INTRODUCTION

This publication presents statistics on the commodity and vessel traffic between Canadian ports.

Source

Shipping statistics are compiled from reports completed by operators or agents of vessels arriving and departing Canadian ports. All vessels are required to submit reports excepting naval or fishing vessels, and craft of less than fifteen registered net tons. Customs officials act as agents for the Dominion Bureau of Statistics in collecting forms at customs ports; returns for non-customs ports are forwarded through the nearest customs office. Operating data are collected for vessels calling at coastal and Great Lakes ports, but regions such as Lake Winnipeg and the MacKenzie River are not included in the survey.

Treatment of Data

Only data relating to those vessels which are engaged in port-to-port transportation of goods and/or passengers for compensation have been included; all intra-port movements have been excluded.

The term "international seaborne shipping" is used for vessels classed as being in foreign service, that is when (1) the vessel arrives from or departs for a foreign port; or (2) cargo is loaded for or unloaded from a foreign port; or (3) the registry of the vessel is other than Canadian or British Commonwealth (even though the vessel may have sailed between two Canadian ports).

A vessel is classed as being in coasting service if (1) it is of Canadian or British Commonwealth registry, sails between two Canadian ports, and loads or unloads no foreign freight; or if (2) it is of foreign registry, but is granted a waiver to engage in coasting service.

A vessel's arrival and departure at ports on a voyage could vary between foreign or coastwise depending on which definition of service is applicable. Because of the variety that is possible in vessel movements, the number of arrivals and departures in either international seaborne or coastwise shipping need not necessarily be the same.

Beginning the count of vessel arrivals and departures on January 1 and ending it on December 31 can cause a disparity in the total number arrived and departed. Vessels entering a port at the end of

a year and clearing it the following January would only be counted as an arrival or departure for that year when the movement occurred.

A vessel is considered arriving or departing "in ballast" if cargo is neither unloaded or loaded at a port, regardless of the amount of in transit cargo that may be on board at the time.

Appendix B lists the Canadian ports for which shipping data are tabulated separately, and is derived from the names assigned to the areas of loading or unloading by the respondents. Because of space limitations, not all ports can be published and must then be grouped; however, information on those identified in the appendix as "Unpublished ports" can be obtained by forwarding a request to the Chief, Transportation Section, Dominion Bureau of Statistics, Ottawa. Appendix C consists of a commodity list, based on the *Standard Commodity Classification Manual* published by the Dominion Bureau of Statistics, into which all cargo types are grouped; reference to this appendix will enable users to obtain a complete description of those commodities which have been necessarily abbreviated in the tables.

The term "general cargo" in this publication refers only to commodities which were not specifically identified in shipping reports; it is not intended to indicate any distinction between bulk and other commodities.

The letters "n.e.s." found in the commodity listing mean "not elsewhere specified".

Because of shrinkage and other reasons, loading and unloading figures for a particular commodity do not always agree; for statistical purposes, however, they are required to be the same.

Some ports frequently engage in "lightering"; in cases where cargo is loaded or unloaded in the harbour rather than at a dock or wharf, the tonnage is included with the port totals. Where trans-shipments are made outside a harbour, or at mid-stream, the cargo handled is treated as a loading or unloading at the nearest port. Ports which have handled lightered commodities include Botwood, Goose Bay, Charlottetown, Bathurst, Campbellton, Chatham, Bic Anchorage, Rimouski, Chicoutimi, Trois-Rivières, Varennes, and Rivière-du-Loup.

It should be noted that due to corrections made throughout the year, statistics contained in this publication may differ from that released as preliminary data in the monthly *Shipping Statistics*.

ANALYSIS OF DATA

During 1966, a total of 60,685,949 tons of cargo were unloaded at Canadian ports in coastwise shipping, which represents an increase of 14.3 per cent over the 53,094,252 tons of domestic traffic in 1965.

