BANK DEBITS TO INDIVIDUAL ACCOUNTS, JUNE, 1937 .

Financial transfers in the form of cheques cashed by the branches of the chartered banks amounted in June to \$2,892 million, an increase of nearly 5 p.c. over May after seasonal adjustment. Gains were recorded in Ontario and the Maritime Provinces, while the three other economic areas showed a decline. The total in the Maritime Provinces was \$58,935,000 against \$58,051,000 in May. The increase after seasonal adjustment was 8.4 p.c. Debits in Montreal were nearly maintained in this comparison but a decline of 2.2 p.c. was shown in the total for Quebec. A gain of 20 p.c. was recorded in Toronto where the totals were \$1,074 million against \$907 million in the preceding month. The gain in Toronto was relatively larger than in the other centres of the Province. The provincial total, however, showed a gain of 16 p.c. The decline in Winnipeg was 8.9 p.c., the total for the Prairie Provinces showing a drop of 5.5 p.c. Debits in Vancouver and British Columbia showed declines of 1 p.c. and 6.8 p.c., respectively.

Comparison with the first six months of 1936.

Bank debits during the first half of the present year were \$18,186 million against \$17,247 million in the same period of 1936. The gain of 5.4 p.c. showed the influence of greater industrial activity and higher price levels. Twenty-eight of the thirty-two centres recorded gains in the comparison. Increases were general in the three clearing centres of the Maritime Provinces resulting in a gain for the area of 23.4 p.c. The gain in Montreal was \$579 million or 11.8 p.c. Larger gains were shown in Quebec and Sherbrooke the net result being that the provincial total moved up nearly 13 p.c. Ottawa was the only centre in Ontario showing a decline from the first six months of 1936. The gain in Toronto was 14 p.c. or \$835 million. Hamilton showed a gain of 10 p.c. and bank debits in Sudbury rose no less than 23 p.c. The provincial total was 11.6 p.c. greater in this comparison.

Seven of the 10 centres in the Prairie Provinces recorded increases. The aggregate for the three provinces showed a decline of 24.3 p.c., a relatively larger percentage decline having been shown in Winnipeg. Each of the three centres in British Columbia recorded gains, the total for the province being 6.7 p.c. greater. The gain in Vancouver was 6.3 p.c. or \$51 million.

Comparison with June, 1936.

Owing to lower levels of speculative trading, bank debits were 7.8 p.c. less in June than in the same month of last year. Each of the economic areas, except British Columbia, recorded declines in this comparison. The greatest percentage drop was shown in the Prairie Provinces where the total was 30 p.c. lower. Declines of 4.4 p.c. and 4.1 p.c. were shown in the Maritime Provinces and Quebec, respectively. Toronto recorded a recession of $\frac{1}{2}$ p.c. while the total for the province was down 3 p.c. A marked decline was shown in the debits of Winnipeg, the total for the Prairie Provinces receding 30 p.c. Increases were shown in each of the three centres in British Columbia, the aggregate for the province being up 4.5 p.c.

Comparison with other economic factors.

The turn-over of bank deposits was greater than in May but less than in June of last year. The percentage of bank debits to deposits was 121.9 against 116.2 in May and 143 in June 1936. While bank debits showed a decline of 7.8 p.c. from the same date of last year, deposits rose more than 8 p.c.

The index of bank debits was 106.7 in June against 101.7 in the preceding month. Prices of commodities and common stocks recorded declines in the same comparison. According to preliminary estimates, the index of the physical volume of business showed a substantial gain over May. While the index of bank debits showed recession from June 1936, each of the four economic factors considered in this connection showed marked advances.
