BANK DEBITS TO INDIVIDUAL ACCOUNTS

or

Amount of Cheques Charged against Bank Accounts at the Clearing House Centres in June, 1926.

Bank de bits to individual accounts were greater in June than in any other month of the present year; when allowance is made for seasonal tendencies, the June debits were greater than in any other month since the record was first obtained in January, 1924, except April, 1926. The total in June, as reported to the Dominion Bureau of Statistics by the Canadian Bankers' Association, was \$2,684,000,000 as compared with \$2,151,000,000 in June 1925, an increase of \$533,000,000 or nearly 25 p.c., while the advance over June, 1924 was about 34 p.c. The debits in June, when adjusted for seasonal variation, show an increase of 17 p.c. over May last and a decline of 3 p.c. from April.

The bank clearings in June were \$1,469,252,796, as compared with \$1,240,079,079 in the corresponding month of 1925, a gain of 18 p.c.

Comparison of the First Six Months of 1926 and 1925.

The debits for the first half year of 1926 amounted to \$14,541,000,000, as compared with \$12,812,000,000 in the corresponding period of 1925, an increase of more than 13 p.c. The greatest gain was experienced in the province of Quebec, where the increase was 18.5 p.c., but increases were recorded in each of the economic areas. The increase in Ontario was nearly 16 p.c., while gains of 12 p.c. and 10 p.c. were shown in the Maritime Provinces and British Columbia, respectively. Notwithstanding the more extensive movement of grain in the last six months owing to the large crop of 1925, the debits of the Prairie Provinces were only 4 p.c. greater than in the corresponding period of 1925.

Comparison by Areas with June, 1925.

Maritime Provinces.

The debits of the Maritime Provinces in June last were \$50,055,000, as compared with \$48,026,000 in June, 1925, an increase of 4 p.c. Each of the three centres showed increases, the debits of Halifax being \$24,959,000, as compared with \$23,674,000 in June, 1925.

Quabec.

The debits of Montreal showed the extensive increase of 25 p.c. over the record of June 1925, the amount being \$746,965,000. Sherbrooke showed a decline, while the increase at Quebec city was of moderate proportions. The net result was that the debits of the province increased nearly 23 p.c.

Ontario.

The debits of Ontario were \$1,188,000,000 in June, as compared with \$908,000,000 in June 1925, an increase of 31 p.c. Of the eleven centres for which comparatoveldata are available, nine showed increases over June, 1925, the gains at Toronto and Hamilton being 28 p.c. and 40 p.c. respectively.

Prairie Provinces.

With the exception of Brandon and the Branches of the Weyburn Security Bank, the reporting centres of the Prairie Provinces showed increases in June. The debits in Winnipeg were \$324,200,000, as compared with \$252,600,000 in June, 1925, an increase of 29 p.c. The increase at Regina was 67 p.c., the amount in June being \$35,890,000. The total for the three provinces was \$477,400,000, as compared with \$382,000,000 in June 1925, an increase of 25 p.c.

British Columbia.

The debits of Vancouver were \$122,300,000, representing an increase of 1 p.c. over the record of June, 1925. Increases also took place at both Victoria and New Westminster. The increase for three centres was \$6,975,000 or nearly 5 p.c., the debits for June being \$160,904,000 as compared with \$153,929-000.

Comparison with May, 1926, as Corrected for Seasonal Variations.

The statistics of bank debits can only be properly compared from month to month when correction is made for seasonal tendencies. To facilitate short -term comparisons, a study was made in the seasonal variation of bank clearings for the twelve-year period from 1913 to 1924. Based on the experience with bank clearings during the period in question, adjustment of the original data of bank debits for the four principal centres and for Canada as a whole, was effected. Comparing the adjusted debits of June with the preceding month, large increases were shown at three principal centres, while the debits of Vancouver were more than maintained. Of the three remaining centres, Toronto showed the largest gain, amounting to nearly 29 p.c. The gain at Winnipeg was 19 p.c., while Montreal showed an increase of 15 pic. The increase of the adjusted debits in the clearing house centres of the Dominion as a whole was 17 p.c.

Comparison of Bank Clearings and Bank Debits.

The futility of using bank clearings to portray the dollar volume of business in Canada, especially in long term comparisons, is demonstrated by the increasing excess of debits over clearings, as the result of bank amalgamations. If the cumulative totals for the first six months of each of the last three years are compared, it is found that the percentage of bank debits to bank clearings in the first six months of 1926 was 174.5 p.c., as compared with 169.5 p.c. in 1925 and 159.6 p.c. in 1924.

Dominion Bursau of Statistics, Ottawa, Canada July 28, 1926.
