TELEPHONE STATISTICS  
FOR  
1929

The installations of telephones in Canada continued to increase during 1929, the total number installed, 1,399,986, exceeding the total for 1928 by 65,452, or 4.5 per cent. The average number of telephones per 100 population was 14.29 and the United States with 16.3 (1928) was the only country with a greater density. Germany with 2,950,430 and Great Britain and North Ireland with 1,759,686 (1928) were the only other countries with larger numbers of telephones, but their averages per 100 population were only 4.6 and 3.8, respectively. The greatest provincial density was in British Columbia where the average was 21.2 telephones per 100 population. Ontario was second with 18.9, Saskatchewan third with 13.4, Alberta fourth with 12.4 and Manitoba fifth with 11.9. Quebec, New Brunswick, Nova Scotia, Prince Edward Island and the Yukon Territory following in this order.

The number of telephones on automatic switchboards at the end of the year was 358,198 and on manual switchboards, 1,041,788. The number operated by magnetos was 408,677 and the number operated by central energy, 991,309. Ontario had the largest number of telephones on automatic switchboards, viz., 125,144, and Quebec was second with 99,281.

The estimated number of conversations by telephone was 2,525,500,000, including 37,851,600 long distance conversations. This was an average of 1,830 conversations per telephone and 257 per capita, which was a higher average than for any other country, the average for the United States in 1928 being 230.7 per capita.

The total investment as reported was \$291,589,148, which was an increase during the year of \$28,387,497 as against an increase of \$19,202,516 during 1928. This was an average investment of \$208 per telephone.

The wire mileage amounted to 4,476,213, an increase of 493,346 miles, the miles of wire per telephone averaged 3.19 miles as against 2.99 miles in 1928, and the number of wires per pole increased from 19.2 to 20.29.

The total income amounted to \$65,240,610, including \$16,516,208 from long distance calls, and expenditures were \$56,559,517 including \$47,634,579 for operating expenses, \$2,096,482 for taxes and \$6,828,456 for interest and payments on debentures, loans, etc.

Practically all the co-operative systems, which numbered 1,543 with 84,123 telephones, are operated at cost for the benefit of the members. The provincial and municipal systems with 245,373 telephones are also on a different basis from the stock companies and the financial data for the systems as a whole are affected accordingly.

Table 9 shows the number of telephones connected to each class of telephone system in each province and also the investment by each class of system. The statistics of the larger systems only are shown in table 13 but the statistics in tables 1 - 12 are for all telephone systems in Canada.

.....

Statistics for foreign countries were taken from "Telephone and Telegraph Statistics of the World," by American Telephone and Telegraph Company.
