ERRATA

Subsequent to the publication of this part of the Shipping Report, it was discovered that some of the I.B.M. cards containing data on pulpwood movements had been excluded from the tabulations. The following revisions, therefore, will have to be made:

Page 362 - Statistical Highlights:

Total unloadings in coastwise shipping at the eight ports - change 15,252,545 to 16,000,530.

Total unloadings from Quebec ports at the eight ports - change 2,126,550 to 2,874,535.

Page 362 - Analysis of Data:

In the opening paragraph change 41.1 per cent to 40.7 per cent, and 10.7 per cent to 11.8 per cent.

Page 363 - Coastwise Shipping:

In the first paragraph change 8.4 per cent to 10.6 per cent, and 2.4 per cent to 7.5 per cent.

Page 363 - In place of the last paragraph commencing "Quebec recorded a decrease...", the following should be substituted:

Quebec recorded an increase of 13.8 per cent in coastwise unloadings compared to 1962. Hamilton and Toronto reported decreases of 3.4 per cent and 6.9 per cent, respectively.

INTRODUCTION

This part of the annual "Shipping Report" provides information on the origin and destination of all cargoes loaded and unloaded at eight major Canadian ports. Statistics on both foreign and coast-wise water transportation to and from these ports are included. Although the eight ports are not necessarily the eight largest in terms of total volume of cargo handled, they were selected because they are major distribution centres for a wide variety of commodities.

Similar data, which are available on request, have been tabulated for the following additional seventeen ports: Bell Island and Corner Brook, Nfld.; Hantsport, and Sydney, N.S.; Baie Comeau, Port Alfred, Sept Iles, Sorel, and Trois Rivieres, P.Q.; Clarkson, Port Colborne, Prescott, Sarnia, and Sault Ste. Marie, Ont.; New Westminster, Powell River and Victoria, B.C. Corresponding information for all other Canadian ports can be tabulated upon request. Such requests should be forwarded to the Chief, Transportation Section, Dominion Bureau of Statistics, Ottawa. When these requests require a special tabulation, it is customary to charge for the machine and labour time, at cost.

Source

Shipping statistics are compiled from reports made by operators or agents of vessels which arrive at, and depart from, Canadian ports. With the exception of vessels of less than fifteen registered net tons, naval vessels, and fishing vessels, all vessels are required to complete "Shipping Reports". At ports where there are customs officers these officials act as agents for the Dominion Bureau of Statistics in collecting the reports and forwarding them to the Bureau. The reports which record the activity at non-customs ports are forwarded through the nearest customs office.

The co-operation of shipping operators, shipping agents, and the Customs and Excise Division of the National Revenue Department in collecting the statistics contained in this publication has continued to be excellent.

Treatment of Data

A vessel is classed as being in foreign service when (1) it arrives from a foreign port as last port of call, or departs for a foreign port as first port of call; or (2) cargo is loaded for a foreign port, or unloaded from a foreign port; or (3) the registry of the vessel is other-than-Canadian or-British Commonwealth (even though the vessel may have arrived at one Canadian port from another, or departed from one Canadian port for another).

A vessel is classed as being in coasting service when (1) it is of Canadian or British Commonwealth registry; and (2) it arrives at one Canadian port from another, or departs from one Canadian port for another; and (3) it unloads no freight from a foreign

port, or loads no freight for a foreign port; or (4) it is of foreign registry, but is granted a waiver to engage in coasting service.

A vessel from a foreign port calling at two Canadian ports with foreign freight for the second port will be in foreign and out coasting at the first port and in foreign at the second port. Also, a vessel calling at two Canadian ports on a voyage to a foreign port and having loaded freight at the first port for a foreign port is out foreign at the first port and in coasting and out foreign at the second port. A vessel calling at several Canadian ports with final destination a foreign port is in coasting service into each port. It also is in coasting service out of each port except the last port, unless freight for a foreign port is loaded.

"Origin" and "destination", as used in this publication, refer only to the ports of loading and unloading.

In some instances the tonnage of goods reported at port of loading does not correspond exactly with the tonnage reported at the unloading port. This is due mainly to changes en route which were not reported, and to inaccuracies in reporting. These inconsistencies, which are of minor significance, are expected to diminish as tracing procedures are improved.

Appendix A is a list of the countries and geographic areas of origin or destination of the commodities which are loaded and unloaded at Canadian ports in international shipping. These countries have been divided into Commonwealth countries and other countries.

Appendix B is the list of commodities into which all cargoes which are loaded or unloaded at Canadian ports are grouped. This list is based on the Standard Commodity Classification Manual published by the Dominion Bureau of Statistics.

Because of space limitations, the description of the commodities which are listed in the tables are often abbreviated or incomplete. Reference to Appendix B, however, will enable users to obtain the complete description.

Also because of space limitations, the headings in the list of commodities have been excluded from the tables. The commodities, however, are listed in the tables in the same order as they appear in Appendix B.

The term "general cargo" which appears in the list of commodities refers to only those commodities which are not identified in the "Shipping Reports" as specific commodities. The term is not intended to indicate the distinction between bulk and other commodities.

The letters "n.e.s." which are found in the commodity listing mean "not elsewhere specified".

