TELEPHONE STATISTICS

1 9 4 3

The number of telephones in service in Canada continued to increase, reaching a new peak at 1,692,162 in 1943. This was an increase during the year of 64,387 or 4 per cent, and an increase during the past 10 years of 499,832 telephones or 42 per cent. The largest increase during 1943 was in two party lines, which increased by 32,421 or 7.4 per cent. Private branch exchange and extension telephones increased by 13,638 or 4.4 per cent, although residence extensions decreased by 1,294 or 2.6 per cent; this was due to restrictions and the tax on such extensions. Telephones on individual lines increased by 6,485 or 1.2 per cent, on 4 party lines by 1,979 or 8.9 per cent and telephones on rural lines (more than 4 to a line) increased by 9,026 or 3.4 per cent. The other 838 of the increase were public pay telephones.

The number of telephones on automatic switchboards (dial telephones) increased by 30,588 or 3.3 per cent and on manual switchboards by 33,799 or 4.3 per cent, each class retaining the same relative position to the total as in 1942. Over 93 per cent of the dial telephones were in the 59 cities enumerated in table 22.

The estimated number of conversations or completed calls included a count of 50,347,917 long distance calls and an estimate based on counts by large systems on representative days of 2,929,446,000 local calls, or a total of 2,979,793,917 calls. This was a slight reduction in the local calls from the 1942 and 1941 estimates but a new high record for long distance calls. The big increase here was in calls between Canada and the United States and Alaska; Trans-oceanic calls, except to and from Newfoundland, have practically ceased, and calls to other western hemisphere countries have been reduced also.

The revenue from long distance calls increased from \$24,056,705 in 1942 and \$15,636,249 in 1939 to \$28,550,436 in 1943, whereas revenue from subscribers, renters, etc. increased from \$56,310,788 in 1942 and \$47,501,533 in 1939 to \$58,786,854. Total revenues increased from \$87,057,252 in 1942 to \$94,406,757 or by 8.4 per cent. The Federal excise tax on long distance calls increased from \$2,269,070 in 1942 to \$3,409,070 and on extension telephones the tax increased from \$39,116 to \$146,968. This latter tax was effective only from June 24, 1942. Taxes paid by the telephone systems increased from \$12,402,630 in 1942 to \$15,286,611 or by 23 per cent.

There was an increase in the number of employees from 20,360 in 1942 to 20,694 or 1.6 per cent but salaries and wages were increased from \$31,580,290 to \$33,581,699 or by 6.3 per cent.

The increase in pole line mileage was only 744 miles or 0.3 per cent and wire mileage increased by 43,284 miles or 0.7 per cent.

Telephone densities in the several provinces are shown below:

	Telephones per 100 Population 1943	
	Residence Telephones	All Telephones
Prince Edward Island .....	5.1	7.3
Nova Scotia .....	7.5	10.8
New Brunswick .....	6.2	9.1
Quebec .....	6.7	11.0
Ontario .....	13.6	19.3
Manitoba .....	8.7	12.7
Saskatchewan .....	9.0	11.4
Alberta .....	7.0	10.8
British Columbia .....	13.1	18.7
Yukon Territory .....	1.2	2.3
Total .....	9.8	14.3

Table 20 was revised in 1941 to include under "co-operative" systems, the systems constructed and operated under Part II of the Ontario Telephone Act. Under this Act telephone systems are financed by municipalities but the land of the members is taxed for the cost. Some of these systems sell service to other persons but the majority of those served are the owners of the systems. Also in Alberta stock companies were formed to acquire, for the use of the stockholders, portions of the provincial system. These have also been classified as co-operative systems although the companies are legally stock companies.

The Bell Telephone Company, with head office in Montreal and operating in Quebec and Ontario, reported 956,113 telephones or 57 p.c. of all telephones in Canada and its subsidiaries account for another 4 p.c. The provincial systems in the three Prairie Provinces accounted for 177,919 telephones, or 10.5 p.c. of the total. These provincial systems provide long distance service to the local systems and, except in Edmonton which operates a municipal system, they serve the large cities in these provinces. In the eastern provinces the Provincial systems are mainly in the provincial parks for fire rangers, etc., and the Dominion systems are in outlying sections of the country where no commercial service is available.

The following table shows the long distance telephone conversations between Canada and foreign countries. To avoid duplications the calls were reported by the system handling them across the Canadian border, although some of them might have originated on other systems. Calls coming in over the American Telephone and Telegraph radio telephone channels and the Bell Telephone connections via the United States were not compiled. Consequently the incoming calls are incomplete.

A regular service was established between Canada and Newfoundland in 1938, but it did not begin operation until January, 1939, and by Governmental Decree because of war conditions ceased to operate September 1, but resumed operation on June 22, 1940. The Canadian Trans-Atlantic Telephone Circuit was closed on August 31, 1939.

STATISTIQUES DU TELEPHONE

1 9 4 3

Le nombre de téléphones au Canada continue d'augmenter, atteignant un nouveau sommet en 1943 avec un total de 1,692,162. C'est là une augmentation de 64,387 ou 4 p.c. durant l'année, et de 499,832 téléphones ou 42 p.c. au cours des dix dernières années. La plus forte augmentation en 1943 est celle des téléphones à deux postes, accroissement de 32,421 ou 7.4 p.c. Les branches privées d'échange et les extensions augmentent de 13,638 ou 4.4 p.c., bien que les extensions de téléphone dans les habitations diminuent de 1,294 ou 2.6 p.c.; cela à cause des restrictions et de la taxe sur ces extensions. Les téléphones sur lignes particulières augmentent de 6,485 ou 1.2 p.c., les téléphones à quatre postes, de 1,979 ou 8.9 p.c. et les téléphones sur lignes rurales (plus de 4 sur une ligne), de 9,026 ou 3.4 p.c. Les téléphones publics payants ont à leur crédit le reste de l'augmentation, soit 838.