With the exception of New Brunswick, the Atlantic Provinces reported gains in freight volume handled during 1966. Newfoundland ports loaded and unloaded 3,549,376 tons compared to 3,287,183 tons in the previous year; Prince Edward Island ports, some 501,144 tons against 412,095 tons in 1965, Nova Scotia ports, 5,648,356 tons in 1966 and 5,376,851 tons in 1965; and New Brunswick ports, 2,105,254 tons and 2,295,011 tons respectively in the two years.

Of the Maritime ports, Halifax continued to lead in terms of volume, loading and discharging 2,333,207 tons during the year; lesser handling of gypsum and fuel oil in domestic shipping resulted in a decline from the 1965 total of 2,603,202 tons. Sydney, meanwhile, advanced to 2,205,180 tons from 1,712,761 tons handled in 1965 with appreciably greater bituminous coal and iron ore traffic. Coastwise shipping at Saint John declined to 1,462,365 tons in 1966 from 1,597,706 tons, corresponding to a dip in the major commodities fuel oil and gasoline; however, other cargo handled gained approximately ten per cent over the previous year. At St. John's, Newfoundland, 592,137 tons were received or shipped in 1966 and 521,987 tons in 1965; about two-thirds of the annual total consist of fuel oil and gasoline.

Bell Island shipped more iron ore in 1966 which inflated its total to 509,605 tons from only 204,153 tons in the preceding year; mining operations ceased during 1966, but shipments would continue from existing stock-piles. Cargoes handled at Corner Brook contracted slightly to 458,563 tons from 476,129 tons due to a drop in pulpwood unloadings. Of the other more significant Atlantic ports, Charlottetown increased its freight volume to 441,141 tons from 367,645 tons; North Sydney to 434,562 tons from 394,967 tons, a gain partially experienced by its sister port, Port-aux-Basques, on many regular shipping runs; and Holyrood to 283,505 tons from 231,336 tons in 1965.

Quebec ports received and shipped 28,955,412 tons of goods during 1966, up 13.0 per cent over the 25,625,609 tons recorded for coastal shipping in 1965. Greater wheat sales and consequently movements assisted considerably in bettering cargo levels at several ports along the St. Lawrence River. At Baie Comeau, freight volume advanced to 2,669,298 tons from 2,395,274 tons in 1965 due to wheat and pulpwood. Montreal handled 10,812,711 tons compared to 9,325,333 tons in 1965, with wheat increasing by over one million tons to 4,215,098 tons; heavier gasoline and fuel oil traffic collectively totalling more than three and a half million tons, aided as well in this expansion.

Cargo into and from Quebec City moved upwards to 3,561,298 tons during the year from 3,202,262 tons in 1965. Grains swelled the total by rising about forty per cent to almost 1.2 million tons, while gasoline and fuel oil (total of 1,150,125 tons) increased by about ten per cent; pulpwood was only slightly lower at 929,112 tons. Sept-Îles and Pointe Noire handled 2,438,644 tons, over one million tons above 1965 due to domestic iron ore movements. For the harbour of Sorel, some 2,566,569 tons were reported, only thirty-three thousand tons over 1965; wheat rose to 1,462,870 tons from 879,081 tons while titanium ore dropped to 999,579 tons from 1,425,015 tons in the previous year, reflecting, in large part, a strike affecting mining operations at Havre St-Pierre. Trois-Rivières loaded and unloaded 1,735,162 tons, or 276,008 tons more than 1965 with greater wheat, pulpwood and fuel oil movements. Increases in bituminous coal and pulpwood unloadings at Port Alfred resulted in an expansion to 654,184 tons from 467,513 tons in 1965.

Ports in Ontario handled 38,610,221 tons of cargo during the year, some 4,831,470 tons or 14.3 per cent more than 1965. Port Arthur—Fort William contributed a substantial share of this increase, by loading and discharging some 2,725,882 tons more than the previous year for a total of 15,657,587 tons. The major gain was wheat moving eastwards, which rose to 11,705,402 tons in 1966 from 9,064,874 tons; barley loadings dropped slightly to 867,864 tons, while iron ore declined by about nine per cent to 654,841 tons. At Hamilton, iron ore unloadings, at 2,012,221 tons, rose by almost one million tons, which caused the port total to move up to 3,207,101 tons from 2,246,919 tons in 1965; fuel oil movements increased by 91,688 tons to 498,287 tons during the year.

