MONTHLY SUPPLY AND DISPOSAL OF ELECTRIC ENERGY - 1967

Introduction

This report presents a summary of the Monthly Electric Power Statistics Survey incorporating all revisions to date. The 1967 monthly data were originally published in the twelve monthly issues of Catalogue No. 57-001.

The survey covers all firms which generate a minimum of 10 million kwh. per annum together with the large distributors of electric energy. In 1966 these firms accounted for 99.5% of all generation and 95.8% of sales to ultimate customers and generation for own use by industrial establishments. The same group of generating firms which provide statistics for the publication "Electric Power Statistics, Volume I, Annual Electric Power Survey of Capability and Load" (Catalogue No. 57-204) are covered in the monthly survey. Therefore there is a direct comparison with the Capability and Load report insofar as energy generation, imports, exports and use of secondary energy are concerned. Any differences are due to late revisions.

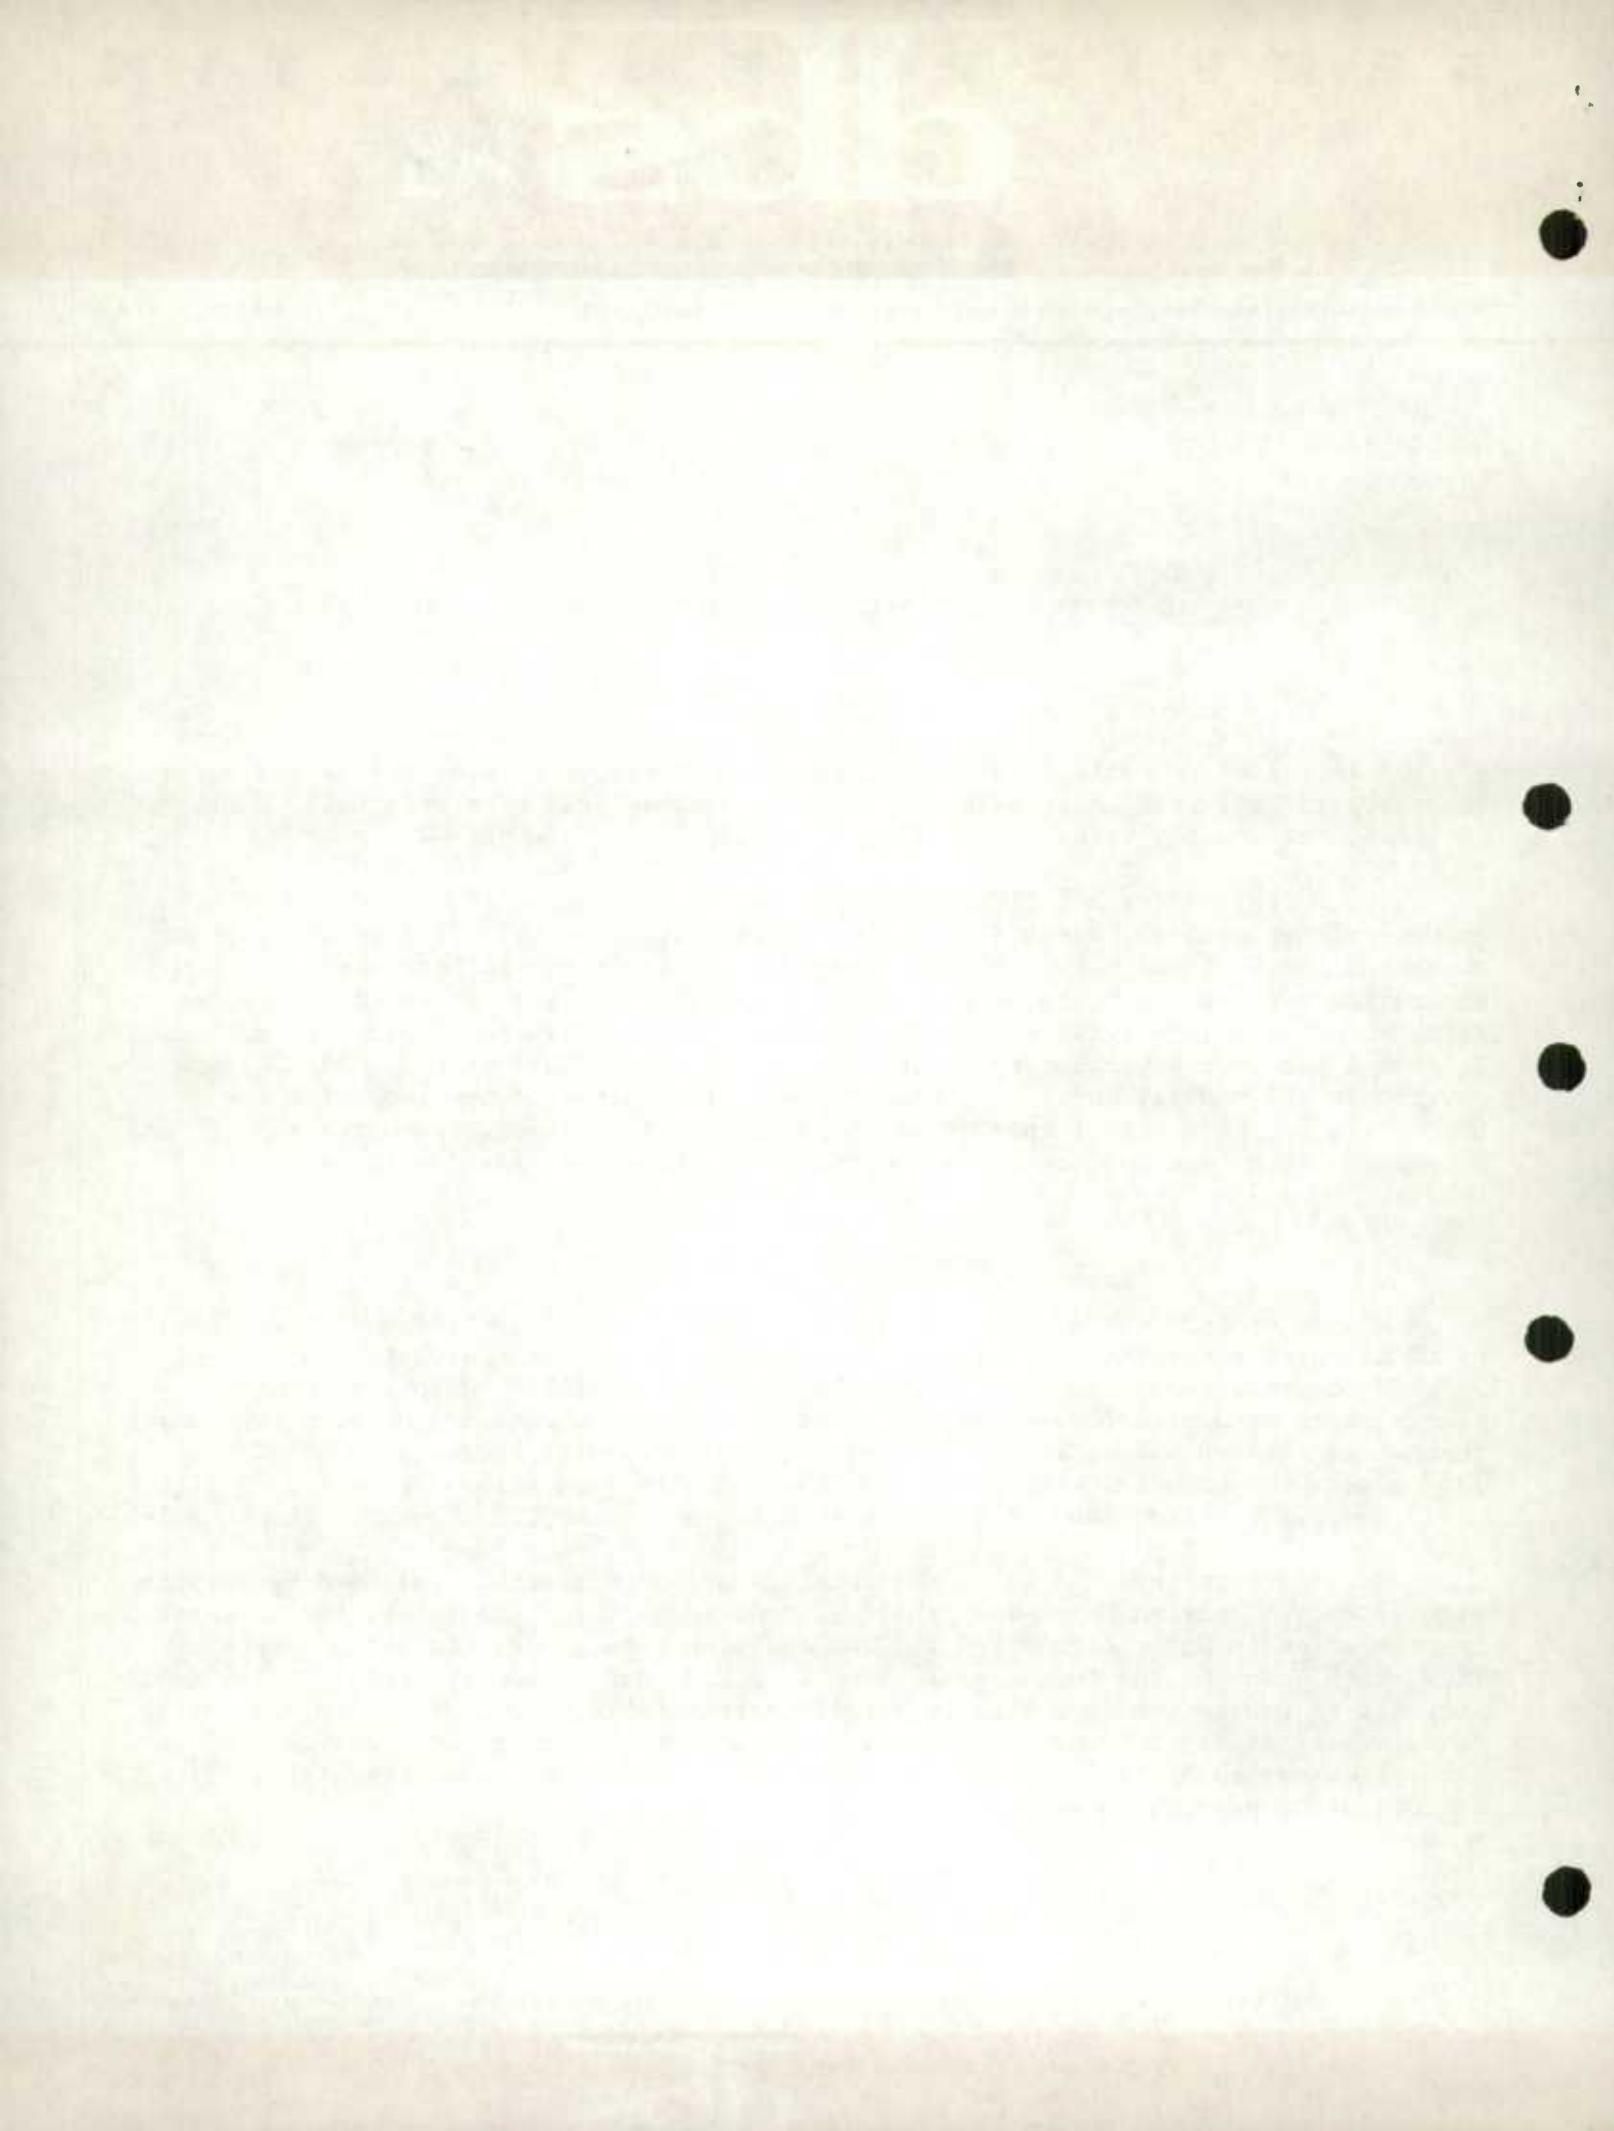

Review of Survey Results

Net generation (total generation less energy used in generating station service) by firms which generated a minimum of 10 million kwh. increased 4.7% in 1967 to 164,-787,829 thousand kwh. from 157,371,369 thousand kwh. in 1966. Output from hydro plants which accounted for 80% of the total generation increased 2.0% over 1966 while thermal generation was up 17.6%. Industrial establishments produced 19.4% of the 1967 generation compared with 22.0% in 1966. Monthly generation varied from a high of 15,309,893 thousand kwh. in December to a low of 12,448,213 thousand kwh. in July.

