SHIPPING REPORT

1961

PART V

Origin and Destination for Selected Commodities

The annual "Shipping Report" provides details of cargoes loaded and unloaded at Canadian ports, vessel movements and port activity. Since 1952 this report has been published in three parts. The first two cover the operations of vessels engaged in international shipping while Part III presents corresponding information on vessels in coastwise and inland service. In these reports the origin of cargo unloaded at Canadian ports and the destination of cargo loaded has been on a broad geographical basis only. More detailed information, however, is available and because of the growing interest in cargo origin and destination, it was decided to publish some of it.

It will be realized that a publication containing the origin and destination of all cargoes unloaded and loaded at all Canadian ports would be too voluminous and too costly to produce. It was necessary, therefore, to be selective as to kind and amount of information to include. At the same time it was necessary to produce information which would be of most value to users consistent with the cost involved and availability of staff and machine resources.

After careful consideration it was decided to produce in two new sections of the annual "Shipping Report" the origin and destination of all cargoes loaded and unloaded at eight of the major Canadian ports and the origin and destination of eight selected commodities. Detailed information with regard to cargo loaded and unloaded at the eight principal ports is contained in Part IV of the 1961 Shipping Report. The following tables showing the origin and destination of the selected commodities is presented as Part V.

The commodities selected were wheat, other grain, pulpwood, iron ore, bituminous coal, gypsum, newsprint and fuel oil. For the purpose of this report ilmenite ore has been included with iron ore. Chosen because of their importance in the Canadian economy, these commodities accounted for 65 per cent of all cargo loaded and unloaded in international shipping and 64 per cent of all coastwise

traffic. The tabulations for iron ore and gypsum represent almost all shipping activity at the ports of Bell Island in Newfoundland, Hantsport in Nova Scotia, Havre St. Pierre and Sept Iles in Quebec. Iron ore, ilmenite and gypsum loaded at these ports totalled 14,294,676 tons or 14 per cent of all cargo loaded at Canadian ports and from 95 to 99 per cent of all cargo handled at these four ports.

The movement of the eight selected commodities is summarized in Tables 25-28 in order to show their relative importance in the overall picture of Canada's shipping. Table 25 shows the tonnage of each commodity loaded for foreign countries by area of destination while Table 26 shows the origin of these commodities unloaded from foreign countries. Similar tabulations by province of destination and origin are presented for coastwise shipping in Tables 27 and 28. Detailed statements showing the movement of each commodity, by port of origin and destination will be found in Tables 29 and 30.

It should be noted that the traffic flow of selected commodities in coastwise shipping is based on unloadings reported. This tabulation provides information as to port of origin of all cargo unloaded but, because of incomplete reporting and year-end differences, the sum of such originating cargo will not agree with total loadings shown in Part III of the Shipping Report.

It should also be realized that the terms "origin" and "destination" as used in this report, refer only to ports of loading and unloading. In many instances, the cargoes are transported further by other modes of transport or re-loaded aboard another vessel for shipment to final destination.

During 1961 a total of 92,948,103 tons of cargo was loaded and unloaded at Canadian ports in international shipping. The selected commodities accounted for 72.7 per cent of all loadings and 54.2 per cent of unloadings. The following table shows the percentage of Canada's total waterborne commerce with foreign countries attributed to these commodities.

Destination or origin	Per cent of total	
	Loadings of selected commodities	Unloadings of selected commodities
United Kingdom.....	64.6	1.1
Other Europe.....	76.4	3.2
Middle East.....	68.9	0.7
Other Africa.....	43.3	21.4
Other Asia.....	75.4	—
Oceania.....	34.4	8.0
South America.....	41.4	25.1
Central America and Antilles.....	15.8	41.3
United States—Alaska.....	28.4	0.1
Hawaii.....	45.7	—
Pacific Ports.....	57.9	45.1
Great Lakes ports.....	77.2	87.4
Atlantic and Gulf ports.....	85.0	18.9
Other North America.....	78.8	56.5
Totals.....	72.7	54.2

It will be noted that while the selected commodities provide a good coverage of outgoing cargo, they are not equally representative of import shipments, particularly from overseas countries. By referring to Part I of the Shipping Report it will be noted that cargoes unloaded from the United Kingdom and Europe are made up generally of manufactures and miscellaneous freight items. While the same is true of cargo from the Far East, 99 per cent of all cargo unloaded from the Middle East was crude oil.

In 1961 cargo loaded at Canadian ports for foreign countries totalled 53,760,748 tons. The eight selected commodities accounted for 39,073,168 tons or almost 73 per cent of the total. Iron ore alone accounted for 32 per cent of the total. Loading of iron ore at Quebec ports totalled 9,949,420 tons, 7.1 million destined to the United States and 2.8 million to the United Kingdom and Europe. Iron ore loaded at Ontario ports amounted to 3,681,755 tons, of which 3.66 million was destined to United States ports. Ore from Newfoundland, 2.25 million tons, was transported to the United Kingdom and Europe, while some 1.2 million tons was loaded at British Columbia ports for Japan. Loadings of wheat totalled 10.8 million tons. The bulk of this was destined to the United Kingdom (22.5 per cent), other Europe (38 per cent) and Asia (33 per cent). Pulpwood loaded for foreign countries totalled 1,752,445 tons. More than half of this, 984,850 tons, was loaded at British Columbia ports for United States west coast ports while some 29 per cent was loaded at Atlantic ports for the United Kingdom and Europe. Gypsum, all loaded at Nova Scotia ports,

totalled 3.86 million tons almost all of which was shipped to the United States. Coal and fuel oil comprise a large part of import rather than export shipments. However, it will be noted that some 703,000 tons of coal were loaded at British Columbia ports for Japan.

Out of a total of 39,187,355 tons unloaded from foreign countries the selected commodities accounted for 21,225,872 tons or 54 per cent. Unloadings of coal, mostly from the United States, totalled 10,654,936 tons or 27.2 per cent of the total. Iron ore unloaded amounted to 5,366,908 tons of which 86 per cent originated at United States Great Lakes ports while 9.6 per cent originated in South America. Some 83 per cent of the total was unloaded at Ontario ports. Fuel oil unloaded at Canadian ports totalled 3,207,041 tons. More than half of this, 1.66 million tons, was unloaded at Quebec ports, followed by Nova Scotia with 542,000 tons and British Columbia with 434,000. Of the total unloaded almost 40 per cent came from the Netherlands Antilles and some 36 per cent from Venezuela. Gypsum and newsprint are significant as outgoing cargo only.

In coastwise shipping the selected commodities accounted for 29,503,506 tons or 63.6 per cent of the total unloaded. Wheat and other grains were transported in greatest volume totalling 10,243,603 tons or 22 per cent of the total followed by pulpwood, 7,156,403 tons or 15.4 per cent, with fuel oil in third place with a total of 6,231,680 tons or 13.4 per cent.
