TELEPHONE STATISTICS

1940

The number of telephones in Canada increased to 1,461,038 from 1,397,272 in 1939, an increase of 4.6 per cent. The loss sustained during 1930-33 was more than offset and a new high record established, the previous peak being 1,402,861 in 1929. The telephone density was an average of 12.85 telephones per 100 of population which was exceeded only by the United States with 15.85, Sweden with 13.64 and New Zealand with 13.28.

An estimate of the number of telephone conversations during the year was 2,899,103,000 which included 34,888,000 long distance conversations. Long distance calls were fewer than in 1928-30 inclusive, but local calls reached a new high record. The former are counted but local calls are estimated, based on counts made by the large systems on representative days during the year.

Approximately 68 per cent of all telephones were residence telephones and the remaining 32 per cent were business telephones including public pay stations. Approximately 36 per cent of the total were business and residence telephones on individual lines and 19 per cent were on private branch exchanges or extensions which might be considered in somewhat the same class as individual line telephones, raising the percentage to 55 per cent. Two-party line telephones constituted 25 per cent of the total and telephones on lines accommodating more than four telephones per line, which are classed as "rural" in this report, were 17 per cent of the total. Four-party line telephones and public pay station telephones which are on individual lines made up the remaining 3 per cent.

NOTE: Telephone statistics for foreign countries were taken from "Telephone and Telegraph Statistics of the World - January 1, 1940" by the American Telephone and Telegraph Company.

Telephone densities in the several provinces are shown below:

	Telephones per 100 Population	
	Residence Telephones	All Telephones
Prince Edward Island	4.2	5.9
Nova Scotia	6.5	9.3
New Brunswick	5.3	7.9
Quebec	6.1	10.0
Ontario	12.4	17.5
Manitoba	7.1	10.6
Saskatchewan	7.2	9.2
Alberta	6.0	9.3
British Columbia	12.7	18.5
Yukon Territory	2.2	4.4
Total	8.7	12.8

Table 19 shows 71,198 telephones for co-operative systems. The number should be larger than this because many of the systems classed as municipal and stock companies are almost exclusively co-operative in operation. In Ontario municipal systems were constructed by organizations of persons wanting telephone service; the municipalities financed the construction and collected the amount expended through special taxes on the properties served. Of the 131 municipal systems in Ontario only 11 are owned by the municipalities. In Alberta similar organizations were incorporated as stock companies but in this report these have been classed as co-operative systems.

The Bell Telephone Company, with head office in Montreal and operating in Quebec and Ontario, reported 824,697 telephones or 56 per cent of all telephones in Canada and its subsidiaries account for another 4 per cent. The provincial systems in the three Prairie Provinces accounted for 149,471 telephones, or 10 per cent of the total. These provincial systems provide long distance service to the local systems and, except in Edmonton which operates a municipal system, they serve the large cities in these provinces. In the eastern provinces the Provincial systems are mainly in the provincial parks for fire rangers, etc., and the Dominion systems are in outlying sections of the country where no commercial service is available.

The number of telephones on automatic switchboards, or dial telephones as they are commonly known, has increased each year, even when the total number was decreasing. In 1940 53 per cent of the total was automatic. The majority of these were in the fifty-one large cities listed in table 21. During the year 65,456 telephones were added or transferred from manual to automatic switchboards in these cities, as against 11,416 in other municipalities. In Hamilton, Ontario, the remaining manually operated telephones were converted to dial telephones and in Kitchener, Ontario, the entire system was changed from manual to automatic switchboard during the year.

The following table shows the long distance telephone conversations between Canada and foreign countries. To avoid duplications the calls were reported by the system handling them across the Canadian border, although some of them might have originated on other systems. Calls coming in over the American Telephone and Telegraph radio telephone channels and the Bell Telephone connections via the United States were not compiled. Consequently the incoming calls are incomplete.

A regular service was established between Canada and Newfoundland in 1938, but it did not begin operation until January, 1939, and by Governmental Decree because of war conditions ceased to operate September 1. The Canadian Trans-Atlantic Telephone Circuit was also closed on August 31, 1939.

STATISTIQUES DU TELEPHONE

1940

Le nombre de téléphones au Canada passe de 1,397,272 en 1939 à 1,461,038 en 1940, augmentation de 4.6 p.c. La baisse de la période 1930-33 est plus que comblée et un nouveau sommet est atteint. Le sommet précédent avait été atteint en 1929 avec 1,402,861 téléphones. Le Canada compte une densité de téléphones de 12.83 par 100 habitants, ce qui n'est dépassé que par les Etats-Unis avec 15.85, la Suède avec 13.64 et la Nouvelle-Zélande avec 13.28.

