TELEPHONE STATISTICS

20-1410

1 9 4 5

With easing of the supply and labour situation the number of telephones increased by 36,871 in 1945 as compared with 59,761 the previous year. Business telephones increased by 26,906, residence telephones by 55,013, rural by 14,236 and public pay by 716 as compared with increases in 1944 of 20,362; 26,833; 11,319 and 1,247 respectively. The increase in automatic or dial telephones was 47,912 and in telephones on manual switchboards, 48,959, and consequently the ratios remained unchanged at 56 per cent dial and 44 per cent on manually operated switchboards.

The large telephone systems make counts of completed calls on representative days and from these counts they make estimates of telephone conversations for the year which added to the actual count of long distance conversations gives the total volume of business. From these data this Bureau makes an estimate for the small systems which do not count completed calls. The conversations thus computed increased from 3,012,653,000 in 1944 to 3,210,280,000 or by 6.6 per cent. There was a large increase in the long distance calls between Canada and the United States and with restrictions lifted calls between Canada and Newfoundland and the United Kingdom and Eire also more than doubled in number.

The property account increased by \$16,571,547 to \$418,434. Gross revenues which have been increasing each year reached \$109,899,862, the operating expenses increased to \$96,417,884 and net revenues to \$13,481,978.

The number of employees increased from 21,978 in 1944 to 25,579 and the pay roll from \$37,261,134 to \$41,830,117.

Telephone densities in the several provinces are shown below:

	Telephones per 100 Population 1 9 4 5	
	Residence Telephones	All Telephones
Prince Edward Island	5.9	8.3
Nova Scotia	7.9	11.2
New Brunswick	6.7	9.7
Quebec	7.3	11.9
Ontario	14.5	20.6
Manitoba	9.3	13.6
Saskatchewan	9.6	12.3
Alberta	7.3	11.1
British Columbia	12.9	18.9
Yukon Territory	1.3	2.3
Total	10.4	15.3

Table 20 was revised in 1941 to include under "co-operative" systems, the systems constructed and operated under Part 11 of the Ontario Telephone Act. Under this Act telephone systems are financed by municipalities but the land of the members is taxed for the cost. Some of these systems sell service to other persons but the majority of those served are the owners of the systems. Also in Alberta stock companies were formed to acquire, for the use of the stockholders, portions of the provincial system. These have also been classified as co-operative systems although the companies are legally stock companies.

The Bell Telephone Company, with head office in Montreal and operating in Quebec and Ontario, reported 1,050,113 telephones or 57 p.c. of all telephones in Canada and its subsidiaries accounted for another 4 p.c. The provincial systems in the three Prairie Provinces accounted for 195,205 telephones, or 10.6 p.c. of the total. These provincial systems provide long distance service to the local systems and, except in Edmonton which operates a municipal system, they serve the large cities in these provinces. In the eastern provinces the Provincial systems are mainly in the provincial parks for fire rangers, etc., and the Dominion systems are in outlying sections of the country where no commercial service is available.

The following table shows the long distance telephone conversations between Canada and foreign countries. To avoid duplications the calls were reported by the system handling them across the Canadian border, although some of them might have originated on other systems. Calls coming in over the American Telephone and Telegraph radio telephone channels and the Bell Telephone connections via the United States were not compiled. Consequently the incoming calls are incomplete.

A regular service was established between Canada and Newfoundland in 1938, but it did not being operation until January, 1939, and by Governmental Decree because of war conditions ceased to operate September 1, but resumed operation on June 22, 1940. The Canadian Trans-Atlantic Telephone Circuit which has been closed since August 31, 1939, was reopened on June 28, 1945. The Canada-Barbados service was inaugurated on September 1, 1945.

(1) Populations in inter-census years were prorated.

(1) Les populations des années entre recensements ne sont pas établies au pro rata.

BUREAU FEDERAL DE LA STATISTIQUE
BRANCHE DES TRANSPORTS ET DES UTILITES PUBLIQUES

Statisticien du Dominion: Herbert Marshall

Chef de la Branche des Transports et Utilités Publiques: G.S. Wong

STATISTIQUES DU TELEPHONE

1 9 4 5

Comme résultat de la détente qui s'est produite dans la situation de l'outillage et de la main-d'oeuvre le nombre de téléphones augmente de 59,761 en 1944 à 96,871 en 1945. Les téléphones d'affaires augmentent de 26,906, les téléphones domiciliaires, de 55,013, les téléphones ruraux, de 14,236 et les taxiphones ou téléphones publics payants, de 716, en comparaison d'augmentations en 1944 de 20,362, 26,853, 11,319 et 1,247 respectivement. L'augmentation des appareils automatiques ou à cadran est de 47,912, et de 48,959 pour les appareils reliés à des tableaux manuels; la proportion reste donc la même, soit 56 p.c. pour les appareils automatiques et 44 p.c. pour les appareils reliés à des tableaux manuels.

