dealing with
ELECTRIC POWER

Catalogue number	Title	Price
Annual		
57-201	Electric and Gas Meter Registrations. Approx. 150 pp. Meter registrations by province, county or census division, company and place served, by type of service.....	\$1.50
57-202	Electric Power Statistics, Vol. II—Annual Statistics. Approx. 70 pp. Summary and detailed analyses of generation and use of electric power in Canada, power plant equipment, customers, employees, salaries and wages, financial statistics and historical tabulation of supply and disposal of electric energy	1.00
57-203	Electricity Bills for Domestic, Commercial and Small Power Service. Approx. 15 pp. Includes an annual index of electricity bills for domestic service and bills for light and power in cities and representative municipalities.....	.50
57-204	Electric Power Statistics, Vol. I—Annual Electric Power Survey of Capability and Load. Approx. 45 pp. Current and projected data of capability and load of major producers of electric energy in Canada.....	.75
Monthly		
57-001	Electric Power Statistics. Approx. 8 pp. Production by utilities and industrial establishments, imports and exports, power made available for use in Canada, secondary energy used, sales to ultimate customers by rate category, cumulative monthly totals for year to date, by province	10¢ a copy; per year, 1.00
Occasional		
57-502	Inventory of Prime Mover and Electric Generating Equipment. Approx. 120 pp. A list of generating plants in Canada by ownership, showing the location, year of installation, name-plate rating and other details of each unit, as at December 31, 1961	1.50
<i>Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution, Dominion Bureau of Statistics, Ottawa, or to the Queen's Printer, Hull, P.Q.</i>

R revised figures.		

ELECTRICITY BILLS FOR DOMESTIC, COMMERCIAL AND SMALL POWER SERVICE

Examples of the Application of Rates

1966

General

This report is based on rate tables supplied by the power companies and municipalities responsible for the distribution of electric energy in the cities and towns in this survey. It consists of the cost of definite quantities of electricity for specific uses and an annual index of electricity bills for domestic service. The monthly bills are computed to show the actual cost to consumers in the 180 municipalities covered by the report when selected quantities are used for specific purposes. The cost to the consumers includes not only the amounts accruing to the distributor, but also all federal, provincial and municipal taxes on such purchases. Discounts for prompt payment have been deducted from gross bills wherever granted.

Uses

Monthly bills cannot be used to obtain the average cost of electricity consumed in any one municipality or to compare municipalities as to cost of electricity, except in a very general way. The unit cost or cost per kilowatt hour of electric energy normally varies according to the nature of the use and the magnitude of the consumption; and, because these factors vary so greatly as between types of user and between municipalities, an average cost for all electricity consumed in any municipality is of little value unless the nature of the uses and amount of consumption for each use is known. Further, industrial power costs vary as to whether the power used is primary or secondary (off-peak or interruptible power taken when available). Other important factors in determining costs of electricity are the relationship between the capacity of a system to produce and distribute electricity and the total consumption, and between the average rate of consumption per day and at different times of the day, and during the year. Because of the difficulty of giving proper weight to these many factors, the Bureau of Statistics has not attempted to show average costs or to compare costs between municipalities. For these purposes the report should be used with the utmost caution.

Computations

Domestic services include delivery of electricity to private residences for lighting, refrigeration, cooking, water heating, house heating and the operation of various electrical appliances. Commercial service includes delivery of electricity to stores, offices, factories, etc., mainly for lighting purposes.

Outdoor sign lighting is generally in a separate category and the rates are different from those for commercial services. Street lighting is also in a separate class. Power service includes the delivery of electricity for the operation of electric motors.

The purpose of this presentation is to provide data for comparative purposes on the cost of electric services in Canada. Because of the various methods of computing costs, it was necessary to select some arbitrary conditions, especially for the fixed charges, and use the same basic conditions in each municipality. In the large majority of municipalities the use of these arbitrary conditions was not necessary, the rates containing a fixed charge and a block rate for all consumptions irrespective of appliances.

Consumptions of 700 and 1,000 kilowatt hours include electricity used for water heating. Except where the entire water heater load was on a flat rate basis, metered rates were used in working out these bills. For a few municipalities, where all water heating is on a flat rate basis, an arbitrary division was made between water heating and the metered services. A 700 kwh. consumption was divided to include a metered consumption of 350 kwh. plus an assumed 350 kwh. consumed by a 1,000 watt heater. A consumption of 1,000 kwh. was divided between 490 kwh. metered and 510 kwh. consumption assumed for a heater of 1,000 watts. To show the effect of flat rate water heaters, a bill for 1,000 kwh. including a water heater of 1,000 watts has been shown for all municipalities where such heaters are in general use.

