ELECTRIC POWER

Catalogue number	Title	Price
Annual		
57-201	Electric and Gas Meter Registrations. Approx. 242 pp. Meter registrations by province, county or census division, company and place served, by type of service.....	\$2.50
57-202	Electric Power Statistics Vol. II—Annual Statistics. Approx. 70 pp. Summary and detailed analyses of generation and use of electric power in Canada, power plant equipment, customers, employees, salaries and wages, financial statistics and historical tabulation of supply and disposal of electric energy	1.00
57-203	Electricity Bills for Domestic, Commercial and Small Power Service. Approx. 15 pp. Includes an annual index of electricity bills for domestic service and bills for light and power in cities and representative municipalities.....	.50
57-204	Electric Power Statistics, Vol. I—Annual Electric Power Survey of Capability and Load. Approx. 45 pp. Current and projected data of capability and load of major producers of electric energy in Canada.....	.75
Monthly		
57-001	Electric Power Statistics. Approx. 4 pp. Production by utilities and industrial establishments, imports and exports, power made available for use in Canada, secondary energy used, sales to ultimate customers by rate category, cumulative monthly totals for year to date, by province	10¢ a copy* per year, 1.00
Occasional		
57-502	Inventory of Prime Mover and Electric Generating Equipment. Approx. 120 pp. A list of generating plants in Canada by ownership, showing the location, year of installation, name-plate rating and other details of each unit, as at December 31, 1961	1.50
<i>Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.</i>		
SYMBOLS		
The following standard symbols are used in Dominion Bureau of Statistics publications:		
.. figures not available.		
... figures not appropriate or not applicable.		
— nil or zero.		
-- amount too small to be expressed.		
P preliminary figures.		
R revised figures.		

ELECTRICITY BILLS FOR DOMESTIC, COMMERCIAL AND SMALL POWER SERVICE

Examples of the Application of Rates

1964

General

This report is based on rate tables supplied by the power companies and municipalities responsible for the distribution of electric energy in the cities and towns in this survey. It consists of the cost of definite quantities of electricity for specific uses and an annual index of electricity bills for domestic service. The monthly bills are computed to show the actual cost to consumers in the 137 municipalities covered by the report when selected quantities are used for specific purposes. The cost to the consumers includes not only the amounts accruing to the distributor, but also all federal, provincial and municipal taxes on such purchases. Discounts for prompt payment have been deducted from gross bills wherever granted.

Uses

Monthly bills cannot be used to obtain the average cost of electricity consumed in any one municipality or to compare municipalities as to cost of electricity, except in a very general way. The unit cost or cost per kilowatt hour of electric energy normally varies according to the nature of the use and the magnitude of the consumption; and, because these factors vary so greatly as between types of user and between municipalities, an average cost for all electricity consumed in any municipality is of little value unless the nature of the uses and amount of consumption for each use is known. Further, industrial power costs vary as to whether the power used is primary or secondary (off-peak or interruptible power taken when available). Other important factors in determining costs of electricity are the relationship between the capacity of a system to produce and distribute electricity and the total consumption, and between the average rate of consumption per day and at different times of the day, and during the year. Because of the difficulty of giving proper weight to these many factors, the Bureau of Statistics has not attempted to show average costs or to compare costs between municipalities. For these purposes the report should be used with the utmost caution.

Computations

Domestic services include delivery of electricity to private residences for lighting, refrigeration, cooking, water heating, house heating and the operation of various electrical appliances. Commercial service includes delivery of electricity to stores, offices, factories, etc., mainly for lighting purposes. Outdoor sign lighting is generally in a separate

category and the rates are different from those for commercial services. Street lighting is also in a separate class. Power service includes the delivery of electricity for the operation of electric motors.

The purpose of this presentation is to provide data for comparative purposes on the cost of electric services in Canada. Because of the various methods of computing costs, it was necessary to select some arbitrary conditions, especially for the fixed charges, and use the same basic conditions in each municipality. In the large majority of municipalities the use of these arbitrary conditions was not necessary, the rates containing a fixed charge and a block rate for all consumptions irrespective of appliances.

Consumptions of 700 and 1,000 kilowatt hours include electricity used for water heating. Except where the entire water heater load was on a flat rate basis, metered rates were used in working out these bills. For a few municipalities, where all water heating is on a flat rate basis, an arbitrary division was made between water heating and the metered services. A 700 kwh. consumption was divided to include a metered consumption of 350 kwh. plus an assumed 350 kwh. consumed by a 1,000 watt heater. A consumption of 1,000 kwh. was divided between 490 kwh. metered and 510 kwh. consumption assumed for a heater of 1,000 watts. To show the effect of flat rate water heaters, a bill for 1,000 kwh. including a water heater of 1,000 watts has been shown for all municipalities where such heaters are in general use.

A few municipalities apply a demand charge in addition to the energy charge for electricity used in house heating. In computing bills for house heating in these municipalities it was assumed that the maximum demand is 15 kilowatts. Where service charges are based on two-wire or three-wire service, the higher charge was used only in calculating the bills for 300, 500, 700 and 1,000 kilowatt hours.

