Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

General Statistics Section,
Manufacturing and Primary Industries Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 996-4991) or to the Statistics Canada reference centre in:

| | | | |

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des statistiques générales,
Division des industries manufacturières et primaires,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 996-4991)
ou au centre de consultation de Statistique Canada à:

| | | | |

Introduction

General

This publication presents data on the consumption of purchased fuel and electricity, broken down by type of fuel, by the manufacturing, mining, logging and electric power industries in Canada.

In prior years much of the detail by type of fuel shown in this publication used to also appear in the individual industry publications. However commencing with the year 1979 this detail no longer appears in the individual industry tables and is only available in this publication and in CANSIM. For users equipped with computer capabilities we can also provide this data back to 1975 on computer tape. A companion publication *Consumption of Purchased Fuel and Electricity by the Manufacturing, Mining and Electric Power Industries, 1962-1974* (Catalogue 57-506, Occasional) presents comparable historical data prior to the first issue of this publication in 1975.

Since some smaller establishments are not included in this report, the reader is urged to read the section on "Data Scope and Coverage" before using the figures given herein.

To help the reader to relate the data shown for each individual industry to the various industry groupings within the total structure of all manufacturing and other industrial activity covered by this publication, a table showing all relevant sections of the Standard Industrial Classification (SIC) is included near the back of this publication as Appendix III.

Conversion to Metric Units of Measure

Commencing with this issue, quantitative figures shown in this publication are being given in metric units. A few conversion ratios relating metric to imperial units of measure are as follows:

1 gallon (Canadian) = 4.546 09 litres (exactly).

1 ton (Imperial) = 0.907 184 748 metric tonnes.

1 cubic foot = 0.028 327 84 cubic metres (for natural gas only. Includes temperature adjustment).

Renseignements généraux

La présente publication renferme des données sur la consommation du combustible, par genre, et de l'électricité achetés par les industries manufacturières, minières et forestières et par l'industrie des services d'électricité au Canada.

Par les années précédentes la ventilation par type de combustible présentée dans cette publication, a paru également dans les publications distinctes consacrées à chacune des industries. Toutefois, commençant avec l'année 1979, cette ventilation n'apparaît plus dans les tableaux des industries distinctes et sera disponible seulement dans ce bulletin et par CANSIM. Les usagers ayant accès à un ordinateur peuvent aussi obtenir cette information à partir de 1975 sur ruban magnétique. Une publication hors série du même genre intitulée *Consommation de combustible et d'électricité achetés par les industries manufacturières et minières et l'industrie des services d'électricité, 1962-1974* (n° 57-506 au catalogue, hors série) renferme des données chronologiques analogues avant la première parution de cette publication en 1975.

Puisque certains petits établissements ne sont pas pris en compte dans le présent bulletin, le lecteur est prié instantanément de lire la section "Portée et champ d'observation" avant d'utiliser les chiffres publiés ici.

Pour aider le lecteur à rapprocher les données présentées pour chaque industrie aux différents groupes d'activité économique compris dans l'ensemble des activités manufacturières et industrielles visées par cette publication, un tableau de toutes les sections pertinentes de la Classification des activités économiques (CAE) se retrouve à l'appendice III à la fin de cette publication.

Conversion aux unités de mesure métriques

À compter du présent numéro, les chiffres figurant dans cette publication seront exprimés en unités métriques. Quelques équivalences pour la conversion des unités impériales en unités métriques suivent:

1 gallon (Canadien) = 4.546 09 litres (exactement).

1 tonne (Impérial) = 0.907 184 748 tonnes métriques.

1 pied cube = 0.028 327 84 mètres cubes (pour gaz naturel seulement. Comprend un ajustement pour température).

Statistical Highlights¹

The total value of fuel purchases as reported by **Manufacturing Industries** in Canada for the year 1980 came to \$4,449 million, up 14.7% from the 1979 total of \$3,880 million. (This and all other fuel figures for manufacturers shown herein cover only the larger manufacturing establishments who filled out our detailed questionnaire. However, since these larger establishments accounted for 96.3% of all manufactured shipments reported for 1980, they should account for a similarly high proportion of fuel expenditures.)

While the smaller firms were not required to report fuel consumption, head offices, sales offices, etc., which file separate head office reports do identify total fuel and electricity expenditures. In 1980 these head office reports filed by manufacturing firms accounted for a total of \$26.8 million in fuel and electricity expenditures, which is additional to the direct expenditures reported in detail by the large manufacturing establishments and shown in Tables 5 to 16 in this publication.

An analysis of the fuel cost reported by manufacturing establishments shows that three types of fuel continue to account for the great majority of energy requirements in this sector. These three are electricity at \$1,759 million, up 16.5%; natural gas at \$1,228 million up 15.0%; and heavy fuel oil which at \$744 million was up by 8.7%. These three types of fuel together accounted for 83.9% of all expenditures on fuel and electricity by manufacturing industries, down slightly from 84.1% in 1979.

To eliminate the substantial impact of inflation on these expenditures numbers, a comparison of **quantities** will be made. This shows that electricity purchases rose 4.3%, natural gas purchases gained 1.2% while heavy fuel oil dropped significantly with 10.5% decline from the respective 1979 volumes.

Due to the significant, but unequal, price increases which have taken place in the energy sector, we have in Text Table I based our analyses on quantities rather than volumes for all but the "Other" and "Total" categories.

Analysing the volume increases and decreases by type of fuel shows the largest increases were reported for diesel oil with a rise of 6.9%, electricity up 4.3% and natural gas which was ahead by 1.2%. The fuels showing the sharpest declines were liquified petroleum gas (LPG) down 18.8%, light fuel oil which

Faits saillants¹

La valeur totale des achats de combustible déclarés par les **industries manufacturières au Canada** pour 1980 s'est élevée à \$4,449 millions, une hausse de 14.7 % par rapport à 1979 (\$3,880 millions). (Ces chiffres et toutes les autres données sur la consommation de combustible figurant dans la présente publication s'appliquent uniquement aux grands établissements manufacturiers qui ont rempli notre questionnaire détaillé; toutefois, comme ceux-ci interviennent pour 96.3 % du volume total des livraisons de produits fabriqués déclarées pour 1980, leurs achats de combustible devraient donc se situer dans le même ordre d'importance.)

Les petites entreprises ne sont pas tenues de déclarer leur consommation de combustible, mais les sièges sociaux, les bureaux de ventes, etc., doivent préciser, dans leurs déclarations distinctes, les dépenses totales d'électricité et de combustible. En 1980, les sièges sociaux des établissements manufacturiers ont déclaré des dépenses d'électricité et de combustible qui ont totalisé \$26.8 millions, chiffre qui vient s'ajouter aux dépenses directes déclarées en détail par les grands établissements manufacturiers et qui figurent dans les tableaux 5 à 16 de la présente publication.

L'analyse des données déclarées par les établissements manufacturiers sur le coût du combustible révèle que les dépenses engagées sur ce chapitre dans ce secteur portent toujours principalement sur les trois catégories suivantes de combustible: l'électricité (\$1,759 millions), une hausse de 16.5 %; le gaz naturel (\$1,228 millions), une augmentation de 15.0 %; et les mazout lourds (\$744 millions), un accroissement de 8.7 %. À elles seules, ces trois catégories de combustible ont figuré pour 83.9 % de l'ensemble des dépenses de combustible et d'électricité des établissements manufacturiers, ce qui est légèrement inférieur aux 84.1 % de 1979.

Pour éliminer les répercussions importantes de l'inflation sur ces chiffres, il suffit de comparer les **quantités**, d'où il ressort que la consommation d'électricité et de gaz naturel a progressé de 4.3 % et de 1.2 % respectivement alors que celle des mazout lourds a régressé fortement (- 10.5 %) par rapport à 1979.

En raison des hausses de prix importantes mais inégales dans le secteur de l'énergie, les données présentées dans le tableau explicatif I sont fondées sur des quantités plutôt que sur des volumes pour toutes les catégories, sauf "autres" et "total".

L'analyse des augmentations et des diminutions en volume selon le genre de combustible consommé révèle que les plus fortes progressions se sont produites pour les huiles diesel (6.9 %), l'électricité (4.3 %) et la gaz naturel (1.2 %). Les combustibles pour lesquels on a enregistré une forte régression par rapport à 1979 sont les gaz de pétrole liquéfiés

¹ See Text Table I.

