THE PETROLEUM AND NATURAL GAS INDUSTRY

Catalogue number	Title	Price
Annual		
55-201	Oil Pipe Line Transport (approx. 37 pp.) Barrels of oil carried by gathering and trunk lines by province, by month; receipts and disposition, pipe line mileage, pumping stations; balance sheet, property account, income account, employees, salaries and wages75
57-205	Gas Utilities (Transport and Distribution Systems) (approx. 45 pp.) Mcf. receipts and disposition of natural gas by month and by province; pipe line mileage; balance sheet, property account, income account, employees and earnings75
45-204	Refined Petroleum Products (approx. 160 pp.) Supplement to monthly report 45-004, containing revised monthly figures on crude oil receipts, refinery operations, shipments, inventories, imports by source of supply also cumulative year totals	1.50
45-208	Refined Petroleum Products Volume II, Consumption of Petroleum Products (Approx. 20 pp.) Sales by kind of consumer, i.e. residential, industrial, government etc., by product, by province or region, a further extension of the sales as published in the monthly and annual refined petroleum products50
Monthly		
55-001	Oil Pipe Line Transport (approx. 8 pp.) Barrels of oil carried by gathering and trunk lines, receipts and disposition, inventories, barrel miles, revenues	20¢ per copy, \$2.00 per year
55-002	Gas Utilities (Transport and Distribution Systems) (approx. 8 pp.) Mcf. receipts and disposition of natural gas by province, month; daily average sendouts, commodity miles	20¢ per copy, \$2.00 per year
26-006	Crude Petroleum and Natural Gas Production (approx. 6 pp.) Production, supply and distribution of crude oil and of natural gas by province; production of propane and butane from natural gas	20¢ per copy, \$2.00 per year
45-004	Refined Petroleum Products (approx. 20 pp.) Refinery receipts of crude oil by province, supply and disposition of petroleum products by province	30¢ per copy, \$3.00 per year
Quarterly		
57-002	Energy Statistics Service Bulletin includes:	
	(a) Canadian Crude oil Requirements (approx. 2 pp.) Actual and anticipated receipts of crude oil and equivalent by refineries, by province or region for specified months, with comparative totals for the previous year	
	(b) Financial Statistics of Oil Pipe Line Transport, Gas Pipe Line Transport, and Gas Distribution Companies (approx. 2 pp.) Balance sheet, income account	
	(c) Retail Gasoline Statistics by Metropolitan Area (approx. 1 pp.) Actual number of gasoline outlets and their sales within the metropolitan areas of Montreal, Ottawa - Hull, Toronto - Hamilton, Winnipeg and Vancouver.....	\$5.00 per year

SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.

Note:

1. Natural gas volumes are measured in cubic feet at 14.73 pounds per square inch absolute and at 60°F.
2. Combined industry tables are not the arithmetic sum of the individual tables but have inter-industry transactions eliminated.

INTRODUCTION

This report presents the seventh of a series of annual statistics on Transport and Distribution Systems. It combines the reports previously published as Gas Pipe Line Transport and Gas Utilities (Distribution Systems). Monthly statistics for gas sales have been compiled since 1942 while monthly statistics for gas pipe line transport have been available from January 1959.

The Dominion Bureau of Statistics appreciates the co-operation and valuable technical advice received from the Statistics Committee of the Canadian Gas Association.

This report includes statistics for those companies primarily engaged in the selling of manufactured or natural gas to ultimate consumers through distribution pipe lines (distribution systems), and those companies engaged in the transportation of natural gas by pipe line from natural gas fields or processing plants to the local distribution systems (transport systems). Gas distribution companies receive the bulk of their revenue from the sales of natural gas to the ultimate consumer, while gas pipe line transport companies obtain the bulk of their revenue from the sale of gas to distribution companies for resale or for export. It should be noted that many gas distribution companies have extensive natural gas transmission operations but are not included in the gas pipe line transport sector because these operations are not separable from their primary activity, natural gas distribution. The monthly report, "Gas Utilities" (Catalogue No. 55-002) presents statistics which integrate the origin, movement and traffic of gas by pipe line and distribution systems and also presents sales of gas by distribution utilities.

