INTRODUCTION

This publication presents statistics on the origin and destination of both foreign and coastwise cargoes loaded and discharged at eight major Canadian ports. While not necessarily the eight largest in terms of total volume handled, these ports were selected due to their being important receiving or distribution centres for a wide variety of cargoes.

Although unpublished, similar data are tabulated annually for Bell Island, Corner Brook, Hantsport, Sydney, Baie Comeau, Port Alfred, Port Cartier, Sept-Îles, Sorel, Trois Rivières, Port Colborne, Sarnia, Sault Ste. Marie, Windsor, New Westminster, Powell River, and Victoria; these, together with the eight in this report, comprise the twenty-five largest ports in Canada in terms of tonnage. These statistics, as well as special data tabulated for other Canadian ports, may be provided upon request to the Chief, Transportation Section, Dominion Bureau of Statistics, Ottawa; any charges are customarily calculated at cost.

Source

Shipping statistics are compiled from reports completed by operators or agents of vessels arriving and departing Canadian ports. All vessels are required to submit reports excepting naval or fishing vessels, and craft of less than fifteen registered net tons. Customs officials act as agents for the Dominion Bureau of Statistics in collecting forms at customs ports; returns for non-customs ports are forwarded through the nearest customs office. Operating data are collected for vessels calling at coastal and Great Lakes ports, but regions such as Lake Winnipeg and the MacKenzie River are not included in the survey.

Treatment of Data

Only data relating to those vessels which are engaged in port-to-port transportation of goods and/or passengers for compensation have been included; all intra-port movements have been excluded.

The term "international seaborne shipping" is used for vessels classed as being in foreign service, that is when (1) the vessel arrives from

or departs for a foreign port; or (2) cargo is loaded for or unloaded from a foreign port; or (3) the registry of the vessel is other than Canadian or British Commonwealth (even though the vessel may have sailed between two Canadian ports). A vessel is classed as being in coasting service if (1) it is of Canadian or British Commonwealth registry, sails between two Canadian ports, and loads or unloads no foreign freight; or if (2) it is of foreign registry, but is granted a waiver to engage in coasting service. On a voyage, a vessel's arrival and departure could easily alternate between foreign or coastwise in view of the variety that is possible in vessel movements.

The terms "origin" and "destination" as used in this publication refer only to the ports of loading and unloading, and not necessarily to the ultimate (perhaps inland) terminal points in some commodity's movement. When using Tables 23 and 24, the cargo tons loaded refer to the volume shipped from the selected port to the destination specified in the third column; with an unloading figure, the roles are reversed, the selected port becoming the destination.

Appendix A lists the countries and geographic areas of origin and destination of the cargoes handled at Canadian ports in international shipping. Appendix B consists of a commodity list, based on the *Standard Commodity Classification Manual* published by the Dominion Bureau of Statistics, into which all cargo types are grouped; reference to this appendix will enable users to obtain a complete description of those commodities which have been necessarily abbreviated in the tables.

The term "general cargo" in this publication refers only to commodities which were not specifically identified in shipping reports; it is not intended to indicate any distinction between bulk and other commodities. The letters "n.e.s." found in the commodity listing mean "not elsewhere specified".

It should be noted that due to corrections made throughout the year, statistics contained in this publication may differ from that released as preliminary data in the monthly *Shipping Statistics*.

ANALYSIS OF DATA

In descending order, the following tonnages were reported for the eight selected ports in 1966: Montreal, 22,835,720 tons (21,911,314 tons in 1965); Vancouver, 21,652,467 tons (20,502,093 tons); Port Arthur-Fort William, 19,508,763 tons (17,037,685 tons); Hamilton, 10,718,676 tons (10,293,615 tons); Halifax, 9,407,069 tons (9,604,571 tons); Quebec, 6,366,407 tons (6,329,205 tons); Toronto, 5,594,678 tons (5,826,100 tons); and Saint John, 5,979,792 tons (5,817,861 tons).

International Shipping

At the eight ports in 1966, the volume of cargo with either a foreign origin or destination declined to 53,433,096 tons from 54,524,916 tons in the previous year.

