INTRODUCTION

This publication contains statistics on the commodities transported between Canadian ports. Data are also given on the number and registered net tonnage of vessel arrivals and departures in coastwise shipping.

Source

Shipping statistics are compiled from reports made by operators or agents of vessels which arrive at and depart from Canadian ports. With the exception of vessels of less than fifteen registered net tons, naval vessels, and fishing vessels, all vessels are required to complete "Shipping reports". At ports where there are customs officers these officials act as agents for the Dominion Bureau of Statistics in collecting the reports and forwarding them to the Bureau. The reports which record the activity at non-customs ports are forwarded through the nearest customs office.

The co-operation of shipping operators, shipping agents, and the Customs and Excise Division of the National Revenue Department in collecting the statistics contained in this publication has continued to be excellent.

Treatment of Data

Only data relating to those vessels which are engaged in port-to-port transportation of goods and/or passengers for compensation have been included. Intra-port movements have been excluded.

A vessel is classed as being in foreign service when (1) it arrives from a foreign port as last port of call, or departs for a foreign port as first port of call; or (2) cargo is loaded for a foreign port, or unloaded from a foreign port; or (3) the registry of the vessel is other-than-Canadian or British Commonwealth (even though the vessel may have arrived at one Canadian port from another, or departed from one Canadian port for another).

A vessel is classed as being in coasting service when (1) it is of Canadian or British Commonwealth registry; and (2) it arrives at one Canadian port from another, or departs from one Canadian port for another; and (3) it unloads no freight from a foreign port, or loads no freight for a foreign port; or (4) it is of foreign registry, but is granted a waiver to engage in coasting service.

A vessel from a foreign port calling at two Canadian ports with foreign freight for the second port will be in foreign and out coasting at the first port and in foreign at the second port. Also, a vessel calling at two Canadian ports on a voyage to a foreign port and having loaded freight at the first port for a foreign port is out foreign at the first port and in coasting and out foreign at the second port. A vessel calling at several Canadian ports with final destination a foreign port is in coasting service into each port. It also is in coasting service out of each port except the last port, unless freight for a foreign port is loaded. Because of the variety that

is possible in vessel movements, the number of arrivals and departures in either international sea-borne shipping or coastwise shipping will not always be the same.

Beginning the count of vessel arrivals and departures on January 1 and ending it on December 31 also causes a disparity in the number of arrivals and departures. Those vessels which arrive in December and depart in January of the next year will be counted only as departures in the statistics of the year in which they depart. Similarly, those vessels which arrive in December and depart in January of the next year will be counted only as arrivals in the statistics of the year in which they arrive.

If a vessel does not unload any freight, or does not load any freight, it is classed as arriving or departing, respectively, "in ballast", regardless of the amount of cargo it might have on board.

Appendix B is a list of the Canadian ports for which shipping data are tabulated separately. This list is derived from the names assigned to the areas of loading or unloading by the respondents. Because of space limitations, data for the complete list of ports is not published in either Part II or Part III of the *Shipping Report*. Those ports for which data are not published separately are designated in the Appendix. Information on these ports can be obtained by forwarding a request to the Chief, Transportation Section, Dominion Bureau of Statistics, Ottawa.

Appendix C is the list of commodities into which all cargoes which are loaded or unloaded at Canadian ports are grouped. This list is based on the *Standard Commodity Classification Manual* published by the Dominion Bureau of Statistics.

Because of space limitations, the description of the commodities which are listed in the tables are often abbreviated or incomplete. Reference to Appendix C, however, will enable users to obtain the complete description.

Also because of space limitations, the headings in the list of commodities have been excluded from the tables. The commodities, however, are listed in the tables in the same order as they appear in Appendix C.

The term "general cargo" which appears in the list of commodities refers to only those commodities which are not identified in the "Shipping Reports" as specific commodities. The term is not intended to indicate the distinction between bulk and other commodities.

The letters "n.e.s." which are found in the commodity listing mean "not elsewhere specified".

It should be noted that, because of corrections made throughout the year, the figures contained in this publication will differ from those released as preliminary data in the monthly *Shipping Report*.

Because of shrinkage and other reasons, loading and unloading figures for a particular commodity do not always agree. For statistical purposes, however, they are required to be the same.

Some ports are heavily engaged in "lightering". In cases where cargo was loaded or unloaded in a port, but in the harbour rather than at a dock or

wharf, the cargo is included with the port totals. Where trans-shipments were made outside a harbour, or at mid-stream, the cargo handled is treated as a loading or unloading at the nearest port. The ports which have lightered commodities included in their totals are: Botwood, Goose Bay, Charlottetown, Bathurst, Campbellton, Chatham, Rimouski, Chicoutimi, Cacouna, Trois-Rivières, Varennes, and Port Stanley.

ANALYSIS OF DATA

During 1964 the total volume of 51,864,783 tons of cargo unloaded in coastwise shipping surpassed the previous all-time high of 46,416,581 tons recorded in 1961. This year's total was 5,745,027 tons or 12.4 per cent, higher than the 1963 figure of 46,119,756 tons.

In 1964 there were significant changes in coastwise shipping activity at several Canadian ports:

Increased tonnages of wheat moving from Port Arthur - Fort William to other ports along the St. Lawrence Seaway contributed to changes at these ports. Port Arthur-Fort William itself loaded 3,107,528 tons more wheat than the 1963 total of 7,260,245 tons, boosting overall loadings to a total of 12,892,869 tons. The total coastwise tonnage handled at the port in 1964 amounted to 13,934,324 tons.

