# OIL PIPE LINE TRANSPORT

1959

Oil operations in 1959 increased to an all-time high. Barrels of oil delivered increased to 308.5 million barrels, 6 per cent over the previous high of 1957 and 12 per cent over 1958. Barrel mile oil movements through trunk lines also reached a peak of 114.2 billion, slightly more than the previous 1957 high and 16 per cent more than 1958. Total pipe line mileage increased 9 per cent or 660 miles to a grand total of 7,800 miles. The total original cost of equipment in operation increased 4 per cent to \$467.3 million.

Total operating revenues increased 14 per cent to \$87.1 million, of which 16 per cent was received from gathering lines and 78 per cent from trunk line operations. Although net operating revenues amounted to \$65.2 million in 1959, an increase of 18 per cent from \$55.5 million in 1958, total income rose only by 2 per cent to \$70.4 million because interest and dividend income decreased sharply to \$3.5 million from \$12.8 million in 1958. It should be noted, however, that the level of dividend and interest income was unusually high in 1958 when the Interprovincial Pipe Line Company received large non-recurring revenues from this source. Net income before taxes amounted to \$39.9 million, a 3 per cent increase over the previous year; however, provision for income tax increased by \$5.2 million over 1958 resulting in an 8 per cent drop of net income after income tax to \$21.0 million from \$25.2 million.

Total cost of property and equipment rose \$17.0 million, most of which was accounted for by the entry of new companies into the industry during 1959, including Alaska-Yukon Pipelines Ltd., Federated Pipe Lines Ltd., Gibson Associated Oils Ltd., and Gibson Petroleum Company Limited.

The largest increase in pipe line mileage was by Alaska-Yukon Pipelines Ltd. which re-activated 107.0 miles of the dormant Canal Pipe Line in the Yukon. Federated Pipe Lines Ltd. completed building 187.0 miles of lines that gather oil from the Swan Hills Fields and deliver it to Edmonton. Goliad Oil and Gas Company added 63.3 miles of pipe lines to gather liquefied petroleum gases in the Pembina

field. Pembina Pipe Line Ltd. and Producers Pipelines Ltd. also made extensive additions to their gathering systems.

The number of employees declined during the year by 6 per cent although total earnings increased slightly, thus average incomes also increased by 6 per cent. Almost half of those employed in the pipe line industry were located in Alberta.

Financial data are not available for some pipe lines which are operated as pipe line departments of parent companies. Lines in this group are those of the Amurex Oil Company, Anglo American Exploration Ltd., Anglo-Canadian Oils Limited, Gibson Petroleum Company Limited, Goliad Oil and Gas Company, Green River Exploration Company Limited, and the Sarnia Products Line of Imperial Oil Limited.

The "Uniform Classification of Accounts for Oil Pipe Line Companies", which was prescribed effective January 1, 1959, for all companies under the jurisdiction of the Board of Transport Commissioners and recently the National Energy Board, was followed in the design of the reporting form for these companies. Consequently, financial details presented herein are in conformity with these accounting regulations. Depreciation, formerly shown in "operating expenses", is now included in "deductions from total income" and taxes, formerly shown in "deductions from total income", is now included in "other office expenses".

Tables 2 to 6 of the present report constitute a resume of data published earlier in monthly pipe line reports. Table 1 provides an historical summary of key statistics for the years 1950-59, the period in which data have been collected.

Statistics of Yukon Pipelines Limited were received too late for inclusion in the tables of this report. This company operated 90.5 miles of 4" pipe line from Summit, B.C., to Whitehorse, Yukon Territory. During 1959 the company received 249,039 barrels of product imports and delivered 249,879 barrels, a daily average of 684.6. Oil movements during the year were 22,614,049 barrel miles.