¹ Voir le tableau explicatif I.

dipped, 10.8% and heavy fuel oil which declined by 10.5% from their respective volumes in 1979. It is interesting to note the continuation of the decline in consumption of petroleum products in comparison with other sources of energy. The total consumption of the six petroleum-based fuels dropped by 9.2% to 8 902 million litres from 9 807 million litres in 1979, whereas the consumption of the two other major sources of energy, namely electricity and natural gas, both recorded modest increases. The impact of higher oil prices is clearly being shown in a shift to other energy sources by the manufacturing sector.

If the above changes are analysed on a provincial basis, it is found that the 6.9% rise in **diesel oil** consumption was fairly general right across the country with the two large consuming provinces showing gains of 6.0% (Ontario) and 13.4% (Quebec). The consumption of electricity gained largely because of an 8.6% increase in the largest consuming province, Quebec as Ontario consumption was virtually unchanged. Other provinces with significant increases were New Brunswick up 14.4%, Prince Edward Island up 12.1% and Alberta with a gain of 10.8%.

Looking at the major consumption decreases it is noted that the magnitude of the 18.8% drop in LPG consumption can be traced entirely to a 43.0% plunge in Ontario consumption as no other province declined more than 13.3%, and several posted increases. The decreases of 10.8% in light fuel oil and 10.5% in heavy fuel oil are attributable to the two major consuming provinces as the largest consuming province, Quebec, recorded declines of 9.6% and 8.5% for light and heavy fuel oil respectively, while Ontario had even larger drops of 20.0% and 12.5% for these two fuels.

Thermal electricity generating plants reported expenditures on fuel consumed totalling \$1,156 million in 1980, up 18.1% from the 1979 value. Of the six types of fuel consumed in these plants the two major ones, coal and heavy fuel oil between them accounted for 80.3% of total expenditures. Coal alone accounted for 60.9% up from 57.3% in 1979 as heavy fuel oil slipped to 19.4% of the total from 23.8% in 1979. Tonnage of coal rose 11.7% while litres of heavy fuel oil eased 8.9%. A surprising increase of 32.3% was recorded by diesel oil in contrast to the decreases generally recorded by petroleum products in 1980. This rise was largely due to a sharp jump in the largest consuming province, Quebec. The largest decrease was again turned in by natural gas with a 10.0% drop. The third largest fuel in 1980 for the first time was uranium at \$94.9 millions followed by natural gas with \$82.4 millions.

(GPL) (- 18.8 %), les mazouts légers (- 10.8 %) et les mazouts lourds (- 10.5 %). Il est intéressant de noter la baisse soutenue de consommation des produits pétroliers par rapport à d'autres sources d'énergie. La consommation totale des six combustibles à base de pétrole a diminué de 9.2 %, passant de 9 807 millions de litres en 1979 à 8 902 millions de litres en 1980, alors que les deux autres sources d'énergie, à savoir le gaz naturel et l'électricité, ont affiché des gains modestes. Les répercussions de l'augmentation des prix du pétrole sont nettement illustrées par l'adoption d'autres sources d'énergie par les industries manufacturières.

L'analyse par province des changements susmentionnés révèle que l'accroissement de 6.9 % de la consommation des huiles diesel s'est manifesté dans tout le pays, les deux principales provinces consommatrices, à savoir l'Ontario et le Québec ayant enregistré des gains respectifs de 6.0 % et 13.4 %. La consommation d'électricité s'est accrue surtout à cause d'une progression de 8.6 % dans la plus forte province consommatrice (Québec), puisque celle de l'Ontario est demeurée pratiquement inchangée. Les autres provinces qui ont affiché des accroissements marqués sont le Nouveau-Brunswick (14.4 %), l'Île-du-Prince-Édouard (12.1 %) et l'Alberta (10.8 %).

Lorsqu'on analyse les principales diminutions de la consommation d'énergie, on constate que la baisse de 18.8 % au titre des GPL est entièrement attribuable à la régression importante de 43.0 % en Ontario, vu qu'aucune autre province n'a subi des pertes supérieures à 13.3 %, plusieurs affichant même des gains. Les baisses de 10.8 % dans la consommation des mazouts légers et de 10.5 % dans celle des mazouts lourds sont attribuables aux deux grandes provinces consommatrices, notamment le Québec où l'on a enregistré des baisses de 9.6 % et de 8.5 % pour les mazouts légers et les mazouts lourds respectivement, alors qu'en Ontario, des diminutions plus élevées sont survenues pour ces deux combustibles (20.0 % et 12.5 %).

Les dépenses totales de consommation de combustibles déclarées par les **centrales thermiques** se sont chiffrées à \$1,156 millions en 1980, une hausse de 18.1 % par rapport à 1979. Ces centrales ont utilisé six catégories de combustibles, mais les deux principaux, le charbon et le mazout lourd, ont compté pour 80.3 % des dépenses totales. À lui seul le charbon a figuré pour 60.9 % contre 57.3 % en 1979, tandis que le mazout lourd est intervenu pour 19.4 % des dépenses totales contre 23.8 % en 1979. Le nombre de tonnes de charbon utilisées s'est accru de 11.7 %, tandis que la quantité de mazout lourd utilisée a baissé de 8.9 %. On a enregistré un accroissement surprenant de 32.3 % au titre des huiles diesel, ce qui fait contraste aux diminutions généralement affichées au niveau des produits pétroliers en 1980. Cette progression a été attribuable dans une large mesure à un accroissement marqué enregistré dans la principale province consommatrice, le Québec. Le gaz naturel a encore affiché la plus forte baisse, soit 10.0 %. En 1980, pour la

The average cost of uranium, used only in Ontario, took a remarkable leap from \$83 per kilogram in 1979 to over \$138 per kilogram in 1980.

The mining industries reported total expenditures on energy of \$706 million, up 16.6% from 1979. However the only major fuels to report increases in actual quantities consumed were diesel oil which rose 6.5% and light fuel oil which gained 5.3%. The largest percentage declines were recorded by heavy fuel oil down 13.4% and by natural gas with an 11.7% drop.

The major fuels in the mining sector in terms of dollar expenditures were electricity at \$341 million, diesel oil with \$126 million and heavy fuel oil at \$113 million. These three fuels together accounted for 82% of all expenditures on mining fuels. The quantity of electricity consumed eased very slightly by 0.9%.

The increase in diesel oil consumption may be traced to strong gains in British Columbia, Quebec and Alberta, while the rise in light fuel oil may be traced to strong increases in Newfoundland and Quebec. The decrease in heavy fuel oil may be traced to Quebec and Newfoundland who are the two main users of this fuel. The natural gas decrease occurred almost entirely in Ontario where consumption plunged 37%, as other major consuming provinces were virtually unchanged.

The logging industry reported 1980 fuel expenditures of \$121.0 million, up 20.3% from the 1979 cost. The two fuels accounting for the great bulk of expenditures were diesel oil with 66.4% of the total and gasoline with 23.9%. Between them these two fuels accounted for just over 90% of all fuel expenditures by the logging sector. Actual quantities of fuel consumed were however lower in 1980 for all types of fuel except electricity and the small "other" category. Diesel oil showed a marginal drop of 0.3% while gasoline eased back 2.5%.

The provinces accounting for most of the expenditures on logging fuel were British Columbia with 41.5% of the Canada total followed by Quebec with 22.3%, Ontario with 19.9% and New Brunswick with 7.0%.

Methodology and Data Collection

The data shown in this publication is collected by means of a question inserted in the questionnaires used in the census surveys of the industries involved.

première fois l'uranium, pour lequel les dépenses se sont élevées à \$94.9 millions, s'est placé au troisième rang, suivi du gaz naturel avec \$82.4 millions. Le prix moyen de l'uranium, qui est consommé uniquement en Ontario, a beaucoup augmenté, passant de \$83 le kilogramme en 1979 à plus de \$138 le kilogramme en 1980.

Le secteur minier a déclaré des dépenses totales de \$706 millions au titre de la consommation d'énergie, en hausse de 16.6 % sur 1979. Toutefois, les seuls principaux combustibles pour lesquels la consommation a réellement augmenté ont été les huiles diesel (6.5 %) et les mazouts légers (5.3 %). Les diminutions les plus élevées ont été enregistrées pour les mazouts lourds (- 13.4 %) et le gaz naturel (- 11.7 %).