Traffic of the gas utilities is reported in terms of gas volume handled, and to provide as accurate a statistical series as possible, the concept of accounting for all receipts and disposition of gas is used. As a result, natural gas receipts from all sources are equal to the disposition of natural gas sales, deliveries to other pipe line companies, inventory changes and fuel. In addition, a certain amount of gas is lost or unaccounted for as a result of pipe line leakage, metering differences, etc.; metering differences include cyclical billing adjustments which arise because it is impossible for a company to bill all of its customers at exactly the same time that it reads all its receiving meters. Significant statistics which separate gas movements of transport and distribution systems are given separately in the receipt and disposition tables. Gas sales categories are defined as follows:

- (a) **Residential:** Sales of gas at residential rates for residential use, including house heating, cooking, water heating, etc.
- (b) **Industrial:** Sales of natural gas at industrial rates, mainly to industrial and manufacturing concerns such as manufacturers

of chemicals, machinery, textiles, food stuffs, foundries and machine shops. These sales include the sales of natural gas for heating purposes as well as raw materials for manufacturing processes. Certain very large commercial establishments such as large hotels or department stores may be included in this category.

- (c) **Commercial:** Sales of gas at commercial rates to hotels, restaurants, department stores, retail dealers, etc. are normally included in this category. However, certain very small industrial establishments may be included.
- (d) **Miscellaneous:** All sales not classified above but not including sale for resale.

Although gas is handled at various pressures in the pipe line systems, and various provinces report volumes on different pressure bases, in this report all volumes of gas have been converted to a common pressure base of 14.73 pounds per square inch absolute.

Review of Survey Results

Sales of natural gas to ultimate customers within Canada during 1965 increased 13.6 per cent to 573.0 from 504.5 billion cubic feet in 1964, and revenue from these sales increased 12.6 per cent to \$369.3 from \$328.0 million. The number of natural gas customers increased to 1,569 thousand from 1,507, while sales per customer increased to 374.8 Mcf. from 344.4. Average revenue per Mcf. was 64 cents and average revenue per customer \$241.54.

Sales per residential customer increased 12.2 Mcf. to 134.6, revenue per customer increased \$8.34 to \$135.94 and revenue per Mcf. decreased 3 cents to \$1.01. Sales per industrial customer increased 1,259.1 Mcf. to 25,659.7, revenue per customer increased \$559.52 to \$9,773.72 and revenue per Mcf. remained the same as the previous year at 38 cents. Commercial sales per customer increased 93.8 Mcf. to 802.6, revenue per customer increased \$57.73 to \$569.14 and revenue per Mcf. decreased one cent to 71 cents.

Sales of natural gas for residential use increased to 187.3 billion cubic feet from 163.6 billion in 1964. Largest volume of these sales was in Ontario (41.8 per cent) followed by Alberta (25.8 per cent), Saskatchewan (10.6 per cent), British Columbia (9.0 per cent), Manitoba (7.6 per cent), Quebec (5.2 per cent) and a small amount in New Brunswick. Sales for industrial use increased to 284.7 billion cubic feet from 257.4, Ontario accounting for 36.7 per cent, followed by Alberta (31.5 per cent), British Columbia (12.4 per cent), Saskatchewan (9.7 per cent), Quebec (6.6 per cent), and Manitoba (3.1 per cent). Sales for commercial

use increased to 101.0 billion cubic feet from 83.5 billion, largest portion of these sales in Ontario (36.1 per cent) followed closely by Alberta (35.8 per cent), Saskatchewan (9.7 per cent), Manitoba (9.7 per cent), British Columbia (6.0 per cent) and Quebec (2.7 per cent).

Sales of liquefied petroleum gases in pipe line systems decreased 7.9 per cent to 925 million cubic feet from 1,005 million while sales of manufactured gas increased 10.6 per cent to 709 million cubic feet from 641 million in the previous year.

Peak sales of natural gas were recorded in January, 67.4 billion cubic feet, up 14.0 per cent compared with the peak month (December) of 1964.

Total natural gas receipts from fields or processing plants, by gas utilities, amounted to 1,028.8 billion cubic feet, up 9.0 per cent from the 944.2 billion in 1964. Imports increased 84.4 per cent to 17.7 billion cubic feet from 9.6 billion. Other receipts, including liquefied petroleum gases used for peak shaving and other temporary uses, increased to 369 million cubic feet from 333 million.

Receipts from storage during the year amounted to 34.7 billion cubic feet, up 27.6 per cent from 27.2 billion and deliveries to storage amounted to 46.2 billion cubic feet, up 30.1 per cent from 35.5 billion. Net increase of gas in storage during the year was 11.5 billion cubic feet. These storage facilities are used to satisfy peak seasonal demands and are located in three provinces, Ontario, Saskatchewan and Alberta.

Natural gas production totalled 1,236.8 billion cubic feet. Of this, 1,028.8 billion cubic feet was marketable gas. The remainder was placed in field injection or storage or used and unaccounted for in field gathering or gas processing plant operations. Alberta accounted for the largest portion, 844.1 billion cubic feet, of the marketable gas.

