TELEPHONE STATISTICS

20-1410

1944

The number of telephones in service in Canada continued to increase in 1944, although to a less extent and at a lower rate than during the previous four years. The increase over 1943 was 59,761 telephones or 3.5 per cent to bring the total to 1,751,923, which was an increase over 1934 of 554,894 telephones or 46.4 per cent. Due to shortage of materials, telephones on 2 party lines increased during 1944 more than those on individual lines, which was also true for 1943. The same factor and the tax on private extension telephones caused a reduction in these from a peak of 54,725 in 1941 to 48,680 in 1944. Business branch line and extension telephones continued to increase. Public pay stations also continued to increase, reaching 32,550 telephones. Telephones on lines serving more than four customers, classed in these statistics as rural, increased by 9.2 per cent for business telephones and 3.7 per cent for residence telephones.

Dial telephones, or those on automatic switchboards, also continued to increase but at a much lower rate than in 1939, 1940 and 1941. They amounted to 989,103 in 1944 or 56 per cent of all telephones; 93 per cent of these dial telephones were in the 59 cities for which data are shown in table 22. Transfers from manual switchboards to automatic switchboards in 1939, 1940 and 1942 caused a net decrease for these telephones on manual switchboards, but in 1943 and 1944 there were net increases of 33,799 and 51,694 telephones respectively.

The estimated number of telephone conversations or completed calls, including a count of 56,678,095 long distance calls and an estimate of local calls based on counts made by the large systems on representative days amounting to 2,955,975,000, was a total of 3,012,653,095. This was an increase over 1943 for local calls, although not a high record, and was a decrease in relation to the number of telephones, but was a new high record for long distance calls, averaging 32.4 per telephone. The big increase was in calls between Canada and the United States and Alaska; trans-oceanic calls, except to and from Newfoundland, have practically ceased during the war. Telephone calls to other western hemisphere countries have also been very few.

Revenues from long distance calls increased from \$28,550,436 in 1943 to \$31,978,502, and from subscribers, renters, etc., from \$58,786,854 to \$61,323,606, and total revenues increased from \$94,406,757 to \$101,082,353. Operating expenses increased from \$59,263,058 to \$64,889,346 and taxes from \$15,286,611 to \$15,591,634, but interest decreased from \$7,267,619 to \$7,190,440. The federal excise tax on long distance calls increased from \$3,409,146 to \$3,913,656, but the tax on telephone extensions decreased from \$146,968 to \$143,276; there is also a provincial tax on long distance calls in Nova Scotia. These are not treated as company taxes.

The number of employees increased from 20,694 to 21,978 or by 6.2 per cent and the pay roll increased from \$33,581,699 to \$37,261,134 or by 11.0 per cent.

Telephone densities in the several provinces are shown below:

	Telephones per 100 ¹ Population 1944	
	Residence Telephones	All Telephones
Prince Edward Island	5.6	8.0
Nova Scotia	7.7	11.1
New Brunswick	6.4	9.5
Quebec	6.9	11.3
Ontario	13.8	19.7
Manitoba	9.0	13.1
Saskatchewan	9.3	11.7
Alberta	7.0	10.8
British Columbia	12.8	18.6
Yukon Territory	1.3	2.3
Total	10.0	14.6

Table 20 was revised in 1941 to include under "co-operative" systems, the systems constructed and operated under Part 11 of the Ontario Telephone Act. Under this Act telephone systems are financed by municipalities but the land of the members is taxed for the cost. Some of these systems sell service to other persons but the majority of those served are the owners of the systems. Also in Alberta stock companies were formed to acquire, for the use of the stockholders, portions of the provincial system. These have also been classified as co-operative systems although the companies are legally stock companies.

The Bell Telephone Company, with head office in Montreal and operating in Quebec and Ontario, reported 987,530 telephones or 56 p.c. of all telephones in Canada and its subsidiaries accounted for another 4 p.c. The provincial systems in the three Prairie Provinces accounted for 185,007 telephones, or 10.6 p.c. of the total. These provincial systems provide long distance service to the local systems and, except in Edmonton which operates a municipal system, they serve the large cities in these provinces. In the eastern provinces the Provincial systems are mainly in the provincial parks for fire rangers, etc., and the Dominion systems are in outlying sections of the country where no commercial service is available.

The following table shows the long distance telephone conversations between Canada and foreign countries. To avoid duplications the calls were reported by the system handling them across the Canadian border, although some of them might have originated on other systems. Calls coming in over the American Telephone and Telegraph radio telephone channels and the Bell Telephone connections via the United States were not compiled. Consequently the incoming calls are incomplete.

