THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks, and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data, (Catalogue Nos. with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The indexes of Real Domestic Product by Industry (included with Catalogue Nos. carrying the prefix 61) provide "constant dollar" measures of the contribution of each industry to gross domestic product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue Nos. with prefix 14).

Both the Input-Output Tables and Indexes of Real Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics, and the legal entity is the main unit of classification of transactors. Also, provision is made in the System for incorporation of balance sheet (wealth) estimates when such data are sufficiently developed.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, the Dominion Bureau of Statistics is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, "A System of National Accounts" (Studies in Methods, Series F, No. 2, Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968). In the future, a document on the conceptual framework of the Canadian System of National Accounts will be prepared for publication by the Dominion Bureau of Statistics. This document will furnish the broad theoretical outline of the System. The finer conceptual details, the statistical tables, and the descriptions of sources and methods as they pertain to the individual parts of the System, will appear in the various regular and occasional publications relating to those parts.

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, l'explication des cadres théoriques et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels de revenu et de dépenses (publiés dans les bulletins dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance des paiements internationaux (numéros de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes de revenu et de dépenses.

Une nomenclature, sensiblement augmentée, d'industries et de biens et services figure dans les tableaux d'intrants et d'extrants (input-output) du système (numéro de catalogue commençant par 15). Les indices du produit intérieur réel par industrie (compris dans les publications dont les numéros de catalogue commencent par 61) mesurent, en "dollars constants", l'apport de chaque branche d'activité au produit intérieur brut au coût des facteurs. Un rapport est établi entre intrants et extrants dans les études de productivité (publications dont les numéros de catalogue commencent par 14).

L'établissement sert d'unité de base de la production industrielle tant dans les tableaux 'input-output' que dans les indices du produit intérieur réel. Les comptes de flux financiers (publications dont les numéros de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. En outre, le système a été conçu de façon à pouvoir incorporer les comptes de bilans (qui prennent pour objet le patrimoine) lorsque les données s'y rapportant seront suffisamment développées.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité légale que lorsque les données sont groupées dans des catégories très générales. Toutefois, le Bureau fédéral de la statistique poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données fondées, par exemple, sur l'établissement de manière à les faire correspondre aux données établies d'après la société ou l'entreprise.

Dans ses grands lignes, le système de comptabilité nationale du Canada est étroitement relié à la norme internationale exposée dans la publication des Nations Unies *A System of National Accounts* (Études méthodologiques, série F, N°2, Rev. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1968). Le Bureau fédéral de la statistique publiera plus tard un document définissant le Système de comptabilité nationale du Canada. Ce document exposera les grands principes du système. Les explications théoriques plus détaillées, les tableaux statistiques, l'explication des sources et des méthodes paraîtront dans les diverses publications courantes ou hors série portant sur les éléments du système.

NOTE RE HISTORICAL CONTINUITY

For a continuous record of the Index of Real Domestic Product and the Index of Industrial Production and their components, the sources are as follows:

"Indexes of Real Domestic Product by Industry—(1961 Base)" Catalogue No. 61-506—Real Domestic Product for the period from 1935 to 1960 and the Index of Industrial Production for the period from 1919 to 1960.

"Indexes of Real Domestic Product by Industry, 1961-1969, 1961-100", Catalogue No. 61-510—for the period from 1961 to 1967.

"Annual supplement to the Indexes of Real Domestic Product by Industry (including the Index of Industrial Production), 1961-100"; attached to the May 1971 issue, Catalogue No. 61-005, incorporating revisions for the period from 1968 to 1970.

Current Issues of the "Indexes of Real Domestic Product by Industry (including the Index of Industrial Production)" beginning with the May 1971 issue, 1961-100; Catalogue No. 61-005, incorporating revisions for the period beginning January 1971.

CONCEPTS, SOURCES AND METHODS

DBS Catalogue No. 61-502—See this publication for description of concepts, sources and methods for the Index of Industrial Production.

DBS Catalogue No. 61-505—See this publication for description of concepts, sources and methods for Real Domestic Product by Industry of origin.

DBS Catalogue No. 61-506—See this publication for technical notes concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the 1960 Standard Industrial Classification and the adoption of the 1961 weight and reference base.

DBS Catalogue No. 61-510—See this publication for technical notes concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the "total activity" concept, the adoption of the final 1961 weighting system, the incorporation of up-to-date census-based annual production levels and the introduction of revised methodology.