Statistical Highlights

The items in the following table provide a statistical picture of the highlights of origin and destination data for the eight selected ports:

Total loadings for Other Europe countries at the eight ports	5,622,846
Total loadings for the United Kingdom at the eight ports	3,538,946
Total unloadings from U.S. Great Lakes ports at the eight ports	12,858,089
Total unloadings from South American ports at the eight ports	4,811,470
Total loadings for Quebec ports at the eight ports	8,469,974
Total loadings for Ontario ports at the eight ports	6,219,609
Total loadings for British Columbia ports at the eight ports	4,060,477
Total unloadings from Ontario ports at the eight ports	7,113,038
Total unloadings from British Columbia ports at the eight ports	3,776,318
Total unloadings from Quebec ports at the eight ports	2,126,550

ANALYSIS OF DATA

In 1963 eight Canadian ports accounted for 41.1 per cent of all coastal shipping and 43.7 per cent of all foreign shipping which represented an overall increase of 10.7 per cent over shipments through these ports in 1962. The ports are; Halifax, Saint John, Quebec, Montreal, Toronto, Hamilton, Port Arthur-Fort William and Vancouver.

Loadings for Abroad

Cargoes loaded for foreign countries through the eight ports increased 19.7 per cent over the previous year. This increase may be attributed in part to large movements of wheat to the U.S.S.R.

Vancouver held the lead in tonnage loaded at the eight ports for shipment abroad. Tonnage loaded in 1963 amounted to 8,850,039 tons, an increase of 22.2 per cent over 1962. Over 55 per cent (4.9 million tons) of the tonnage was shipped to Asiatic ports while 11.4 per cent (1 million tons) was shipped to U.S. Pacific ports. In 1963, Montreal loaded the second largest tonnage (4,865,808 tons) which was 43.0 per cent greater than 1962. Over 26 per cent went to the United Kingdom and over 56 per cent went to other European countries of which the U.S.S.R. and the Netherlands received the largest portions.

Port Arthur-Fort William reported the shipment of over 3 million tons to U.S. Great Lakes ports. Halifax reported approximately 1.5 million tons loaded for U.S. Atlantic and Gulf ports. The remaining four selected ports reported their greatest tonnages shipped to the United Kingdom and Europe.

Other selected Canadian ports showing increased loadings for shipment abroad in 1963 over 1962 were: Quebec City 43.3 per cent; Saint John, 31.9 per cent; Toronto 22.0 per cent and Port Arthur-Fort William 2.4 per cent. Hamilton had a decrease of 11.2 per cent and Halifax reported a decrease of 5.3 per cent.

Unloadings from Abroad

Cargoes from abroad unloaded at the eight selected Canadian ports increased 7.1 per cent over the previous year. This increase may be attributed in part to an increase of over 22 per cent in unloadings of bituminous coal.

Hamilton reported the greatest tonnage unloaded from abroad; 7,665,320 tons, an increase of over 10 per cent from 1962. Ninety seven per cent of the tonnage was received from U.S. Great Lakes ports.

Montreal reported the second largest tonnage unloaded from abroad; 6,695,660 tons, a decrease of over 10 per cent from 1962. Imports from the Middle East, from South America, from Great Lakes ports and from Central America and Antillies accounted for over 77 per cent of the total; over a million tons being received from each of these sources.

Other selected Canadian ports showing increased tonnages unloaded from abroad in 1963 over 1962 were: Quebec City, 51.2 per cent; Toronto, 36.4 per cent; Saint John, 11.9 per cent; Vancouver, 4.6 per cent and Halifax, 4.4 per cent. Port Arthur-Fort William unloaded approximately the same tonnage in 1963 as in 1962.

The chief source of imports into Halifax is South America (over 3 million tons; oil being a significant factor) the chief source of imports through Saint John, is from the Middle East (1.9 million tons); and, the chief source of imports through Toronto is U.S. Great Lakes ports (3.2 million tons).

Coastwise Shipping

Cargoes handled in coastwise shipping through the eight selected ports showed an increase of 8.4 per cent over the previous year. Cargo loadings increased 13.1 per cent while unloadings increased 2.4 per cent at these ports during 1963.

Loadings

Port Arthur-Fort William recorded the largest tonnage loaded with 9,669,899 tons, an increase of 34.8 per cent over 1962, (chiefly wheat for trans-shipment). The Province of Quebec was the destination of over half of the loadings at the Lakehead. Ontario was the destination of almost the entire balance.

The port of Montreal was second in tonnage loaded, (4,181,062 tons); 4.9 per cent lower than 1962. Destination of 46.8 per cent of this amount was in the Province of Quebec (nearly half for Quebec City), with 40.5 per cent going to Ontario. Toronto absorbed slightly under one quarter. The Atlantic Provinces received the balance.

Vancouver loaded over 4 million tons of coastwise cargo, all of which was destined for British Columbia ports.

Coastal cargo originating at selected ports in the Atlantic Provinces amounted to 2,628,333 tons. Approximately three quarters (73.1 per cent) was unloaded within the area and the remainder in the Province of Quebec.

Hamilton showed an increase in coastwise loadings of 15.3 per cent over 1962. Quebec and Toronto, on the other hand, reported a decline of 13.2 and 24.4 per cent respectively.

Unloadings

Montreal unloaded the largest tonnage in coastwise shipping for the eight selected ports, with Vancouver placing second in volume. These ports recorded an increase of 10.6 and 5.6 per cent respectively over 1962. The two ports accounted for 57.4 per cent of all cargo unloaded at the eight selected ports.

Unloadings at Port Arthur-Fort William increased 22.8 per cent over 1962. Halifax reported an increase of 9.1 per cent and Saint John 4.5 per cent.

Quebec recorded a decrease of 14.3 per cent in coastwise loadings from 1962. Hamilton and Toronto also reported decreases of 3.4 per cent and 6.9 per cent respectively.

October 15, 1964.