A regular service was established between Canada and Newfoundland in 1938, but it did not begin operation until January, 1939, and by Governmental Decree because of war conditions ceased to operate September 1, but resumed operation on June 22, 1940. The Canadian Trans-Atlantic Telephone Circuit was closed on August 31, 1939.

STATISTIQUES DU TELEPHONE

1944

Le nombre de téléphones au Canada continue d'augmenter en 1944, bien qu'en moindre proportion et de façon plus ralenties que durant les quatre années précédentes. L'augmentation sur 1943 est du 59,761 ou 5.5 p.c., au total de 1,751,923, soit une augmentation sur 1934 de 554,894 téléphones ou 46.4 p.c. A cause de la pénurie de matériel, les téléphones à deux postes augmentent plus que ceux des lignes particulières en 1944, comme en 1943. Le même facteur et la taxe sur les extensions privées les diminuent d'un sommet de 54,725 en 1941 à 48,680 en 1944. Les embranchements et extensions téléphoniques d'affaires continuent d'augmenter. Les téléphones publics payants continuent aussi d'augmenter et atteignent 32,550. Les lignes téléphoniques desservant plus de quatre usagers, classées dans ces statistiques comme rurales, augmentent de 9.2 p.c. pour les téléphones d'affaires et de 3.7 p.c. pour ceux des habitations.

Les appareils automatiques ou les appareils reliés à des tableaux automatiques, continuent aussi d'augmenter mais beaucoup plus lentement qu'en 1939, 1940 et 1941. Ils sont au nombre de 989,103 en 1944 ou 56 p.c. de tous les téléphones; 93 p.c. de ces appareils téléphoniques automatiques sont dans 59 villes dont les données se trouvent au tableau 22. Les transferts des tableaux manuels aux tableaux automatiques en 1939, 1940 et 1942, sont cause d'une diminution nette de ces appareils reliés aux tableaux manuels; mais en 1943 et 1944, il y a augmentations nettes de 33,799 et 31,694 téléphones respectivement.

Le nombre estimatif de conversations téléphoniques ou d'appels complétés comprennent 56,678,095 appels interurbains et à grande distance comptés et une estimation, d'après un comptage effectué par les grands réseaux certains jours représentatifs, de 2,955,975,000 appels locaux, soit un total de 3,012,653,095. Ce chiffre représente une augmentation des appels locaux sur 1943, mais n'est pas sans précédent, et une diminution relativement au nombre d'appareils. C'est par ailleurs, un chiffre sans précédent pour les appels à grande distance, soit, en moyenne, 32.4 appels par téléphone. La forte augmentation a lieu dans les appels entre le Canada et les Etats-Unis et l'Alaska; les appels transocéaniens, sauf ceux à destination et venant de Terre-Neuve, ont à peu près cessé durant la guerre et les appels aux autres pays de l'hémisphère occidental ont aussi été très peu nombreux.

Les recettes provenant des appels interurbains et à grande distance passent de \$28,550,436 en 1943 à \$31,978,302, et celles provenant des abonnés, loueurs, etc., de \$58,786,854 à \$61,323,606. Les recettes globales augmentent de \$94,406,757 à \$101,082,353; les dépenses d'exploitation augmentent de \$59,263,058 à \$64,889,346 et les taxes de \$15,286,611 à \$15,591,634; mais l'intérêt diminue de \$7,267,619 à \$7,190,440. La taxe d'accise fédérale sur les appels interurbains et à grande distance augmente de \$3,409,146 à \$3,913,656 mais la taxe sur les extensions diminue de \$146,968 à \$143,276. Il y a également une taxe provinciale sur les appels interurbains en Nouvelle-Ecosse. Elle n'est pas considérée comme taxe sur la compagnie.

Le nombre d'employés augmente de 20,694 à 21,978 ou de 6.2 p.c. et les salaires et gages, de \$33,581,699 à \$37,261,134 ou de 11.0 p.c.

La densité des téléphones dans les différentes provinces est indiquée ci-dessous

	Appareils par 100 habitants 1944	
	Téléphones domestiques	Total des téléphones
Ile' du Prince-Edouard	5.6	8.0
Nouvelle-Ecosse	7.7	11.1
Nouveau-Brunswick	6.4	9.5
Québec	6.9	11.3
Ontario	13.8	19.7
Manitoba	9.0	13.1
Saskatchewan	9.3	11.7
Alberta	7.0	10.8
Colombie Britannique	12.8	18.6
Territoire du Yukon	1.3	2.3
Total	10.0	14.6

Le tableau 20 a été repris en 1941 de façon à inclure sous "réseaux coopératifs" les réseaux construits et exploités subordonnément à la partie 11 de la Loi des téléphones de l'Ontario. En vertu de cette loi, les réseaux téléphoniques sont financés par les municipalités mais les terrains des propriétaires sont taxés pour en défrayer le coût. Certains de ces réseaux vendent leurs services à d'autres personnes mais la majorité des desservis sont les propriétaires des réseaux. De même en Alberta, des compagnies par actions ont été formées dans le but d'acquérir pour l'usage des actionnaires des parties de système provincial. Ces compagnies sont aussi désignées comme organismes coopératifs bien qu'elles soient légalement des compagnies par actions.

Le Bell Telephone Company dont le siège social est à Montréal, et qui opère dans le Québec et l'Ontario, déclare 987,530 téléphones ou 56 p.c. de tous les téléphones du Canada; ses filiales en comptent 4 p.c., en plus. Les réseaux provinciaux des trois Provinces des Prairies rapportent 185,007 appareils ou 10.6 p.c. du total. Ces réseaux assurent un service interurbain aux réseaux locaux et, sauf Edmonton qui a son propre système municipal, desservent les grandes villes de ces provinces. Dans les provinces de l'Est du Canada, les systèmes provinciaux sont utilisés principalement dans les parcs provinciaux, par les gardes forestiers, etc. Les systèmes fédéraux sont situés dans les régions éloignées où il n'existe aucun système commercial.

Le tableau suivant donne le nombre de conversations téléphoniques à grande distance entre le Canada et les pays étrangers. Pour éviter les doubles emplois, les appels sont déclarés par les réseaux qui en disposent au-delà des frontières canadiennes, bien que certains de ces appels puissent provenir d'autres réseaux. Les appels venant des voies radio-téléphoniques de l'American Telephone and Telegraph et des branchements de la Bell Telephone via les Etats-Unis ne sont pas calculés. En conséquence, les appels venant de l'extérieur sont incomplets.

