1. Coal and Coke Statistics, January 1966 January production of coal amounted to 1,209,306 tons, an increase of .44% from the January 1965 production of 1,204,131^r tons. Landed imports increased to 148,749 tons compared with 146,281 tons in the same period last year. Shipments of coal as reported by mine operators decreased to 1,110,251 tons in January 1966 from 1,223,658^r tons in January 1965. In January 1966, consumption of coal and coke by industrial consumers amounted to 1,679,694 tons and 492,781 tons respectively compared with 1,802,421 tons and 487,684 tons in January 1965.

Coke production during the month of January 1966 rose slightly to 375,259 tons from 374,053^r tons in January 1965. During the same period, the amount of coke used in blast furnaces increased to 342,090 tons from 328,868 tons.

ERRATUM

IND-SB-2(3) Page 5. Quantity of coal used to generate electricity in Nova Scotia should read 584,141 tons.

2. Canadian Crude Oil Requirements First Half 1966 Canadian refineries crude oil requirements for the first half of 1966 are forecast to exceed the requirement of one million barrels per day previously forecast for the year 1966 (March 9, 1966 Service Bulletin). The average take of 1016.3 thousand barrels per day indicates planned increases of 5.5% over the same period in 1965. Requirements for imported crude oil are anticipated to increase 8.2% while requirements for domestic crude will increase 3.1%.

The following table includes January to June anticipated requirements with corresponding actual takes of crude at refineries for the years 1961 to 1966.

CRUDE OIL REQUIREMENTS

January-June 1961-1966

	Domestic Crude	Imported Crude	Total
(000s barrels per calendar day)			
January to June:			
1966	587.5*	428.8*	1016.3*
1965	569.7	393.0	962.7
1964	544.5	377.6	922.1
1963	502.3	381.9	884.2
1962	476.9	349.4	826.3
1961	427.0	350.7	777.7

* Anticipated.

1. The first part of the report deals with the general situation of the country and the progress of the work during the year. It is divided into two main sections: the first section deals with the general situation and the second section deals with the progress of the work.

2. The second part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work and the second section deals with the conclusions.

3. The third part of the report deals with the conclusions of the work during the year. It is divided into two main sections: the first section deals with the conclusions and the second section deals with the recommendations.

4. The fourth part of the report deals with the recommendations of the work during the year. It is divided into two main sections: the first section deals with the recommendations and the second section deals with the conclusions.

5. The fifth part of the report deals with the conclusions of the work during the year. It is divided into two main sections: the first section deals with the conclusions and the second section deals with the recommendations.

6. The sixth part of the report deals with the recommendations of the work during the year. It is divided into two main sections: the first section deals with the recommendations and the second section deals with the conclusions.

7. The seventh part of the report deals with the conclusions of the work during the year. It is divided into two main sections: the first section deals with the conclusions and the second section deals with the recommendations.

8. The eighth part of the report deals with the recommendations of the work during the year. It is divided into two main sections: the first section deals with the recommendations and the second section deals with the conclusions.

9. The ninth part of the report deals with the conclusions of the work during the year. It is divided into two main sections: the first section deals with the conclusions and the second section deals with the recommendations.

10. The tenth part of the report deals with the recommendations of the work during the year. It is divided into two main sections: the first section deals with the recommendations and the second section deals with the conclusions.

11. The eleventh part of the report deals with the conclusions of the work during the year. It is divided into two main sections: the first section deals with the conclusions and the second section deals with the recommendations.

12. The twelfth part of the report deals with the recommendations of the work during the year. It is divided into two main sections: the first section deals with the recommendations and the second section deals with the conclusions.

13. The thirteenth part of the report deals with the conclusions of the work during the year. It is divided into two main sections: the first section deals with the conclusions and the second section deals with the recommendations.

14. The fourteenth part of the report deals with the recommendations of the work during the year. It is divided into two main sections: the first section deals with the recommendations and the second section deals with the conclusions.

15. The fifteenth part of the report deals with the conclusions of the work during the year. It is divided into two main sections: the first section deals with the conclusions and the second section deals with the recommendations.

.. Figures not available.

The data contained in the above table was previously included in "Canadian Crude Oil Requirements" Catalogue No. 45-003 which has been discontinued.

4. Refined Petroleum Products Output of refined petroleum products decreased 1.3% in January to 31,633,808 barrels from 32,047,631 in the same month last year, according to an advance release of data that will be contained in the January issue of the DBS report "Refined Petroleum Products".

Receipts of crude oil advanced 0.6% in January to 31,424,470 barrels from 31,252,265 a year earlier, comprising 4.1% less domestic crude at 18,569,813 barrels versus 19,353,982 and 8.0% more imported crude at 12,854,657 barrels versus 11,898,283. Domestic disappearance of finished petroleum products rose 2.3% to 38,789,150 barrels from 37,931,606 in the same month last year.
