COMMERCIAL FAILURES FOR THE FIRST SIX MONTHS OF 1936

The number of commercial failures in the first half of 1936 was less than in the same period of any other year during the term of observation from 1921 to the present. The total in the first six months of the present year was 629 against 678 in the same months of 1935. Significant betterment was shown over the conditions in the first six months of 1932 when 1,239 fatalities occurred. Records of commercial failures contribute to the evidence of economic improvement by the majority of appropriate factors. The defaulted liabilities for the first half of 1936 were \$8,511,715 as compared with \$8,518,270, \$13,017,644 and \$19,355,795 respectively, for the same periods of the three preceding years. Thus defaulted liabilities showed a considerable decrease when compared with the same periods of 1934 and 1933 and a slight decrease when compared with the same period of 1934, while the number of liabilities also showed a decline in each of the same comparisons.