Le nombre d'appareils téléphoniques reliés à des tableaux automatiques (téléphones à cadran) s'accroît de 30,588 ou 3.3 p.c.; celui d'appareils reliés à des tableaux manuels, de 33,799 ou 4.3 p.c.; ces deux catégories occupent la même position par rapport au total qu'en 1942. Plus de 93 p.c. des appareils téléphoniques automatiques se trouvent dans les 59 cités énumérées dans le tableau 22.

Le nombre estimatif de conversations téléphoniques ou d'appels complets comprend 50,347,917 appels interurbains et à grande distance comptés, et une estimation, d'après un comptage effectué par les grands réseaux certains jours représentatifs, de 2,929,446,000 appels locaux, soit un total de 2,979,793,917 appels. Il y a une légère diminution du nombre d'appels locaux sur les estimations de 1942 et de 1941, mais les appels à grande distance atteignent un nouveau sommet. Ici, la forte augmentation a lieu dans les appels entre le Canada et les Etats-Unis; les appels transocéaniques venant de l'Alaska, sauf ceux à destination et venant de Terre-Neuve, ont presque cessé, et les appels aux autres pays de l'hémisphère occidental ont diminué également.

Les recettes provenant des appels interurbains et à grande distance passent de \$24,056,705 en 1942 et de \$15,636,249 en 1939 à \$28,550,436 en 1943, tandis que celles provenant des abonnés, des loueurs, etc. passent de \$56,310,788 en 1942 et de \$47,501,533 en 1939 à \$58,786,854. Les recettes globales augmentent de \$87,057,252 en 1942 à \$94,406,757, ou de 8.4 p.c. Les produits de la taxe d'accise fédérale sur les appels interurbains et à grande distance passent de \$2,269,070 en 1942 à \$3,409,070, et ceux de la taxe sur les téléphones à extension augmentent de \$39,116 à \$146,968. Cette dernière taxe n'est en vigueur que depuis le 24 juin 1942. Les taxes payées par les réseaux téléphoniques passent de \$12,402,630 en 1942 à \$15,286,611 soit une augmentation de 6.3 p.c.

Il y a augmentation de 1.6 p.c. du personnel, le nombre d'employés passent de 20,360 en 1942 à 20,694, mais l'augmentation des salaires et gages est de 6.3 p.c., le montant passent de \$51,580,290 à \$53,581,699.

L'augmentation du nombre de milles des lignes sur poteaux est de 744 seulement ou de 0.3 p.c., et celle du nombre de milles de fils est de 43,284 ou 0.7 p.c.

Densité des téléphones dans les différentes provinces est indiquée ci-dessous

	Appareils par 100 habitants 1 9 4 3	
	Téléphones domestiques	Total des téléphones
Ile du Prince-Edouard .....	5.1	7.5
Nouvelle-Ecosse .....	7.5	10.8
Nouveau-Brunswick .....	6.2	9.1
Québec .....	6.7	11.0
Ontario .....	13.6	19.5
Manitoba .....	8.7	12.7
Saskatchewan .....	9.0	11.4
Alberta .....	7.0	10.8
Colombie Britannique .....	13.1	18.7
Territoire du Yukon .....	1.2	2.5
Total .....	9.8	14.5

Le tableau 20 a été repris en 1941 de façon à inclure sous "réseaux coopératifs" les réseaux construits et exploités subordonnément à la partie 11 de la Loi des téléphones de l'Ontario. En vertu de cette loi, les réseaux téléphoniques sont financés par les municipalités mais les terrains des propriétaires sont taxés pour en défrayer le coût. Certains de ces réseaux vendent leurs services à d'autres personnes mais la majorité des desservis sont les propriétaires des réseaux. De même en Alberta, des compagnies par actions ont été formées dans le but d'acquérir pour l'usage des actionnaires des parties de système provincial. Ces compagnies sont aussi désignées comme organismes coopératifs bien qu'elles soient légalement des compagnies par actions.

Le Bell Telephone Company dont le siège social est à Montréal, et qui opère dans le Québec et l'Ontario, déclare 956,113 téléphones ou 57 p.c. de tous les téléphones du Canada; ses filiales en comptent 4 p.c., en plus. Les réseaux provinciaux des trois Provinces des Prairies rapportent 177,919 appareils ou 10.5 p.c. du total. Ces réseaux assurent un service interurbain aux réseaux locaux et, sauf Edmonton qui a son propre système municipal, desservent les grandes villes de ces provinces. Dans les provinces de l'Est du Canada, les systèmes provinciaux sont utilisés principalement dans les parcs provinciaux, par les gardes forestiers, etc. Les systèmes fédéraux sont situés dans les régions éloignées où il n'existe aucun système commercial.

Le tableau suivant donne le nombre de conversations téléphoniques à grande distance entre le Canada et les pays étrangers. Pour éviter les doubles emplois, les appels sont déclarés par les réseaux qui en disposent au-delà des frontières canadiennes, bien que certains de ces appels puissent provenir d'autres réseaux. Les appels venant des voies radio-téléphoniques de l'American Telephone and Telegraph et des branchements de la Bell Telephone via les Etats-Unis ne sont pas calculés. En conséquence, les appels venant de l'extérieur sont incomplets.

Un service régulier a été établi entre le Canada et Terre-Neuve en 1938 mais il n'est entré en opération qu'en janvier 1939; à cause de la guerre, il a cessé de fonctionner le 1er septembre, en vertu d'un décret fédéral, mais il a été remis en opération le 22 juin 1940. Le circuit téléphonique canadien transatlantique a également été fermé le 31 août 1939.