Dans le secteur minier, les combustibles les plus utilisés ont été l'électricité (\$341 millions), les huiles diesel (\$126 millions) et les mazouts lourds (\$113 millions). Ensemble, ces trois combustibles ont compté pour 82 % des dépenses totales de la consommation de combustibles dans ce secteur. La quantité d'électricité utilisée a diminué très légèrement de 0.9 %.

L'accroissement de consommation des huiles diesel est attribuable à de fortes progressions en Colombie-Britannique et en Alberta, alors que pour les mazouts légers, cette hausse est imputable aux gains élevés enregistrés à Terre-Neuve et au Québec. La baisse de la consommation des mazuts lourds est attribuable au Québec et à Terre-Neuve qui en sont les deux principaux utilisateurs. La baisse au niveau du gaz naturel s'est produite presque entièrement en Ontario où la consommation a diminué de 37 %, alors qu'elle demeurait pratiquement inchangée dans les autres grandes provinces consommatrices.

Dans le secteur forestier, les dépenses en consommation ont atteint \$121.0 millions, 20.3 % de plus qu'en 1979. Les huiles diesel (66.4 %) et l'essence (23.9 %) sont intervenues pour la plus grande partie des dépenses, c'est-à-dire pour tout juste un peu plus de 90 % des dépenses totales. Toutefois, les quantités réelles de combustible utilisées en 1980 ont diminué dans toutes les catégories de combustibles, sauf l'électricité et la petite catégorie "autre". La consommation d'huiles diesel a diminué légèrement (0.3 %), tandis que celle de l'essence s'est accrue de 2.5 %.

La plupart des dépenses de consommation de combustible dans le secteur forestier ont été enregistrées en Colombie-Britannique (41.5 % du total national, suivie du Québec (22.3 %), de l'Ontario (19.9 %) et du Nouveau-Brunswick (7.0 %).

Méthodologie et collecte des données

Les données figurant dans ce bulletin sont tirées des renseignements fournis en réponse à une question insérée dans les questionnaires de recensement des industries concernées.

While the data shown herein covers the vast majority of fuel consumed by these industries, there are some exclusions and other complicating factors which should be taken into consideration when using these figures. These factors are outlined in the section on "Data Scope and Coverage".

In order to understand the nature of the data collected it is useful to know the instructions issued to the respondents for completing the questionnaires. The following are the guidelines given to Census of Manufactures respondents. Those for the Census of Mines and Census of Forestry (Logging) respondents are similar (see Appendix II).

Consumption of Purchased Fuel and Electricity

This question is designed to obtain information on all purchased fuel and electricity consumed by the establishment both in its manufacturing and non-manufacturing operations. Answers to the detailed questions should cover amounts used by the establishment in vehicles of all descriptions, plant and office operations and any ancillary units which comprise this accounting entity. Values reported should include transportation, duties, etc., which form part of the laid down cost at the establishment. You should not report fuel purchased as fuel consumed unless the quantities are substantially the same.

Data Scope and Coverage

In reviewing and using these data, the reader must bear in mind certain factors:

The series are not mutually exclusive in that the electric energy generated by the electric power industry from the fossil fuels shown in Table 1 (together with any generation from hydro or nuclear sources) is sold to consumers, among which are the logging, mining and manufacturing industries. The purchase of such electric energy by these industries is shown in Tables 2 to 16.

Consumption of purchased energy by the industries noted does not represent their total consumption, in that the data exclude consumption of any self-produced fuel or electricity. For example, the petroleum refining industry uses fuels produced by the refining process, the pulp and paper and sawmill industries consume substantial quantities of waste (e.g., slab and edgings), while numerous industrial establishments have their own hydro generating facilities. Any generating facilities owned by industrial establishments could use some of the fossil fuel shown in this publication as purchased, but equally such facilities could use self-produced fuels.

Ces données portent sur la plupart des combustibles consommés par ces industries, mais les utilisateurs devront tenir compte du fait que certains éléments ont été exclus et que d'autres compliquent l'interprétation des données. Ces derniers points sont mentionnés à la section "Portée et champ d'observation".

Pour comprendre la nature des données recueillies, il est bon de connaître les instructions données aux enquêtés sur la façon de remplir les questionnaires. Voici la ligne de conduite que doivent suivre les enquêtés du recensement des manufactures. Les instructions fournies dans le recensement des mines et celui des forêts sont analogues (voir l'appendice II).

Consommation de combustible et d'électricité achetés

Cette question vise à recueillir des renseignements sur tout le combustible et l'électricité achetés et consommés par l'établissement dans ses activités manufacturières et non manufacturières. Les réponses aux questions détaillées doivent prendre en compte les quantités utilisées par les véhicules de tous genres, l'usine et les bureaux ainsi que les établissements auxiliaires faisant partie de cette entité comptable. Les valeurs déclarées doivent comprendre le coût du transport, les taxes, etc., qui font partie du coût du combustible livré à l'établissement. Ne pas déclarer le combustible acheté comme combustible consommé, sauf si les quantités sont sensiblement les mêmes.

Portée et champ d'observation

Le lecteur doit tenir compte de certains facteurs lorsqu'il analyse et utilise ces données:

Les séries ne s'excluent pas l'une l'autre; en effet, l'énergie électrique que produit l'industrie des services d'électricité à partir des combustibles fossiles figurant au tableau 1 (ainsi que l'électricité provenant de sources hydrauliques et nucléaires) est vendue à des consommateurs, dont des industries forestières, minières et manufacturières. Les achats d'électricité de ces industries figurent aux tableaux 2 à 16.

L'énergie achetée par les industries en question ne constitue pas leur consommation totale, en ce sens que les données excluent la consommation de l'électricité ou des combustibles qu'elles auraient elles-mêmes produits. Par exemple, les raffineries de pétrole utilisent des combustibles provenant du processus de raffinage, les usines de pâtes et papiers et les scieries consomment des quantités importantes de déchets (comme les dosses et les délinqures), et de nombreux établissements industriels ont leurs propres installations hydroélectriques. Les installations de production d'électricité appartenant à des établissements industriels pourraient utiliser non seulement certains des combustibles fossiles achetés figurant dans la présente publication, mais aussi des combustibles de propre fabrication.

The data exclude any fuels used for non-fuel purposes, for example, natural gas used as a raw material input.

No quantities are shown for "other fuels" (except in Table 1) since this category covers steam, wood, etc., involving several different units of measure.

Fuels and energy used by the logging, mining and manufacturing industries do not necessarily relate to industrial activity as such. For example, fuel used in transportation activities or for space heating of an establishment would be included along with that used to provide power for actual industrial processing. Thus any interpretation of ratios between fuel used and industrial activity should be made keeping in mind that some elements of fuel used will be influenced by the extent to which industries provide their own transportation and heating services. See the extract above from instructions to the Census of Manufactures respondents in replying to questions on the Consumption of Purchased Fuel and Electricity. Census of Logging and Census of Mining instructions are similar to those for Manufacturing.

The coverage of the major industry sectors in this report is not complete. As stated above, the Electric Power Industry coverage excludes any power generated by private industry. In mining the coverage is for all establishments in the Annual Census of Mines, Quarries and Oil Wells except for SIC 064, Crude Petroleum and Natural Gas Industry and SIC Major Group 5, Services Incidental to Mining.

Forestry and manufacturing coverage is also incomplete in that small establishments are not surveyed for their use of fuels. For an explanation of how this might effect the data see the Introduction to publication, *Manufacturing Industries of Canada: National and Provincial Areas, 1980* (Catalogue 31-203). However, as an indication of this effect, the value of manufactured shipments of these small establishments in forestry was only 12.9% of the total logging activity shipments, while in manufacturing the small establishments accounted for 3.7% of the total manufacturing activity shipments.

Data on the consumption of purchased fuel and electricity used in this report are gathered on questionnaires sent to operating units only. They thus exclude any consumption by ancillary units such as head offices, sales offices, warehouses, laboratories, etc., included in census principal statistics of an industry, if such consumption is not included in the return of an operating establishment.

