# SHIPPING REPORT

1961

## PART IV

### Origin and Destination for Selected Ports

The annual "Shipping Report" which up to 1960 consisted of three separate parts, provides details of cargoes loaded and unloaded at Canadian ports, vessel movements and port activity. Parts I and II cover the operations of vessels engaged in international seaborne shipping whereas Part III presents corresponding information on vessels employed in coastwise and inland service.

Although there is a considerable amount of detail available in these publications, it is not possible to obtain both origin and destination of freight moved by water. Where the port of origin of specific commodities is shown, the destination is available only on a broad geographical basis, and where the port of destination is shown, the origin is available only on a broad geographical basis. For some years, however, the ports of origin and destination have been coded and special tabulations have been made available on request.

Over the past few years, it has become evident that there is widespread and a continually growing interest in origin and destination data. It was therefore decided to publish some of the information in this new Part (No. IV) of the Shipping Report.

Before this could be done, however, there were a number of problems and other considerations which had to be overcome. It will be realized that a publication containing the origin and destination of all cargoes loaded and unloaded at all Canadian ports would consist of many hundreds of pages and be a costly and time consuming task to produce. It was therefore necessary to be selective as to the kind and amount of information to include and to decide the form of presentation. At the same time it was necessary to produce the information which would be of most value to users consistent with the cost involved and availability of staff and machine resources.

Another consideration was that a publication containing all data would, in total, probably be of limited value. Most users are interested in or need this type of information for specific ports or ports in a particular geographic area such as a province, the Lower St. Lawrence River region, the St. Lawrence Seaway, etc.

After careful consideration of all these factors, it has been decided to produce in this new section of the "Shipping Report" the origin and destination of all cargoes loaded and unloaded at eight of the

major Canadian ports. Both foreign and coastwise loadings and unloadings are included. Although these eight ports are not necessarily the eight largest in terms of total volume of cargo handled, they have been selected as being representative of Canada as a whole and because they are major distribution centres for a wide variety of commodities.

**Similar data have been tabulated for the following seventeen other important ports and can be made available on request:** Bell Island and Cornerbrook, Nfld.; Hantsport and Sydney, N.S.; Baie Comeau, Port Alfred, Sept Iles, Sorel and Trois Rivieres, P.Q.; Clarkson, Port Colborne, Prescott, Sarnia and Sault Ste. Marie, Ont.; and, New Westminster, Powell River and Victoria, B.C.

Corresponding information for all other Canadian ports is coded and can be made available on request by special tabulations of the cards. When requests require special runs of the I.B.M. cards, it is customary to charge for the machine and labour time, at cost. Such requests should be forwarded to the Chief, Transportation Section, Dominion Bureau of Statistics, Ottawa.

It will be noticed that in some instances, the tonnage of goods reported by the port of loading does not correspond exactly with the tonnage reported at the unloading port. This is due mainly to changes en route, not later reported, and to some extent inaccuracies in reporting. These inconsistencies however are considered to be of minor significance and are expected to diminish as tracing procedures, which are continually under review, are improved.

It should also be realized that the terms "origin" and "destination", as used in this report, refer only to the ports of loading and unloading. In many instances, the cargoes are transported further either by other modes of transport or re-loaded aboard another vessel for shipment to final destination.

In 1961 the eight ports selected handled almost 46 per cent of Canada's foreign shipping and 40 per cent of all coastwise traffic. Out of a total of 53.8 million tons of freight loaded for foreign countries, some 20 million tons or 37.2 per cent was loaded at these eight ports while 22.5 million tons or 57.3 per cent of the total import tonnage of 39.2 million entered Canada through these ports. In coastwise traffic, they handled 43.1 per cent of the loadings and 36.5 per cent of the unloadings.

The details are summarized in Tables 19-22 in order to show the relative importance of the eight selected ports in the overall picture for Canada. Table 19 shows the tonnage of cargo loaded for foreign countries by area of destination while table 20 shows the origin of cargo unloaded from foreign countries. Similar information regarding coastwise shipping is presented in tables 21 and 22. Here the destination or origin of cargo is summarized by

province. Tables 23 and 24 provide details of all cargo unloaded and loaded at the selected ports, by commodity and by origin and destination, in both international and coastwise shipping.

The following table shows the percentage of the total Canadian waterborne commerce with foreign countries loaded and unloaded at the eight selected ports.

Country of destination or origin	Per cent of total	
	Loaded at selected ports	Unloaded at selected ports
United Kingdom .....	37.0	85.1
Other Europe .....	39.5	88.4
Middle East .....	64.7	99.3
Other Africa .....	51.3	46.0
Other Asia .....	63.5	97.9
Oceania .....	32.6	88.9
South America .....	64.9	76.5
Central America and Antilles .....	59.7	42.9
United States .....	24.9	44.3
Other North America .....	67.8	15.6
<b>Total</b> .....	<b>37.2</b>	<b>57.3</b>

It will be noted that these ports handled a relatively low percentage of shipments destined to the United Kingdom and to the United States. Much of the traffic between Canada and these two countries however consists of iron ore from Sept Iles and Bell Island and these, being virtually one-commodity ports, are not included in this study. Excluding commerce with the United States, the selected ports handled some 57 per cent of Canada's overseas shipping.

In coastwise shipping, 48 per cent of the 5.5 million tons of cargoes unloaded at ports in the Atlantic provinces originated at the eight selected

ports; 45 per cent of the 15.3 million tons unloaded in the province of Quebec; and 53 per cent of the 13.9 million tons unloaded in Ontario.

The corresponding percentage of the total loadings at the Atlantic provinces, Quebec and Ontario for the eight selected ports was in each instance approximately 40 per cent. Montreal alone received 24 per cent of all the cargo loaded at ports in the Atlantic provinces. In British Columbia almost 100 per cent of the cargo loaded in coastwise traffic was as expected, unloaded in that province. The port of Vancouver handled 26 per cent of the loadings and 30 per cent of the unloadings.

December 14, 1962.
