CORPORATION PROFITS

FOURTH QUARTER 1966

The estimates of corporation profits and other financial data contained in this report are the results of a sample survey of all companies incorporated in Canada, except Government-owned companies, Canadian unincorporated branches of foreign corporations are also included in the totals while foreign subsidiaries of Canadian corporations are excluded.

Sources and Methods

In preparing the estimates, a stratified random sample of corporations is used together with the summary corporation statistics contained in "Taxation Statistics" published by the Department of National Revenue (Taxation Division). The figures in "Taxation Statistics" are on an annual basis and are available about two years after the year to which they refer. The sample results are used to allocate the annual totals by quarters, and current figures are obtained by projection from this base. This procedure ensures that profits are defined consistently for all corporations and improves the accuracy of the estimates.

Under the original design of the sample, estimates of profits would be within 3 per cent of the "true" figures 95 per cent of the time. However, since not all companies in the original sample are participating in the survey, the actual error is about 6 per cent. This error will be reduced as the number of companies in the sample increases.

Definitions

The definitions of items contained in the report are based mainly on accounting definitions used by corporations. The term "profits" as used throughout this report means the total profits of all companies earning profits less the losses of all companies incurring losses.

Sales figures in "Taxation Statistics" are used as a base for projecting the estimates obtained from

the survey to provide current sales estimates. These sales figures contain investment income as well as income from operations.

Net earnings as used in this report are the total earnings, exclusive of Canadian dividends received, after all current charges except depletion, capital cost allowance, charitable donations and income tax liabilities. Canadian dividends received are excluded because earnings are computed before payment of dividends, and if receipt of these dividends were included they would be counted twice, once in the hands of the paying corporation and again in the hands of the receiving corporation.

Depletion charges are not deducted since, although these are properly a charge for individual firms, the exhaustion of natural resources should not be a charge against National Income. However, for the three groups for which depletion charges are significant—mining, wood products and paper products—depletion charges are shown separately in the tables.

Capital cost allowance as outlined in the tables reflects the amount of depreciation claimed for income tax purposes, and, therefore, may not be comparable to the amounts as shown by corporations in their own books.

Income tax liabilities are based on figures supplied by reporting companies.

Depletion charges are based on the amounts reported by the companies and are not related to the data contained in "Taxation Statistics".

A more comprehensive description of the methods, sources and definitions is contained in the initial publication of this series, "Quarterly Corporation Profits, 1950-1954", issued by the Dominion Bureau of Statistics in March, 1955.

Corporation Profits - Fourth Quarter, 1966

Seasonally adjusted corporation profits before taxes are estimated at \$1,322 million for the fourth quarter of 1966, an increase of \$98 million or 8 per cent from the revised third quarter of \$1,224 million.

Profits in the Manufacturing sector increased by 9 per cent, from a revised \$527 million in the third quarter to \$575 million in the fourth quarter. Within the sector, the most marked increase occurred in the Electrical Products Industries where profits rose by 59 per cent from \$22 million to \$35 million. Other sizeable increases were as follows: Other Manufacturing Industries, 39 per cent from \$28 million to \$39 million; Paper and Allied Industries, 26 per cent from \$39 million to \$49 million; Metal Industries including four major groups—Primary Metal, Metal Fabricating, Machinery and Transportation Equipment, 21 per cent from \$148 million to \$179 million; Petroleum and Coal Products Industries, 10 per cent from \$39 million to \$43 million; Wood Industries and Printing, Publishing and Allied Industries, 8 per cent from \$25 million to \$27 million and \$24 million to \$26 million respectively. Offsetting in part the increase occurring in the aforementioned industries were noticeable declines occurring in the Non-metallic Mineral Products

Industries of 36 per cent to \$18 million from \$28 million; Textile Industries, 20 per cent to \$12 million from \$15 million; Chemical and Chemical Products Industries, 14 per cent to \$50 million from \$58 million; Rubber Industries, 11 per cent to \$8 million from \$9 million and Food and Beverage Industries, 3 per cent to \$89 million from \$92 million.

The Non-manufacturing sector, in total, increased by approximately 7 per cent from \$697 million to \$747 million. Transportation, Storage and Communication increased sharply by 40 per cent from \$133 million to \$186 million. Other industries recording a rise are: Wholesale Trade, 12 per cent from \$95 million to \$106 million; Finance, Insurance and Real Estate, 9 per cent from \$158 million to \$173 million; Electric Power, Gas and Water Utilities, also 9 per cent from \$23 million to \$25 million and Service Industries, 3 per cent from \$39 million to \$40 million. Other Non-manufacturing remained unchanged at \$25 million. Retail Trade decreased by 12 per cent to \$72 million from \$82 million and finally, Mines, Quarries and Oil Wells dropped by 15 per cent to \$120 million from \$142 million.
