INTRODUCTION

This publication presents statistics on the origin and destination of both foreign and coastwise cargoes loaded and discharged at eight major Canadian ports. While not necessarily the eight largest in terms of total volume handled, these ports were selected due to their being important receiving or distribution centres for a wide variety of cargoes.

Although unpublished, similar data are tabulated annually for Bell Island, Corner Brook, Hantsport, Sydney, Baie Comeau, Port Alfred, Port Cartier, Sept-Îles, Sorel, Trois Rivières, Port Colborne, Sarnia, Sault Ste. Marie, Windsor, New Westminster, Powell River, and Victoria; these, together with the eight in this report, comprise the twenty-five largest ports in Canada in terms of tonnage. These statistics, as well as special data tabulated for other Canadian ports, may be provided upon request to the Chief, Transportation Section, Dominion Bureau of Statistics, Ottawa; any charges are customarily calculated at cost.

Source

Shipping statistics are compiled from reports completed by operators or agents of vessels arriving and departing Canadian ports. All vessels are required to submit reports excepting naval or fishing vessels, and craft of less than fifteen registered net tons. Customs officials act as agents for the Dominion Bureau of Statistics in collecting forms at customs ports; returns for non-customs ports are forwarded through the nearest customs office. Operating data are collected for vessels calling at coastal and Great Lakes ports, but regions such as Lake Winnipeg and the MacKenzie River are not included in the survey.

Treatment of Data

Only data relating to those vessels which are engaged in port-to-port transportation of goods and/or passengers for compensation have been included; all intra-port movements have been excluded.

The term "international seaborne shipping" is used for vessels classed as being in foreign service, that is when (1) the vessel arrives from

or departs for a foreign port; or (2) cargo is loaded for or unloaded from a foreign port; or (3) the registry of the vessel is other than Canadian or British Commonwealth (even though the vessel may have sailed between two Canadian ports). A vessel is classed as being in coasting service if (1) it is of Canadian or British Commonwealth registry, sails between two Canadian ports, and loads or unloads no foreign freight; or if (2) it is of foreign registry, but is granted a waiver to engage in coasting service. On a voyage, a vessel's arrival and departure could easily alternate between foreign or coastwise in view of the variety that is possible in vessel movements.

The terms "origin" and "destination" as used in this publication refer only to the ports of loading and unloading, and not necessarily to the ultimate (perhaps inland) terminal points in some commodity's movement. When using Tables 23 and 24, the cargo tons loaded refer to the volume shipped from the selected port to the destination specified in the third column; with an unloading figure, the roles are reversed, the selected port becoming the destination.

Appendix A lists the countries and geographic areas of origin and destination of the cargoes handled at Canadian ports in international shipping. Appendix B consists of a commodity list, based on the *Standard Commodity Classification Manual* published by the Dominion Bureau of Statistics, into which all cargo types are grouped; reference to this appendix will enable users to obtain a complete description of those commodities which have been necessarily abbreviated in the tables.

The term "general cargo" in this publication refers only to commodities which were not specifically identified in shipping reports; it is not intended to indicate any distinction between bulk and other commodities. The letters "n.e.s." found in the commodity listing mean "not elsewhere specified".

It should be noted that due to corrections made throughout the year, statistics contained in this publication may differ from that released as preliminary data in the monthly *Shipping Statistics*.

ANALYSIS OF DATA

In 1967, eight ports comprising this report received or shipped 52,650,627 tons of cargo in international shipping (53,433,096 tons in 1966), and 43,312,860 tons of domestic cargoes (48,630,476 tons in 1966).

Halifax

Foreign cargo into or from Halifax declined 7.6 per cent to 6,537,996 tons in 1967 due to gypsum exports to the U.S. east coast being practically halved at 1,044,306 tons. Crude petroleum from Venezuela, Iran and Libya rose to 3,317,463 tons from 2,983,890 tons in 1966, while fuel oil from the Netherlands Antilles increased to 463,751 tons from 298,216 tons in the previous year. Trade with the U.S.S.R. shrank to less than ten per cent of the 293,967 tons recorded in 1966 due to lesser wheat shipments.

Coastal shipping rose to 2,525,383 tons from 2,333,207 tons in 1966; gasoline and fuel oil accounted for 1,965,045 tons or 78 per cent of all the commodities handled. Saint John, N.B., continued as the principal trading partner with approximately one-quarter of the total tonnage.

Saint John

Saint John loaded or discharged 4,155,915 tons of goods in international shipping through 1967, down about eight per cent due to export tonnage (down to 1,227,946 tons from 1,570,814 tons in 1966) of wheat, down by 136,969 tons, wheat flour by 62,339 tons and pulpwood by 40,659 tons. Import tonnage remained practically unchanged at 2,927,969 tons, of which five-sixths consisted of crude petroleum and fuel oil.

The port's domestic traffic, at 1,433,826 tons was down less than thirty thousand from 1966. Over ninety per cent of the annual volume was made up of gasoline and fuel oil, Halifax, Charlottetown, St. Stephen and Rimouski being important centres for these items.

