Preliminary Electric Energy Statistics, December 1969,  
Catalogue No. 57-001

Net generation of electric energy increased 8.2% to 18,135,198 thousand kwh. in December 1969 from 16,761,038 thousand kwh. in December 1968. There were increases in net generation in all provinces except Nova Scotia, where there was a decrease of 5.5%. The largest increases occurred in Yukon Territory and New Brunswick where they amounted to 46.6% and 16.0% respectively. In December, as has been the case for several previous months, favourable water conditions resulted in hydro generation increasing 12.8%, while thermal generation decreased 4.5%.

Imports decreased 41.1% and exports increased 5.1% compared with December 1968. Firm energy consumption increased 6.7%.

Total generation for the twelve month period ending December 31, 1969 amounted to 190,418,640 thousand kwh. compared with 189,044,480<sup>F</sup> thousand kwh. ending in November.

Seasonally adjusted net generation in December amounted to 16,562 million kwh. compared with 15,979 million kwh. in November and 16,116 million kwh. in October. Firm energy consumption amounted to 16,427 million kwh. on a seasonally adjusted basis. The comparable figures for November and October were 15,881 million kwh. and 15,940 million kwh. respectively.