Les données excluent tous les combustibles qui ne sont pas utilisés comme tels, par exemple, le gaz naturel servant comme matière première.

On n'a indiqué aucune quantité (sauf au tableau 1) au chapitre des "autres combustibles" puisque cette catégorie comprend la vapeur, le bois, etc., éléments dont les quantités sont exprimées en unités de mesure différentes.

Les combustibles et l'électricité utilisés par les industries forestières, minières et manufacturières n'interviennent pas nécessairement dans l'activité industrielle en tant que telle. Ainsi, les données comprennent le combustible dont se servirait un établissement à des fins de transport ou pour le chauffage de ses locaux et le combustible utilisé dans la fabrication industrielle proprement dite. Si l'on cherche à interpréter le rapport entre le combustible utilisé et l'activité industrielle, il ne faut donc pas perdre de vue que le niveau de consommation dépend en partie de la mesure dans laquelle les établissements assurent leurs propres services de transport et de chauffage. On trouvera ci-dessus un extrait des instructions données aux enquêtés du recensement des manufactures concernant la façon de répondre aux questions sur la consommation du combustible et de l'électricité achetés. Les instructions du recensement des forêts et du recensement des mines sont semblables à celles du recensement précité.

Dans ce bulletin, le champ d'observation des principaux secteurs de l'industrie n'est pas complet. Comme il est mentionné ci-dessus, le champ d'observation des services d'électricité ne comprend pas l'énergie produite par le secteur privé. En ce qui a trait aux mines, le champ observé recouvre tous les établissements du recensement annuel des mines, carrières et puits de pétrole, sauf le no 064, "Industrie du pétrole brut et du gaz naturel", et le groupe 5, "Services miniers", de la CAÉ.

Le champ d'observation de l'exploitation forestière et des industries manufacturières est également incomplet, car les petits établissements ne sont pas pris en compte. On trouvera des explications sur l'effet que ces lacunes peuvent avoir sur les données dans l'introduction de la publication intitulée, *Industries manufacturières du Canada: Canada et provinces, 1980* (no 31-203 au catalogue). À titre indicatif, signalons que la valeur des livraisons de produits de propre fabrication des petites entreprises des secteurs de l'exploitation forestière et de l'industrie manufacturière n'a représenté, respectivement, que 12.9 % et 3.7 % des livraisons totales dans ces secteurs.

Les données sur la consommation du combustible et de l'électricité achetés figurant dans ce bulletin proviennent de questionnaires envoyés aux seules unités d'exploitation. Elles ne font donc pas état de la consommation des unités auxiliaires (sièges sociaux, bureaux des ventes, entrepôts, laboratoires, etc.), qui est prise en compte dans les statistiques principales d'une industrie, si cette consommation n'est pas comprise dans la déclaration d'un établissement d'exploitation.

Confidentiality

Certain industries in this report are withheld to prevent disclosure of detail relating to individual respondents, as required by the Statistics Act.

Industry Classification

The basic data for this report have been compiled according to the 1970 revision of the Standard Industrial Classification.²

² Statistics Canada, *Standard Industrial Classification Manual, Revised 1970* (Catalogue 12-501E).

Confidentialité

Conformément aux dispositions de la Loi sur la statistique, on a dû éliminer certaines statistiques de ce bulletin afin d'éviter que ne soient divulgués des détails concernant des répondants particuliers.

Classement des industries

Les données de base de ce bulletin ont été rassemblées à partir de la Classification des activités économiques², révisée en 1970.

² Statistique Canada, *Classification des activités économiques, révisée 1970*, n° 12-501F au catalogue.

THERMAL GENERATING STATION FUEL CONSUMPTION

Company
Name

Year

AUTHORITY

This census is authorized under the authority of the Statistics Act, Chapter 15, Statutes of Canada 1970-71-72.

INFORMATION SHARING AGREEMENTS

To reduce response burden and to ensure more uniform statistics, Statistics Canada has entered into agreements with various government departments and agencies for the sharing of data:

Under Section 11 of the Canada Statistics Act, these data are shared with the Federal Department of Energy, Mines and Resources, and with the National Energy Board for those respondents whose operations in part are regulated by the Board.

Section 11 agreements shall not apply to your report if an authorized officer or person of your company objects in writing to the Chief Statistician and mails that letter to the Manufacturing and Primary Industries Division of Statistics Canada together with the completed questionnaire. Please specify those agencies or departments listed above from which data shall be withheld.

COMPLETION AND RETURN

One copy of this schedule is to be completed for each station or station component i.e. steam conventional, steam nuclear, internal combustion, gas turbine, and returned to the Energy and Minerals Section, Ottawa, K1A 0T6, by March 1 following the year under review.

Name of station

| Type of Station of Component | Conventional Steam <input type="checkbox"/> | Nuclear Steam <input type="checkbox"/> | Internal combustion <input type="checkbox"/> | Gas turbine <input type="checkbox"/> |
|---|--|---|---|---|
| Type of fuel | Fuel consumed | | | Net generation (no breakdown required) |
| Report only the amount of fuel used for the generation of electricity, estimate if necessary) | Average heat content (report only in one of the units indicated, check appropriate box) | Amount | Total cost (report to nearest dollar omit cents) | |
| Solid | | | | |
| Biriminuous coal - Canadian | 1.1 | | | |
| - Imported | 1.2 | | | |
| Subbituminous coal | 1.3 | | | |
| Saskatchewan lignite | 1.4 | | | |
| Spent pulping liquors | 1.5 | | | |
| Wood (bark, hog fuel, etc.) | 1.6 | | | |
| Petroleum coke | 1.7 | | | |
| Liquid | | | | |
| Light fuel oil (grades 1,2 & 3) | 2.1 | | | |
| Heavy fuel oil (grades 4,5 & 6) | 2.2 | | | |
| Diesel fuel | 2.3 | | | |
| Tar | 2.4 | | | |
| Other (specify) | | | | |
| Gaseous | | | | |
| Natural gas | 3.1 | | | |
| Coke oven gas | 3.2 | | | |
| Blast Furnace gas | 3.3 | | | |
| Other (specify) | 3.4 | | | |
| Other | | | | |
| Nuclear | 4.1 | kJ/g | kilograms | |
| Waste heat | 4.2 | Please check box if waste heat is used to produce steam for generation <input type="checkbox"/> | | |
| Total Net Generation | 5.0 | | | |

LÉGALITÉ

Ce recensement est effectué en vertu de la Loi de la Statistique, chapitre 15, Statuts du Canada de 1970-71-72.

ENTENTES DE PARTAGE DES DONNÉES

Pour alléger le fardeau de réponse et assurer des statistiques plus uniformes, Statistique Canada a conclu des ententes avec divers ministères et organismes publics en vue d'un échange de données.

En vertu de l'article 11 de la Loi sur la statistique du Canada, les données sont partagées avec le ministère de l'Énergie, des Mines et des Ressources ainsi que l'Office national de l'énergie pour les répondants dont une partie de leurs opérations est régie par l'Office.

Les ententes conclues en vertu de l'article 11 ne s'appliqueront pas à vos déclarations pour cette enquête si un agent ou une personne autorisée de votre société signifie au statisticien en chef, par écrit, qu'il s'y oppose et envoie sa lettre accompagnée du questionnaire dûment rempli à la Division des industries manufacturières et primaires de Statistique Canada. Veuillez préciser les organismes ou ministères susmentionnés auxquels il ne faut pas communiquer les données.

RÉPONSE ET RETOUR

1) Un exemplaire de ce rapport devra être rempli pour chaque centrale ou unité de centrale (c'est-à-dire production d'énergie par vapeur-méthode classique, vapeur-méthode nucléaire, combustion interne, turbine à gaz) et renvoyé à la Section de l'énergie et des minéraux, Ottawa K1A 0T6 au plus tard le 1 mars suivant l'année observée.