Receipts of this commodity at Baie Comeau increased 100.6 per cent, to 2,039,561 tons from 1,016,968 tons. Montreal unloaded 675,165 tons more wheat during 1964 than in 1963 bringing the total to 3,488,712 tons, while Trois-Rivières unloaded 425,816 tons more for a total of 865,839 tons.

Unlike other ports along the grain routes, lesser quantities of wheat were discharged at Prescott. The 1964 total of 337,725 tons was considerably smaller than the 616,120 tons reported in 1963. Coastwise activity at this port during 1964 amounted to 699,092 tons compared to 1,308,083 tons reported in 1963.

Sorel made an impressive gain in coastwise shipping in 1964 when 2,372,531 tons were handled. This amount was 727,725 tons higher than the previous year's total. Increased unloadings of ilmenite ore from Havre St. Pierre and the general increase in wheat shipments were two of the more important factors in this rise.

The port of Vancouver handled a record 8,466,295 tons in coastwise shipping during 1964. The previous high reported in 1963 was surpassed by 640,354 tons. The two commodities moved in largest volume at this port were pulpwood and sand and gravel.

As a result of increased loadings and unloadings, New Westminster once again registered a record for tonnage handled in coastwise shipping. This year's 2,981,532 tons was 331,640 tons more than the previous twelve-month total. Influencing this trend were increased loadings of wheat for domestic use, increased loadings of pulpwood, and a rise in the amount of sand and gravel shipped.

Canada's premier port, Montreal, experienced another year of heavy shipments, when 9,583,067 tons were handled in 1964. The rise of 418,803 tons from the previous year was accounted for by increases reported in unloadings of wheat, up 675,165 tons, and fuel oil, up 134,815 tons. Partially offsetting these increases was a decline of 263,221 tons in unloadings of bituminous coal. In 1964, 143,686 tons of this commodity was unloaded at Montreal.

Loadings of pulpwood declined in 1964 at several ports. Batiscan, Quebec, ceased movements of this commodity entirely. In the previous year, 212,800 tons were shipped from this port to Trois-Rivières. Humbermouth reported 391,120 tons shipped this year compared with 474,800 tons in 1963. Shipments of pulpwood from Forestville, Quebec, however, rose 67,330 tons, to 898,272 tons.

On the West Coast, Harmac recorded an increase again this year in the tonnage of pulpwood handled. In 1964, 994,017 tons were unloaded compared with 860,810 tons the previous year.

For the third successive year, loadings of bituminous coal at Sydney, Nova Scotia were lower than the preceeding year. During 1964, 1,102,532 tons were loaded at this port for discharge at Montreal and Great Lakes ports.

Significant changes were noted in the amounts of several other commodities transported in coastwise shipping:

The tonnage of fuel oil unloaded during 1964 expanded by 972,542 tons, to a total of 7,499,334 tons. Increases were reported in all three regions.

Gasoline was another petroleum product which was unloaded in greater quantity in 1964. The 2,811,982 tons of this commodity which was unloaded in 1963 expanded to 3,102,183 tons for the twelve-month period in 1964.

Unloadings of logs and round timber rose by 237,747 tons, to 4,254,520 tons. Although the Atlantic and Great Lakes regions reported higher unloadings than in 1963, the Pacific Coast continued to dominate the total, with 4,152,117 tons unloaded.

Significant changes were also noted in the number of vessel arrivals and departures at the following ports:

The port of New Westminster made the most impressive gain of all ports. During 1964 the number of vessel arrivals and departures advanced to 9,274 with registered net tonnage of 3,530,130 tons. The corresponding figures for the previous year were 8,022 and 3,065,267 tons, respectively.

Batiscan, Quebec, recorded the largest decline because of the decreased pulpwood loadings. This year only 24 vessel arrivals and departures were reported, compared to 1,268 during 1963. The registered net tonnage of these vessels decreased accordingly, to 2,880 tons from 243,876 tons.

Another B.C. port which recorded increased vessel activity in coastwise shipping was Duncan Bay. This year's 2,079 vessels, with registered net tonnage of 913,199 tons, was considerably higher than the 1963 figures of 1,201 vessels and 554,193 tons.

Trois-Rivières reports showed fewer vessel arrivals and departures in 1964 than the previous year. The 1963 total of 2,864 vessels of 2,806,436 regis-

tered net tonnage had decreased this year to 2,009 vessels of 2,407,830 tons. A decrease in the number of vessels transporting pulpwood to this port contributed greatly to this decline.

Because of the increased grain trade, Port Arthur-Fort William handled more vessels again this year. In 1964, 2,344 vessels of 10,946,544 registered net tons made use of the port compared with 1,831 vessels of 9,454,702 registered net tons during the previous year.

Vancouver reported 37,578 vessel arrivals and departures of 16,695,068 registered net tons in 1964. These figures were down considerably from the 38,091 vessels of 16,537,321 registered net tons reported in 1963.

Of the total cargo unloaded in coastwise shipping, 47,837,239 tons, or 92.2 per cent, were transported in vessels of Canadian Registry. This compares with 1963 when 41,275,894 tons, or 86.6 per cent, were transported in Canadian vessels. Bahamian-registered vessels transported 461,902 tons in Canada's coastal trade this year, compared to 1,158,828 tons last year.