Domestic Service Index

There was no change in the provincial index for domestic service in Newfoundland. In Carbonear and Mount Pearl, bills were increased for consumptions of 300 kwh. per month or less and decreased for consumptions greater than 300 kwh. However, these changes did not affect the index as only the bills for St. John's are used in its computation.

In Prince Edward Island there was a decrease in the provincial index from 103.4 to 102.2 due to a reduction in the domestic bills in Summerside.

The Nova Scotia index declined from 106.1 to 105.0 as a result of decreases in rates in Bridgewater and Glace Bay.

The rise in the index from 99.6 to 100.2 in Quebec was due to an increase in the provincial sales tax from 2% to 6%. The new 6% tax replaced all educational, municipal and provincial sales taxes which were in effect in 1963.

Increases in bills in the Ontario municipalities of Midland, Port Arthur, Sarnia and Sudbury more than offset the decrease in Galt. As a result the Ontario index increased from 130.8 to 131.5 in 1964.

A new provincial sales tax of 4% on electric bills was the main factor in the increase from 98.3

to 104.3 in the Manitoba index. An increase in the Winnipeg bills also contributed to the 6% increase.

The drop in the Saskatchewan index from 99.4 to 98.2 resulted from decreases in the bills of North Battleford, Prince Albert and Weyburn.

The Alberta index increased from 109.6 to 111.5 as a result of an increase in the Lethbridge bills.

A slight decrease in the British Columbia index resulted from decreases in Cranbrook and New Westminster.

The index for Canada rose to 115.2 from 114.5 in 1963. This increase reversed the downward trend evidenced during the previous three year period.

Annual Index¹ of Electricity Bills for Domestic Service, by Province, 1953-64

¹ Based on electricity rates in effect December 31 each year.

Lowest Bills

Any attempt to determine which municipality in Canada enjoys the lowest cost of electricity might be difficult for reasons mentioned above. From the selected list of municipalities, which comprise this report, those having the lowest bills for selected quantities and uses are shown in the following tables.

While the domestic service bills will probably show the average for most municipalities, it is probable that with larger loads and consumptions for

commercial use and for power, other municipalities would have smaller bills. The fact that no one municipality had the smallest bill for all types of consumption in the three classes of service indicates that caution should be exercised when making comparisons as between municipalities.

There is a possibility that some municipalities from which bills have not been collected may have as low or lower bills than those shown in the tables below, and consequently **there is no certainty that these bills are the lowest of any municipality in Canada.**

Lowest Monthly Bills for Domestic Service, 1964

Municipality	Monthly consumption - kwh.									
	60	100	180	300	500	700	1,000	5,000	7,500	dollars
Belleville, Ont.	1.00

Bills for Commercial Service

Bills for commercial service decreased in the municipalities of Summerside, Bridgewater, Glace Bay, New Waterford, Sydney, Rimouski, North Battleford, Prince Albert, Weyburn and Cranbrook.

Increases in commercial service bills were recorded in Carbonear, Midland, Sarnia, Brandon, Dauphin, Neepawa, Portage la Prairie, St. Boniface and Selkirk.

The municipalities of Mount Pearl, Galt, Sault Ste. Marie, Sudbury, The Pas, Winnipeg, Drumheller, Edmonton and Lethbridge had both increases and decreases in their commercial service bills.

Bills for Power Service

Power service bills increased in Carbonear, Mount Pearl, Edmonton, Midland, Sarnia, St. Boniface, The Pas and Winnipeg.

Power service bills decreased in Summerside, Bridgewater, Glace Bay, Brandon, Dauphin, Neepawa, Portage la Prairie, Selkirk, North Battleford, Prince Albert, Weyburn and Cranbrook.

Drumheller and Edmonton power service rates increased for consumption of 5,000 kwh. and over.

Fort William, Sudbury and Lethbridge bills showed both increases and decreases.

¹ Bills include a provincial sales tax of 5 p.c. Power used in manufacturing is exempt from tax.

² In this case 100 kw. is equivalent to 109 kva.

³ From Annual Electric Power Statistics, Catalogue No. 57-202.

⁴ Included with commercial customers.

⁵ The following rebates on power generated wholly or in part by coal produced in Nova Scotia is applicable to power consumers who are engaged in manufacturing, converting and processing goods or products from raw or other materials; Halifax, Dartmouth and Windsor—2½ mills per kwh.; New Glasgow—5 mills per kwh.; Springhill—7 mills per kwh.

⁶ Includes surrounding area.

⁷ Bills include provincial sales tax of 6 p.c.

⁸ Minimum bill.

⁹ Bills include provincial sales tax of 5 p.c.

¹⁰ Bills include provincial education and hospital tax of 5 p.c. Power used in manufacturing and heating is exempt.

¹¹ Bills include surcharge of 7½ p.c.

¹² Bills include surcharge of 5 p.c.

¹³ Bills include surcharge of 10 p.c.

¹⁴ 25 h.p. and over, customers installing own transformer.

¹⁵ Some power customers are classified as commercial customers in Catalogue No. 57-207.

^{*} Municipalities in which changes in bills occurred in 1964.
