# RADIO AND TELEVISION BROADCASTING 1962 

## INTRODUCTION

This report presents the results of a survey of the Canadian radio and television broadcasting industry for 1962. The survey was designed to collect financial statistics and other information for the use of the Board of Broadcast Governors, the Department of Transport, and the Dominion Bureau of Statistics.

The data shown in Table 1 of this report have been taken from reports prepared by the Dominion Bureau of Statistics in previous years. These figures for previous years have been adjusted to achieve comparability with the revised concepts reflected in the 1961 and 1962 figures. The table shows the combined results of the public and private sector of
the broadcasting industry for the years 1958 to 1961. However, for 1962, the private sector and the CBC are shown in separat e columns.

Tables 7 and 8 deal with the broadcasting industry as a whole and include the assets and liabilities of the CBC, but Tables 2 to 6 inclusive present data on the privately-owned sector of the broadcasting industry only. This is a change from 1961 when we included the results of the operation of the CBC in all tables except 4 and 5.

Data for privately owned stations cover their operations for their fiscal period ending within calendar year 1962, while data for the CBC are for its fiscal year ended March 31, 1963.

## Review of Survey Results

The radio and television broadcasting industry registered a compound rate of growth in revenues of approximately 8 per cent per annum during the five Year period 1958 to 1962 . Between 1961 and 1962 the total broadcasting revenue increased $11 \%$ (from $\$ 103.9$ to $\$ 115.5$ million) and the total operating revenues increased $12 \%$ (from $\$ 110.6$ to $\$ 124.4$ million). Of these totals, which include the CBC, the radio broadcasting sector contributed $\$ 55.9$ million or $45 \%$ and the television broadcasting sector contributed $\$ 68.5$ million or $55 \%$. On a comparable basis the results of 1961 showed that radio contributed $\$ 51.5$ million or $46.6 \%$ and television contributed $\$ 59.1$ million or $53.4 \%$.

During 1962 the number of private television stations reporting to the DBS increased by 3 to 58 ; and there were 4 additional radio stations bringing the total surveyed to 198. The advent of these new stations, however, did not materially change the pattern of the industry's revenue sources. In both 1961 and 1962, revenues from network and national advertising represented $63 \%$, while revenues from local advertising made up $37 \%$ of total broadcasting revenues, as both categories increased approximately $11 \%$ during 1962. Other non-broadcasting revenue increased by $33 \%$ between the two years and, as a result, total operating revenues at $\$ 124.4$ million for 1962 showed an increase of $12 \%$ over 1961.

Operating expenses of the broadcasting industry increased from $\$ 181.1$ million to $\$ 196.0$ million between 1961 and 1962, an increase of $8 \%$. Some
categories of expense increased at a much faster rate than the overall total; notable increases were registered by depreciation and amortization at $\$ 11.4$ million ( $\$ 6.2$ million), and wages and salaries $\$ 82.1$ million ( $\$ 75.0$ million). Other items showing marked increases are commissions paid to representative agencies and interest charges. The growth of revenues exceeded the growth of expenses and resulted in an operating profit of $\$ 5.3$ million in 1962 compared to an operating loss of $\$ 0.2$ million in 1961.

The following table gives an analysis of the operating revenue of the CBC for the year ending March 31, 1963. It shows that the radio operations of the Corporation brought in $9.5 \%$ of its total broadcasting revenues, a much smaller proportion than the contribution of radio operations to revenue of the private broadcasting sector. "Other non-broadcasting operating revenues" are shown at $\$ 556.000$ : included in this total is income from non-broadcasting operations in the amount of $\$ 443,000$ which is made up of interest on investments held and other sundry items. These were included in operating income in conformity with the Corporation's practice and because they formed a relatively insignificant proportion of the total revenue of the Corporation. The revenue reported in the table is arrived at after deducting certain payments to stations and commissions to advertising agencies and networks from both revenues and expenses as reported in the annual report of the $C B C$.

## Analysis of Broadcasting Revenue of the Canadian Broadcasting Corporation for the Year Ending March 31, 1963

|  | Fadio | Te levision | Total |
| :---: | :---: | :---: | :---: |
|  | thousands of dollars |  |  |
| Broadcasting revenue from: |  |  |  |
| (a) Network and national advertising .................................................. | 1,329 | 19,449 | 20,778 |
| (b) Local advertising ............. | 815 | 1,047 | 1,862 |
| Total broadcasting revenue | 2.144 | 20.496 | 22,640 |
| Other non-broadcasting operating revenue ... | 205 | 351 | 556 |
| Total operating revenue ........................................................... | 2,348 | 20, 847 | 23,196 |

Some broadcasting firms have sources of income, and incur expenses, from otherthan-broadcasting activities. Interest or dividends from investments and rental income are classified under this heading by the DBS. In 1962, the net of other-thanbroadcasting income less expenses amounted to $\$ 288,151$ for the private sector, which was a substantial reduction from $\$ 1,057,260$ for the whole industry shown in 1961; part of the reduction is accounted for by showing the non-broadcasting income of the $C B C$ with other operating incomes as noted above. Income taxes paid by the profitable firms amounted to $\$ 3.5$ million in 1961 and $\$ 3.9$ million in 1962. After the above adjustments, table 1 shows that the private broadcasting industry reaped a net profit in 1962 of $\$ 1.7$ million compared to a loss of $\$ 2.7$ million in 1961 .