REMARQUES SUR LA CONTINUITÉ CHRONOLOGIQUE

Les publications ci-après peuvent servir à établir un dossier continu du produit intérieur réel et de l'indice de la production industrielle et de leurs éléments:

Indexes of Real Domestic Product by Industry—(1961 Base), numéro au Catalogue: 61-506—*Real Domestic Product*, pour la période de 1935 à 1960 et *Index of Industrial Production*, pour la période de 1919 à 1960.

"Indices du produit intérieur réel, par industrie, 1961-1969, 1961-100", numéro au catalogue: 61-510F, pour la période de 1961 à 1967.

"Le supplément annuel des indices du produit intérieur réel par industrie (incluant l'indice de la production industrielle), 1961-100"; attaché au numéro du catalogue: 61-005, de l'édition de mai 1971 et incorporant les révisions pour la période de 1968 à 1970.

"Indices du produit intérieur réel par industrie (incluant l'indice de la production industrielle), 1961-100"; numéro au catalogue: 61-005, éditions courantes commençant en mai 1971 et incorporant les révisions pour la période à partir de janvier 1971.

CONCEPTS, SOURCES ET MÉTHODES

N° 61-502 du catalogue du B.F.S.—Se reporter à cette publication, qui présente la description des concepts, sources et méthodes d'établissement de l'indice de la production industrielle.

N° 61-505 du catalogue du B.F.S.—Se reporter à cette publication, qui présente la description des concepts, sources et méthodes d'établissement du produit intérieur réel par industrie d'origine.

N° 61-506 du catalogue du B.F.S.—Se reporter à cette publication, qui présente les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'ont entraîné l'application de la Classification type des industries de 1960 et l'adoption de l'année 1961 comme base de pondération et de référence.

N° 61-510F du catalogue du B.F.S.—Se reporter à cette publication, qui contient les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'ont entraîné l'introduction du concept "d'activité totale", l'adoption du régime de pondération finale de 1961, l'incorporation des plus récents niveaux de production annuelle établis d'après le recensement, et l'introduction d'une méthodologie nouvelle.

SYMBOLS AND CODES

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- nil or zero.
- amount too small to be expressed.

S.I.C. code: The Standard Industrial Classification code appearing in the tables should be interpreted as follows:

An S.I.C. Division is indicated by one of the integers 1 to 11.

An S.I.C. Major group within the Division is indicated by two digits following the Division code and separated from it by a colon.

A 3- or 4-digit industry class is indicated by 3 or 4 digits respectively.

CONTENT OF SPECIAL INDUSTRY GROUPINGS

The industry content of these special groupings is defined as follows:

Real Domestic Product less agriculture: All industries less agriculture (S.I.C. 2 to 11).

Goods-producing industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing (S.I.C. 5); construction (S.I.C. 6); and electric power, gas and water utilities (S.I.C. 7:04).

Goods-producing industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; 7:04).

Service-producing industries: Transportation, storage and communication (S.I.C. 7:01-03); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); community, business and personal service industries (S.I.C. 10); and public administration and defence (S.I.C. 11).

Commercial industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing (S.I.C. 5); construction (S.I.C. 6); transportation, storage and communication (S.I.C. 7:01-03) less highway and bridge maintenance (S.I.C. 516); electric power (S.I.C. 572); gas distribution (S.I.C. 574); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); offices of physicians (S.I.C. 823); offices of dentists (S.I.C. 825); other health services (S.I.C. 827); motion picture and recreational services (S.I.C. 10:04); services to business management (S.I.C. 10:05); personal services (S.I.C. 10:06) less private households (S.I.C. 873); miscellaneous services (S.I.C. 10:07).

Commercial industries less agriculture: The total of the previous grouping less Agriculture (S.I.C. 2-6; part 7; 8; 9; part 10).

Non-commercial industries: Highway and bridge maintenance (S.I.C. 516); water systems and other utilities (S.I.C. 576; 579); hospitals (S.I.C. 821); welfare organizations (S.I.C. 828); religious organizations (S.I.C. 831); private households (S.I.C. 873); education and related services (S.I.C. 10:01); and public administration and defence (S.I.C. 11).

Index of Industrial Production: Mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing (S.I.C. 5); and electric power, gas and water utilities (S.I.C. 7:04).

