TELEPHONE STATISTICS

1 9 4 1

The number of telephones in Canada increased to 1,562,146 from 1,461,038 in 1940, an increase of 6.9 p.c. The loss sustained during 1930-33 was more than offset in 1940 and a new high record was established in 1941. The telephone density was an average of 13.58 telephones per 100 of population which was exceeded only by the United States with 16.56, Sweden with 14.26 and New Zealand with 13.96.

An estimate of the number of telephone conversations during the year was 3,011,527,000 which included 59,747,000 long distance conversations. Both local and long distance calls were the highest yet recorded. Long distance calls are counted but local calls are estimated, based on counts made by the large systems on representative days during the year.

Over 68 p. c. of all telephones were residence telephones and the remaining 32 p.c. were business telephones including public pay stations. Approximately 36 p.c. of the total were business and residence telephones on individual lines and 19 p.c. were on private branch exchanges or extensions which might be considered in somewhat the same class as individual line telephones, raising the percentage to 55 p.c. Two-party line telephones constituted 25 p.c. of the total and telephones on lines accommodating more than four telephones per line, which are classed as "rural" in this report, were 17 p.c. of the total. Four-party line telephones and public pay station telephones which are on individual lines made up the remaining 5 p.c.

The revenue from long distance telephone calls was increased from \$17,648,151 in 1941 to \$20,794,755 or by 17.8 p.c., and the excise tax on long distance calls was increased from \$884,277 to \$1,346,434 or by 52.4 p.c., the rate having been increased effective April 30, 1941, from 6 p.c. to 10 p.c., with fixed minimum and maximum taxes per call.

NOTE: Telephone statistics for foreign countries were taken from "Telephone and Telegraph Statistics of the World - January 1, 1941" by the American Telephone and Telegraph Company.

Telephone densities in the several provinces are shown below:

	Telephones per 100 Population 1941	
	Residence Telephones	All Telephones
Prince Edward Island	4.3	6.2
Nova Scotia	6.9	9.3
New Brunswick	5.8	8.5
Quebec	6.5	10.5
Ontario	13.2	18.6
Manitoba	7.6	11.4
Saskatchewan	7.7	9.8
Alberta	6.5	9.7
British Columbia	13.4	19.2
Yukon Territory	1.7	3.6
Total	9.3	13.6

Table 20 has been revised to include under "co-operative" systems, the systems constructed and operated under Part 11 of the Ontario Telephone Act. Under this Act telephone systems are financed by municipalities but the land of the members is taxed for the cost. Some of these systems sell service to other persons but the majority of those served are the owners of the systems. Also in Alberta stock companies were formed to acquire for the use of the stockholders, portions of the provincial system. These have also been classified as co-operative systems although the companies are legally stock companies.

The Bell Telephone Company, with head office in Montreal and operating in Quebec and Ontario, reported 888,348 telephones or 57 p.c. of all telephones in Canada and its subsidiaries account for another 4 p.c. The provincial systems in the three Prairie Provinces accounted for 160,440 telephones, or 10 p.c. of the total. These provincial systems provide long distance service to the local systems and, except in Edmonton which operates a municipal system, they serve the large cities in these provinces. In the eastern provinces the Provincial systems are mainly in the provincial parks for fire rangers, etc., and the Dominion systems are in outlying sections of the country where no commercial service is available.

The number of telephones on automatic switchboards, or dial telephones as they are commonly known, has increased each year, even when the total number was decreasing. In 1941 55 p.c. of the total was automatic. The majority of these were in the fifty-one large cities listed in table 22. During the year 85,335 telephones were added or transferred from manual to automatic switchboards in these cities, as against 9,048 in other municipalities. In Shawinigan Falls, Que., and in Sudbury, Ont. the entire systems were changed from manual to automatic switchboard during the year.

The following table shows the long distance telephone conversations between Canada and foreign countries. To avoid duplications the calls were reported by the system handling them across the Canadian border, although some of them might have originated on other systems. Calls coming in over the American Telephone and Telegraph radio telephone channels and the Bell Telephone connections via the United States were not compiled. Consequently the incoming calls are incomplete.

A regular service was established between Canada and Newfoundland in 1938, but it did not begin operation until January, 1939, and by Governmental Decree because of war conditions ceased to operate September 1. The Canadian Trans-Atlantic Telephone Circuit was also closed on August 31, 1939.

Chef de la Branche des Transports et Utilités Publiques: G.S. Wrong, B.Sc.

STATISTIQUES DU TELEPHONE

1 9 4 1

Le nombre de téléphones au Canada augmente de 1,461,038 en 1940 à 1,562,148 en 1941, ou de 6.9 p.c. Le recul de la période 1930-33 est plus que compensé et un nouveau sommet est atteint. La densité des téléphones au Canada est de 13.58 appareils en moyenne par 100 habitants, ce qui n'est dépassé que par les Etats-Unis, avec 16.56, la Suède avec 14.26 et la Nouvelle-Zélande avec 13.96.

Le nombre estimatif de conversations téléphoniques durant l'année est de 3,011,527,000 dont 39,747,000 appels interurbains. Ce sont les chiffres les plus élevés encore enregistrés tant pour les appels locaux que pour les appels interurbains. Les appels interurbains sont comptés tandis que les appels locaux sont estimés d'après un comptage effectué par les grands réseaux certains jours représentatifs de l'année.

Plus de 69 p.c. de tous les appareils sont des téléphones domestiques et les 32 p.c. qui restent sont des téléphones commerciaux, y compris les téléphones publics payants. Près de 36 pour cent du total sont des téléphones commerciaux et domestiques sur lignes particulières et 19 p.c. sont des branches privées d'échange ou des extensions, lesquelles peuvent être placées à peu près dans la même catégorie que les téléphones particuliers, ce qui porte le pourcentage à 55 pour cent. Les téléphones à deux postes représentent 25 p.c. du total et les lignes à postes groupés desservant plus de quatre téléphones chacune lesquelles sont classifiées dans ce rapport comme "lignes rurales" représentent 17 p.c. du total. Les téléphones à quatre postes et les téléphones publics payants sur lignes particulières constituent les 3 p.c. qui restent.

Les recettes provenant des appels interurbains passent de \$17,648,151 en 1940 à \$20,794,733 en 1941, augmentation de 17.8 p.c. Les produits de la taxe d'accise sur ces appels augmentent de \$884,277 à \$1,346,434 ou 52.4 p.c., les taux ayant été haussés de 6 p.c. à 10 p.c. le 30 avril 1941, avec taux fixes minimums et maximums pour chaque appel.

NOTA: Les statistiques du téléphone pour les pays étrangers sont extraites de "Telephone and Telegraph Statistics of the World - 1er janvier, 1941" par l'American Telephone and Telegraph Company.

La densité des téléphones dans les diverses provinces est donnée ci-dessous

	Téléphones par 100 âmes 1 9 4 1	
	Téléphones domestiques	Total des téléphones
Ile du Prince-Edouard	4.3	6.2
Nouvelle-Ecosse	6.9	9.9
Nouveau-Brunswick	5.8	8.5
Québec	6.5	10.5
Ontario	13.2	18.6
Manitoba	7.6	11.4
Saskatchewan	7.7	9.8
Alberta	6.3	9.7
Colombie Britannique	13.4	19.2
Yukon	1.7	3.6
Total	9.3	13.6

Le tableau 20 a été repris de façon à inclure sous "réseaux coopératifs" les réseaux construits et exploités subordonnement à la partie 11 de la Loi des téléphones de l'Ontario. En vertu de cette loi, les réseaux téléphoniques sont financés par les municipalités mais les terrains des propriétaires sont taxés pour en défrayer le coût. Certains de ces réseaux vendent leurs services à d'autres personnes, mais la majorité des desservis sont les propriétaires des réseaux. De même en Alberta, des compagnies par actions ont été formées dans le but d'acquérir pour l'usage des actionnaires des parties du système provincial. Ces compagnies sont aussi désignées comme organismes coopératifs bien qu'elles soient légalement des compagnies par actions.

La Bell Telephone Company dont le siège social est à Montréal et qui opère dans le Québec et l'Ontario déclare 888,348 téléphones ou 57 p.c. de tous les téléphones du Canada; ses filiales en déclarent 4 p.c. Les réseaux provinciaux des trois Provinces des Prairies déclarent 160,440 appareils ou 10 p.c. du total. Ces réseaux assurent un service interurbain aux réseaux locaux et, sauf Edmonton qui a son propre système municipal, desservent les grandes villes de ces provinces. Dans les provinces de l'Est, les systèmes provinciaux sont utilisés principalement dans les parcs provinciaux par les gardes forestiers, etc. Les systèmes fédéraux sont situés dans les régions éloignées où il n'existe aucun système commercial.

Le nombre d'appareils téléphoniques reliés à des tableaux automatiques ou téléphones à cadran comme ils sont désignés ordinairement, a augmenté chaque année, même lorsque le total diminuait. En 1941, 55 p.c. de tous les téléphones sont des téléphones automatiques. La majorité de ces appareils se trouvent dans les cinquante et une grandes villes énumérées au tableau 22. Au cours de l'année, 85,355 téléphones ont été ajoutés ou transférés du tableau manuel au tableau automatique dans ces villes en regard de 9,048 dans d'autres municipalités. A Shawinigan Falls, P.Q. et à Sudbury, Ont., les anciens systèmes manuels ont été transformés en systèmes automatiques durant l'année.

Le tableau suivant donne le nombre de conversations téléphoniques à longue distance entre le Canada et les pays étrangers. Pour éviter les doubles emplois, les appels sont déclarés par les réseaux qui en disposent au-delà des frontières canadiennes, bien que certains de ces appels puissent provenir d'autres réseaux. Les appels venant des voies radio-téléphoniques de l'American Telephone and Telegraph et des branchements de la Bell Telephone via les Etats-Unis ne sont pas calculés. En conséquence les appels venant de l'extérieur sont incomplets.

Un service régulier a été établi entre le Canada et Terre-Neuve en 1938 mais il n'est entré en operation qu'en janvier 1939; à cause de la guerre il a cessé de fonctionner le 1er septembre en vertu d'un décret du Gouvernement. Le circuit téléphonique canadien transatlantique a également été fermé le 31 août.