In 1962 there were 15,767 employees engaged in the broadcasting industry, an increase of 253 , or $1.6 \%$ over 1961. Salaries and wages paid by the industry totalled $\$ 82.1$ million, an increase of $9.6 \%$. Staff benefits which include such expenses as staff pensions, medical insurance and other items showed an increase of $18 \%$ over the previous year.

Table 2 presents a statement of the operation of the private radio broadcasting industry for 1962 by provinces. Comparison of this year's table with that prepared for 1961 is complicated by the inclusion of CBC operations in Ontario for 1961, but as the 1961 loss on operations for the CBC amounted to $\$ 410,000$ for both radio and television (Table 6 , 1961), the distortion is not serious. A comparison of 1961 with 1962 , shows that stations in seven out of ten areas report ed increased net operating rev enue, and those in the province of British Columbia more than doubled their "net" from $\$ 255,000$ to $\$ 625,000$.

Table 3 presents a statement of the operation of the private television broadcasting industry for 1962. Here again, a comparison of this year's table with that for 1961 is complicated by the inclusion of the operations of the CBC in Ontario for 1961. The number of areas showing an overall operating profit rose from two to four and the total for Canada rose from a loss of $\$ 3$ million to a profit of $\$ 1.1$
million. Eight new privately-owned television stations started operations in 1961, and only three in 1962, so this fact probably accounts for part of the change.

Tables 4 and 5 show the operating results of radio and television broadcasting firms by operating revenue groups. As a result of overlapping, some stations appear in two groups. In 1961, four groups of radio stations out of ten, and four groups of television stations out of six, showed overall losses. This year the results were better, only two out of ten groups of radio stations and one out of six groups of television stations, showed overall losses. Radio stations in the smallest income group (incomes under $\$ 75,000$ ) suffered an av erage loss of $\$ 3,200$, while those with incomes of $\$ 1$ million and over had an average profit of $\$ 334,600$ for 1962 . This can be compared to 1961 results, which showed a loss of $\$ 30$ per station for the small est group and a profit of $\$ 285,000$ per station for those whose operating revenue exceeded $\$ 1$ million. For television, a similar comparison shows an average loss of $\$ 26.400$ per station for the smallest group and an average loss per station of $\$ 176,000$ for the largest group in 1961 while the table shows for 1962 an average loss of $\$ 30,000$ for the small groups and an average profit of $\$ 62,000$ for stations having operating revenues of $\$ 1$ million and over, a considerable improvement.

Table 6 carries forward the operating profit from the radio and television sectors of the broadcasting industry from tables 2 and 3. It shows the addition of other income from sources not connected with broadcasting and the deduction of non-operating expenses. Table 6 shows the net income before income taxes of the broadcasting industry amounted to $\$ 5,633,073$, provision for income taxes by profitable firms amounted to $\$ 3,878,735$ and the aftertax profit amounted to $\$ 1,754,338$ for the whole industry. This represents a return of $1.6 \%$ on the total assets ( $\$ 107.6$ million) under the control of the private sector of the industry but a return of $4.5 \%$ on shareholders' equity and reserves. The results of the operations of the CBC do not appear in this table because the unexpended balance of the Parliamentary

Grant is treated as an account due to the Government of Canada. The amount of the surplus at the beginning of the year does not agree with the surplus at the end of the previous year because of small adjustments applicable to a number of firms.

Table 7 shows the assets and liabilities of the broadcasting industry in 1962. It is arrived at by combining the balance sheets of all private broadcasting firms and the CBC. The equity of the

Government of Canada in the CBC, amounting to $\$ 42.8$ million, is included in the amount shown as common stock in the statement.

Table 8 shows an analysis of the total figures for fixed assets that appear in Table 7.