Notes: 1 Due to rounding, sub-annual detail may not average the annual level.

2 For RDP purposes the content of S.I.C. Division 7 has been altered to include only transportation, storage and communication; electric power, gas, water and other utilities are excluded and measured separately, as a component of the Index of Industrial Production.

SIGNES ET CODES CONVENTIONNELS

Voici la signification des signes et des codes conventionnels employés dans les tableaux:

- .. chiffre non disponible.
- néant ou zéro.
- chiffre infime.

Code C.T.I.: Le code de la Classification type des industries figurant aux tableaux doit être interprété comme suit:

Une branche de la C.T.I. est indiquée par un des nombres entiers de 1 à 11.

Un groupe de la C.T.I., à l'intérieur d'une branche, est indiqué par deux chiffres qui suivent le code de la branche et sont séparés de celui-ci par deux points(:).

Une classe d'industrie à 3 ou 4 chiffres est indiquée par 3 ou 4 chiffres respectivement.

INDUSTRIES RÉUNIES DANS CHAQUE AGRÉGAT SPÉCIAL

Énumération des industries qui composent chaque groupe spécial ci-après:

Produit intérieur réel, moins l'agriculture: Toutes les industries, moins l'agriculture (C.T.I. 2-11).

Industries productrices de biens: Agriculture (C.T.I. 1); foretage (C.T.I. 2); pêche et piégeage (C.T.I. 3); mines (y compris le broyage), carrières et puits de pétrole (C.T.I. 4); industrie manufacturière (C.T.I. 5); construction (C.T.I. 6); et électricité, gaz et eau (C.T.I. 7:04).

Industries productrices de biens, moins l'agriculture: Le total du regroupement précédent, moins l'agriculture (C.T.I. 2-6; 7:04).

Industries productrices de services: Transports, entreposage et communications (C.T.I. 7:01-03); commerce (C.T.I. 8); finance, assurance et immeuble (C.T.I. 9); services sociaux, commerciaux, industriels et personnels (C.T.I. 10); administration publique et défense nationale (C.T.I. 11).

