## INTRODUCTION

This part of the annual *Shipping Report* provides information on the origin and destination of all cargoes loaded and unloaded at eight major Canadian ports. Statistics on both foreign and coastwise water transportation to and from these ports are included. Although the eight ports are not necessarily the eight largest in terms of total volume of cargo handled, they were selected because they are major distribution centres for a wide variety of commodities.

Similar data, which are available on request, have been tabulated for the following additional seventeen ports: Bell Island and Corner Brook, Nfld.; Hantsport and Sydney, N.S.; Baie Comeau, Port Alfred, Port Cartier, Sept Îles, Sorel and Trois Rivières, P.Q.; Port Colborne, Sarnia, Sault Ste. Marie and Windsor, Ont.; New Westminster, Powell River and Victoria, B.C. In terms of total volume handled annually, these ports, together with the eight ports for which data are contained in this publication, comprise the twenty-five largest ports in Canada. Corresponding information for all other Canadian ports can be tabulated upon request. Such requests should be forwarded to the Chief, Transportation Section, Dominion Bureau of Statistics, Ottawa. When these requests require a special tabulation, it is customary to charge for the machine and labour time, at cost.

It should be noted that Port Cartier and Windsor have been added to the list of largest ports, while Clarkson and Prescott have been dropped.

### Source

Only data relating to those vessels which are engaged in port-to-port transportation of goods and/or passengers for compensation have been included. Intra-port movements have been excluded.

Shipping operating statistics are compiled from reports made by operators or agents of vessels which arrive at, and depart from, Canadian ports. With the exception of vessels of less than fifteen registered net tons, naval vessels, and fishing vessels, all vessels are required to complete "Shipping Reports". At ports where there are customs officers these officials act as agents for the Dominion Bureau of Statistics in collecting the reports and forwarding them to the Bureau. The reports which record the activity at non-customs ports are forwarded through the nearest customs office.

The co-operation of shipping operators and agents in completing "Shipping Reports", and the Customs and Excise Division of the National Revenue Department in collecting these reports, has continued to be excellent.

### Treatment of Data

A vessel is classed as being in foreign service when (1) it arrives from a foreign port as last port of call, or departs for a foreign port as first port of call; or (2) cargo is loaded for a foreign port, or unloaded from a foreign port; or (3) the registry of the vessel is other-than-Canadian or British Commonwealth (even though the vessel may have arrived at one Canadian port from another, or departed from one Canadian port for another).

A vessel is classed as being in coasting service when (1) it is of Canadian or British Commonwealth registry; and (2) it arrives at one Canadian port from another, or departs from one Canadian port for another; and (3) it unloads no freight from a foreign port, or loads no freight for a foreign port; or (4) it is of foreign registry, but is granted a waiver to engage in coasting service.

A vessel from a foreign port calling at two Canadian ports with foreign freight for the second port will be in foreign and out coasting at the first port and in foreign at the second port. Also, a vessel calling at two Canadian ports on a voyage to a foreign port and having loaded freight at the first port for a foreign port is out foreign at the first port and in coasting and out foreign at the second port. A vessel calling at several Canadian ports with final destination a foreign port is in coasting service into each port. It also is in coasting service out of each port except the last port, unless freight for a foreign port is loaded.

"Origin" and "destination", as used in this publication, refer only to the ports of loading and unloading. To facilitate the proper interpretation of the data contained in the two large tables, the following should be noted: the last two columns of Table 23 and Table 24 show the tonnage of cargo loaded or unloaded at the ports listed in the first column. The second column should be read as the ORIGIN of the tonnage shown in the fifth column, and as the DESTINATION of the tonnage shown in the fourth column.

Appendix A is a list of the countries and geographic areas of origin or destination of the commodities which are loaded and unloaded at Canadian ports in international shipping. These countries have been divided into Commonwealth countries and other countries. To provide more information, data for thirty-eight ports or areas in the United States have been presented separately this year. In former years these ports were combined into "U.S. Pacific, Great Lakes, and Atlantic and Gulf Ports".

Appendix B is the list of commodities into which all cargoes loaded or unloaded at Canadian ports are grouped. This list is based on the *Standard Commodity Classification Manual* published by the Dominion Bureau of Statistics.

Because of space limitations, the description of the commodities which are listed in the tables are often abbreviated or incomplete. Reference to Appendix B, however, will enable users to obtain the complete description.

Also because of space limitations, the headings in the list of commodities have been excluded from the tables. The commodities, however, are listed in the tables in the same order as they appear in Appendix B.

The term "general cargo" which appears in the list of commodities refers to only those commodities which are not identified in the "Shipping Reports" as specific commodities. The term is not intended to indicate the distinction between bulk and other commodities.

