# CORPORATION PROFITS <br> FIRST QUARTER, 1956 

Published by Authority of
The Right Honourable C. D. Howe, Minister of Trade and Commerce

# DOMINION BUREAU OF STATISTICS <br> General Assignments Division 

## CORPORATION PROFITS

## FIRST QUARTER, 1956

The estimates of corporation profits and other financial data contained in this report are the results of a sample survey of all companies incorporated in Canada, except Government-owned companies and incorporated co-operatives. Canadian unincorporated branches of foreign corporations are also included in the totals while foreign subsidiaries of Canadian corporations are excluded.

## Sources and Methods

In preparing the estimates, a stratified random sample of corporations is used together with the summary corporation statistics contained in "Taxation Statistics" published by the Department of National Revenue (Taxation Division). The figures in "Taxation Statistics" are on an annual basls and are available about two years after the year to which they refer. The sample results are used to allocate the annual totals by quarters, and curtent figures are obtained by projection from this base, This procedure ensures that profits are defined consistently for all corporations and improves the accuracy of the estimates.

Under the original design of the sample, estimates of profls would be within 3 per cent of the "true" flgures 95 per cent of the time. However, since not all companies in the original sample are participating in the survey, the actual error is about 6 per cent. This error will be reduced as the number of companies in the sample increases.

## Definitions

The definitions of items contained in the report are based mainly on accounting definitions used by corporations. The term "profits" as used throughout this report means the total profits of all companies earning profits less the losses of all companies incurring losses.

Sales figures in "Taxation Statistics" are used as a base for projecting the estimates obtained from the survey to provide current sales estimates. These sales figures contain investment income as well as income from operations.

Net Earnings as used in this report are the total earnings, exclusive of Canadian dividends received, after all curtent charges except depletion, depreclation, charitable donations and income tax liabilities. Canadian dividends received are excluded because earnings are computed before payment of dividends, and if receipt of these dividends were included they would be counted twice, once in the hands of the paying corporation and again in the hands of the receiving corporation.

Depletion charges are not deducted since, although these are properly a charge for individual firms, the exhaustion of natural resources should not be a charge against National Income. However, for the two groups for which depletion charges are significant-mining and wood and paper products depletion charges are shown separately in the tables.

Depreciation charges as shown in the tables reflect the rates allowed by the Income Tax Act even though companies are permitted to charge depreciation on their own books at rates different from those used for income tax purposes. The totals published in "Taxation Statistics" form the base for the estimates in this report and the deprectation flgures submitted in the survey are used only for interpolation and projection.

Income tax liabilities are calculated for each reporting company, each quarter to obtain totals of tax liabilities for each industrial group. An allowance is then made for profits which are covered by losses in other quarters.

Depletion charges are based on the amounts reported by the companies and are not related to the data contained in "Taxation Statistics".

## Interpretation of Quarterly Movements

Total corporation profits appear to follow a fairly regular pattern from quarter to quarter with total profits before taxes of the aggregate of all industries reaching a peak in the second and third quarters of each year and then declining through the next two quarters. Before two consecutive quarters can be compared, the same two quarters for previous years must be studied in an effort to determine how much of the change is due to seasonal movements and how much is due to an improvement or worsening in the general profits pattern of the industry.

Corporations with two or more establishments file only one profits return covering all establishments of the company. The forestry operations car ried on by pulp and paper companies are therefore included with the wood and wood products group in manufacturing; while mining operations caried on by companies princlpally engaged in smelting and refining are included in the non-ferrous metal industry. Other groups are affected to a lesser degree. The figures in this report are therefore not comparable with series in other Bureau reports, such as those covering wages and production, which are on an establishment basis.

A more comprehensive description of the methods, sources and definitions is contained in the initial publication of this serles, "Quarteriy Corporation Profits, 1950-1954'", issued by the Dominion Bureau of Statistics in March 1955.

## CORPORATION PROFITS - FIRST QUARTER, 1956

Corporation profits before taxes were estimated at $\$ 728$ million for the first quarter of 1956 , an increase of $\$ 158$ million, or 28 per cent, over the estimated $\$ 570$ million for the first quarter of 1955.