A certains jours représentatifs, les grands réseaux comptent les appels complétés et, d'après ce comptage, ils établissent le nombre estimatif d'appels pour l'année, laquelle ajoutés aux appels interurbains, donnent le volume des affaires. A la lumière de ces renseignements, le Bureau Fédéral de la Statistique prépare une estimation des petits réseaux qui ne comptent pas les appels complétés.

Les conversations ainsi calculées augmentent de 3,012,653,000 en 1944 à 3,210,280,000, soit de 6.6 p.c. Une forte augmentation est enregistrée dans les appels interurbains ou à grande distance entre le Canada et les États-Unis et, comme les restrictions sont abolies sur les appels entre le Canada et Terre-Neuve, le Royaume-Uni et l'Irlande, le volume des appels entre le Canada et ces pays augmente de plus de 100 p.c.

Les biens augmentent de \$16,571,547 et atteignent \$418,454,346, les revenus globaux qui augmentent à chaque année touchent \$109,899,862, les frais d'exploitation s'établissent à \$96,417,884 et les revenus nets, à \$13,481,978.

Le nombre d'employés augmente de 21,978 en 1944 à 25,579 et les salaires et gages, de \$37,261,134 à \$41,830,117.

La densité des téléphones dans les différentes provinces est indiquée ci-dessous

	Appareils par 100 habitants 1 9 4 5	
	Téléphones domiciliaires	Total des téléphones
Ile du Prince-Edouard	5.9	8.3
Nouvelle-Ecosse	7.9	11.2
Nouveau-Brunswick	6.7	9.7
Quebec	7.3	11.9
Ontario	14.5	20.6
Manitoba	9.3	13.6
Saskatchewan	9.6	12.3
Alberta	7.3	11.1
Colombie Britannique	12.9	18.9
Territoire du Yukon	1.3	2.3
Total	10.4	15.3

Le tableau 20 a été repris en 1941 de façon à inclure sous "réseaux coopératifs" les réseaux construits et exploités subordonnement à la partie 11 de la loi des téléphones de l'Ontario. En vertu de cette loi, les réseaux téléphoniques sont financés par les municipalités mais les terrains des propriétaires sont taxés pour en défrayer le coût. Certains de ces réseaux vendent leurs services à d'autres personnes mais la majorité des desservis sont les propriétaires des réseaux. De même en Alberta, des compagnies par actions ont été formées dans le but d'acquérir pour l'usage des actionnaires des parties du réseau provincial. Ces compagnies sont aussi désignées comme organismes coopératifs bien qu'elles soient légalement des compagnies par actions.

Le Bell Telephone Company dont le siège social est à Montréal et qui opère dans le Québec et l'Ontario déclare 1,050,113 téléphones ou 57 p.c. de tous les téléphones du Canada; ses filiales en comptent 4 p.c., en plus. Les réseaux provinciaux des trois Provinces des Prairies déclarent 195,205 appareils ou 10.6 p.c. du total. Ces réseaux assurent un service interurbain aux réseaux locaux et, sauf Edmonton qui a son propre réseau municipal, desservent les grandes villes de ces provinces. Dans les provinces de l'Est du Canada, les réseaux provinciaux sont utilisés principalement dans les parcs provinciaux, par les gardes forrestiers, etc. Les réseaux fédéraux sont situés dans les régions éloignées où il n'existe aucun réseau commercial.

Le tableau suivant donne le nombre de conversations téléphoniques entre le Canada et les pays étrangers. Pour éviter les doubles emplois, les appels sont déclarés par les réseaux qui en disposent au-delà des frontières canadiennes, bien que certains de ces appels puissent provenir d'autres réseaux. Les appels venant des voies radio-téléphoniques de l'American Telephone and Telegraph et des branchements de la Bell Telephone via les Etats-Unis ne sont pas calculés. En conséquence, les appels venant de l'extérieur sont incomplets.

Un service régulier a été établi entre le Canada et Terre-Neuve en 1938 mais il n'a été inauguré qu'en janvier 1939; à cause de la guerre, il a cessé de fonctionner le 1er septembre, en vertu d'un décret fédéral, mais il a été remis en opération le 22 juin 1940. Le circuit téléphonique canadien transatlantique qui était fermé depuis le 31 août 1939 a été rouvert le 28 juin 1945. Le service Canada-Barbades fut inauguré le 1er septembre 1945.