Quebec contributed 38.8% of the total Canadian generation, followed by Ontario with 31.6% and British Columbia with 12.9%. Of these three provinces, the increase in generation in Ontario amounted to 7.4% over the 1966 generation while increases in British Columbia and Quebec generation were 2.0% and 1.9% respectively. The small increase in generation in Quebec is largely attributable to a decrease in deliveries of secondary energy to other provinces. The largest percentage increase in 1967 net generation was 16.5% in Prince Edward Island followed by New Brunswick with 13.3% and Saskatchewan with 10.4%.

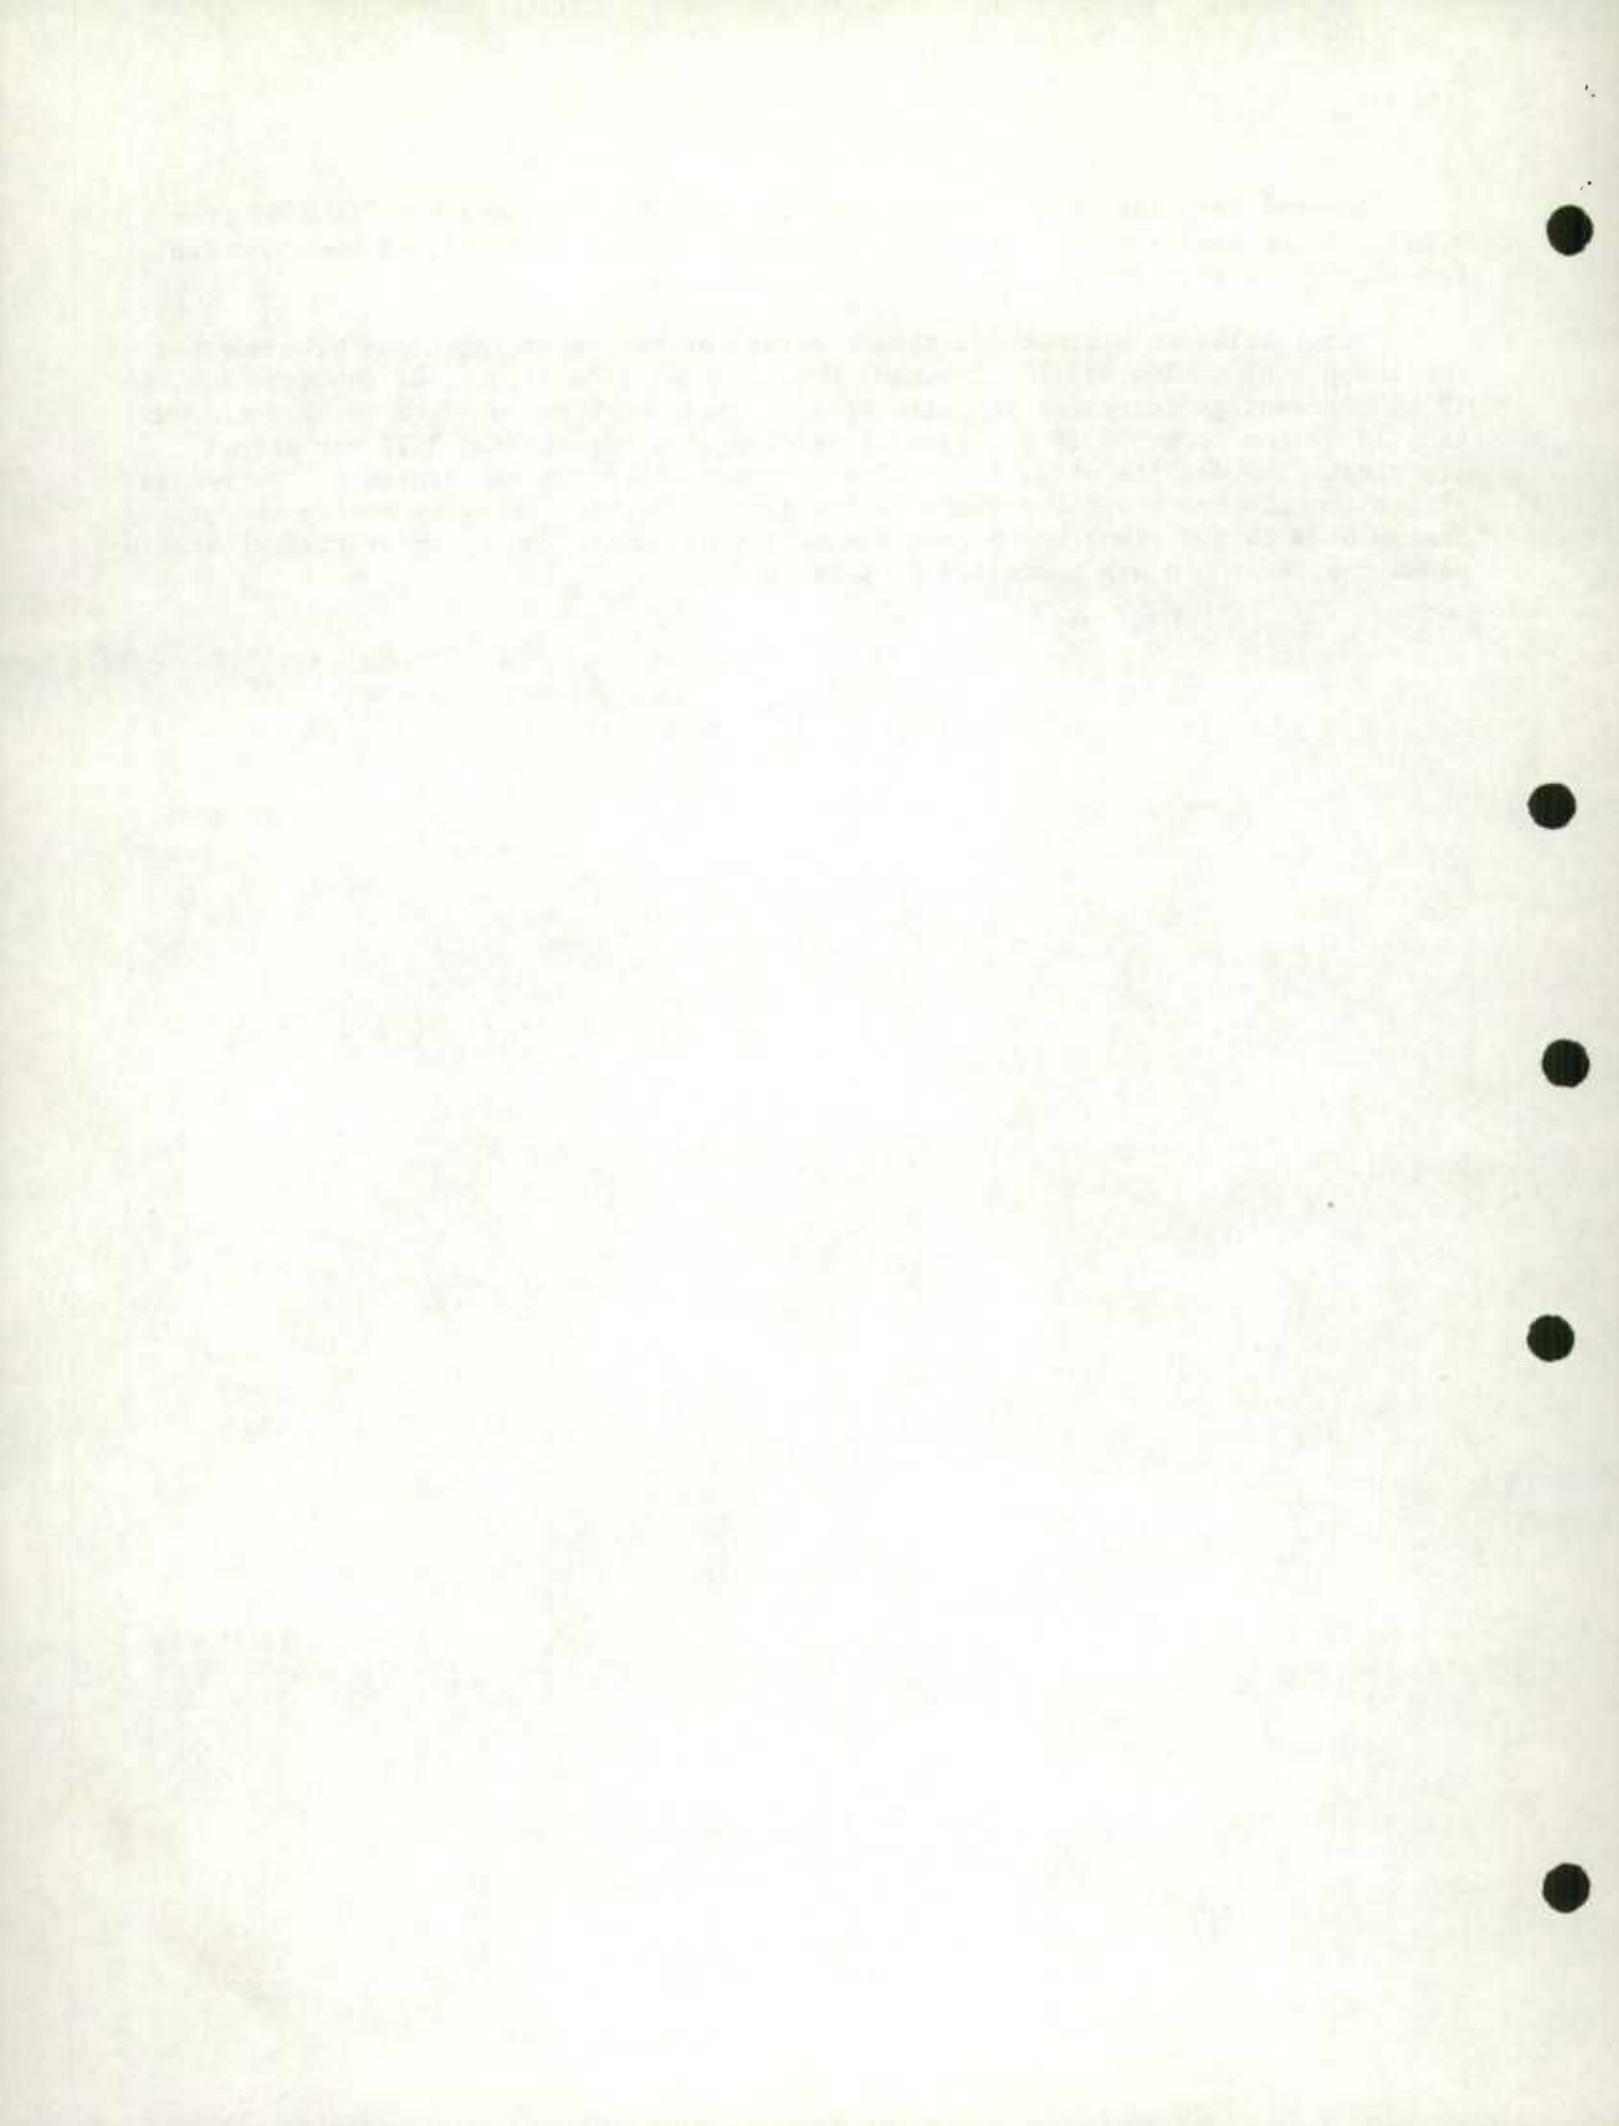

6503-521

DBS Regional Offices - St. John's • Halifax • Montreal • Toronto • Winnipeg • Edmonton • Vancouver

Imports from the United States rose to 4,141,683 thousand kwh. in 1967 from 3,057,315 thousand kwh. in 1966 while exports decreased to 4,065,649 thousand kwh. from 4,309,786 thousand kwh. during the same period.

Total sales to ultimate customers served by the reporting group of companies increased 6.0% to 104,956,173 thousand kwh. in 1967 from 99,012,487 thousand kwh. in 1966. Percentage increases in sales by rate categories amounted to 10.0% for domestic, 10.5% for farm, 17.1% for general service (commercial) and 8.1% for street lighting. The decline of 0.7% in sales to power customers was caused by the reclassification of some power customers to the general service category during the year. Energy used in own plant which consists mainly of generation by industrial establishments for their own use increased 3.0% in 1967.