Income tax liabilities were estimated at \$321 million for the first quarter of 1956, an increase of $\$ 61$ million, or 23 per cent, over the $\$ 260$ million estimated for the first quarter of 1955. Income tax llabilities were estimated at 44 per cent of profits before taxes for the first quarter of 1956 as compared with an estimate of 46 per cent for the same period in 1955.

Profits after taxes increased from an estimated $\$ 310$ million in the first quarter of 1955 to an estimated $\$ 407$ million in the first quarter of 1956 , an increase of $\$ 97$ million or 31 per cent.

In the Manufacturing sector estimated increases in profits before taxes in the firsi quarter of 1956 over the first quarter of 1955 were recorded in the Iron and Steel group which increased $\$ 42$ million from $\$ 63$ million in 1955 to $\$ 105$ million in 1956 , in the Wood and Paper group which increased an estimated $\$ 15$ million from $\$ 77$ million in 1955 to $\$ 92$ million in 1956, in the Petroleum and Coal group which increased $\$ 10$ million from $\$ 32$ million in 1955 to $\$ 42$ million in 1956, in the Non-Ferrous Metal group which increased $\$ 7$ million from $\$ 12$ million in 1955 to $\$ 19$ million in 1956, in the Textile group which increased $\$ 5$ million from $\$ 13$ million in 1955 to $\$ 18$ million in 1956, in the Chemical group which increased $\$ 3$ million from $\$ 22$ million in 1955 to $\$ 25$ million in 1956, in the Non-Metallic Mineral group which increased $\$ 3$ million from $\$ 8$ million in 1955 to $\$ 11$ million in 1956, in the Foods and Beverages group which increased $\$ 2$ million from $\$ 23$ million in 1955 to $\$ 25$ million in 1956, in the Electrical Apparatus and Supplies group which increased $\$ 2$ million from $\$ 15$ million in 1955 to $\$ 17$ million in 1956, and in the Other Manufacturing group which increased $\$ 1$ million from $\$ 12$ million in 1955 to $\$ 13$ million in 1956. The only industry group which did
not show a rise in profits before taxes from the first quarter of 1955 to the first quarter of 1956 was Rubber Products, a group which has been broken out of "Other Manufacturing Industries" and is now set forth as a separate table for the first time in this publication. This group showed an estimated profit before taxes of $\$ 6$ million for the first quarter of both 1955 and 1956.

An overall increase in profits before taxes of $\$ 90$ million, or 32 per cent, was estimated for the Manufacturing sector as a whole, from $\$ 283$ million in the first quarter of 1955 to $\$ 373$ million in the first quarter of 1956.

The Non-Manufacturing sector in total showed an increase of $\$ 68$ million, or 24 per cent, from $\$ 287$ million in the first quarter of 1955 to $\$ 355$ million for the same period in 1956. This estimated increase was reflected in all industry groups with the most sizeable change occurring in the Mining, Quarrying and Oil Wells group which increased $\$ 26$ million from $\$ 82$ million in the first quarter of 1955 to $\$ 108$ million in the first quarter of 1956. Wholesale Trade increased an estimated $\$ 15$ million from $\$ 29$ million in the first quarter of 1955 to $\$ 44$ million in the first quarter of 1956, Transportation, Storage and Communication increased an estimated $\$ 12$ million from $\$ 4.5$ million in the first quarter of 1955 to $\$ 57$ million in the first quarter of 1956, Other Non-Manufacturing increased an estimated $\$ 7$ million from $\$ 12$ million in the first quarter of 1955 to $\$ 19$ million in the first quarter of 1956. Public Utility Operation increased an estimated $\$ 4$ million from $\$ 22$ million in the first quarter of 1955 to $\$ 26$ million in the first quarter of 1956, Finance, Insurance and Real Estate increased an estimated $\$ 2$ million from $\$ 68$ million in the first quarter of 1955 to $\$ 70$ million in the first quarter of 1956, Retail Trade increased an estimated $\$ 1$ million from $\$ 22$ million in the first quarter of 1955 to $\$ 23$ million in the first quarter of 1956 and Service increased an estimated $\$ 1$ million from $\$ 7$ million in the first quarter of 1955 to $\$ 8$ million in the first quarter of 1956.

## NOTE

With this issue the classification "Other Manufacturing Industries" has been divided into two groups as follows:

From
Other Manufacturing Industries

To
Rubber Products
Other Manufacturing Industries

For details of published groupings see page 12.
