ELECTRIC POWER STATISTICS

NOVEMBER 1966

Table 1 of this report contains preliminary statistics on energy generation, imports, exports and secondary for the month of November 1966. These preliminary statistics indicate that net generation increased 9.0 per cent to 14,161,637 thousand kwh. in November 1966 from 12,986,712^r thousand kwh. generated one year ago.

Imports increased to 281,921 thousand kwh. from 246,926 thousand kwh. and exports increased to 457,238 thousand kwh. from 299,020 thousand kwh. in November 1965.

Table 2 shows detailed data concerning the amount of energy made available and the disposition of this energy for the month of September 1966. These figures include a breakdown of sales by rate categories for large utilities and industries while distribution by smaller utilities and industries is included in "distribution by non-respondents" (item 31). Distribution by non-respondents is the energy which is delivered by companies which report in this survey to companies which do not report. Consumption of own generation by industrial establishments is included in "used in own plant" (items 20 and 21). Comparable September 1965 data is shown for all categories where available.

Tables 5, 6 and 7 give final data for months January to September 1966 and preliminary data for other months. In Table 5, secondary energy includes both that used in own plant and that sold to ultimate customers. In September, of the 387,917^r thousand kwh. of secondary energy, 196,305 thousand kwh. was used in own plant, while 191,612 thousand kwh. was sold to ultimate customers.

Total generation for the twelve-month period ending November 30, 1966 amounted to 156,147,229 thousand kwh. compared to 154,972,304^r for the period ending in October.

Monthly electric power statistics are designed to provide current information on the production and consumption of electric energy in Canada. In order to expedite the collection and compilation of returns, the series is confined to firms which generate a minimum of 10 million kwh. per annum and to large distributors of electric energy. These firms accounted for 99.5 per cent of total production in 1964.

In the electric power series, net generation is defined as total generation less the amount used in station service.

24	Secondary (3)	196,305	-	-
25	Total used in own plant (20 + 21) (3)	3,189,036	84,894	-
26	Sales to ultimate customers:				
27	Power - Firm	6,810,676 ^r	4,493,543	103,966	213
28	Secondary	364,609 ^r	191,612 ^r	-	1,669 ^r
29	General service (commercial)	955,296	1,052,264	7,582	4,736
30	Domestic	1,760,779 ^r	1,924,228	19,252	5,068
31	Farm(1)	71,962	78,908	-	-
32	Street lighting	73,311	81,861	867	150
33	Total sales to ultimate customers (23 + 24 + 25 + 26 + 27 + 28)	10,036,633 ^r	7,822,416	131,667	11,836
34	Unallocated energy(2)	1,052,732 ^r	978,022	5,300	147
35	Distribution by non-respondents	468,302	464,904	1,826	272
36	Total disposal of energy (18 + 22 + 29 + 30 + 31)	11,871,788 ^r	12,846,901	230,187	12,255

(1) Many utilities cannot distinguish between domestic and farm, as they do not keep separate records

(2) Includes losses, unaccounted for, and cyclical billing adjustment.

(3) Amount used in own plant is included in firm and secondary power sales in 1965.

December								
Year								

(1) Many utilities cannot distinguish between domestic and farm, as they do not keep separate records.

(2) Includes sales to industrial establishments with generating facilities.