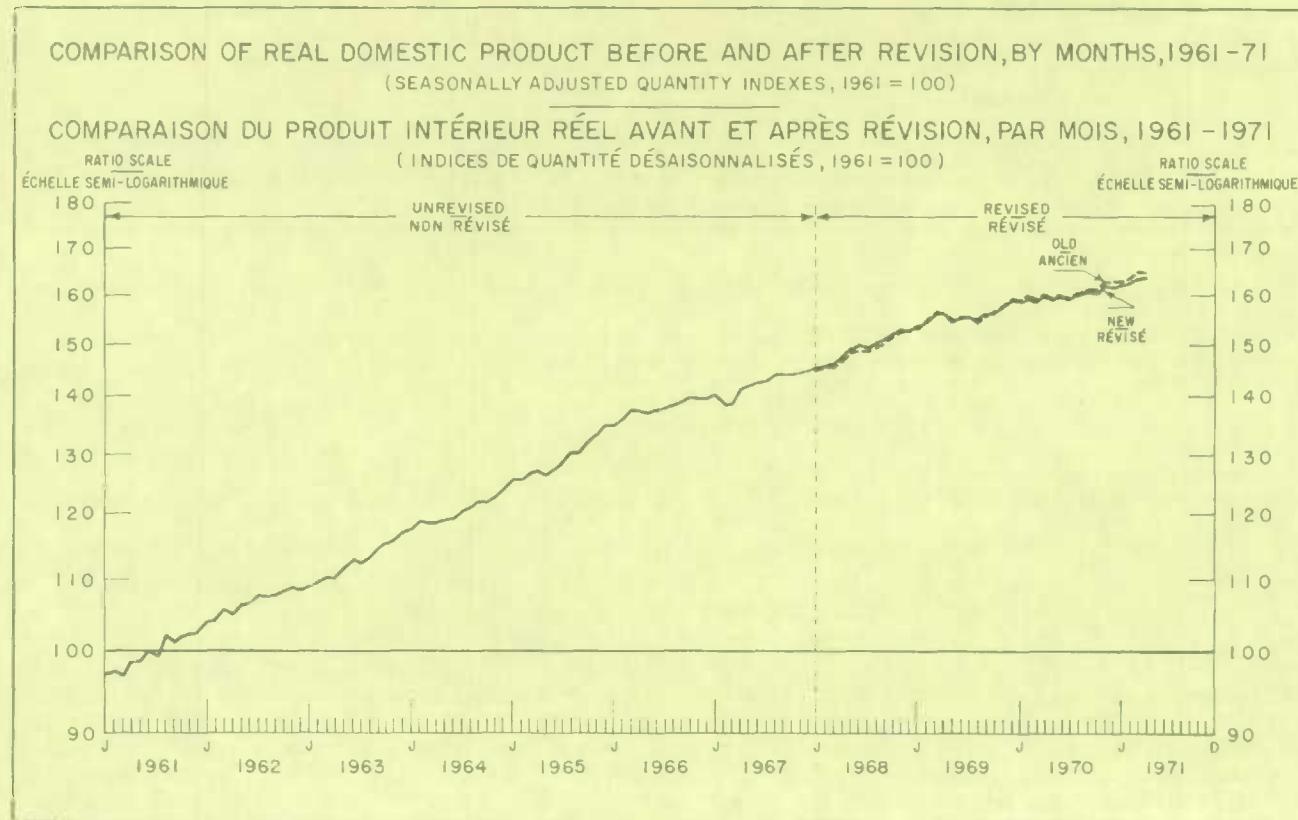

Industries commerciales: Agriculture (C.T.I. 1); foretage (C.T.I. 2); pêche et piégeage (C.T.I. 3); mines (y compris le broyage), carrières et puits de pétrole (C.T.I. 4); industrie manufacturière (C.T.I. 5); construction (C.T.I. 6); transports, entreposage et communications (C.T.I. 7:01-03); moins l'entretien des routes et des ponts (C.T.I. 516); électricité (C.T.I. 572); distribution du gaz (C.T.I. 574); commerce (C.T.I. 8); finance, assurance et immeuble (C.T.I. 9); cabinets de médecin (C.T.I. 823); cabinets de dentiste (C.T.I. 825); autres services de santé (C.T.I. 827); cinématographie et services récréatifs (C.T.I. 10:04); établissements au service des entreprises (C.T.I. 10:05); services personnels (C.T.I. 10:06); moins ménages privés (C.T.I. 873); services divers (C.T.I. 10:07).

Industries commerciales, moins l'agriculture: Le total du groupe précédent, moins l'agriculture (C.T.I. 2-6; partie de 7; 8; 9 et partie de 10).

Industries non commerciales: Entretien des routes et des ponts (C.T.I. 516); services d'eau et autres services d'utilité publique (C.T.I. 576; 579); hôpitaux (C.T.I. 821); œuvres de bienfaisance (C.T.I. 828); organismes religieux (C.T.I. 831); ménages privés (C.T.I. 873); enseignement et services connexes (C.T.I. 10:01); administration publique et défense nationale (C.T.I. 11).

Indice de la production industrielle: Mines (y compris le broyage), carrières et puits de pétrole (C.T.I. 4); industrie manufacturière (C.T.I. 5); électricité, gaz et eau (C.T.I. 7:04).

Remarques: 1 En raison de l'arrondissement des chiffres, il peut que la moyenne des données mensuelles et trimestrielles n'équivaille pas au niveau annuel.
2 Pour le calcul du produit intérieur brut, la division 7 de la classification type des industries a été modifiée de façon à inclure seulement les transports, l'entreposage et les communications. L'électricité, le gaz, l'eau et les autres services d'utilité publique sont évalués séparément.

TECHNICAL NOTE

This supplement contains revised annual and sub-annual indexes of Real Domestic Product by industry for the period 1968 to 1970. These indexes are continuous with those for the period 1961 to 1967 as published in "Indexes of Real Domestic Product by Industry", DBS Catalogue No. 61-510. The revisions result primarily from three factors—the incorporation of more recent annual data, the revision of monthly projectors and (for the seasonally adjusted data) revisions to seasonal adjustment factors.

Chart I shows a comparison of the revised monthly RDP index with the previously published RDP levels.

