INTRODUCTION

This publication presents statistics on the origin and destination of both foreign and coastwise cargoes loaded and discharged at eight major Canadian ports. While not necessarily the eight largest in terms of total volume handled, these ports were selected due to their being important receiving or distribution centres for a wide variety of cargoes.

Similar data can be prepared for other Canadian ports, upon request to the Transportation Section, Statistics Canada, Ottawa; any charges are customarily calculated at cost.

Source

Shipping statistics are compiled from reports completed by operators or agents of vessels entering and leaving Canadian ports. Reports are not required for naval or fishing vessels, and craft of less than fifteen registered net tons. Customs officials act as agents for Statistics Canada in collecting forms at customs ports; returns for non-customs ports are forwarded through the nearest customs office. Operating data are collected for vessels calling at coastal and Great Lakes ports, but regions such as Lake Winnipeg and the MacKenzie River are not included in the survey.

Treatment of Data

Only data relating to those vessels which are engaged in port-to-port transportation of goods and/or passengers for compensation have been included; all intra-port movements have been excluded.

The term "international seaborne shipping" is used for vessels classed as being in foreign service, that is when (1) the vessel arrives from or departs for a foreign port; or (2) cargo is loaded for or unloaded from a foreign port; or (3) the registry of the vessel is other than Canadian or British Commonwealth (even though the vessel may have sailed between two Canadian ports).

A vessel is classed as being in coasting service if (1) it is of Canadian or British Commonwealth registry, sails between two Canadian ports, and loads or unloads no foreign freight; or if (2) it is of foreign registry, but is granted a waiver to engage in coasting service. On a voyage, a vessel's arrival and departure could easily alternate between

La présente publication contient des statistiques sur l'origine et la destination des navires hauturiers et des caboteurs chargés et déchargés dans les huit principaux ports du Canada. Sans être nécessairement les plus importants quant au volume du trafic des marchandises, ces ports ont été choisis en raison de leur importance comme centres de chargement et de déchargement pour une grande variété de marchandises.

On peut obtenir des données semblables sur les autres ports canadiens en s'adressant au chef de la Section des transports, Statistique Canada, Ottawa; en règle générale, le prix demandé pour ces statistiques est égal au prix de revient.

Source

Les statistiques sur la navigation sont établies d'après les données fournies par le personnel ou les agents des navires qui entrent dans les ports canadiens ou qui en sortent. Aucune déclaration n'est requise des navires de forces navales, des bateaux de pêche, ni d'embarcations jaugeant moins de quinze tonnes nettes. Les douaniers agissent à titre d'agents du Statistique Canada et recueillent les formulaires aux ports douaniers; les déclarations pour les ports non douaniers sont acheminées au bureau douanier le plus proche. Les données d'exploitation sont recueillies pour les navires faisant escale aux ports côtiers et des Grands Lacs, mais certains endroits, comme le lac Winnipeg et le fleuve MacKenzie ne sont pas compris dans le champ de l'enquête.

Traitement des données

Seules les données qui se rapportent aux navires effectuant le transport d'un port à l'autre, de marchandises et de passagers payants, sont indiquées ici; on n'a pas tenu compte des mouvements dont le lieu de départ et d'arrivée est le même port.

L'expression "navigation internationale" englobe trois catégories de bâtiments ou de cargaisons: (1) les navires en provenance ou à destination d'un port étranger, (2) les cargaisons chargées ou déchargées qui sont destinées à des pays étrangers ou qui en proviennent, (3) les navires immatriculés ailleurs qu'au Canada ou que dans un pays du Commonwealth (même si le navire a navigué entre deux ports canadiens).

La "navigation nationale" englobe: (1) les navires immatriculés au Canada ou dans un pays du Commonwealth qui naviguent entre deux ports canadiens sans charger ni décharger de fret étranger; et (2) les navires immatriculés ailleurs, mais qui ont reçu l'autorisation de faire du cabotage. En raison de la variété des mouvements possibles, l'arrivée et le

foreign or coastwise in view of the variety that is possible in vessel movements.