The following table gives a summary analysis of the balance sheet (Table 7) of the broadcasting industry as between the CBC and the private sector: the balance sheet of the CBC is as of March 31 , 1963.

|  | CBC | Private stations | Total |
| :---: | :---: | :---: | :---: |
|  | thousands of dollars |  |  |
| Current assets | 16,417 | 33,976 | 50,393 |
| Fixed assets less reserve for depreciation | 33,096 | 58,305 | 91,401 |
| Other assets. | 702 | 15,314 | 16.016 |
| Total assets ............................................................................ | 50,215 | 107, 595 | 157,810 |
| Current liabilities | 7,417 | 32, 202 | 39,619 |
| Long term debt | - | 36,595 | 36,595 |
| Sundry reserves | - | 2,021 | 2,021 |
| Preferred stock. | - | 13,081 | 13,081 |
| Common stock. | 42.798 | 6,909 | 49,707 |
| Surplus ........................................................................................... | - | 16,787 | 16,787 |
| Total liabilities and net worth ................... | 50,215 | 107,595 | 157.810 |

## Concepts

Last year the report showed the revenues and expenditures of the broadcasting industry as a whole, including the operations of the CBC. Thanks to the co-operation of the CBC, we are showing the results of their operations separately in Table 1 this year. The CBC operates stations in all parts of Canada and its operations are of such a nature that it is meaningless to divide them into specific areas and include them with the private sector of the industry.

## Operating Revenue and Expenses

Table 1 shows broadcasting revenue as reported for the years 1958-62 by DBS. However, certain adjustments were made to the figures for revenue as reported in previous years to make them comparable to those that we report for 1961 and 1962. For the years 1958 to 1960 the reported figures segregated certain expenditures incurred and paid on account of the advertiser and deducted these expenditures from both revenues and expenses for the year under review. For 1961 and 1962 the reported figures did not segregate these expenditures. To make the figures comparable over the 5 -year period these items have been added back to the appropriate revenue classifications and shown as part of the operating expenses.

The operating expenses of the industry for the years 1958 and 1962 are shown in Table 1. Prior to 1961 only three categories of expense were collected on a comparable basis to 1961 and 1962 and these have been shown. All other operating expenses for the years before 1961 are grouped under the heading "other operating expense".

In 1961 "other operating expenses" included such things as insurance, travelling, office supplies and expense and amounted to $7 \%$ of all expenses. In this report the figures have been revised by adding insurance expense to rent, repairs and maintenance; travelling expense was added to adver. tising; and office supplies and expenses are segregated in a new heading.

All broadcasting stations report advertising revenue received from network, national and local advertising $n$ et of advertising agency commissions. In the case of network advertising revenue, arrangements are generally made by the advertiser or the advertising agency directly with the CBC or with the other networks: the individual station will show as revenue only the amount that was received from the network,

National advertising revenue is revenue received directly by the station from national or regional advertisers for programs, announcements and spot advertisements, broadcast on a non-network basis. Both CBC-owned stations and privat ely-owned stations receive this type of revenue. In this report, the totals of revenue for network and national advertising, for the two Canadian network systems, are combined.

Local advertising is usually received from local or district advertisers for programs or announcements broadcast on a non-net work basis. Advertising
of this type is usually secured by salesmen employed by the individual station. Both CBC-owned stations and privately-owned stations receive this type of revenue.

The revenues and expenses of the CTV Television Network Limited, were prorated over the television stations that were members of the network: on the basis of each station's operating revenues in order to produce Table 3. However, they are not included in Table 5, where the television stations are di vided into revenue groups.

## Glossary of Terms

1. Network advertising revenue as shown in this report consists of revenue received for advertising when a station is at tached to a network. Arrangements are generally made by the advertiser or his agency directly with the network. In the case of a non-CBC network, arrangements may be made with the station originating the program. Since part of the revenues received by the originating station for network advertising are paid out to other stations carrying the advertising, only the net advertising revenue is reported by the originating station.
2. National advertising revenue is revenue received from national or regional advertisers for programs or announcements broadcast on a nonnetwork basis.
3. Local advertising revenue is revenue received fromlocal or district advertisers for programs or announcements broadcast on a non-network basis.
4. Other non-broadcasting operating revenue is revenue received from operations of the station which are incidental to broadcasting (e.g. rental of station facilities, recording services) plus any broadcast revenues of a non-advertising nature.
5. Representative agencies are individuals or organizations which are hired by broadcasting stations to seek the business of national and re-
gional advertisers on a non-network basis. Representative agencies are distinguished from the station's own sales force (including individuals and separate sales organizations representing one station) which usually cover the local market.
6. Advertising agencies are individuals or organizations which arrange the distribution of their clients' advertising among all the advertising media.
7. Other income (Table 6) is income which is not normally associated with the day-to-day operation of the broadcasting station (e.g. investment income, bad debts recovered, income from extritneous sources).
8. Other expenses (Table 6) are expenses which are not normally associated with the day-to-day operation of the station (e.g. expenses of enterprises outside the field of broadcasting, donations).
9. Additions and deductions to the surplus account (Table 6). These are made up of items that do not affect the income of the business for the period under review (e.g. profit on sales of capital assets, writeoffs of goodwill, incorporation expense).