The letters "n.e.s." which are found in the commodity listing mean "not elsewhere specified".

## ANALYSIS OF DATA

In descending order of size, the following tonnages were handled at the eight ports in 1964: Montreal, 21,562,943 tons (20,725,732 tons in 1963); Vancouver, 20,055,635 tons (17,852,181 tons); Port Arthur-Fort William, 18,398,270 tons (14,629,147 tons); Hamilton, 9,392,558 tons (8,935,303 tons); Halifax, 9,175,845 tons (8,188,491 tons); Saint John, 5,833,131 tons (5,254,547 tons); Toronto, 5,713,090 tons (6,166,666 tons); and Quebec, 5,088,295 tons (5,720,111 tons).

**Loadings for Foreign Countries**

Cargoes loaded for foreign countries at the eight ports in 1964 rose 14.6 per cent, to 26,647,794 tons from 23,245,640 tons reported in the previous year. An expansion in Canada's international wheat sales to Communist countries was an important factor in this increase.

Vancouver maintained its premier position again in 1964 when 10,211,954 tons were loaded for foreign countries. This represented an increase of 15.4 per cent from the 1963 total of 8,850,039 tons. Asian countries absorbed 5,965,648 tons, or 58.4 per cent of the total, while 741,986 tons were shipped to U.S. Pacific ports.

Montreal continued to expand in 1964, when 5,548,039 tons were shipped to foreign countries, for an increase of 14.0 per cent over the 1963 total of 4,865,808 tons. The United Kingdom was the main overseas destination of Montreal loadings, receiving 1,692,974 tons, or 30.5 per cent of the total. As a result of the wheat sales previously mentioned, U.S.S.R. European ports were the destination of 838,614 tons of cargo, while 465,709 tons were unloaded in the Netherlands.

The Lakehead ports of Port Arthur-Fort William remained in third place again this year when 4,284,236 tons were loaded for foreign countries, or an increase of 14.9 per cent from the 1963 total of 3,728,662 tons. Shipments to U.S. Great Lakes ports amounted to 3,709,977 tons, or 86.6 per cent of the total, with iron ore shipments of 1,730,491 tons to Indiana Harbour comprising the most significant movement.

Other selected ports reporting increased loadings in international seaborne shipping were: Quebec, up 25.0 per cent, to 1,688,533 tons from 1,350,742 tons; Halifax, up 17.3 per cent, to 2,828,558 tons from 2,410,746 tons; and Toronto, up 15.7 per cent, or 421,259 tons from 364,012 tons.

**Unloadings from Foreign Countries**

Despite an increase in the total at all ports, cargoes unloaded from foreign countries at the eight selected ports declined 1.5 per cent, to 26,436,021 tons from 26,831,418 tons in 1963.

Hamilton unloaded the largest tonnage in international seaborne shipping—7,775,530 tons, which was 1.4 per cent greater than the 7,665,320 tons reported during the previous year. Of the total, 97.1 per cent originated at U.S. Great Lakes ports.

Iron ore from Lake Superior ports, totalling 3,023,012 tons, and bituminous coal shipments of 2,458,163 tons from Ashtabula, Ohio, were the two most important movements recorded.

Montreal was again in second place, with reported unloadings of 6,431,837 tons, or a decrease of 4.0 per cent from the 6,695,660 tons discharged in 1963. Unloadings of crude petroleum, fuel oil, and other commodities from Venezuela totalled 1,469,956 tons, which strengthened its position as the main overseas source of Montreal imports. In the Great Lakes area, Chicago, because of its large corn shipments, of 278,517 tons, remained the most important United States port of origin.

Unloadings at the port of Halifax increased 10.3 per cent, to 3,799,631 tons from 3,446,179 tons. Shipments of crude petroleum from Venezuela, which amounted to 3,025,124 tons, and unloadings of 203,048 tons of fuel oil from the Netherlands Antilles, made the greatest contributions to this port's total.

Saint John and Vancouver also reported increased foreign unloadings during 1964. The former rose 10.2 per cent, to 2,742,620 tons from 2,488,324 tons, and the latter, 17.1 per cent, to 1,377,386 tons from 1,176,381 tons. The major overseas source of tonnage unloaded at Saint John was Lebanon, which shipped 595,708 tons of crude petroleum, while Vancouver received the bulk of its cargo from U.S. Pacific Coast ports and Japan.