REAL DOMESTIC PRODUCT FOR 1970

Total Real Domestic Product for Canada grew by 2.4 per cent in 1970 in contrast to a growth of 4.5 per cent in 1969, and an average growth rate over the period 1961-69 of 5.8 per cent. As indicated by the quarterly changes in Table I, the growth in the Canadian economy in 1970 occurred mainly in the first and fourth quarters, with the increase in the first half-year equal to second-half growth for total RDP. The index of Industrial Production, in contrast, grew strongly in the first

NOTE TECHNIQUE

Ce supplément contient les données annuelles, trimestrielles et mensuelles révisées du produit intérieur réel, par industrie, pour la période 1968 à 1970. Pour un dossier continu il faut se reporter à la publication 61-510F: "Indices du produit intérieur réel par industrie" contenant les indices pour la période 1961 à 1967, comparables à ceux du présent supplément. Trois facteurs principaux ont contribué aux présentes révisions: l'incorporation de points de repères mis à jours basés sur des statistiques annuelles récemment disponibles; la mise à jour de projecteurs mensuels et l'incorporation de facteurs d'ajustement saisonnier basés sur des données plus récentes.

Le Graphique I nous donne une comparaison des indices révisés et des indices disponibles avant cette révision.

PRODUIT INTÉRIEUR RÉEL, 1970

Le produit intérieur réel canadien a augmenté de 2.4 p. 100 en 1970 comparativement à 4.5 p. 100 en 1969 et à un taux moyen d'expansion de 5.8 p. 100 pour la période 1961 à 1969. Telle qu'indiquée dans les changements trimestriels énumérés au Tableau I, la croissance de l'économie canadienne en 1970 a pris place surtout au premier et au quatrième trimestres, tout en demeurant identique pour chacune des 2 moitiés de l'année. L'indice de la production industrielle n'a toutefois pas suivi la même orientation avec

quarter while the fourth quarter performance was dampened by a sharp drop in motor vehicle production.

un premier trimestre très fort et un quatrième trimestre montrant une modération due à un déclin de la production de véhicules automobiles.

 2. Federal Reserve Statistical Release, *Industrial Production*, Dec. 15/70, Mar. 15/71 — Déc. 15/70, mars 15/71.

In a comparison with the performance of the Canadian economy, the growth in total production in the United States was lower during recent years as is indicated in Table II. The unemployment rate for Canada rose from 4.7 per cent in 1969 to 5.9 per cent of the labour force in 1970. The corresponding rates in the United States were 3.5 and 4.9 per cent, respectively. Consumer prices in 1970 increased more rapidly in the United States than in Canada: 5.9 per cent in the United States and 3.4 per cent in Canada.

Les États-Unis ont connu une expansion du produit national brut en dollars constants inférieure à celle du Canada durant les dernières années (voir Tableau II). Au Canada le taux de chômage de 4.7 p. 100 du total de la main-d'œuvre en 1969 a monté à 5.9 p. 100 en 1970. Les taux américains correspondants ont été de 3.5 et 4.9 p. 100, respectivement. En 1970, l'indice des prix au consommateur a augmenté plus rapidement aux États-Unis qu'au Canada: de 5.9 p. 100 aux États-Unis et de 3.4 p. 100 au Canada.

 2. Board of Governors of the Federal Reserve System, *Industrial Production Indexes*, 1961-1966, (1963-1966), *Federal Reserve Statistical Release Industrial Production*, Jan. 14/69, Jan. 16/70, Dec. 15/70, Mar. 15/71 — Janv. 14/69, Jan. 16/70, déc. 15/70, mars 15/71.

The major contributions to the 1970 increase in Real Domestic Product in Canada came from mining, quarrying and oil wells, transportation, storage and communication, and community, business and personal services, while the more notable declines occurred in manufacturing, agriculture and construction.

Within mining, the two most important increases were in metal mines and in mineral fuels. Exports provide most of the explanation for the mineral fuels increase—exports to Japan in the case of coal mines and to the United States in the

Au Canada en 1970, les augmentations les plus importantes dans le produit intérieur réel provenaient des industries suivantes: mines, carrières et puits de pétrole; transports, entreposage et communications; et services sociaux, commerciaux, industriels et personnels. Les déclins les plus marqués se sont faits sentir dans l'industrie manufacturière, l'agriculture et la construction.

Au sein de l'industrie minière, les deux plus importantes augmentations ont pris place dans les mines de métaux et dans les combustibles minéraux, ces derniers bénéficiant d'exportations accrues du produit des mines de charbon vers le Japon et d'ex-

case of the crude petroleum and natural gas industry.

