FOR REVIEW

Preliminary Electric Energy Statistics, August 1969.
Catalogue No. 57-001

Net generation of electric energy increased 8.9 per cent to 14,972,615 thousand kwh. in August 1969 from 13,749,830 thousand kwh. in August 1968. There were increases in net generation in all provinces except Newfoundland, where there was a decrease of 20.4 per cent. In August, as has been the case in previous few months, favourable water conditions resulted in a 12.6 per cent increase in hydro generation while the output of thermal plants decreased 3.1 per cent.

Imports decreased 40.7 per cent and exports increased 83.1 per cent compared with July 1968. Firm energy consumption increased 7.0 per cent.

Total generation for the twelve month period ending August 31, 1969 amounted to 185,207,337 thousand kwh. compared with 183,984,552<sup>r</sup> thousand kwh. ending in July.

Seasonally adjusted, net generation in August amounted to 15,894 million kwh. compared with 15,886 million kwh. in July. Firm energy consumption amounted to 15,428 million kwh. on a seasonally adjusted basis down from 15,581 million kwh. in July.
