Dominion Statistician: Business Statistician: R. H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.) Sydney B. Smith, M.A.

#### BANK DEBITS TO INDIVIDUAL ACCOUNTS, OCTOBER, 1937.

The amount of cheques cashed against individual accounts at the branch banks showed a decline of 12.7 p.c. in October below the standing of the same month of 1936. The total was \$2.9 billion against \$3.3 billion, the Maritimes alone of the five economic areas showing a gain in this comparison. Halifax and Moncton recorded increases over the same month of last year, the aggregate for the three centres of the Maritimes recording a gain of 1.3 p.c. The cities of Montreal and Quebec recorded considerable declines, while Sherbrooke was the only clearing centre in the province showing a gain. The decline in the provincial total for quebec was nearly 8 p.c. Four of the thirteen centres in Ontario recorded declines in this comparison, the decrease in Toronto being nearly 11 p.c. Debits in Ontario amounted to \$1.2 billion against \$1.3 billion in October 1936, a decline of 7.8 p.c. Five of the ten centres in the Prairie Provinces recorded gains over last year, the decline in Winnipeg being of considerable proportions. The total debits in the Prairie Provinces amounted to \$493.6 million against \$725.0 in October last year. Bank debits showed declines in the three clearing centres of British Columbia, the aggregate for the province declining nearly 4 p.c.

#### Comparison with September After Seasonal Adjustment.

After sensonal adjustment declines in the five economic areas were general in October from the preceding month. The declines in the Maritime Provinces and Juebec were 10.2 p.c. and 3.6 p.c., respectively. The recession in Ontario was limited to 1.9 p.c., a drop of 1.6 p.c. having been shown in Toronto. The gain in the Prairie Provinces was less than normal for the season, debits showing a decline of 10.8 p.c. after seasonal adjustment. The drop in Vancouver was nearly 10 p.c., a decline of 6.7 p.c. having been shown in the aggregate for the three centres of British Columbia.

### Comparison with the first Ten Months of 1936.

Owing to the decline during October, the cumulative total for the first ten months of 1937 showed a slight decline from the same period of last year. Gains were recorded, however, in each of the economic areas except the Prairie Provinces. Increase in the Maritime Provinces was more than 18 p.c. while quebec showed a gain of 9 p.c. A gain of \$525.8 million was shown in Ontario representing 4 p.c. The aggregate for the Prairie Provinces dropped from \$5.6 billion to \$4.0 billion, a decline of nearly 28 p.c. Each of the centres in British Columbia recorded gains, the net result being an increase of nearly 3 p.c. in the provincial total.

#### Comparison with other factors.

The ratio of bank debits to deposits was 122.5 p.c. in October against 147.1 p.c. in October last year. During the interval, bank debits receded from \$3.328 million to \$2,906 million, while deposits increased from \$2,263 million to \$2,371 million. Without any adjustment for seasonal tendencies, the turnover increased in October over the preceding month, the ratio having been 122.5 p.c. against 116.6 p.c.

The index of bank debits, after seasonal adjustment, was 105.3 in October against 120.6 in the same month of last year. A slight increase was shown in the index of the physical volume of business. Employment in manufacturing plants recently stood at a much higher level than in October1936 when the index on the base of 1926 was 106.6. The standing at the first of October, after seasonal adjustment, was 118.5. Wholesale prices reached a higher level in October than in the same month of 1936, the standing having been 84.7 against 77.1. Common stock prices, on the other hand, due to the recent decline, were at a much lower level as represented by the index of 105.8 against 126.9.

The cost of the co
