#### NOTE RE HISTORICAL CONTINUITY

For a continuous record of the Index of Real Domestic Product and the Index of Industrial Production and their components, the sources are as follows:

"Indexes of Real Domestic Product by Industry - (1961 Base)" Catalogue 61-506 - Real Domestic Product for the period from 1935 to 1960 and the Index of Industrial Production for the period from 1919 to 1960.

"Indexes of Real Domestic Product by Industry, 1961-1969, 1961=100", Catalogue 61-510 - for the period from 1961 to 1967 except for certain industries listed in the annual supplement below.

"Annual supplement to the Indexes of Real Domestic Product by Industry (including the Index of Industrial Production), 1961=100"; attached to the April 1973 issue, Catalogue 61-005, incorporating revisions for the period from 1968 to 1972 and for the period 1961 to 1967 for certain industries.

Current Issues of the "Indexes of Real Domestic Product by Industry (including the Index of Industrial Production)" beginning with the April 1973 issue, 1961=100; Catalogue 61-005, incorporating revisions for the period beginning January 1973.

#### CONCEPTS, SOURCES AND METHODS

Catalogue 61-502 - See this publication for description of concepts, sources and methods for the Index of Industrial Production.

Catalogue 61-505 - See this publication for description of concepts, sources and methods for Real Domestic Product by Industry of origin.

Catalogue 61-506 - See this publication for technical notes concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the 1960 Standard Industrial Classification and the adoption of the 1961 weight and reference base.

Catalogue 61-510 - See this publication for technical notes concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the "total activity" concept, the adoption of the final 1961 weighting system, the incorporation of up-to-date census-based annual production levels and the introduction of revised methodology.

#### REMARQUES SUR LA CONTINUITÉ CHRONOLOGIQUE

Les publications ci-après peuvent servir à établir un dossier continu du produit intérieur réel et de l'indice de la production industrielle et de leurs éléments:

*Indexes of Real Domestic Product by Industry - (1961 Base)*, Catalogue 61-506 - *Real Domestic Product*, pour la période de 1935 à 1960 et *Index of Industrial Production*, pour la période de 1919 à 1960.

"Indices du produit intérieur réel, par industrie, 1961-1969, 1961=100", Catalogue 61-510F, pour la période de 1961 à 1967 à l'exception de certaines industries énumérées dans le supplément annuel ci-joint.

"Le supplément annuel des indices du produit intérieur réel par industrie (incluant l'indice de la production industrielle), 1961=100"; attaché au Catalogue 61-005, de l'édition de avril 1973 et incorporant les révisions pour la période de 1968 à 1972 et pour la période de 1961 à 1967 pour certaines industries.

"Indices du produit intérieur réel par industrie (incluant l'indice de la production industrielle), 1961=100"; Catalogue 61-005, éditions courantes commençant en avril 1973 et incorporant les révisions pour la période à partir de janvier 1973.

#### CONCEPTS, SOURCES ET MÉTHODES

Catalogue 61-502 - Se reporter à cette publication, qui présente la description des concepts, sources et méthodes d'établissement de l'indice de la production industrielle.

Catalogue 61-505 - Se reporter à cette publication, qui présente la description des concepts, sources et méthodes d'établissement du produit intérieur réel par industrie d'origine.

Catalogue 61-506 - Se reporter à cette publication, qui présente les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'ont entraîné l'application de la Classification type des industries de 1960 et l'adoption de l'année 1961 comme base de pondération et de référence.

Catalogue 61-510F - Se reporter à cette publication, qui contient les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'ont entraîné l'introduction du concept "d'activité totale", l'adoption du régime de pondération finale de 1961, l'incorporation des plus récents niveaux de production annuelle établis d'après le recensement, et l'introduction d'une méthodologie nouvelle.

## SYMBOLS AND CODES

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- nil or zero.
- amount too small to be expressed.

S.I.C. code: The Standard Industrial Classification code appearing in the tables should be interpreted as follows:

An S.I.C. Division is indicated by one of the integers 1 to 11.