The volume of cargo handled at Sarnia rose by about three per cent to 2,873,180 tons with the growth of fuel oil traffic which made up over one-half of the port total. Across Toronto's waterfront, freight volume bettered that of 1965 by more than one-quarter, rising to 2,211,950 tons with sizeable gains in coal, fuel oil, cement and wheat. Clarkson received and shipped 335,936 tons more during 1966 for a total of 2,082,501, of which more than one-half was limestone; the gains were realized through heavier fuel oil and gasoline traffic. With more salt, gasoline and fuel oil originating at or destined for Windsor, the port total, at 1,107,178 tons exceeded that of 1965 by 311,772 tons.

Sault Ste. Marie reported a decline to 1,200,142 tons from 1,468,536 tons in 1965 with lower iron ore and fuel oil activity. Among other Ontario ports, Port Colborne handled 1,525,495 tons, up from the 1965 total of 1,241,210 tons because of wheat; limestone at Colborne rose to 1,161,741 tons from 1,079,950 tons in the previous year; Goderich

recorded 825,244 tons in 1966 and 761,385 tons in 1965; and at Port Credit, the cargo volume increased to 669,336 tons from 454,541 tons in 1965 because of bituminous coal unloadings.

Pacific ports handled 42,020,991 tons compared to 35,401,948 tons in the previous year; contributing appreciably to this increase were logs, for which 1966 coverage included sorting areas between the origin and final destination of this commodity. At Vancouver, 9,384,257 tons were loaded and discharged in 1966, representing an increase of 239,966 tons from the preceding year. Of the commodities handled at the port, fuel oil rose to 1,007,140 tons from 845,181 tons, and larger gains were reported for pulpwood and logs; quantities of newsprint, lumber and timber, as well as sand and gravel contracted from 1965.

New Westminster received or shipped 328,789 tons more than 1965 for a total of 3,972,018 tons; pulpwood and logs account for over one-half of this volume. Wheat and cement rose during 1966, together aggregating almost five hundred thousand tons, while sand and gravel dropped slightly to 765,292 tons. Britannia Beach lifted its annual total to 1,895,856 tons from 1,519,708 tons in 1965 with more pulpwood, sand and gravel, while Duncan Bay moved to 1,873,880 tons in 1966 from 1,807,237 tons in the previous year.

More inbound sulphur at Powell River helped to offset declines in pulpwood and newsprint, and further to boost the port total to 1,350,454 tons from

1,268,380 tons in 1965. At Victoria, freight volume remained practically unchanged at 1,257,133 tons, of which approximately two-thirds consist of wheat, fuel oil and pulpwood in that order. Greater log and pulpwood traffic was reported for several other west coast ports, among which are Nanaimo, Port Alberni and Port Mellon.

Wheat occupied first place among commodities in terms of volume, and consequently shipping requirements, some 12,730,806 tons being unloaded in coastwise traffic. Fuel oil, pulpwood and logs were unloaded in the region of eight million tons each, and were followed by gasoline and iron ore, both at approximately 3.5 million tons. Several commodities were discharged between one and two million tons, and included here were sand and gravel, limestone, bituminous coal, hogged fuel and cement.

Vessel arrivals and departures in coastwise shipping numbered 204,435, up from the 1965 total of 197,059; of the cargo unloaded from these craft, 58,950,883 tons or 97.1 per cent were carried aboard those of Canadian registry, compared to 49,087,504 tons or 92.5 per cent in 1965.

The first part of the report deals with the general situation of the country and the progress of the work during the year. It is followed by a detailed account of the various projects and the results achieved. The report concludes with a summary of the work done and the plans for the future.

CONCLUSION

The work done during the year has been very satisfactory and it is hoped that the results will be of great value to the country.