The three remaining ports recorded sizeable decreases in 1964: Toronto decreased 13.3 per cent, to 3,288,720 tons from 3,793,231 tons; Quebec dropped 27.4 per cent, to 840,587 tons from 1,157,565 tons; and Port Arthur-Fort William shrank by 56.0 per cent, to 179,710 tons from 408,758 tons. The majority of Toronto unloadings originated at U.S. Great Lakes Ports, while Quebec received major shipments of fuel oil from the Netherlands Antilles and Venezuela. Port Arthur-Fort William had Toledo, Ohio as its largest single source of cargo.

**Coastwise Loadings**

Cargoes loaded at the eight selected ports during 1964 increased 20.7 per cent, to 25,827,119 tons from 21,394,590 tons in the previous year, primarily because of increased wheat shipments.

Port Arthur-Fort William handled the greatest portion of loadings for domestic ports. This year, 12,892,869 tons of cargo were loaded, for a large increase of 33.3 per cent over the 9,669,899 tons reported in 1963. Ontario and Quebec ports absorbed 12,658,654 tons, or 98.2 per cent of the port total, with Montreal receiving 3,505,786 tons. Baie Comeau was the port of destination of 1,874,640 tons.

The next most sizeable port of loading in 1964 was Montreal, which increased its total by 1.6 per cent, to 4,250,002 tons. Shipments to other

ports within Quebec amounted to 2,198,378 tons, while Ontario received 1,604,432 tons. Movements of gasoline and fuel oil to Quebec City made this port Montreal's largest port of destination. Hamilton and Toronto were the largest Ontario ports in terms of receipts from Montreal, unloading 349,502 tons, and 295,692 tons, respectively.

Vancouver increased its loadings in 1964 to 4,558,037 tons, which was an increase of 12.3 per cent from the 4,059,755 tons recorded in the previous year. Because of its geographical location, all of this port's shipments were made within the province of British Columbia. Harmac was the main destination, unloading 761,591 tons, most of which was pulpwood. In descending order of size, the following ports were the next most important areas of destination: Duncan Bay, 588,876 tons; Port Mellon, 559,864 tons; Britannia Beach, 471,588 tons; and Victoria, 455,337 tons.

Halifax and Saint John each reported significant increases in coastwise cargo loaded in 1964. The former rose 15.5 per cent, to 2,061,310 tons from 1,784,725 tons, and the latter, 36.1 per cent, to 1,148,423 tons from 843,608 tons. New Brunswick ports unloaded 606,995 tons of cargo loaded at Halifax, while the province of Quebec was the main area of destination for shipments from Saint John.

Two of the three remaining ports reported increased loadings this year. Hamilton expanded 31.0 per cent, to 498,197 tons from 380,298 tons, and Quebec rose 6.6 per cent, to 187,221 tons from 175,558 tons. The only port reporting decreased loadings was Toronto, which was down 22.9 per cent, to 231,060 tons from 299,685 tons.

**Coastwise Unloadings**

The eight selected ports unloaded 17,308,833 tons in 1964, an increase of 8.2 per cent from the 16,000,530 tons recorded in 1963.

Montreal was again the most important port of discharge in coastwise shipping. Unloadings of

5,333,065 tons were 7.0 per cent greater than the 4,983,202 tons recorded last year. Cargo originating at Ontario ports accounted for 4,723,892 tons, or 88.6 per cent of the total, while Nova Scotian ports delivered 460,066 tons, or 8.6 per cent.

Ranking second to Montreal in coastwise unloadings was the port of Vancouver. During 1964 this port unloaded 3,908,258 tons, for an increase of 3.8 per cent from the previous year's total of 3,766,006 tons. All coastwise cargo terminating at Vancouver originated within the province of British Columbia. Shipments from Britannia Beach, of 814,410 tons, and New Westminster, of 719,063 tons, constituted 39.2 per cent of the total cargo discharged, with sand and gravel the most significant commodity moved from these ports.

The port of Quebec increased its portion of coastwise unloadings to 3,371,954 tons, up 11.1 per cent from the 3,036,246 tons recorded in 1963. Internal movements of cargo within the province expanded to 1,944,393 tons from 1,828,651 tons, while Ontario shipments to the port of Quebec totalled 991,080 tons, compared to the 1963 total of 707,222 tons. Montreal shipped 949,755 tons, and Port Arthur-Fort William, 928,763 tons, to be the largest ports of origin for Quebec unloadings.

All of the remaining selected ports, with the exception of Halifax, reported increased unloadings during 1964. The ports, with their respective totals, follow in descending order of size: Toronto, 1,772,051 tons (1,709,738 tons in 1963); Port Arthur-Fort William, 1,041,455 tons (821,828 tons); Hamilton, 917,558 tons (681,265 tons); and Saint John, 478,146 tons (455,404 tons). Halifax was down in 1964 to 486,346 tons from 546,841 tons, primarily because of decreased unloadings from New Brunswick and Quebec.