An S.I.C. Major group within the Division is indicated by two digits following the Division code and separated from it by a colon.

A 3- or 4- digit industry class is indicated by 3 or 4 digits respectively.

## CONTENT OF SPECIAL INDUSTRY GROUPINGS

The industry content of these special groupings is defined as follows:

**Real Domestic Product less agriculture:** All industries less agriculture (S.I.C. 2 to 11).

**Goods-producing industries:** Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing (S.I.C. 5); construction (S.I.C. 6); and electric power, gas and water utilities (S.I.C. 7:04).

**Goods-producing industries less agriculture:** The total of the previous grouping less agriculture (S.I.C. 2-6; 7:04).

**Service-producing industries:** Transportation, storage and communication (S.I.C. 7:01-03); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); community, business and personal service industries (S.I.C. 10); and public administration and defence (S.I.C. 11).

**Commercial industries:** Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing (S.I.C. 5); construction (S.I.C. 6); transportation, storage and communication (S.I.C. 7:01-03) less highway and bridge maintenance (S.I.C. 516); electric power (S.I.C. 572); gas distribution (S.I.C. 574); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); offices of physicians (S.I.C. 823); offices of dentists (S.I.C. 825); other health services (S.I.C. 827); motion picture and recreational services (S.I.C. 10:04); services to business management (S.I.C. 10:05); personal services (S.I.C. 10:06) less private households (S.I.C. 873); miscellaneous services (S.I.C. 10:07).

**Commercial industries less agriculture:** The total of the previous grouping less Agriculture (S.I.C. 2-6; part 7; 8; 9; part 10).

**Non-commercial industries:** Highway and bridge maintenance (S.I.C. 516); water systems and other utilities (S.I.C. 576; 579); hospitals (S.I.C. 821); welfare organizations (S.I.C. 828); religious organizations (S.I.C. 831); private households (S.I.C. 873); education and related services (S.I.C. 10:01); and public administration and defence (S.I.C. 11).

**Index of Industrial Production:** Mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing (S.I.C. 5); and electric power, gas and water utilities (S.I.C. 7:04).

**Notes:** 1 Due to rounding, sub-annual detail may not average the annual level.

2 For RDP purposes the content of S.I.C. Division 7 has been altered to include only transportation, storage and communication; electric power, gas, water and other utilities are excluded and measured separately, as a component of the Index of Industrial Production.

## SIGNES ET CODES CONVENTIONNELS

Voici la signification des signes et des codes conventionnels employés dans les tableaux:

- .. chiffre non disponible.
- néant ou zéro.
- chiffre infime.

Code C.T.I.: Le code de la Classification type des industries figurant aux tableaux doit être interprété comme suit:

Une branche de la C.T.I. est indiquée par un des nombres entiers de 1 à 11.

Un groupe de la C.T.I., à l'intérieur d'une branche, est indiqué par deux chiffres qui suivent le code de la branche et sont séparés de celui-ci par deux points(:).

Une classe d'industrie à 3 ou 4 chiffres est indiquée par 3 ou 4 chiffres respectivement.

## INDUSTRIES RÉUNIES DANS CHAQUE AGRÉGAT SPÉCIAL

Énumération des industries qui composent chaque groupe spécial ci-après:

**Produit intérieur réel, moins l'agriculture:** Toutes les industries, moins l'agriculture (C.T.I. 2-11).

**Industries productrices de biens:** Agriculture (C.T.I. 1); forage (C.T.I. 2); pêche et piégeage (C.T.I. 3); mines (y compris le broyage), carrières et puits de pétrole (C.T.I. 4); industrie manufacturière (C.T.I. 5); construction (C.T.I. 6); et électricité, gaz et eau (C.T.I. 7:04).

**Industries productrices de biens, moins l'agriculture:** Le total du groupement précédent, moins l'agriculture (C.T.I. 2-6; 7:04).

**Industries productrices de services:** Transports, entreposage et communications (C.T.I. 7:01-03); commerce (C.T.I. 8); finance, assurance et immeuble (C.T.I. 9); services sociaux, commerciaux, industriels et personnels (C.T.I. 10); administration publique et défense nationale (C.T.I. 11).

