CORPORATION PROFITS

THIRD QUARTER 1965

The estimates of corporation profits and other financial data contained in this report are the results of a sample survey of all companies incorporated in Canada, except Government-owned companies. Canadian unincorporated branches of foreign corporations are also included in the totals while foreign subsidiaries of Canadian corporations are excluded.

Sources and Methods

In preparing the estimates, a stratified random sample of corporations is used together with the summary corporation statistics contained in "Taxation Statistics" published by the Department of National Revenue (Taxation Division). The figures in "Taxation Statistics" are on an annual basis and are available about two years after the year to which they refer. The sample results are used to allocate the annual totals by quarters, and current figures are obtained by projection from this base. This procedure ensures that profits are defined consistently for all corporations and improves the accuracy of the estimates.

Under the original design of the sample, estimates of profits would be within 3 per cent of the "true" figures 95 per cent of the time. However, since not all companies in the original sample are participating in the survey, the actual error is about 6 per cent. This error will be reduced as the number of companies in the sample increases.

Definitions

The definitions of items contained in the report are based mainly on accounting definitions used by corporations. The term "profits" as used throughout this report means the total profits of all companies earning profits less the losses of all companies incurring losses.

Sales figures in "Taxation Statistics" are used as a base for projecting the estimates obtained from

the survey to provide current sales estimates. These sales figures contain investment income as well as income from operations.

Net earnings as used in this report are the total earnings, exclusive of **Canadian** dividends received, after all current charges except depletion, capital cost allowance, charitable donations and income tax liabilities. Canadian dividends received are excluded because earnings are computed before payment of dividends, and if receipt of these dividends were included they would be counted twice, once in the hands of the paying corporation and again in the hands of the receiving corporation.

Depletion charges are not deducted since, although these are properly a charge for individual firms, the exhaustion of natural resources should not be a charge against National Income. However, for the three groups for which depletion charges are significant—mining, wood products and paper products—depletion charges are shown separately in the tables.

Capital cost allowance as outlined in the tables reflects the amount of depreciation claimed for income tax purposes, and, therefore, may not be comparable to the amounts as shown by corporations in their own books.

Income tax liabilities are based on figures supplied by reporting companies.

Depletion charges are based on the amounts reported by the companies and are not related to the data contained in "Taxation Statistics".

A more comprehensive description of the methods, sources and definitions is contained in the initial publication of this series, "Quarterly Corporation Profits, 1950-1954", issued by the Dominion Bureau of Statistics in March, 1955.

¹ Includes Tobacco, Leather and Miscellaneous Manufacturing Industries.² Includes Agriculture, Forestry, Fishing and Construction.**Corporation Profits – Third Quarter, 1965**

At a seasonally adjusted quarterly rate of \$1263 million, profits before taxes show an increase of 2.9% from \$1227 million in the second quarter.

The Manufacturing sector in total remains relatively unchanged from an estimated \$585 million in the second quarter to \$587 million in the third quarter. However, in this sector there are some wide variations. The Metal Industries include four major industry groups—Primary Metals, Metal Fabricating, Machinery and Transportation Equipment Industries. The raw data for these groups are shown separately but are combined for the purpose of seasonally adjusted series and on this basis show a 3.9% increase in profits from the second to the third quarter. Paper and Allied Industries, Printing and Publishing, Non-Metallic Minerals, Petroleum and Coal, show a decline in profits of 7.2%, 12.5%, 10.0% and 13.6% respectively. The Wood Industries show an increase in profits in third quarter of 37.5% from the second quarter and this is the first increase in this industry since the fourth quarter of 1964. Electrical Products Industries show an increase of 11.5% in third quarter while the remaining industries in Manufacturing remain relatively unchanged.

The group of industries lying outside the Manufacturing sector show in total a 5.3% increase in profits from \$642 million to \$676 million from the

second to the third quarters. All industries in this group show an increase in profits in the third quarter at seasonally adjusted quarterly rates, except Wholesale Trade which shows a slight decrease of 2.3%. The largest increase in profits is shown by Retail Trade, which shows a 19.4% increase in profits from the second to the third quarters. The remaining industries in the Non-manufacturing group show an increase in profits from second to third quarter as follows: Mines, Quarries and Oil Wells 2.1%. Transportation, Storage and Communication (these are combined for seasonally adjusted data) 1.0%. Electric Power, Gas and Water Utilities, 14.3%. Finance, Insurance and Real Estate, 5.7%. Service Industries, 13.3%. Other Non-Manufacturing (Agriculture, Forestry, Fishing and Construction) 13.8%.

In comparison with the first nine months seasonally adjusted totals of 1964 and 1965, profits for All Industries show an increase of 10.9%. The Manufacturing sector for the nine months comparison shows an increase of 7.8%. In this sector large increases for the nine month totals are shown in Food and Beverages, 14.4%, Metal Industries, 8.9%, while substantial declines in profits are shown in Paper and Allied Products, 7.5%, and Wood Industries, 15.3%. In the Non-manufacturing sector the Mining Industry shows an increase of 11.9% and Retail Trade shows an increase of 19.4%.