Nom de la centrale

| Type de centrale ou d'unité | Vapeur-méthode classique <input type="checkbox"/> | Vapeur-méthode nucléaire <input type="checkbox"/> | Combustion interne <input type="checkbox"/> | Turbine à gaz <input type="checkbox"/> |
|--|---|---|---|--|
| Type de combustible | Combustible consommé | | | Production nette (ventilation non requise) |
| (Production électrique seulement, estimez si nécessaire) | Teneur moyenne (veuillez cocher la case appropriée) | Quantité | Coût total \$ (omettre les cents) | |
| Solides | <input type="checkbox"/> kJ/kg <input type="checkbox"/> BTU/lb | <input type="checkbox"/> tonnes courtes <input type="checkbox"/> tonnes métriques | | |
| Charbon bitumineux – Canadien | 1.1 | | | |
| – importé | 1.2 | | | |
| Charbon sous-bitumineux | 1.3 | | | |
| Lignite de la Saskatchewan | 1.4 | | | |
| Lessive de pâte épuisée | 1.5 | | | |
| Déchets de bois | 1.6 | | | |
| Coke de pétrole | | | | |
| Liquides | <input type="checkbox"/> kJ/l <input type="checkbox"/> BTU/gal | <input type="checkbox"/> litres <input type="checkbox"/> gallons | | |
| Mazout léger (n°s 1-2-3) | 2.1 | | | |
| Mazout lourd (n°s 4-5-6) | 2.2 | | | |
| Diesel | 2.3 | | | |
| Goudron | 2.4 | | | |
| Autres (spécifier) | 2.5 | | | |
| Gazeux | <input type="checkbox"/> kJ/m ³ <input type="checkbox"/> BTU/pl.cu. | <input type="checkbox"/> '000 mètres cubes <input type="checkbox"/> '000 pieds cubes | | |
| Gaz naturel | 3.1 | | | |
| Gaz de four à coke | 3.2 | | | |
| Gaz de haut fourneau | 3.3 | | | |
| Autres (spécifier) | 3.4 | | | |
| Autres | kJ/g | kilograms | | |
| Nucléaire | 4.1 | | | |
| Récupération thermique | 4.2 | Veuillez cocher si une récupération thermique est utilisée à la production de vapeur pour la production d'électricité | <input type="checkbox"/> | |
| Total | 5.0 | | | |

CERTIFICATION

Je déclare que les renseignements donnés dans le présent rapport sont de bonne foi et, autant que je sache, complets, et exacts.

Appendix II

Question Asked of Respondents to the Annual Census of Logging, Annual Census of Mines and the Annual Census of Manufactures

| 5 CONSUMPTION OF PURCHASED FUEL AND ELECTRICITY (refer to Instruction 5 in the Reporting Guide) | | | | | |
|--|-------|--|---|----------------------------------|---------------|
| BASIS OF VALUATION FOR PURCHASED FUEL AND ELECTRICITY | | Commodity code for Statistics Canada use | Optional Units of Measure (Indicate option by deleting unit not used) | | Quantity used |
| 5.12 If you are unable to report consumption as requested and are reporting purchases, please check here <input type="checkbox"/> | | | short ton | metric tonne | |
| 5.1 Coal | 261 6 | | 1000 cu. ft. | cu. metres | |
| 5.2 Natural gas | 263 1 | | | | |
| 5.3 Motor gasoline (excluding aviation) | 431 2 | | | | |
| 5.4 Kerosene, stove oil (No. 1 fuel oil) | 432 2 | | | | |
| 5.5 Diesel oil | 432 3 | | | | |
| 5.6 Light fuel oil (Nos. 2 and 3) | 432 4 | | | | |
| 5.7 Heavy fuel oil (Nos. 4, 5 and 6) | 432 5 | | | | |
| 5.8 Liquefied petroleum gases (propane, butane, etc.) | 436 1 | | | | |
| 5.9 Electricity purchased (include service charge) | 497 1 | | 1000 kW.h | | |
| 5.10 Steam | 497 2 | | 1,000,000 B.t.u. | gigajoule | |
| 5.10.1 Other fuel purchased and used (include aviation gasoline, etc.) (Please specify) | | | (Please indicate unit) | | |
| 5.11 Total fuel and electricity | | | | | |
| 5.12 ELECTRIC GENERATING FACILITIES Did this establishment during the reporting period operate generating facilities with nameplate rating of more than 500 kW? | | | Yes 1 <input type="checkbox"/> | No 2 <input type="checkbox"/> | |

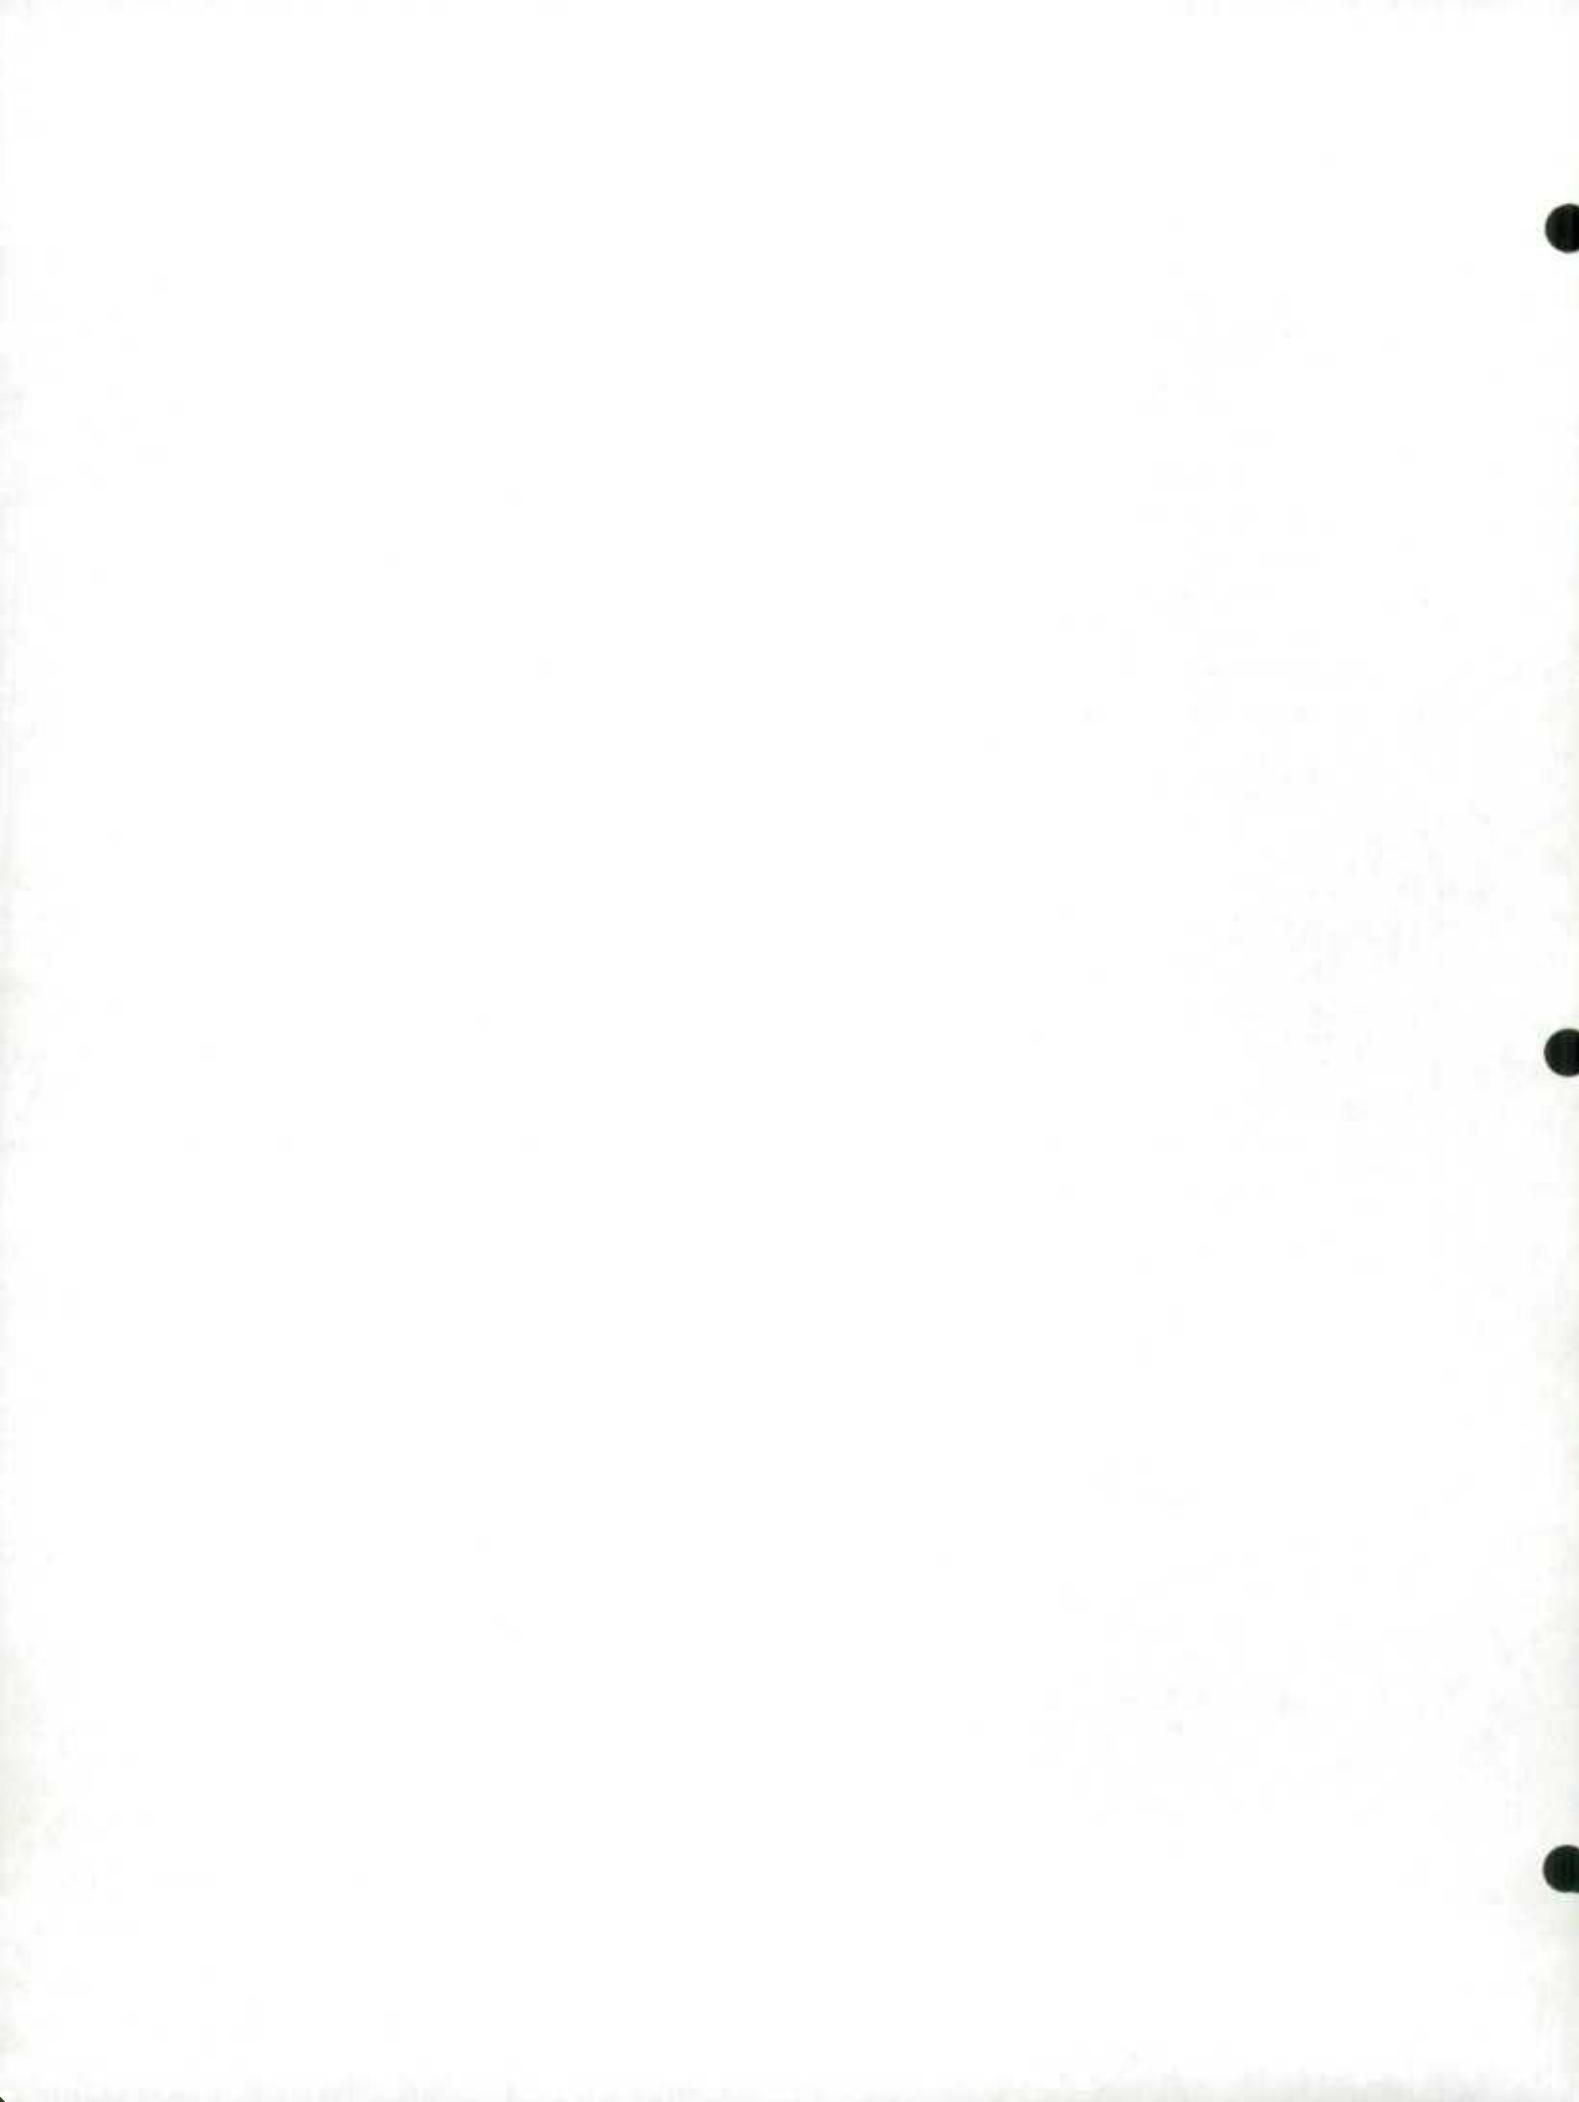

STANDARD

Appendice II

Question posée aux répondants au recensement annuel de l'exploitation forestière, au recensement annuel des mines et au recensement annuel des manufactures

| 5 CONSOMMATION DE COMBUSTIBLE ET D'ÉLECTRICITÉ (voir l'article 5 du Guide de déclaration) | | | | | |
|--|-------|--|---|-----------------------------------|-------------------|
| MODE D'ÉVALUATION DU COMBUSTIBLE ET DE L'ÉLECTRICITÉ ACHETÉS | | Indicatif des marchandises à l'usage de Statistique Canada | Unité de mesure choisie (biffer la mention inutile) | | Quantité utilisée |
| 5.12 Si vous ne déclarez pas la consommation telle que demandé, mais plutôt les achats, cochez ici <input type="checkbox"/> | | | Tonne courte | Tonne métrique | |
| 5.1 Charbon | 261 6 | | 1000 lb ³ | m ³ | |
| 5.2 Gaz naturel | 263 1 | | | | |
| 5.3 Essence pour moteurs (sauf l'essence d'aviation) | 431 2 | | | | |
| 5.4 Kérozène, mazout pour poêles (mazout n° 1) | 432 2 | | | | |
| 5.5 Huiles diesel | 432 3 | | | | |
| 5.6 Mazouts légers (n° 2 et 3) | 432 4 | | | | |
| 5.7 Mazouts lourds (n° 4, 5 et 6) | 432 5 | | | | |
| 5.8 Gaz de pétrole liquéfiés (propane, butane, etc.) | 436 1 | | | | |
| 5.9 Électricité achetée (y compris le coût de service) | 497 1 | | 1000 kW.h | | |
| 5.10 Vapeur | 497 2 | | 1,000,000 Btu | gigajoule | |
| 5.10.1 Autres combustibles achetés et utilisés (y compris l'essence d'aviation, mazout, etc.) | | | (Préciser l'unité) | | |
| 5.11 Total du combustible et de l'électricité | | | | | |
| 5.12 GÉNÉRATRICES D'ÉLECTRICITÉ L'établissement a-t-il utilisé des génératrices d'électricité ayant une puissance nominale supérieure à 500 kW au cours de l'année en question? | | | Oui 1 <input type="checkbox"/> | Non 2 <input type="checkbox"/> | |

| 0794 | Potash mines | 0794 | Mines de potasse |
| 0799 | Miscellaneous non-metal mines, n.e.s. | 0799 | Mines non métalliques diverses, n.c.a. |

See footnote(s) at end of table.