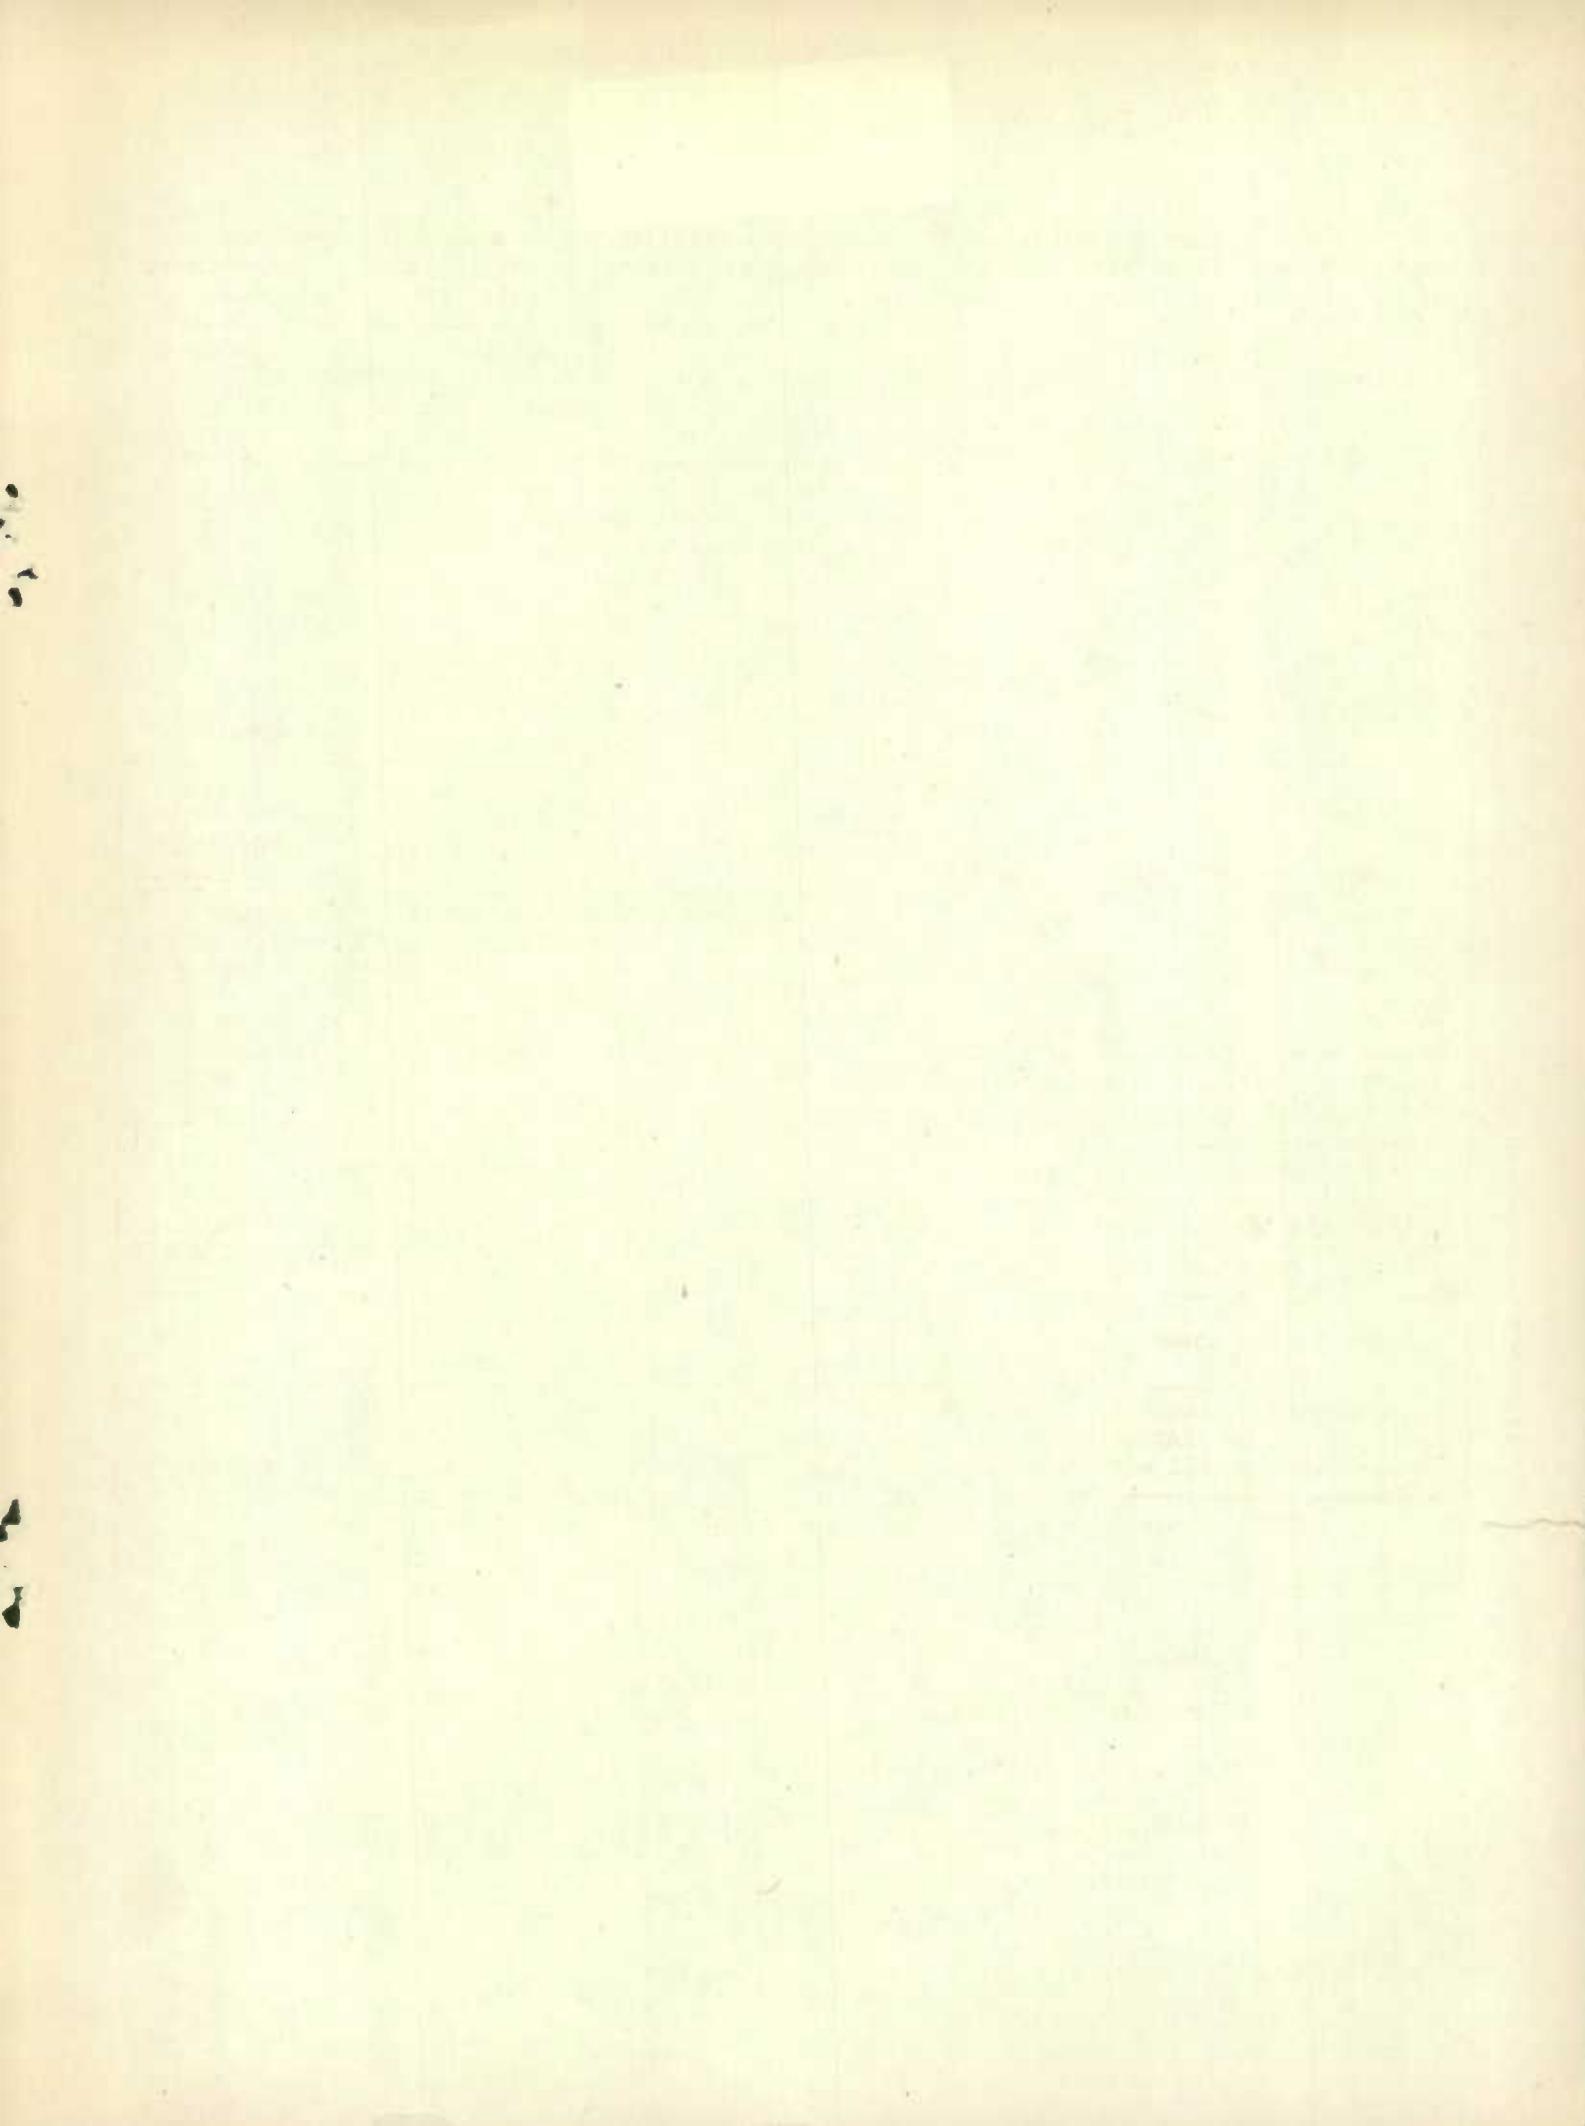

Un service régulier a été établi entre le Canada et Terre-Neuve en 1938 mais il n'est entré en opération qu'en janvier 1939; à cause de la guerre, il a cessé de fonctionner le 1er septembre, en vertu d'un décret fédéral, mais il a été remis en opération le 22 juin 1940. Le circuit téléphonique canadien transatlantique a été fermé le 31 août 1939.
