1. Preliminary Electric Energy Statistics, December 1967

Net generation of electric energy increased 0.9% to 15,043, - 972 thousand kwh. in December 1967 from 14,906,210 thousand kwh. in December 1966. This is the smallest percentage monthly increase since March 1963. The small increase was due, in part to the above normal temperatures which prevailed across most of Canada during the month.

Imports and exports were down by 6.2% and 26.9% respectively compared with December 1966. Secondary energy consumption decreased 45%. This is the twelfth consecutive month that secondary energy consumption has declined. Firm energy consumption increased by 2.5% over December 1966, the smallest percentage increase since March 1963.

Total net generation for the twelve month period ending December 31, 1967 amounted to 164,616,659 thousand kwh.

## 2. Preliminary Electric Energy Statistics 1967

Cumulative monthly data from firms which generate a minimum of 10 million kwh. per annum indicate that net generation of electric energy in Canada during 1967 amounted to 164,617 million kwh. compared with 157,372 million kwh. in 1966, an increase of 4.6%. Output from hydro plants which accounted for 80% of the total was up 1.5% while thermal generation increased 18.0%.

Imports increased sharply to 4,142 million kwh. from 3,057 million kwh. in 1966. Most of this increase occurred in British Columbia where imports were up 911 million kwh.

Exports declined to 4,066 million kwh. from 4,310 million kwh. the previous year. Ontario exports were down by 145 million kwh. while British Columbia exports decreased 122 million kwh.

Secondary energy consumption dropped from 4,234 million kwh. in 1966 to 2,528 million kwh. in 1967. Quebec, Ontario and British Columbia were down 925 million kwh., 470 million kwh. and 196 million kwh. respectively.

Firm energy made available for use in Canada increased 6.8% to 162,165 million kwh.

THE HISTORY OF THE UNITED STATES

The history of the United States is a story of growth and development. It begins with the first settlers who came to the continent in search of a better life. They found a land of opportunity and a land of freedom. They built a nation that has become a model for the world.

The early years of the United States were marked by a period of exploration and discovery. The first settlers came to the continent in the early 17th century. They found a land of opportunity and a land of freedom. They built a nation that has become a model for the world.
