	61 001 DE STATICE
	Historical File Conduction by Authority of the Hon. James A. Mackinnon, M.P., Minister of Trade and Commerce DCM.INION BUREAU OF STATISTICS - OTTAWA.
*	Price: 50 cents a year Dominion Statistician: S. A. Cudmore, M.A. (Oxon.) LL.D. (Tor.) F.S.S., F.R.S.C.
	Chief, Business Statistics Branch: Sydney B. Smith, M.A.

CHEQUES CASHED AGAINST INDIVIDUAL ACCOUNTS, MAY, 1945.

Cheques cashed during May were greater than in any other month in history. The total was \$6,894 million as compared with \$6,653 million in the same month last year. Bank debits in the month under review rose to a new high point, the previous maximum having been in November of last year when the total was \$6,671 million. The high point achieved in May reflected the influence of heavy payments on the 8th Victory Loan.

Heavier financial transactions were definitely indicated for each of the five economic areas in May over the same month of last year. The greatest percentage increase was shown in the Maritime Provinces where debits rose from \$144 million to \$165 million. The advances in Quebec and Ontario were 1.9 per cent and 4.1 per cent, respectively, over the high position of debits in May last year. Cheques cashed in the Prairie Provinces rose from \$1,141 million to \$1,162 million, the increase being nearly 2 per cent. Increases were general in the three clearing centres of British Columbia, the net result being an advance of 9.3 per cent in the provincial total.

Debits in Montreal were \$1,765 million, an increase having been shown over May of last year. The standing in Toronto was \$1,924 million, the increase having been nearly 15 per cent.

Comparison with the first five months of 1944.

Cheques cashed in the first five months of 1945 were greater than in the same period of any other year. The total was \$26.6 billion against \$24.7 billion in the first five months of 1944. Consecutive increases were shown from 1938 to the present time, reflecting the advance in economic activity generated by war conditions. From an historical viewpoint the maximum of the last major economic cycle was reached in 1929 when the total was \$19.3 billion. This total was unsurpassed until 1943 when the total reached \$21.1 billion.

Four of the five economic areas reached a new high position in respect of cheques cashed in the first five months of the year. The total in the Prairie Provinces during the same period of 1944 was somewhat higher than in the last five months. The remaining four economic areas recorded a new maximum for the elapsed portion of the present year. The total for Ontario was \$12.3 billion, an increase of nearly \$1¹/₄ billion over the same period of the preceding year. The amount of cheques cashed in Ontario for the first five months of the year has shown a new high position year by year from 1942 to the present. Debits in Quebec during the first five months rose from \$6.9 billion to \$7.7 billion, a gain of 10 per cent. The levels of 1944 and 1945 have been in excess of the preceding maximum reached in 1929. Bank debits in the Maritime Provinces were \$604 million, an increase of 13.8 per cent over the first five months of 1944. An upward trend has been shown in the Maritime Provinces since 1938, high points having been recorded in 1929 and 1937.

Attention is drawn to Table 5 on page 4 presenting the amount of cheques cashed in clearing centres during the first five months of the years 1924 to 1945 in each of the five economic areas. New high records were established for each of the areas except the Prairie Provinces during the first five months of 1945. A higher total was shown for the Prairie Provinces in the same period of last year. With this exception the early months of 1945 created historical maxima for the different economic areas.

The money supply posted quite a substantial increase in the early months of 1945. The total at the end of April was \$6,312 million compared with \$5,441 million in the same month of 1944. Marked advances were shown both in bank deposits and in the circulating media in the hands of the public consisting of notes and subsidiary coin.

A great expansion in economic activity since the beginning of the war is apparent in every field. The increase both in the general level of prices and in the physical volume of goods and services, signifies also a marked addition to the work required of the money supply. It is evident that the increase in the money supply permitted the greater volume of monetary transactions.

Cash and cheque payments in the last month for which statistics are available were \$6.9 billion against \$6.5 billion in the same month of last year. Cheque payments recorded a gain of nearly 7 per cent in this comparison, an estimate having been made for payments outside of clearing centres. Cash payments rose from \$1,206 million to \$1,286 million during the same interval.