The terms "origin" and "destination" as used in this publication refer only to the ports of loading and unloading, and not necessarily to the ultimate (perhaps inland) terminal points in some commodity's movement. When using Tables 23 and 24, the cargo tons loaded refer to the volume shipped from the selected port to the destination specified in the second column; with an unloading figure, the roles are reversed, the selected port becoming the destination.

Countries are divided by geographic areas, first Commonwealth nations, then other countries. Order is as follows: Western Europe, Eastern Europe, Middle East, Other Africa, Other Asia, Oceania, South America, Central America, North America. Full country nomenclature and system of classifying constitutes Appendix A. Appendix B consists of a commodity list, based on the *Standard Commodity Classification Manual* published by Statistics Canada, into which all cargo types are grouped; reference to this appendix will enable users to obtain a complete description of those commodities which have been necessarily abbreviated in the tables. Sequence of commodities is from Live Animals through End Products as described in this Appendix.

The term "general cargo" in this publication refers only to commodities which were not specifically identified in shipping reports; it is not intended to indicate any distinction between bulk and other commodities. The letters "n.e.s." found in the commodity listing mean "not elsewhere specified".

Errors accommodated under this item are due to its use as a "catch-all". Occasionally various amounts of different commodities, each having their own code, are added together by the respondent and designated "general cargo". This erroneous practice inflates the figure for general cargo and decreases the total for each commodity improperly designated to general cargo. Although these figures may be distorted by small amounts only each time a report is submitted, over the year the errors may become significant.

Containerized freight is considered as one unit and does not take into account the nature of the product. This leads to discrepancies in the figures given for the different containerized products as their tonnages are listed as a part of the container figure not that of the product. For example, if we compare shipments of raw asbestos from the harbour of Montreal during 1971 we find a large

départ d'un navire peuvent très bien entrer, la première, dans la catégorie de la "navigation internationale" et, le second, dans celle de la "navigation nationale", ou vice versa.

Pour les besoins de la présente publication, les expressions "origine" et "destination" s'appliquent uniquement aux ports de chargement et de déchargement, et pas nécessairement à la destination ultime (il peut s'agir de navigation intérieure) de certaines marchandises. En consultant les Tableaux 23 et 24, on constate que le volume de marchandises chargées se rapporte à la quantité de marchandises expédiées à partir de l'un des ports choisis vers la destination indiquée dans la deuxième colonne; dans le cas d'un déchargement, les rôles sont renversés, et le port choisi devient celui de destination.

Les pays sont répartis en régions, les pays du Commonwealth d'abord, et ensuite les autres pays, dans l'ordre suivant: Europe occidentale, Europe orientale, Moyen-Orient, autres pays d'Afrique, autres pays d'Asie, Océanie, Amérique du Sud, Amérique centrale, Amérique du Nord. La nomenclature complète des pays et le système de classification constituent l'Appendice A. L'Appendice B comprend une liste des marchandises, basée sur le *Manuel de la classification type des marchandises*, publié par le Statistique Canada et dans lequel sont énumérés tous les genres de marchandises; les utilisateurs désireux de connaître la description complète des marchandises — qu'il nous a fallu nécessairement abréger dans les tableaux — feraient bien de consulter cette liste. L'éventail des marchandises énumérées va des animaux vivants aux produits finis.

L'expression "Marchandises diverses" s'applique, dans la présente publication, uniquement aux marchandises qu'on n'a pas dénommées avec précision dans les questionnaires; on ne fait pas de distinction entre les marchandises en vrac et les autres marchandises. Les lettres "n.d.a." dans la liste des marchandises signifient "non dénommé ailleurs".

Les erreurs qui s'accumulent sous cet item sont causées par son utilisation comme "tout autre". Diverses quantités de différentes marchandises dont chacune a son propre code sont groupées occasionnellement par le répondant et désignées comme "marchandises diverses". Cette pratique exagère le total des marchandises diverses et diminue le total de chaque marchandise qui est ainsi incorrectement nommée. Bien que ces chiffres peuvent être faussés seulement par de petites quantités chaque fois qu'un rapport nous est transmis, sur une base annuelle les erreurs peuvent être importantes.