The total traffic of the gas transport systems was estimated at 743.6 billion Mcf. miles or 16,954 million ton miles compared with 671.4 billion Mcf. (15,309 ton) miles in 1964. The gross margin per MMcf. mile was 17.2 cents (0.7524 cents per ton mile) compared with 18.4 cents in 1964, and 19.1 cents in 1963. Gross margin per Mcf. of gas carried was 16.1 cents.

The average length of haul for transport systems was estimated at 939 miles compared with 929 miles last year, and the average throughput per mile of line was 320,824 Mcf. per day, an increase of 11.3 per cent from 288,338 Mcf. for 1964; the average throughput was 2,169,695 Mcf. per day.

Natural gas utilities operated 88 compressor stations, five more than in the previous year and installed compressor horsepower increased to 709,359 from 679,914.

Pipe line mileage operated by natural gas distribution systems amounted to 34,638.6 miles, an increase of 1,860 miles during the year. Manufactured gas systems operated 467.2 miles of pipe line, and natural gas transport systems operated 6,350.2 miles. Total mileage of all natural gas pipe lines, including lines operated by producing and gas processing companies amounted to 44,072.9 miles, up 2,211.1 miles during the year.

Major additions to pipe line were completed by both transmission and distribution companies. Three companies accounted for the largest portion of the transmission company increases. Westcoast Transmission Company Limited added 220 miles of main line in British Columbia, Alberta Gas Trunk Line Company Limited added 180 miles in Alberta and Trans-Canada Pipe Lines Limited added 41 miles to their main line in Manitoba as well as 84 miles looped line, 30 miles of this in Manitoba and 54 miles in Saskatchewan. Of the distribution companies the greatest increase in pipe line was recorded by Saskatchewan Power Corporation, 150 miles of transmission line and 103 miles of distribution line, thus extending service to 12 new communities. Other additions to pipe line by distribution companies were made by Inter City Gas Utilities Limited, 92 miles of transmission line and 78 miles of distribution line. Northwestern Utilities Limited, 91 miles of transmission line and 56 miles of distribution line. Union Gas Company of Canada Limited, 141 miles of distribution line, British Columbia Hydro and Power Authority, 120 miles of distribution line, and Consumers' Gas Company, 106 miles of distribution line.

The plant property and equipment accounts of the natural gas utility industries at the end of 1965 was \$2,322 million, 48.1 per cent in the transport sector and 51.9 per cent in the distribution sector. Transmission plant is the largest single account, making up 48.0 per cent of fixed assets. In 1965 expenditure on the construction of new plant and equipment amounted to \$228.8 million or 9.9 per cent of fixed assets. Total plant made up the largest single asset of both industries. Accumulated depreciation amounted to \$333.4 million or 14.4 per cent of total plant in service. Total current assets amounted to \$158.4 million and current liabilities \$192.9 million.

The four largest companies in the transport systems accounted for \$1,053.4 million in assets or 44.4 per cent of all assets of natural gas utilities.

Total fiscal year revenues from gas sales of all companies amounted to \$474.2 million. Revenue for gas distribution systems was \$370.2 million while transport systems had a revenue of \$244.5 million.

The interprovincial transport systems made a profit of \$17.4 million, down 4.9 per cent from \$18.3 million in 1964. Intraprovincial transport companies decreased their net income 26.4 per cent to \$6.4 million from \$8.7 million.

The cost of gas for the utilities continued to dominate the expenses and other deductions making up 34.6 per cent compared with 38.8 per cent last year. Interest on long term debt was the second most important item making up 19.6 per cent. The average interest rate paid during the year was 5.4 per cent. Depreciation for the year was \$56.3 million or 2.5 per cent of average plant in service.

The natural gas utilities had approximately \$680 million available for expenditures during the year, 60.4 per cent of this was applied to the gas distribution industry, and the remaining 39.6 per cent to the gas pipe line transport industry. Revenue from gas distribution operations accounted for 76.6 per cent of this system's sources, and revenue in the gas transport industry operations accounted for 77.0 per cent. Operating revenue accounted for 72.0 per cent of total sources for the

two industries combined after eliminating inter-industry transactions. The utilities received 10.0 per cent through the sale of long term debt, compared with 13.3 per cent last year.

Of the funds received by the utilities, 38.3 per cent was spent on operating and other expenses, 24.3 per cent invested in plant, 11.7 per cent was interest on long term debt, 5.0 per cent paid out in dividends, 5.0 per cent was an increase in the working capital, investments were increased 4.8 per cent and 2.8 per cent was tax on income. The remainder, 8.1 per cent, was used for other transactions.

Employees for the gas utilities totalled 11,316 and their earnings \$66.3 million. Average earnings per employee were \$5,860. In the previous year employees totalled 11,027, earnings \$60.8 million and average earnings per employee were \$5,511.