**Industries commerciales:** Agriculture (C.T.I. 1); forage (C.T.I. 2); pêche et piégeage (C.T.I. 3); mines (y compris le broyage), carrières et puits de pétrole (C.T.I. 4); industrie manufacturière (C.T.I. 5); construction (C.T.I. 6); transports, entreposage et communications (C.T.I. 7:01-03); moins l'entretien des routes et des ponts (C.T.I. 516); électricité (C.T.I. 572); distribution du gaz (C.T.I. 574); commerce (C.T.I. 8); finance, assurance et immeuble (C.T.I. 9); cabinets de médecin (C.T.I. 823); cabinets de dentiste (C.T.I. 825); autres services de santé (C.T.I. 827); cinématographie et services récréatifs (C.T.I. 10:04); établissements au service des entreprises (C.T.I. 10:05); services personnels (C.T.I. 10:06); moins ménages privés (C.T.I. 873); services divers (C.T.I. 10:07).

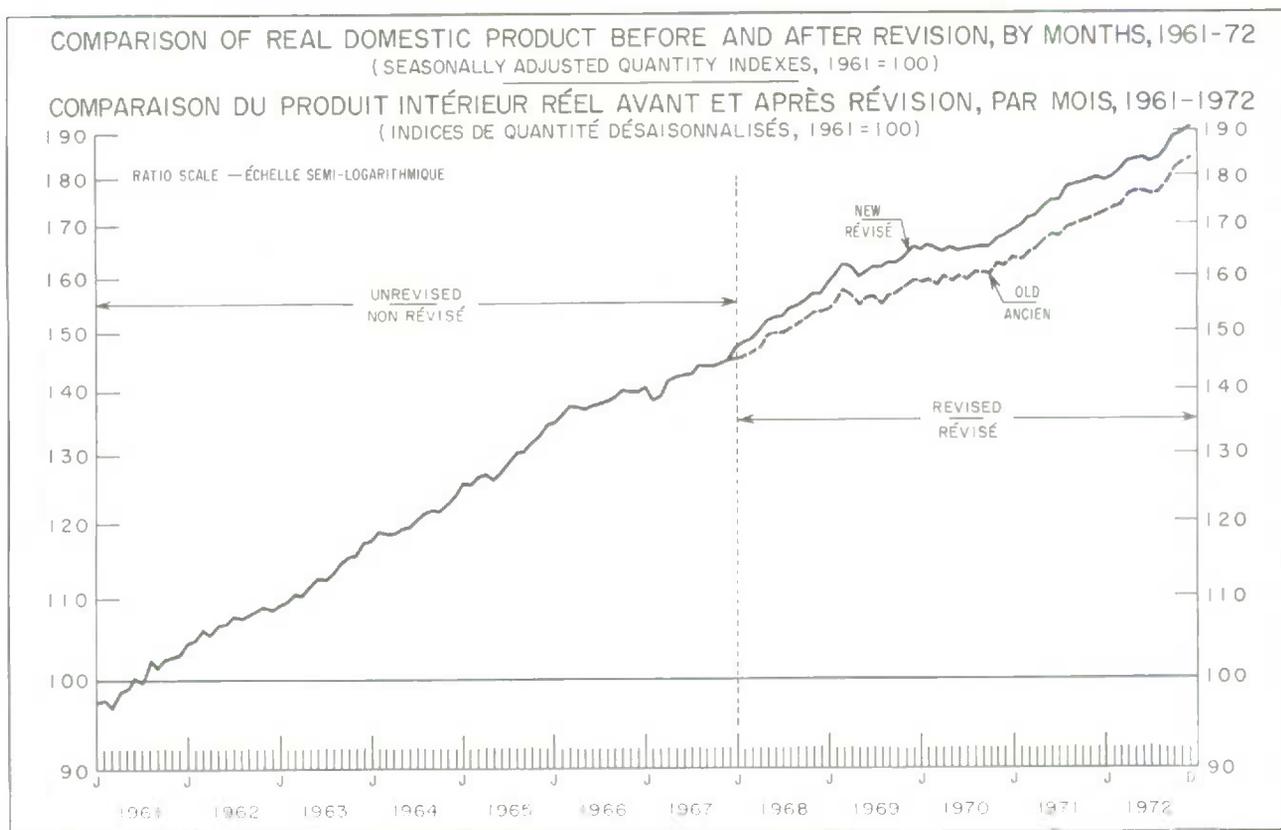

**Industries commerciales, moins l'agriculture:** Le total du groupe précédent, moins l'agriculture (C.T.I. 2-6; partie de 7; 8; 9 et partie de 10).

**Industries non commerciales:** Entretien des routes et des ponts (C.T.I. 516); services d'eau et autres services d'utilité publique (C.T.I. 576; 579); hôpitaux (C.T.I. 821); oeuvres de bienfaisance (C.T.I. 828); organismes religieux (C.T.I. 831); ménages privés (C.T.I. 873); enseignement et services connexes (C.T.I. 10:01); administration publique et défense nationale (C.T.I. 11).

**Indice de la production industrielle:** Mines (y compris le broyage), carrières et puits de pétrole (C.T.I. 4); industrie manufacturière (C.T.I. 5); électricité, gaz et eau (C.T.I. 7:04).

**Remarques:** 1 En raison de l'arrondissement des chiffres, il se peut que la moyenne des données mensuelles et trimestrielles n'équivaille pas au niveau annuel.

2 Pour le calcul du produit intérieur brut, la division 7 de la classification type des industries a été modifiée de façon à inclure seulement les transports, l'entreposage et les communications. L'électricité, le gaz, l'eau et les autres services d'utilité publique sont évalués séparément.

#### TECHNICAL NOTE

This supplement contains revised annual, quarterly and monthly indexes of Real Domestic Product by Industry for the period 1968 to 1972.

The revisions form part of the regular annual revisions to the Indexes of Real Domestic Product and result from the incorporation of more recent annual data (causing revisions in level), and from the incorporation of new monthly information as well as updated seasonal adjustment factors. The April issue of 61-005, Index of Real Domestic Product by Industry, contains the revised indexes from January 1973.

Chart 1 shows a comparison of the revised monthly RDP index with the previously published record.

Users should note that the previously published indexes for the industries listed below have also been revised for the 1961-1967 period, for a few selected industries as a result of further research. In the case of paid and imputed rents the deflated Gross National Expenditure series have been adopted. This in turn has increased the RDP growth rate over the 1961-67 period by 0.2 percentage points. In total these revisions result in the following changes in the indexes of Real Domestic Product for 1961-1967 from the levels shown in Catalogue 61-510.

#### NOTE TECHNIQUE

Le supplément contient les données annuelles, trimestrielles et mensuelles révisées du Produit intérieur réel par industrie, pour la période de 1968 à 1972.

Ces révisions font suite au processus normal des révisions annuelles de l'indice du produit intérieur réel et proviennent de l'incorporation des chiffres annuels plus récents (causant des révisions des niveaux annuels) et de l'introduction de nouvelles informations mensuelles et de facteurs saisonniers mis à jour. Les chiffres révisés pour la période de janvier à avril 1973 sont publiés dans la livraison d'avril de 61-005, indices du produit intérieur réel par industrie.

Le graphique 1 montre une comparaison de l'indice mensuel révisé du P.I.R. avec les niveaux du P.I.R. publiés antérieurement.

Les usagers devraient prendre note que les indices publiés antérieurement pour les industries énumérées ci-dessous ont été révisés pour la période de 1961-1967 à la suite de recherches ultérieures; cette révision se limite cependant à un nombre restreint d'industries. Pour ce qui est des loyers payés et imputés, on a utilisé les chiffres dégonflés de la Dépense nationale brute. Cet ajustement a eu pour effet d'augmenter de 0.2% le taux de croissance du P.I.R. pour la période 1961-1967. Au total, ces révisions se sont soldées par les changements suivants dans les indices du produit intérieur réel (1961-1967) par rapport aux niveaux indiqués dans le Catalogue 61-510.

	1962	1963	1964	1965	1966	1967
Previously published - Publiés antérieurement .....	106.9	112.7	120.4	129.0	138.0	142.4
This revision - Chiffres révisés .....	107.0	113.2	121.3	130.0	139.4	144.1

The revised 1961-1967 data for the component industries and aggregates are available upon request.

Les chiffres révisés de 1961 à 1967 pour les industries composantes et les agrégats sont disponibles sur demande.

Industry title	S.I.C. Code - Code C.T.I.	Titre d'industrie
Soft Drink Manufacturers .....	141	Manufacturiers de boissons gazeuses
Hosiery Mills .....	231	Industries des bas et chaussettes
Knitting Mills .....	5:06	Bonneterie
Aircraft and Parts Manufacturers .....	321	Manufacturiers d'avion et d'éléments
Manufacturers of Mixed Fertilizers .....	372	Manufacturiers d'engrais composés
Motor Vehicle Manufacturers .....	323	Manufacturiers de véhicules automobiles

Education and Related Services .....	10:01	Enseignement et services connexes
Services to Business Management .....	10:05	Établissements au service des entreprises

## REVIEW OF 1972

Real domestic product for all industries in 1972 increased by 5.3%, compared to 5.7% in 1971. In contrast, real domestic product excluding agriculture grew by 5.9% in 1972 compared to 5.3% in the previous year and to an average annual rate of 5.8% from 1961 to 1972. Over the same period, total real domestic product grew at an average annual rate of 5.7% while total goods-and service-producing industries had growth rates of 5.5% and 5.8% respectively.

The continued expansion in total output in 1972 was accompanied by a considerable improvement in employment. The results of the Labour Force Survey indicate that total employment increased by 3.1% in 1972 compared to 2.5% in 1971. The service-producing industries contributed most of the gains in employment. Employment in this industry grouping increased by 4.3% in 1972 while employment in goods-producing industries rose by only 1.4%. Within the goods-producing industries, manufacturing employment was up by 3.5%. The strength in production in the final quarter of 1972 supported continued expansion in employment. These forces contributed to the downward trend of the unemployment rate in the final quarter of the year.

## REVUE DE 1972

En 1972, le produit intérieur réel de l'ensemble des industries a augmenté de 5.3 % contre 5.7 % en 1971. Par contre, le produit intérieur réel sans l'agriculture a progressé de 5.9 % en 1972 contre 5.3 % l'année précédente à un taux annuel moyen de 5.8 % de 1961 à 1972. Pendant la même période, le produit intérieur réel total a augmenté à un taux annuel moyen de 5.7 %, tandis que les industries productrices de biens et de services ont présenté respectivement des taux globaux de croissance de 5.5 % et de 5.8 %.

L'expansion soutenue de la production totale de 1972 s'est accompagnée d'une amélioration considérable de la situation de l'emploi. D'après l'enquête sur la population active, l'emploi total a progressé de 3.1 % en 1972 comparativement à 2.5 % en 1971. Les industries productrices de services ont rendu compte de la plus grande partie de la progression de l'emploi. En effet, l'emploi y a augmenté de 4.3 % en 1972 contre 1.4 % seulement dans les industries productrices de biens, où l'emploi dans les industries manufacturières s'est néanmoins accru de 3.5%. La vigueur de la production au quatrième trimestre de 1972 a soutenu une expansion suivie de l'emploi. Ces forces expansionnistes ont favorisé une tendance à la baisse du taux de chômage dans ce même trimestre.

Within the commercial non-agricultural industries, the number of persons employed increased by 3.0% in 1972, accompanied by an increase of 6.3% in output. This resulted in a gain of 3.2% in output per person employed, slightly faster than the average annual rate of 2.9% for the 1961-1972 period. Output per person employed in commercial non-agricultural goods-producing industries increased by 4.0% in 1972 compared to 5.4% in 1971. For commercial service-producing industries, the rate of increase in output per person employed accelerated to 2.7% in 1972 compared to 2.1% in the previous year.