Montreal

Due mainly to less wheat activity particularly to Communist countries, international shipping at Montreal fell almost two million tons to 10,038,816 tons in 1967; wheat volume stood at 3,407,739 tons in 1966 and 1,824,873 tons in 1967. Flour and grains shared this experience to a degree; for example corn, mostly imports from the U.S. Great Lakes, shrank to 362,179 tons from 450,405 tons. Fuel oil unloadings slipped to 1,821,147 tons from 2,198,631 tons, the main suppliers being Netherlands Antilles, Venezuela, United Kingdom and Italy. Crude petroleum imports rose to 1,027,119 tons from 811,225 tons, while coal from the United States

fell almost one-quarter to 307,765 tons. For the first time crude petroleum was received from the New Orleans area.

Reduced wheat exports were reflected in the port's domestic shipping which dropped down to 8,519,287 tons from 10,812,711 tons in 1966. Outward fuel oil and gasoline were also lower. The three principal ports trading with Montreal were Port Arthur-Fort William (2,786,519 tons), Quebec (1,059,441 tons) and Hamilton (488,504 tons).

Quebec

Foreign cargo at Quebec in 1967 rose appreciably to 3,639,362 tons from 2,805,109 tons in the previous year due particularly to wheat, corn and barley traffic which totalled 1,294,661 tons and 654,774 tons in the two years. The United Kingdom, West Germany, Italy, Netherlands and Poland were large purchasers. Asbestos, newsprint and fuel oil however were all lower moving down to 1,424,428 tons from 1,496,916 tons.

Less incoming wheat and pulpwood depressed coastwise shipping to 3,406,126 tons from 3,561,298 tons in 1966; unloadings made up over 93 per cent of this total. The principal origins of this tonnage were Montreal at 1,035,508 tons (mainly gasoline and fuel oil), Port Arthur-Fort William at 1,021,181 tons (grains), and Forresterville at 703,258 tons (pulpwood); only Montreal reported greater volumes.

Hamilton

Movement of commodities in foreign shipping declined to 6,854,936 tons from 7,511,575 tons, due to a decline in iron ore receipts of about one-third to 2,362,088 tons from Taconite, Minnesota, Marquette, Silver Bay and Superior, Wisconsin. Bituminous coal however rose to 3,535,648 tons from 3,157,117 tons, Sandusky reporting a substantial gain to 2.9 million tons.

Domestic iron ore into Hamilton advanced to 2,797,007 tons from 2,012,221 tons, this tonnage from Sept-Îles-Pointe Noire being the cause of the port's overall increase to 3,738,144 tons from 3,207,101 tons. Fuel oil from Clarkson and Montreal slipped to 316,043 tons from 394,904 tons in 1966.

Port Arthur - Fort William

Greater iron ore traffic to the United States, notably Indiana Harbour, helped push the port's total in foreign shipping to 4,215,015 tons from 3,851,176 tons in the previous year; the ore total was 2,247,163 tons in 1967 and 2,036,007 tons in 1966. There was also a higher level of direct overseas grain exports through the year, the total having risen to 887,824 tons from 531,623 tons.

Appreciably reduced grain activity in domestic shipping caused the annual total to fall 29.4 per cent to 11,055,049 tons. Wheat loads in 1967 totalled 6.8 million tons against 11.7 million tons in the previous year. Montreal led as a receiving centre, although its 2,614,642 tons of wheat and other grains represented a 1.2 million ton decline from 1966. Iron ore movements destined for Sault Ste. Marie and Port Colborne amounted to 964,893 tons, comparing favourably with the 1966 volume of 654,841 tons.

Toronto

Along Toronto's waterfront some 3,651,427 tons were handled through 1967, or about eight per cent above the previous year. Bituminous coal unloadings rose ten per cent to 1,943,114 tons from Ashtabula, Conneaut and Toledo. Soyabean imports from the United States, notably Chicago and Toledo rose thirty thousand to 339,582 tons, while fuel oil moved up to 256,163 tons from 224,245 tons.

Toronto's domestic shipping declined 4.7 per cent to 2,107,318 tons with a number of small declines in several products, notably fuel oil and cement. Coal from Sydney was about two per cent higher at 621,328 tons, while grains from the Canadian Lakehead were 10.5 per cent higher at 323,850 tons.

Vancouver

On the Pacific coast, Vancouver handled 13,557,160 tons of international cargo compared to 12,268,210 tons in 1966. The principal commodities passing through the port were wheat, other grains, wood products, coal and fertilizer materials, which together comprised over seventy per cent of all foreign cargoes. Japan, the port's major trading partner, increased its volume to 4,887,727 tons from 4,022,379 tons consisting of a wide range of products from raw material to finished products; the major commodities involved were coal, potash, forest and steel products. Wheat for Communist China dropped to 978,707 tons from 1,701,221 tons while tonnage to India more than trebled to 359,957 tons. Among European countries, Vancouver tonnage increased to the United Kingdom, Italy and the Netherlands, and declined to West Germany.

Traffic at Vancouver to and from other Canadian ports advanced to 10,527,367 tons, or 1,143,110 tons over 1966. Pulpwood increased about seven per cent to 2,786,616 tons, sand and gravel about one-fifth to 2,099,545 tons, while fuel oil and gasoline eased slightly to 1,342,387 tons. Cargo activity to and from Britannia Beach amounted to 2,044,579 tons, Nanaimo, 1,161,327 tons and Campbell River, 819,600 tons.
