ELECTRIC AND GAS METER REGISTRATIONS

1968

The terms "Electric Meter Registrations" and "Gas Meter Registrations" are used throughout this report in reference to the number of meters in service as reported by companies engaged in the sale of electricity or gas in applications for certificate of registration. Each company is required to obtain a certificate of registration from the Department of Industry, Trade and Commerce, Standards Branch, not later than the 31st of March each year, for all meters in service at the end of the previous year.

Prior to 1956 the Electric and Gas Meter Registrations report was published by the Standards Division of the Department of Trade and Commerce in the "Report of the Standards Division", which covered the fiscal year ending on March 31. Since 1957 the report has been for the calendar year. A table showing electric meter registrations by province and company was first compiled for the 1958 report.

Due to its doubtful accuracy and limited use, regional reporting of electric meter registrations by incorporated municipalities was discontinued in 1968. Also, in order to conform more closely with the respondents records the domestic, commercial and power meter breakdown has been replaced by a tabulation by type of meter e.g. watthour, prepayment, etc.

The number of meters reported in service by companies engaged in the sale of electricity in Canada rose to 6,718,933 at December 31, 1968 from 6,488,161 one year earlier, an increase of 230,772 or 3.6 p.c. Single phase and polyphase watthour meters numbered 6,221,366 and 159,381 respectively. There was a total of 337,807 other A.C. meters in service at the end of the year of which 240,853 were single phase and 96,954 were polyphase. Other types of meters in service included 136 prepayment A.C. meters and 243 D.C. meters. All A.C. meters were of the 60 hertz variety with the exception of 25 hertz meters in Ontario and Quebec and 50 hertz meters in Newfoundland numbering 146 and 693 respectively.

A total of 1,838,601 natural, manufactured and other gas meters was reported in service at the end of 1968 an increase of 3.5 p.c. over the 1,776,609 recorded in 1967. At the year end only 11,188 meters remained in manufactured gas service, as compared with 14,248 in 1967 and 610,096 in 1950, the peak year. Meters in natural gas service rose 3.9 p.c. to 1,807,353 from 1,739,577.

ELECTRICITY AND GAS INSPECTION DISTRICTS

For purposes of inspection under the Electricity Inspection Act and the Gas Inspection Act, the provinces of the Dominion have been divided into the following districts:
