#### BANK DEBITS TO INDIVIDUAL ACCOUNTS, DECEMBER, 1935

Financial transfers in the form of cheques cashed to individual accounts by the branch banks in the thirty-two clearing centres showed, after seasonal adjustment, a gain of nearly 1 p.c. in December over the preceding month. Gains in this comparison were limited to the Western areas, an increase of 9 p.c. being shown in the Prairie Provinces and of 4.7 p.c. in British Columbia. The totals for the three Eastern economic areas showed declines from November. The results were affected by the occurrence of five Sundays in the last month of the year.

The decline in the Maritime Provinces was contrary to seasonal tendencies. The adjusted decline in the province of Quebec was about 5 p.c. A considerable drop was shown in Toronto, while the other centres of Ontario made on balance a somewhat better showing. The declines in Toronto and in Ontario were 8.2 p.c. and 5 p.c., respectively. The seasonally adjusted debits of Winnipeg showed an increase of nearly 12 p.c. and the net result for the ten centres of the Prairie Provinces was a gain of 9 p.c. British Columbia showed an adjusted gain of 4.7 p.c., while Vancouver was up 1.6 p.c.

#### Comparison with December, 1934

While the Maritime Provinces and the Western areas recorded gains over December of last year, the Dominion total receded 3.5 p.c. The Maritime Provinces recorded a gain of 8.7 p.c., advances being shown in Halifax and Moncton. The decline in the province of Quebec was nearly 9 p.c., the showing being due to the fact that increase in Quebec and Sherbrooke failed to offset the decline in Montreal. Ten of the thirteen centres in Ontario showed increases over the same month of last year, but the total for the province declined 10 p.c. This was due mainly to the declines in Toronto and Ottawa. Six of the ten centres in the Prairie Provinces recorded gains, the increase in Winnipeg being 15.2 p.c. The net result for the area was a gain of nearly 17 p.c. British Columbia scored in this comparison, the gain in Vancouver being 19.7 p.c. An increase of 17.6 p.c. was shown in the aggregate for the province.

#### Comparison with the Preceding Year

Owing to declines in Quebec and Ontario, the Dominion total of bank debits for 1935 was 4 p.c. less than in the preceding year. The total was \$31,546,000,000 compared with \$32,867,000,000. The increase in the Maritime Provinces was 7.5 p.c., the total in 1935 having been more than \$574,000,000. Increases were shown in each of the three clearing centres of the area. The annual total for the province of Quebec, due mainly to the decline in Montreal, showed a dropping off of 5 p.c. An increase of 10 p.c. was shown in the city of Quebec. Three only of the thirteen centres in Ontario recorded declines from the preceding year, the declines in Ottawa and Toronto having a predominant influence on the general result. The decline for Ontario was 7 p.c., the total in 1935 having been \$13,877,000,000. Despite declines in Winnipog and Brandon, the total for the ten centres of the Prairie Provinces showed a gain of 1.7 p.c. The decline in Winnipog was limited to 1.1 p.c. General gains were shown in the three centres of British Columbia, the net result being a gain of nearly 3 p.c. Debits in Vancouver were \$1,350,000,000, a gain of 2.2 p.c. over 1934.

#### Comparison with Other Economic Factors

The index of bank debits after seasonal adjustment advanced from 100.8 in November to 101.5 in the month under review. The index of employment in manufacturing plants with seasonal adjustment advanced from 102.4 to 104.9. The index of the physical volume of business, on the other hand, receded from 110 to 106.2. The wholesale price level was practically maintained in December, while the index of common stocks advanced from 105.8 to 107.4. Trading was less active than in November, when a marked advance took place in common stock prices.

# 1. BANK DEBITS TO INDIVIDUAL ACCOUNTS AT THE CLEARING HOUSE CENTRES OF CANADA, DECEMBER 1935. WITH COMPARATIVE FIGURES FOR NOVEMBER 1935, AND DECEMBER 1934.