For manufacturing the lowest growth in output during the sixties occurred in 1967 when durables grew by 2.7 per cent and non-durables by 2.3 per cent. In 1970, non-durables output grew at the still slower pace of 1.4 per cent while durables output fell by 3 per cent. Decreased demand and the higher exchange rate for the Canadian dollar, as well as labour disputes, were the main factors affecting the pulp and paper industry which was the main contributor to the non-durables slowdown. A decline in the motor vehicle industries, partially related to the G.M. strike, was the major factor in the decline in durables output. The fall in Canadian automobile production was accompanied by a strong decline in the number of new cars and new commercial vehicles of North American manufacture sold. Demand for overseas manufactured vehicles rose strongly in 1970, but not sufficiently to compensate for the drop in sales of North American cars. Among other durable industries showing below average growth during 1970 were the construction oriented industries: the wood industries, cement manufacturers, concrete products and ready-mix concrete industries.

Utilities which, combined with mining and manufacturing, forms the Index of Industrial Production grew substantially on the strength of gains in all component industries.

The increase in output of the "transportation, storage and communication group" was distributed among all three components. Air, rail and pipeline transport were the main factors in the transportation rise; grain elevators contributed the strength to storage; and telephone systems and telegraph and cable accounted for most of the communication increase.

Trade grew slowly in 1970 with a levelling off in retail trade countering the wholesale trade increase. Declines were recorded in motor vehicle dealers, department stores and furniture, T.V. radio and appliance stores, the most important being motor vehicle dealers. Several store types, notably food stores, registered increases.

portations du produit de l'industrie du pétrole brut et du gaz naturel vers les États-Unis.

Aussi bien dans les industries manufacturières de biens durables que celles de biens non-durables, le taux d'augmentation le plus faible durant les années soixante fut en 1967 quand la production de biens durables n'augmenta que de 2.7 p. 100 et celle des biens non durables de 2.3 p. 100; en 1970, l'augmentation dans la production de ces derniers était encore plus lente montrant un gain de 1.4 p. 100 tandis que la production des biens durables descendait de 3 p. 100. Une baisse de la demande et l'augmentation du taux de change du dollar canadien en plus de conflits de travail furent les principaux facteurs du déclin dans l'industrie des pâtes et papiers, laquelle contribua le plus au ralentissement montré dans la production de biens non durables. Une diminution de la production des industries de véhicules automobiles, reliée à la grève de General Motors, a été le facteur le plus important du déclin montré dans la production de biens durables. Cette diminution dans la production canadienne de véhicules automobiles a été accompagnée d'une forte descente dans les ventes de voitures neuves et des véhicules utilitaires neufs manufacturés en Amérique du Nord. Il faut aussi remarquer que la demande pour des véhicules fabriqués outre-mer a fortement augmenté en 1970, mais de façon insuffisante à compenser pour la diminution dans les ventes de véhicules nord américains. D'autres industries de biens durables en 1970 à croissance moindre que la moyenne ont été en 1970 celles qui produisent des matériaux de construction telles que l'industrie du bois, les manufacturiers de ciment, de produits en béton et du béton préparé.

Les services d'utilité publique, qui, combinés à l'industrie minière et l'industrie manufacturière forment l'agrégat appelé "indice de la production industrielle" ont augmenté sensiblement à la suite de gains enregistrés dans toutes les industries composantes de ce groupe.

Les trois composantes de "transports, entreposage et communications" ont contribué à l'augmentation de ce groupe. Les transports par air, par eau et par pipe-line furent tous trois principalement responsables de l'augmentation dans les transports; les élévateurs à grain ont contribué fermement à l'augmentation montrée dans l'industrie de l'entreposage tandis que la plus grande partie de l'accroissement enregistré dans les communications venait des services téléphoniques, télégraphiques et de câbles.

Le commerce augmenta lentement en 1970 par suite de la stagnation du commerce de détail qui a annulé la croissance du commerce de gros. Des déclins ont été enregistrés dans les ventes des marchands de véhicules automobiles, des magasins à rayons, des magasins de meubles, téléviseurs, radios et appareils électro-ménagers, le plus important de ces déclins se faisant sentir dans les ventes des marchands de véhicules automobiles. Plusieurs magasins, entre autres ceux qui vendent des aliments, ont enregistré des augmentations.

TABLE 1. REAL DOMESTIC PRODUCT BY INDUSTRY, BY YEARS, 1967-70 (1960 S.I.C.)