Le fret conteneurisé est considéré comme une marchandise et ne prend pas en considération la nature du produit lui-même. Ceci occasionne des erreurs pour les différentes marchandises transportées en conteneurs parce que leur tonnage est inscrit sous le fret conteneurisé et non sous leur nom. Si l'on compare, par exemple, les chargements d'amiante brute expédiée du port de Montréal durant 1971, nous pouvons re-

decrease (owing to the increased use of containers), whereas, total shipments of asbestos from Montreal increased during that year.

Transshipments of cargoes, which are cargoes coming into a Canadian port en route to a port in a foreign country by water, are reflected in port totals. For example, cargoes unloaded from one vessel at Vancouver and re-loaded onto another vessel are recorded as a loading and unloading at that port.

For international trade, the published loadings and unloadings do not represent the exports and imports at a particular port because they include transhipped cargoes. (This term should not be confused with "goods-in-transit", goods neither loaded nor unloaded and therefore not recorded as a shipment.)

All volume data are presented in tons of 2,000 pounds.

Cargoes which are loaded in one navigational season but not discharged till the following season are recorded in the following year's annual report.

It should be noted that due to corrections made throughout the year, statistics contained in this publication may differ from that released as preliminary data in the monthly *Shipping Statistics*.

STATISTICAL ANALYSIS

The eight ports featured in this report received and shipped a total of 80,400,325 tons of cargo in international trade, 45.3% of Canada's total for 1972. In domestic trade, these harbours also handled 51,756,814 tons of goods, 42.4% of the nation's total. Foreign shipping at all Canadian ports rose 14.5% from 70,215,533 tons while domestic traffic increased 0.6% from 51,460,708 tons in 1971.

Quebec and Saint John had the highest increase in foreign traffic in 1972, 33.4% and 41.8% respectively, while Vancouver's traffic increased 9.7% compared to 1971.

The significant rise in Quebec's international and domestic traffic was a result of the increased activity at Saint Romuald. In coastwise shipping Quebec showed the largest increase in cargo loaded, 353.2%, while cargo unloaded decreased by 14.8% compared to 1971.

marquer une baisse due à l'utilisation plus intense des conteneurs alors qu'en réalité le total des chargements d'amiante avait augmenté cette année-là.

Les totaux portuaires comprennent les marchandises transbordées par eau, c'est-à-dire les marchandises qui arrivent à un port canadien et qui sont destinées vers un port étranger. Les produits déchargés d'un bateau à Vancouver, par exemple, et rechargés à bord d'un autre navire figurent comme chargements et déchargements à ce port.

Pour le commerce international, les données publiées ne représentent pas les exportations et les importations parce qu'elles comprennent les marchandises transbordées. (On ne doit pas confondre ce terme avec marchandises en transit qui ne sont ni chargées ni déchargées et par ce fait même ne sont pas rapportées.)

Toutes les données pondérales sont présentées en tonnes de 2,000 livres.

Les marchandises embarquées durant une saison de navigation mais débarquées seulement durant la saison suivante, seront présentées dans le rapport annuel de cette dernière.

Il est à noter qu'en raison de corrections effectuées pendant l'année, les statistiques de la présente édition peuvent différer de celles qui ont été publiées à titre préliminaire dans le bulletin mensuel *Shipping Statistics*.

ANALYSE STATISTIQUE

En 1972, le commerce international aux huit ports canadiens mentionnés dans ce rapport, a atteint 80,400,325 tonnes, soit 45.3% du total canadien. Ils ont contribué à 42.4% du trafic national avec les 51,756,814 tonnes de marchandises qui y furent manutentionnées. Pour l'ensemble des ports canadiens, le trafic international a augmenté de 14.5% atteignant 70,215,533 tonnes tandis que le trafic national augmentait de 0.6% comparativement à 1971. Cette année-là, 51,460,708 tonnes de marchandises furent manutentionnées.

Les ports de Québec et Saint-Jean subirent les plus fortes hausses de trafic international en 1972, 33.4% et 41.8% respectivement tandis que l'activité à Vancouver augmentait de 9.7% comparativement à 1971.

L'activité grandissante à Saint Romuald est à l'origine des fortes hausses du trafic national et international à Québec. Dans le secteur national, ce port a subi une hausse remarquable de 353.2% pour les changements alors qu'il accuse une baisse de 14.8% pour les déchargements par rapport à 1971.