Voir note(s) à la fin du tableau.

INDUSTRIE DE L'EXPLOITATION FORESTIÈRE ET DES MINES:

1. EXPLOITATION FORESTIÈRE:

Exploitation forestière
Exploitation forestière - Bois à pâte¹
Exploitation forestière, n.c.a.¹

1. MINES MÉTALLIQUES:

Placers d'or²
Mines de quartz aurifère
Mines d'uranium
Mines de fer
Mines métalliques diverses
Mines de cuivre-or-argent
Mines de nickel-cuivre
Mines d'argent-cobalt
Mines d'argent-plomb-zinc
Mines de molybdène
Mines métalliques diverses, n.c.a.

2. COMBUSTIBLES MINÉRAUX:

Mines de charbon
Industrie du pétrole brut et du gaz naturel³

3. MINES NON MÉTALLIQUES (SAUF MINES DE CHARBON):

Mines d'amiante
Tourbières
Mines de gypse
Mines non métalliques diverses
Mines de stéatite et de talc
Mines de feldspath et de quartz
Mines de sel
Mines de potasse
Mines non métalliques diverses, n.c.a.

| 302 | Fabricated structural metal industry | 302 | Fabrication d'éléments de charpente métallique |
| 303 | Ornamental and architectural metal industry | 303 | Industrie des produits métalliques d'architecture et d'ornement |
| 3031 | Metal door and window manufacturers | 3031 | Fabricants de portes et fenêtres métalliques |
| 3039 | Ornamental and architectural metal industry, n.e.s. | 3039 | Fabrication de produits métalliques d'architecture et d'ornement, n.c.a. |
| 304 | Metal stamping, pressing and coating industry | 304 | Industrie de l'emboutissage, du matriçage et du revêtement des métaux |
| 3041 | Metal coating industry | 3041 | Industrie du revêtement des métaux |
| 3042 | Metal stamping and pressing industry | 3042 | Industrie de l'emboutissage et du matriçage des métaux |
| 305 | Wire and wire products manufacturers | 305 | Industrie du fil métallique et de ses produits |
| 30516 | Fastener manufacturers | 30516 | Fabricants d'agrafes |
| 30596 | Wire and wire products manufacturers, n.e.s. | 30596 | Industrie du fil métallique et de ses produits, n.c.a. |
| 306 | Hardware, tool and cutlery manufacturers | 306 | Fabricants de quincaillerie, d'outillage et de coutellerie |
| 307 | Heating equipment manufacturers | 307 | Fabricants d'appareils de chauffage |
| 308 | Machine shops | 308 | Ateliers d'usinage |
| 309 | Miscellaneous metal fabricating industries | 309 | Fabrication de produits métalliques divers |
| 14. MACHINERY INDUSTRIES (EXCEPT ELECTRICAL MACHINERY): | | | |
| 311 | Agricultural implement industry | 311 | Fabricants d'instruments aratoires |
| 315 | Miscellaneous machinery and equipment manufacturers | 315 | Fabricants de machines et d'équipement divers |
| 316 | Commercial refrigeration and air conditioning equipment manufacturers | 316 | Fabricants d'équipement commercial de réfrigération et de climatisation |
| 318 | Office and store machinery manufacturers | 318 | Fabricants de machines pour le bureau et le commerce |
| 15. TRANSPORTATION EQUIPMENT INDUSTRIES: | | | |
| 321 | Aircraft and aircraft parts manufacturers | 321 | Fabricants d'aéronefs et de pièces |
| 323 | Motor vehicle manufacturers | 323 | Fabricants de véhicules automobiles |
| 324 | Truck body and trailer manufacturers | 324 | Fabricants de carrosseries de camions et remorques |
| 3241 | Truck body manufacturers | 3241 | Fabricants de carrosseries de camions |
| 3242 | Non-commercial trailer manufacturers | 3242 | Fabricants de remorques à usage non commercial |
| 3243 | Commercial trailer manufacturers | 3243 | Fabricants de remorques à usage commercial |
| 325 | Motor vehicle parts and accessories manufacturers | 325 | Fabricants de pièces et accessoires d'automobiles |

INDUSTRIES MANUFACTURIÈRES—suite:

12. PREMIÈRE TRANSFORMATION DES MÉTAUX:

- Sidérurgie
- Fabriques de tubes et tuyaux d'acier
- Fonderies de fer
- Fonte et affinage
- Laminage, moulage et extrusion de l'aluminium
- Laminage, moulage et extrusion du cuivre et de ses alliages
- Laminage, moulage et extrusion des métaux, n.c.a.

13. FABRICATION DE PRODUITS EN MÉTAL (SAUF MACHINES ET ÉQUIPEMENT DE TRANSPORT):

- Industrie des chaudières et des plaques
- Fabrication d'éléments de charpente métallique
- Industrie des produits métalliques d'architecture et d'ornement
- Fabricants de portes et fenêtres métalliques
- Fabrication de produits métalliques d'architecture et d'ornement, n.c.a.
- Industrie de l'emboutissage, du matriçage et du revêtement des métaux
- Industrie du revêtement des métaux
- Industrie de l'emboutissage et du matriçage des métaux
- Industrie du fil métallique et de ses produits
- Fabricants d'agrafes
- Industrie du fil métallique et de ses produits, n.c.a.
- Fabricants de quincaillerie, d'outillage et de coutellerie
- Fabricants d'appareils de chauffage
- Ateliers d'usinage
- Fabrication de produits métalliques divers

14. FABRICATION DE MACHINES (SAUF ÉLECTRIQUES):

- Fabricants d'instruments aratoires
- Fabricants de machines et d'équipement divers
- Fabricants d'équipement commercial de réfrigération et de climatisation
- Fabricants de machines pour le bureau et le commerce

15. FABRICATION D'ÉQUIPEMENT DE TRANSPORT:

- Fabricants d'aéronefs et de pièces
- Fabricants de véhicules automobiles
- Fabricants de carrosseries de camions et remorques
- Fabricants de carrosseries de camions
- Fabricants de remorques à usage non commercial
- Fabricants de remorques à usage commercial
- Fabricants de pièces et accessoires d'automobiles