Une estimation du nombre de conversations téléphoniques durant l'année atteint 2,899,103,000, y compris 34,888,000 appels interurbains. Les appels interurbains accusent une baisse sur 1928, 1929 et 1930, mais les appels locaux atteignent un nouveau sommet. Les appels interurbains sont comptés, mais les appels locaux sont estimés en se basant sur les comptes faits par les grands réseaux certains jours représentatifs de l'année.

Environ 68 p.c. de tous les appareils sont des téléphones domestiques et les 32 p.c. qui restent sont des téléphones commerciaux, y compris des téléphones publics payants. Près de 36 p.c. du total sont des téléphones domestiques et commerciaux sur lignes individuelles et 19 p.c. sur des branches privées d'échange ou des extensions, ce qui porte le pourcentage à 55 p.c. Les téléphones sur lignes à postes multiples constituent 25 p.c. du total et les appareils sur lignes desservant plus de quatre téléphones par ligne, classifiés comme "ruraux" dans ce rapport, représentent 17 p.c. du total. Les téléphones sur lignes à postes quadruples et les téléphones publics payants, qui sont sur lignes individuelles, constituent les 3 p.c. qui restent.

NOTA: Les statistiques du téléphone pour les pays étrangers sont extraites de "Telephone and Telegraph Statistics of the World - 1er janvier 1939" par l'American Telephone and Telegraph Company.

La densité des téléphones dans les diverses provinces est donnée ci-dessous:

	Téléphones par 100 âmes	
	Téléphones domestiques	Total des téléphones
Île du Prince-Edouard	4.2	5.9
Nouvelle-Ecosse	6.5	9.3
Nouveau-Brunswick	5.3	7.9
Québec	6.1	10.0
Ontario	12.4	17.5
Manitoba	7.1	10.6
Saskatchewan	7.2	9.2
Alberta	6.0	9.3
Colombie Britannique	12.7	18.5
Yukon	2.2	4.4
 Total	8.7	12.8

Le tableau 19 fait voir que les réseaux coopératifs ont 71,198 téléphones. Ce nombre devrait être plus élevé parce qu'un grand nombre de réseaux classifiés comme municipaux et sociétés par actions opèrent presque exclusivement sur une base coopérative. Dans l'Ontario les réseaux municipaux ont été créés par des associations composées de personnes désirant un service téléphonique; les municipalités en ont financé la construction pour se rembourser ensuite au moyen de taxes spéciales imposées aux propriétés desservies. Des 131 réseaux municipaux de l'Ontario, 11 seulement sont la propriété des municipalités. En Alberta des organismes semblables ont été incorporés comme sociétés par actions, mais ils ont été désignés comme réseaux coopératifs dans ce rapport.

La Bell Telephone Company dont le siège social est à Montréal et qui opère dans le Québec et l'Ontario déclare 824,697 téléphones ou 56 p.c. de tous les téléphones au Canada; ses filiales en déclarent un autre 4 p.c. Les réseaux provinciaux des trois Provinces des Prairies déclarent 149,471 appareils, soit 10 p.c. du total. Ces réseaux provinciaux assurent un service interurbain aux réseaux locaux, sauf à Edmonton où il existe un système municipal; ils desservent les grandes villes de ces provinces. Dans l'Est les systèmes provinciaux sont utilisés principalement dans les parcs provinciaux par les gardes forestiers, etc. Les systèmes fédéraux sont situés dans les régions éloignées où il n'existe aucun service commercial.

Le nombre d'appareils reliés à des tableaux automatiques, ou les téléphones à cadran comme on les appelle communément, a augmenté chaque année, même lorsque le total diminuait. En 1940 plus de 53 p.c. du total sont des téléphones à cadran. La majorité de ces appareils se trouvent dans les cinquante et une grandes villes énumérées au tableau 21. Pendant l'année 65,456 téléphones reliés à des tableaux manuels sont devenus des appareils à cadran en ces cités, comparativement à 11,416 dans les autres municipalités. A Hamilton, Ontario, ce qui restait de téléphones à tableaux manuels a été changé pour des appareils à cadran et à Kitchener, Ontario, le réseau entier a été relié à des tableaux automatiques au cours de l'année.

Le tableau suivant montre les conversations téléphoniques à longue distance entre le Canada et les pays étrangers. Pour éviter les doubles emplois, les appels sont déclarés par les réseaux qui en disposent au delà des frontières canadiennes, bien que

certains d'entre eux puissent provenir d'autres réseaux. Les appels venant par la voie des canalisations radiotéléphoniques de l'American Telephone and Telegraph et des connexions de la Bell Telephone via les Etats-Unis ne sont pas calculés. En conséquence, les appels venant de l'extérieur sont incomplets.

Un service régulier a été établi entre le Canada et Terre-Neuve en 1938, mais il n'est entré en opération qu'en janvier 1939; à cause de la guerre il a cessé de fonctionner le 1er septembre en vertu d'un décret du gouvernement. Le circuit téléphonique canadien transatlantique a également été fermé le 31 août.