Price pressures continued to be of concern. Over-all prices as measured by the implicit price index of gross national expenditure rose by 4.6%, following an increase of 3.1% in 1971. The consumer price index for all items was 4.8% ahead of the 1971 level. Price increases moderated in the fourth quarter. The implicit price index of GNE rose by .7%, the slowest increase since the third quarter of 1971. The rate of increase in the consumer price index was also slower in the fourth quarter.

All categories of domestic consumer demand provided strong support for the expansion in 1972, even after allowance for price change. In real terms, consumer demand for durable goods rose the fastest on a year-to-year basis. This was achieved despite the deceleration in the third quarter, primarily attributable to a drop in sales of automobiles. The slowdown in outlays on total consumer goods in the third quarter was partially offset by the surge in spending on services.

Exports played an important role in 1972. The volume of merchandise exports rose by nearly 9% compared to close to 7% in 1971. The commodities registering important gains were motor vehicles and parts, crude petroleum, natural gas, coal, lumber, and newsprint, among others. The increase in newsprint exports was the first since 1969. This strength in external demand is evident in the gains in output of such export-oriented industries as motor vehicle parts and accessories manufacturers (up 13.3%) and motor vehicle manufacturers (up 8.6%), crude petroleum and natural gas industry (ahead by 16.7%), coal mines (up 39.2%), pulp and paper industries (up 8.1%, the first substantial gain since 1969), and sawmills and planing mills (up 8.8%). The growth in exports was concentrated in the second and final quarter of the year.

Dans le secteur commercial non agricole, le nombre de personnes occupées a augmenté de 3.0 % en 1972, gain qui s'est accompagné d'une hausse de 6.3 % de la production. Ces avances se sont traduites par une progression de 3.2 % de la production par personne occupée. Cette progression se situe légèrement au-dessus du taux annuel moyen de croissance de 2.9 % pour la période 1961-1972. La production par personne employée dans les industries commerciales non agricoles productrices de biens a augmenté de 4.0 % en 1972 contre 5.4 % en 1971. Dans les industries commerciales productrices de services, le taux de croissance de la production par personne occupée a grimpé à 2.7 %, contre 2.1 % l'année précédente.

La pression exercée par les prix a continué de causer des préoccupations. L'indice des prix implicite des dépenses nationales brutes révèle qu'au niveau global les prix ont monté de 4.6 % après une hausse de 3.1 % en 1971. D'autre part, l'indice d'ensemble des prix à la consommation a accusé en 1972 une avance de 4.8 % par rapport à 1971. Les augmentations des prix ont modéré leur rythme au quatrième trimestre. L'indice des prix implicite des D.N.B. a progressé de 0.7 % au cours de ce trimestre; il s'agit là de la plus petite avance depuis le troisième trimestre de 1971. Le taux d'accroissement de l'indice des prix à la consommation a également fléchi au quatrième trimestre.

Toutes les catégories de demande de consommation domestique ont fermement étayé le mouvement expansionniste en 1972, ce qui demeure vrai même si on fait la part de la montée des prix. En termes réels, la demande des consommateurs concernant les biens durables est celle qui a le plus augmenté d'une année à l'autre. Cela s'est produit en dépit d'un ralentissement au troisième trimestre attribuable au premier chef à une chute des ventes de véhicules automobiles. Le ralentissement des dépenses au troisième trimestre pour ce qui est de l'ensemble des biens de consommation a été compensé en partie par la brusque montée des dépenses en services.

