1. Preliminary Propane Statistics August 1969 and August 1970

Production of propane for August 1970 amounted to 2,278,772 barrels. This was an increase of 384,863 barrels over the same month last year.

Sales to distributors were 727,853 barrels as compared with 851,670 during August 1969.

The export of propane for the month was 721,617 barrels, an increase of 58.4% over August, 1969. Most of the change is accounted for by a large increase in exports to U.S. districts I and II. These statistics show provincial source and end disposition of the product, without taking into account intermediate interprovincial transfers.

(1) Excludes returned to formation.

(2) Identifiable industrial sales have been allocated to this category. Distributor sales may contain sales to industrial.

P. Preliminary Electric Power Statistics, October 1970
Catalogue No. 57-001

In October 1970 net generation amounted to 17,030,644 thousand kwh. a rise of 4.7% over the 16,261,345 thousand kwh. generated in October 1969. Increases in net generation occurred in all provinces except Newfoundland and British Columbia where there were decreases of 5.2% and 12.2% respectively. As in the last few previous months labour disputes in industry in British Columbia were responsible for the decline in electricity consumption and thus in generation. The largest increases in generation occurred in New Brunswick and Yukon Territory where they amounted to 30.4% and 47.7% respectively. Hydro generation increased 3.0% in October over the same period last year, while thermal generation increased 10.9%.

Imports increased 67.0% and exports increased 43.1% compared with October 1969. Firm energy consumption increased 4.3%.

Total generation for the twelve month period ending October 31, 1970 amounted to 201,376,309 thousand kwh. compared with 200,607,010^F thousand kwh. for the twelve month period ending September 30, 1970.

Seasonally adjusted net generation in October 1970 amounted to 17,472 million kwh. compared with 17,695 million kwh. in September and 17,436 million kwh. in August. Firm energy consumption amounted to 17,175 million kwh. on a seasonally adjusted basis. The comparable figures for September and August were 17,235 million kwh. and 16,784 million kwh. respectively.
