GENERAL STATISTICS BRANCH

Dominion Statistician: Statistician: R. H. Coats, LL.D., F.R.S.C., F.S.S.(Hon.) Sydney B. Smith, M.A.

BANK DEBITS TO INDIVIDUAL ACCOUNTS, FEBRUARY, 1941.

Payments by cheque in thirty-two clearing centres were \$2,540 million in February, recording a decline of 14 p.c. from the same month of last year. The drop was attributable to the heavy payments on the first war loan made in the second month of last year. Declines were shown in each of the five economic areas. The total for the Maritime Provinces receded from 75.3 to 59.7. Debits in the province of Quebec were \$714 million against \$948 million in February last year, a decline of nearly 25 p.c. The recessions in Toronto and the province of Ontario were 20.2 p.c. and 7.5 p.c., respectively. Bank debits in the Prairie Provinces were \$374.9 million in February against \$426 million one year ago. A minor increase was shown in New Westminster while declines were registered in Vancouver and Victoria. The net result was that the provincial total dropped from \$190 million to \$173 million. The Dominion total was 14 p.c. less in the month under review than in February 1940.

Comparison with the First Two Months of 1940.

The total bank debits for the first two months of 1941 were \$5,481 million compared with \$5,630 million in the same period last year. The decline was 2.6 p.c. or \$148 million. Ontario was the only one of the five economic areas to record an advance in this comparison. The total was \$2,680 million against \$2,451 million. The decline in the Maritime Provinces was 4.6 p.c. while the drop in the province of Quebec was nearly 15 p.c. The total for the Prairie Provinces was \$824 million against \$920 million, a decline of 96 million or 10.4 p.c. An increase was shown in New Westminster, while recessions were recorded in Vancouver and Victoria. The net result for the province was a decline of 3.5 p.c.

Comparison with January after Seasonal Adjustment.

Increases were recorded in Quebec and British Columbia over January, after seasonal adjustment. The decline for Canada as a whole was 6.1 p.c. The Maritime Provinces showed a decline of 4.1 p.c. while the increase for Quebec was 2.4 p.c. Declines of 14.7 p.c. and 10.4 p.c. were shown in Toronto and Ontario respectively. The Prairie Provinces as a whole recorded a decline in this comparison, despite the increase of 3.7 p.c. in Winnipeg. Mainly due to the advance of 9.3 p.c. at Vancouver, the total for British Columbia was 8.8 p.c. greater.

Comparison with Other Factors.

Bank clearings were \$3,069 million in the first two months of 1941, against 2,962 million in the same period of 1940. The percentage of bank debits over bank clearings was 175.7 in February against 189.5 in February last year. The sum of four classes of bank deposits was \$2,873 million at the end of January against \$2,755 million on the same date of last year. The percentage of bank debits to deposits was 88.4 against 107.3 in February one year ago. The index of bank debits on the base of 1935-1939=100 was 86.2 in February against 100.2 in the same month a year ago. A marked increase during the interval had been shown in the physical volume of business and employment. The index of wholesale prices on the base of 1926 moved up somewhat over the twelve months, while the index of common stock prices on the new base declined from 90.2 in February last year to 71.3 in January of this year.