Les exportations ont joué un rôle important en 1972. Le volume des exportations de marchandises a augmenté de près de 9 % contre 7 % environ en 1971. Les produits pour lesquels il y a eu d'importants gains sont entre autres les véhicules automobiles et leurs pièces, le pétrole brut, le gaz naturel, le charbon, les sciages, le papier journal. Pour les exportations de papier journal, il s'agissait de la première progression depuis 1969. L'essor de la production d'industries exportatrices comme l'industrie des pièces et accessoires automobiles (avance de 13.3 %), l'industrie automobile (avance de 8.6 %), l'industrie du pétrole brut et du gaz naturel (avance de 16.7 %), les mines de charbon (avance de 39.2 %), l'industrie des pâtes et papiers (avance de 8.1 %, première progression importante depuis 1969) et les scieries et les ateliers de rabotage (avance de 8.8 %) témoignent de la vigueur de la demande extérieure. La progression des exportations a surtout eu lieu au deuxième ou quatrième trimestre de l'année.

Industrial disputes in 1972 cost industry over two and a half times as many man-working days as in 1971. The severest disruption occurred during the second and third quarters. In the second quarter, over 40% of the man-days lost was accounted for by the province-wide strike of Quebec government employees. Other industries primarily involved in 1972 were the mining, manufacturing, construction, transportation and utilities industries. In spite of the record level of man-days lost, there was sufficient underlying strength that the economy recorded substantial growth in 1972.

En 1972, les conflits industriels ont coûté à l'industrie plus de deux fois et demie plus de journées-hommes qu'en 1971. La perturbation la plus grave est survenue au deuxième et au troisième trimestre. Au deuxième trimestre, plus de 40 % des journées-hommes perdues sont imputables à la grève des fonctionnaires québécois dans l'ensemble de la province. Au nombre des autres industries sérieusement affectées par les grèves en 1972, on compte les mines, les industries manufacturières, la construction, les transports et les services publics. Malgré ce niveau record de journées-hommes perdues, la vague expansionniste a été suffisamment forte pour que l'économie croisse sensiblement en 1972.

Table I presents the quarterly growth rates for Canada and the United States.

Au tableau I, on trouvera les taux trimestriels de croissance du Canada et des États-Unis.

One half of the 1972 increase in real domestic product was contributed by manufacturing and trade. Nearly another 40% of the 1972 gain is attributable to finance, insurance and real estate industries; community, business and personal services; and transportation.

Manufacturing output advanced by 6.7% in 1972. The main thrust was provided by durable manufactures, up 7.5%. Major contributors to the 1972 increase in manufacturing activity were the transportation equipment industries, in particular the motor vehicle, truck body and trailer, and motor vehicle parts and accessories manufacturers, pulp and paper (benefitting from the first increase in the volume of exports of newsprint since 1969), electrical products, metal fabricating, and foods and beverages industries.

For the year, total trade increased by 7%, with both wholesale and retail trade recording substantial gains. The substantial rise in the volume of personal expenditures on new passenger cars is reflected in the 10.9% increase in the output of motor vehicle dealers. Growth in the output of motor vehicle dealers was concentrated entirely during the second and fourth quarters. The softness in the demand for consumer goods in the third quarter was responsible for the levelling off of the output of total retail trade in that period. Nevertheless, for the year, retail trade advanced by 6.9%, led by department stores (+11.0%), motor vehicle dealers (+10.9%), variety stores (+11.7%), and furniture, television, radio and appliance stores (+11.0%).

The components of wholesale trade experiencing the fastest growth were the merchants of automotive parts and accessories (+11.1%), other textile and clothing accessories (+8.6%), household electrical appliances (+12.2%), farm machinery (+16.8%), industrial and transportation equipment and supplies (14.0%), and commercial institutional and service equipment and supplies (+8.1%).

Transportation industries as a group grew by 7.6%, led by pipeline transport (+17.2%) and air transport (+15.9% despite the air traffic controllers' strike in the first quarter).

Electric power, gas and water utilities increased by 10.3% over 1971. Within utilities, the sharpest expansion was reported by gas distribution, ahead by 15.4%, followed by electric power, up by 9.7%.

La moitié de la progression du produit intérieur réel en 1972 est venue des industries manufacturières et du commerce. Les finances, les assurances et l'immeuble, les services sociaux, commerciaux, industriels et personnels et les transports sont intervenus pour près de 40 % de cette progression.