Goods handled at Halifax in international shipping rose by under two per cent to 7,073,862 tons from 6,944,594 tons in 1965. Unloadings, fuels comprising the largest portion, had expanded

to 4,227,840 tons; crude petroleum from Venezuela and the Netherlands Antilles dropped, but increased supplies were received from Iran, Iraq and Libya. Of the cargo loaded, at 2,846,022 tons, some 1,770,955 tons consisted of gypsum bound for American cities along the Atlantic and Gulf coasts; wheat and flour to the U.S.S.R. advanced to 293,948 tons from 122,495 tons in 1965.

With an annual total of 4,517,427 tons, Saint John handled some 297,272 tons more during the year, unloadings rising by slightly over seven per cent to 2,946,613 tons; over two-thirds of that volume was crude petroleum from Iran and Lebanon alone. Over thirty per cent of the export tonnage was bound for the United Kingdom, the principal components of the year's 532,271 tons being wheat, flour, lumber and timber. Shipments to Belgium, at sixty-eight thousand tons were roughly halved due to lower wheat exports, which, however, rose and almost doubled movements to the U.S.S.R. at 322,199 tons.

Foreign cargoes into and from Montreal during 1966 declined by 4.5 per cent to 12,023,009 tons due to waterborne crude petroleum slipping to 811,225 tons from 2,174,413 tons in 1965; receipts from Venezuela, at 414,466 tons, are only one third of the previous year. Total wheat exports through the harbour rose to 3,486,833 tons, appreciable volumes moving to India and China although a twenty per cent drop to 797,633 tons was recorded for the U.S.S.R. Trade with the United Kingdom totalled 1,363,930 tons against 1,842,410 tons in 1965, with a contraction in grains compounded by gasoline and fuel oil being halved at one hundred thousand tons.

At Quebec 2,805,109 tons were handled in 1966 compared to some 3,126,943 tons in the previous year. Traffic with several European countries was lower, the list being led by the United Kingdom, Belgium, the Netherlands and West Germany; these countries accounted for almost one-quarter of all goods at the port. Cargo transported to and from Italy and Japan rose by almost fifty per cent to two hundred thousand tons.

Commodities received or shipped at Hamilton declined to 7,511,575 tons from 8,046,696 tons in 1965 because of lower American iron ore receipts; of the 3,474,661 tons unloaded, ore from Taconite and Silver Bay totalled 2.2 million tons. Coal into the port eased slightly to 3,157,117 tons from 3,205,618 tons in the preceding year; Ashtabula and Sandusky remain the major suppliers. Exports from the harbour were down about six per cent to 191,495 tons; the United Kingdom was the destination of 81,851 tons.

Loadings and unloadings at Port Arthur-Fort William in international shipping were reduced by 6.2 per cent to 3,851,176 tons as a result of lower iron ore traffic to the United States; 2,036,007 tons of Steep Rock ore were shipped, the largest receiving centres being Indiana Harbour, Cleveland

and Buffalo. Overseas shipments to the United Kingdom, West Germany and the Netherlands declined; together these countries accepted over half a million tons.

Along Toronto's lakefront the year's volume dropped 17.1 per cent to 3,382,728 tons due to a reported decrease in coal unloadings to 1,770,145 tons from 2.4 million tons in 1965; these declines were evident in several of the suppliers, the most important being Conneaut and Toledo. Tonnages to several countries in Western Europe, including the United Kingdom, Belgium, Italy and West Germany, were lower than in 1965.

Vancouver loaded and discharged 12,268,210 tons of foreign goods in 1966 and 11,357,798 tons in 1965; almost two-thirds consisted of wheat, lumber and timber, fertilizer materials and coal. Japan ranked first among trading partners, receiving 3,720,458 tons through Vancouver compared to 3,070,831 tons in 1965; that country is also a significant supplier of finished products and other goods, accounting for one sixth of the 1,859,022 tons unloaded. Mainland China obtained more wheat through the port, increasing its annual total to 1,701,247 tons from 1,286,523 tons in the previous year. India (at 218,971 tons) and the Netherlands (at 417,800 tons) received more, potash being a major factor; among European countries, the United Kingdom was shipped less lumber and timber, as well as wheat, which led to a decline of 43.5 per cent to 433,261 tons.

