COMMERCIAL FAILURES IN THE CALENDAR YEARS 1941, 1942 and 1943.

Commercial failures reached a lower point in 1943 than in any other year since records were first kept at the beginning of the century. Progressive declines were shown year by year from 1939 to 1943. The total as reported under the Bankruptcy and Winding-up Acts was 314 compared with 737 in the preceding year.

The standing in 1939 was 1,392 failures and subsequent declines were to 1,173 in 1940 and to 1,008 in 1941. The decline in the last four years reflected the prosperity occasioned by war production.

The number of failures in 1943 was less than one-fifth of the average of about 1,740 shown for the period since the end of the last war. The records from 1934 to the present show a betterment over the average for the twenty-five years. The trend in failures since the termination of hostilities in 1918 has been decidedly downward. A high level was maintained from 1921 to 1933, despite the prosperity cycle in evidence during the greater part of the period. Some reduction in failures was shown from 1925 to 1927, but fatalities continued heavy from 1928 to 1933.

Statistics of commercial failures have long been regarded as of value in appraising the trend of economic conditions.

The total number of commercial failures in Canada for 1943, as reported to the Dominion Bureau of Statistics, were considerably lower at 314 for 1943 as compared with 737 for 1942 and 1,008 for 1941. The defaulted liabilities for 1943 were \$4,486,247, as compared with \$6,019,308 for 1942. Thus, defaulted liabilities showed a considerable decrease when compared with 1942 and a striking decrease when compared with 1941.

FAILURES BY BRANCHES OF BUSINESS FOR THE CALENDAR YEARS

In manufactures, there were 23 failures in 1943 as compared with 80 in 1942 and 132 in 1941. More detailed information regarding the classes of business in which failures occurred in 1942 and 1943 is given in Tables 4 and 5.