La production manufacturière a augmenté de 6.7 % en 1972. La poussée principale a eu lieu chez les fabricants de biens durables, dont la production a connu une avance de 7.5 %. Au nombre des industries qui ont le plus contribué à la progression de 1972 dans le secteur manufacturier, on compte les industries du matériel de transport (et notamment les fabricants de véhicules automobiles, de caisses de camion et de remorques et de pièces et accessoires automobiles), l'industrie des pâtes et papiers (qui a bénéficié de la première augmentation du volume des exportations de papier journal depuis 1969), l'industrie des produits électriques, l'industrie des produits métalliques et l'industrie des aliments et boissons.

Au cours de l'année, la progression pour l'ensemble du commerce a été de 7 % et s'est appuyée sur des gains importants tant dans le commerce de gros que dans le commerce de détail. L'augmentation marquée des dépenses personnelles en voitures de tourisme neuves ressort nettement de la hausse de 10.9 % de la production des marchands de véhicules automobiles, qui a atteint ce niveau en dépit du fait que des gains n'aient été enregistrés qu'au deuxième et au quatrième trimestre. Le manque de vigueur de la demande de biens de consommation au troisième trimestre est responsable du tassement de la production de l'ensemble du commerce de détail pendant cette période. Cependant, pour l'année toute entière, le commerce de détail a progressé de 6.9 %; les magasins à rayons venaient en tête (+11.0 %), suivis des marchands de véhicules automobiles (+10.9 %), des bazars (+11.7 %) et des magasins de meubles, de téléviseurs, de radios et d'appareils électriques (+11.0 %).

Dans le commerce de gros, les avances les plus importantes ont été enregistrées chez les marchands de pièces et d'accessoires automobiles (+11.1 %), d'autres tissus et accessoires d'habillement (+8.6 %), d'appareils électro-ménagers (+12.2 %), de machines agricoles (+16.8 %) et de matériel et de fournitures pour l'industrie et les transports (+14.0 %) et pour les établissements commerciaux, les institutions et les services (+8.1 %).

Le groupe des industries des transports a vu sa production globale s'accroître de 7.6 %. Cette poussée ascendante est venue principalement du transport par pipe-line (+17.2 %) et du transport aérien (+15.9 %) malgré la grève au premier trimestre des contrôleurs du trafic aérien.

La production des services d'électricité, de gaz et d'eau a avancé de 10.3 % par rapport à 1971. L'expansion la plus vive a été enregistrée dans le secteur de la distribution du gaz (avance de 15.4 %) suivi des services d'électricité (avance de 9.7 %).

Major strength in mining was concentrated in the mineral fuels group: output climbed by 18.7% in response to strong export and domestic markets. The growth in mining as a whole was restrained by the sharp decline in the output of iron mines (severely affected by strikes in 1972).

Total construction activity for the year was held in check by a decline in non-residential construction. Residential construction activity eased off in the final quarter of 1972, but was still 6.4% ahead of the 1971 fourth-quarter level. For the year, residential construction was ahead by 8.2%, following an increase of 20.1% in 1971.

The steep decline in agriculture in 1972 reflects lower grain production reinforced by a drop in the quality of the crop.

L'essor principal de l'industrie minière est venu du groupe des combustibles minéraux; la production y a progressé de 18.7% en réponse à la vigueur des marchés extérieur et intérieur. La croissance de la production des mines a été freinée dans son ensemble par la chute accentuée de la production des mines de fer (en proie à d'importantes grèves en 1972).

Par ailleurs, dans le secteur de la construction la progression a été contenue par un fléchissement de la construction non résidentielle. La construction résidentielle a ralenti au quatrième trimestre mais la production pendant cette période a néanmoins progressé de 6.4 % par rapport au trimestre correspondant de 1971. Pour l'année, la construction résidentielle a marqué une progression de 8.2 % par rapport à 1971 où l'avance avait été de 20.1 %.

La chute verticale enregistrée dans le secteur agricole en 1972 est attribuable à une production céréalière moindre et de qualité inférieure.