| 378 | Manufacturers of industrial chemicals | 378 | Fabricants de produits chimiques industriels |
| 3781 | Manufacturers of pigments and dry colours | 3781 | Fabricants de pigments et de colorants secs |
| 3782 | Manufacturers of industrial chemicals (inorganic), n.c.s. | 3782 | Fabricants de produits chimiques (inorganiques) industriels, n.c.a. |
| 3783 | Manufacturers of industrial chemicals (organic), n.e.s. | 3783 | Fabricants de produits chimiques (organiques) industriels, n.c.a. |
| 379 | Miscellaneous chemical industries | 379 | Fabricants de produits chimiques divers |
| 3791 | Manufacturers of printing inks | 3791 | Fabricants d encres d imprimerie |
| 3799 | Miscellaneous chemical industries, n.c.s. | 3799 | Fabricants de produits chimiques divers, n.c.a. |
| 20. MISCELLANEOUS MANUFACTURING INDUSTRIES: | | | |
| 391 | Scientific and professional equipment industries | 391 | Fabrication de matériel scientifique et professionnel |
| 3911 | Instrument and related products manufacturers | 3911 | Fabricants d instruments et de produits similaires |
| 3912 | Clock and watch manufacturers | 3912 | Fabricants d horloges et de montres |
| 3913 | Orthopaedic and surgical appliance manufacturers | 3913 | Fabricants d appareils orthopédiques et chirurgicaux |
| 3914 | Ophthalmic goods manufacturers | 3914 | Fabricants d articles ophthalmiques |
| 3915 | Dental laboratories | 3915 | Ateliers de mécanicien-dentiste |
| 392 | Jewellery and silverware industry | 392 | Fabrication de bijouterie et d orfèvrerie |
| 393 | Sporting goods and toy industries | 393 | Fabrication d articles de sport et de jouets |
| 3931 | Sporting goods manufacturers | 3931 | Fabricants d articles de sport |
| 3932 | Toys and games manufacturers | 3932 | Fabricants de jeux et de jouets |
| 397 | Signs and displays industry | 397 | Fabrication d enseignes et d étalages |
| 399 | Miscellaneous manufacturing industries, n.e.s. | 399 | Industries manufacturières diverses, n.c.a. |
| 3991 | Broom, brush and mop manufacturers | 3991 | Fabricants de balais, de brosses et de balais à franges |
| 3992 | Button, buckle and fastener manufacturers | 3992 | Fabricants de boutons, de boucles et d agrafes |
| 3993 | Floor tile, linoleum and coated fabrics manufacturers | 3993 | Fabricants de carreaux, de dalles, de linoléum et de tissus enduits |
| 3994 | Sound recording and musical instrument manufacturers | 3994 | Enregistrement du son et fabrication d instruments de musique |
| 3995 ⁷ | Stamp and stencil (rubber and metal) manufacturers | 3995 ⁷ | Fabricants de tampons et de pochoirs (en caoutchouc ou en métal) |
| 3996 | Pen and pencil manufacturers | 3996 | Fabricants de stylos et de crayons |

1970 REVISION OF THE STANDARD INDUSTRIAL CLASSIFICATION – Concluded

RÉVISION DE 1970 DE LA CLASSIFICATION DES ACTIVITÉS ÉCONOMIQUES – fin

| SIC Code | Industry group and industry | Code de la CAE | Groupe d'industries et industrie |
|--|--|----------------------|--|
| MANUFACTURING INDUSTRIES – Concluded: | | | |
| INDUSTRIES MANUFACTURIÈRES – fin: | | | |
| 3997 | Typewriter supplies manufacturers | 3997 | Fabricants de fournitures pour la dactylographie |
| 3998 | Fur dressing and dyeing | 3998 | Apprêtage et teinture de fourrure |
| 39997 | Other miscellaneous manufacturing industries | 39997 | Autres industries manufacturières diverses |
| 1 Effective with 1976 survey the four digit SIC breakdown of SIC 031 is no longer being used. | | | |
| 2 Effective with the year 1973 the survey of SIC 051 was discontinued. | | | |
| 3 Not surveyed on a company basis. | | | |
| 4 Effective 1972 Census of Manufactures, SIC 2544 was created as a separate industry; its establishments were formerly in SIC 2541. | | | |
| 5 Effective 1976 Census of Manufactures, SIC 2542 was eliminated as a separate class and included in SIC 2541. | | | |
| 6 Effective 1976 Census of Manufactures; created by the division of SIC 305. | | | |
| 7 Effective 1976 Census of Manufactures, SIC 3995 and 3997 were eliminated as separate classes and included in SIC 3999. | | | |
| 1 Depuis le recensement de 1976 la ventilation de CAÉ 031 à quatre chiffres ne figure plus. | | | |
| 2 Depuis l'année 1973, le recensement de la CAÉ 051 a été discontinué. | | | |
| 3 Non recensé sur la base d'entreprise individuelle. | | | |
| 4 La classe CAÉ 2544, créée au recensement des manufactures de 1972, figure comme une industrie distincte; ces établissements appartenait auparavant à la classe CAÉ 2541. | | | |
| 5 Depuis le recensement des manufactures de 1976, la classe CAÉ 2542 ne figure plus à part mais est incluse dans la classe CAÉ 2541. | | | |
| 6 Cette classe existe depuis le recensement des manufactures de 1976; elle a été créée par la division de la classe CAÉ 305. | | | |
| 7 Depuis le recensement des manufactures de 1976, les classes CAÉ 3995 et 3997 ne figurent plus à part mais ont été incluses dans la classe CAÉ 3999. | | | |

SELECTED PUBLICATIONS

Reports on the Annual Census of Manufactures

This report is one of the general, or all-industry, series presenting the results of the annual Census of Manufactures. The complete general series, containing principal statistics on individual industries and industry groups for all of Canada or its various geographical subdivisions, is as follows:

Catalogue

Annual Reports

- 31-203 Manufacturing Industries of Canada: National and Provincial Areas
- 31-209 Manufacturing Industries of Canada: Sub-provincial Areas¹
- 31-210 Manufacturing Industries of Canada: Type of Organization and Size of Establishment. Discontinued; last issue, 1976
- 31-211 Products Shipped by Canadian Manufacturers
- 31-212 Consumption of Containers and Other Packaging Supplies by the Manufacturing Industries
- 57-208 Consumption of Purchased Fuel and Electricity by the Manufacturing, Mining and Electric Power Industries

Biennial Reports

- 31-401 Domestic and Foreign Control of Manufacturing, Mining and Logging Establishments in Canada
- 31-402 Industrial Organization and Concentration in the Manufacturing, Mining and Logging Industries
- 31-522 Destination of Shipments of Manufacturers, 1974
- 31-523 Structural Aspects of Domestic and Foreign Control in the Manufacturing, Mining and Forestry Industries, 1970-1972
- 31-528 Concepts and Definitions of the Census of Manufactures
- 31-529 Apparent Domestic Availability of Selected Manufacturing Products, 1977

¹ Principal statistics of industries for Economic regions, census divisions, (counties), Census Metropolitan Areas, specific Census Agglomerations and municipalities.

In addition to these general reports, some 120 annual reports on individual industries contain quantities and values of products shipped and of materials used by the individual industry as well as some of the principal statistics carried in the general reports and certain additional industry information.

A list of all the reports on the Census of Manufactures is included in the bureau's Subscription Order Form, obtainable on request from the Publications Distribution Unit, Statistics Canada, Ottawa.

CHOIX DE PUBLICATIONS

Rapports concernant le recensement annuel des manufactures

Le présent rapport fait partie de la série générale qui s'applique à toutes les industries et qui donne les résultats du recensement annuel des manufactures. Voici la série générale complète contenant les statistiques principales sur chaque industrie en particulier et sur les groupes d'industries au Canada entier ou dans ses différentes subdivisions géographiques:

Catalogue

Rapports annuels

- 31-203 Industries manufacturières du Canada: Niveaux national et provincial
- 31-209 Industries manufacturières du Canada: Niveau infraprovincial¹
- 31-210 Industries manufacturières du Canada: Forme d'organisation et taille des établissements. Ne paraît plus; dernière édition, 1976
- 31-211 Produits livrés par les fabricants canadiens
- 31-212 Consommation de contenants et autres matières d'emballage, par industrie manufacturière
- 57-208 Consommation de combustibles et d'électricité achetés par les industries manufacturières et minières et par les centrales thermiques des services d'électricité

Rapports biennaux

- 31-401 Le contrôle national et étranger des établissements du secteur de la fabrication, des mines et de l'abattage au Canada
- 31-402 Organisation des industries et concentration dans le secteur de la fabrication, des mines et de l'abattage

Hors série

- 31-522 Destination des livraisons des manufacturiers, 1974
- 31-523 Les aspects structuraux du contrôle national et étranger dans les industries manufacturières, minières et forestières, 1970-1972
- 31-528 Concepts et définitions du recensement des manufactures
- 31-529 Disponibilité national apparente de certains produits fabriqués, 1977

¹ Statistiques principales sur les industries pour les régions économiques les divisions de recensement (comtés), les régions métropolitaines de recensement, des certaines agglomérations de recensement et des municipalités.

En plus de ces rapports généraux, il existe quelque 120 publications annuelles sur des industries particulières; celles-ci contiennent les données suivantes: quantité et valeur des produits livrés et des matières utilisées par chaque industrie, certaines des statistiques principales publiées dans les rapports généraux et certaines données supplémentaires sur chaque industrie.

Le bulletin d'abonnement contient une liste de toutes les publications du recensement des manufactures; on peut obtenir le bulletin d'abonnement en en faisant la demande à Distribution des publications, Statistique Canada, Ottawa.