A few municipalities apply a demand charge in addition to the energy charge for electricity used in house heating. In computing bills for house heating in these municipalities it was assumed that the maximum demand is 15 kilowatts. Where service charges are based on two-wire or three-wire service, the higher charge was used only in calculating the bills for 300, 500, 700 and 1,000 kilowatt hours.

Domestic Service Index

There were no changes in the bills for Newfoundland, Prince Edward Island, New Brunswick, Quebec or Saskatchewan and therefore, no change in the provincial indexes.

Nova Scotia, Manitoba and British Columbia had changes in house heating bills only and the provincial indexes also remained unchanged.

In Ontario an increase in the bills for Barrie, Kitchener, Midland, Nepean Twp, Ottawa, Stratford, Waterloo, and Windsor more than offset a decrease in bills for Sarnia and the provincial index rose from 133.0^r to 134.1.

The Alberta index dropped from 111.5 to 111.2 due to a reduction in rates for the city of Edmonton.

The overall index for Canada shows an increase from 113.4 to 113.8.

Annual Index¹ of Electricity Bills for Domestic Service, by Province, 1955-66
(1949 = 100)

Province	1955	1956	1957	1958	1959	1960	1961	1962	1963	1964	1965	1966

¹ Based on electricity rates in effect December 31 each year.

Lowest Bills

Any attempt to determine which municipality in Canada enjoys the lowest cost of electricity might be difficult for reasons mentioned above. From the selected list of municipalities, which comprise this report, those having the lowest bills for selected quantities and uses are shown in the following tables.

While the domestic service bills will probably show the average for most municipalities, it is probable that with larger loads and consumptions for

commercial use and for power, other municipalities would have smaller bills. The fact that no one municipality had the smallest bill for all types of consumption in the three classes of service indicates that caution should be exercised when making comparisons as between municipalities.

There is a possibility that some municipalities from which bills have not been collected may have as low or lower bills than those shown in the tables below, and consequently there is no certainty that these bills are the lowest of any municipality in Canada.

Lowest Monthly Bills for Domestic Service, 1966

Municipality	Monthly consumption—kwh.

Port Arthur, Ont.	236.70

Bills for Commercial Service

Bills for commercial service in Midland and Ottawa increased while those in Kitchener and Sarnia decreased. The bills for Edmonton, Stratford, Waterloo and Windsor show both increases and decreases.

Bills for Power Service

Power service bills increased in Kitchener, Midland, Ottawa and Waterloo. The Sarnia power bills decreased, while those in Edmonton, Stratford, and Windsor showed both decreases and increases.

¹ Bills include provincial sales tax of 5 p.c.

² From "Annual Electric Power Statistics", Catalogue No. 57-202.

³ Includes surrounding area.

⁴ Bills include provincial sales tax of 6 p.c.

⁵ The decrease in number of customers in many municipalities is due to smaller service areas.

⁶ Bills include a municipal tax of 5 p.c.

⁷ Bills include provincial education and hospital tax of 4 p.c.

⁸ Bills include surcharge of 7½ p.c.

⁹ Bills include surcharge of 5 p.c.

¹⁰ Bills include surcharge of 10 p.c.

¹¹ Municipality included in survey for the first time.

¹² Minimum bill.

* Municipalities in which changes in bills occurred in 1966.

¹ Bills include a provincial sales tax of 5 p.c. Power used in manufacturing is exempt from tax.

² In this case 100 kw. is equivalent to 109 kva.

³ From "Annual Electric Power Statistics," Catalogue No. 57-202.

⁴ Some power customers are classified as commercial customers in Catalogue No. 57-202.

⁵ The following rebates on power generated wholly or in part by coal produced in Nova Scotia are applicable to power consumers who are engaged in manufacturing, converting and processing goods or products from raw or other materials; Halifax, Dartmouth and Windsor — 2½ mills per kwh.; New Glasgow — 5 mills per kwh.; Springhill — 7 mills per kwh.

⁶ Includes surrounding area.

⁷ Bills include provincial sales tax of 6 p.c.

⁸ The decrease in number of customers in many municipalities is due to smaller service areas.

⁹ Minimum bill.

¹⁰ Bills include provincial sales tax of 5 p.c.

¹¹ Bills include a municipal tax of 5 p.c.

¹² Bills include provincial education and hospital tax of 4 p.c. Power used in manufacturing and heating is exempt.

¹³ Bills include surcharge of 7½ p.c.

¹⁴ Bills include surcharge of 5 p.c.

¹⁵ Bills include surcharge of 10 p.c.

¹⁶ Municipality included in survey for the first time.

¹⁷ 25 h.p. and over, customers installing own transformers.

¹⁸ Municipalities in which changes in bills occurred in 1966.