Coastwise Shipping

Domestic cargo loaded or unloaded at the eight ports rose to 48,630,476 tons from 42,797,528 tons in 1965.

At Halifax, gasoline and fuel oil totalled 2,008,609 tons or 86.1 per cent of the 2,333,207 tons loaded and unloaded, and made up almost all of the 506,344 tons shipped to and from Saint John, the port's major trading partner in volume terms. Outward shipments of 1,950,486 tons (2,105,070 tons in 1965) reflected a drop in gypsum to only 16,972 tons from 128,089 tons in 1965, much less being directed into Montreal. Of the 382,721 tons (498,132 tons in 1965) unloaded, most (310,775 tons) came from Saint John and the Lakehead, fuels and grains respectively being lower.

During the year Saint John received or loaded 1,462,365 tons in coastal shipping compared to 1,597,706 tons in 1965. Loadings were reduced to 1,028,058 tons from 1,124,707 tons in the preceding year due to less fuels to Chatham, Halifax, Quebec, Rimouski and other St. Lawrence ports. Cargo discharged stood at 434,307 tons for 1966, of which about ninety per cent consisted of gasoline and fuel oil from Halifax.

At Montreal 10,812,711 tons of domestic cargo were handled this year compared to 9,325,333 tons in 1965; unloadings increased by over a million

tons to 6,209,649 tons due to grains. Port Arthur-Fort William shipped 4.4 million tons, mostly for the harbour's elevators. Loadings at Montreal are chiefly gasoline and fuel oil, which in 1966 rose and totalled 1,152,253 tons and 2,408,430 tons respectively, destined mainly for Great Lakes and St. Lawrence River ports.

Cargo handled at Quebec in coastwise shipping rose to 3,561,298 tons from 3,202,262 tons in 1965; unloadings made up approximately ninety-five per cent of this total. The main origins of this tonnage were the Lakehead at 1,132,905 tons, Montreal at 942,233 tons, and Forestville at 821,021 tons; the major commodities are grains, fuel, and pulpwood respectively. For the first two, sizeable increases were reported, but from Forestville pulpwood dropped by about thirty thousand tons.

Hamilton shipped or received 3,207,101 tons during the year, approximately a million tons better than 1965 due to a greater influx of Labrador iron ore, which aggregated 2,012,221 tons and accounted for the decline in ore imported from the United States. Fuel oil movements at the port rose by somewhat under one-quarter to 498,287 tons, most of which was sent from Montreal and Clarkson; the former port received more than half of the 503,714 tons loaded at Hamilton.

Domestic traffic at Port Arthur-Fort William, at 15,657,587 tons surpassed the 1965 volume by 21.1 per cent with heavier grain shipments. Montreal

led the list of receiving centres with a total of 4,470,504 tons and was followed by Sorel, Quebec, Port Colborne and Trois Rivières where elevator activity was heightened. Flowing to Sault Ste. Marie were 501,282 tons of iron ore, compared to 570,639 tons in 1965.

In coastal trade, Toronto handled 2,211,950 tons or one-quarter above 1965; a major gain was experienced in coal unloadings at 611,211 tons from Sydney. Wheat from Port Arthur-Fort William, fuel oil from Montreal and cement from Belleville also helped inflate the total.

On the Pacific coast, Vancouver's coastal volume advanced to 9,384,257 tons, representing an increase of 239,966 tons from 1965. Fuel oil for other ports in the province rose to 1,007,034 tons from 842,499 tons in the previous year, and appreciable gains were reported for pulpwood and logs. Britannia Beach contributed 900,131 tons, largely sand and gravel, to the 3,957,227 tons unloaded at Vancouver, and was the destination of 689,861 tons, especially pulpwood and hogged fuel. Forestry products were also of significance in traffic with Duncan Bay, Nanaimo, New Westminster, Port Mellon and Powell River; these five ports in 1966 accounted for 4.1 million tons.
