BUSINESS FINANCIAL STATISTICS BALANCE SHEETS

Selected Financial Institutions FIRST OUARTER 1963

INTRODUCTION

This is the first issue of a new quarterly publication covering selected financial statistics. This issue contains quarterly balance sheet information for trust companies, mortgage loan companies, sales finance and consumer loan companies. Similar data for other groups of financial institutions and the whole area of non-financial corporations will be added in succeeding issues of this quarterly series as they become available.

The quarterly survey of corporation balance sheets was started in 1961 on the recommendation of an Interdepartmental Committee on Financial Statistics representing several government departments and the Bank of Canada. This Committee found that the lack of up-to-date information on the assets and liabilities of corporations was a serious handicap to those concerned with economic and monetary policies. The growing importance and complexity of the financial transactions of corporations have been in evidence for some time. More complete and up-to-date information from financial institutions and non-financial corporations on the sources and uses of funds is essential in assessing such factors as the distribution and adequacy of funds available at any particular time.

During the next few years the balance sheet data collected in these surveys will fill a major gap in knowledge about this area. Such information will be of substantial value to business firms as well as to government.

The survey covers, or will cover, on a sample basis, all non-financial corporations operating in Canada and financial institutions for which quarterly data are not now available. The cooperation of corporations in this survey has been excellent. However, because of many problems related to obtaining complete lists of the names of corporations, the industrial grouping of these corporations and the inflation of the totals for sample companies into estimates for all corporations, it will be some time before complete results from the survey can be published. In the interim, as stated previously, results for individual industries will be released as the analysis of each is completed.

This publication has been prepared by the Business Finance Division and the Central Research and Development Staff. Acknowledgement is gratefully made to the companies reporting in the survey whose cooperation has made this report possible.

CONTENT OF GROUPS

Trust Companies

This group includes all companies incorporated under the Trust Companies Act of Canada and corresponding provincial Acts. Many of these companies are heavily engaged in mortgage lending as well as in the management of estate trust and agency funds and other financial activities permitted under the Federal and Provincial Trust Company Acts.

The balance sheet data shown for these companies includes both company funds (shareholders equity) and guaranteed funds originating from deposits and the sale of certificates. Estate, trust and agency funds are not included.

Mortgage Loan Companies

This group consists of those companies which raise funds from the public primarily for mortgage lending. It includes all companies incorporated under the Dominion Loan Companies Act, Savings

Certificate Companies and other institutional lenders which fit the above definition, Privately financed mortgage companies are not included. They will be incorporated in one of the other financial groups to be published at a later date.

Sales Finance and Consumer Loan Companies

In general, these companies make loans mostly to persons, for such purposes as the financing or purchase of consumer goods and services of all types and for the consolidation of debt, etc. Sales finance companies make loans mainly to buyers of goods at retail, but also to a lesser extent to business for the financing of goods at the wholesale level and for a variety of other purposes. Consumer loan companies make cash loans to persons on the security of promissory notes with additional security frequently being provided by chattel mortgages. Consumer loan companies include companies operating under the previsions of the Small Loans Act, and affiliated companies engaged in personal loans.

There is a close relationship between sales finance companies and consumer loan companies. Many carry out both activities, while some engage primarily in one and have a wholly-owned subsidiary engaged in the other. Since consolidated returns are received from some of these companies the main table in this report includes both sales finance and consumer loan companies. However, table 4 presents the totals for consumer loan companies not included in consolidated returns of sales finance companies. The companies in this table have about 90 per cent of the receivables of all consumer finance companies.

Sales finance companies which are whollyowned subsidiaries of merchandising and manufacturing companies and finance only the sales of their parent company are not included in these tables. Also excluded are companies primarily engaged in loans to business, such as factoring companies and investment companies and companies lending to home owners for home improvements. Insofar as possible the companies in this group in the Assets survey are the same as those covered in the DBS publication *Credit Statistics*. The footnote to Table 3, and the definition in the text of the item "accounts and notes receivable" show the relationship between this item, as reported in *Credit Statistics* and in this publication.

DEFINITION OF ITEMS

Noted below are items where special problems of interpretation may exist.

A. Trust Companies and Mortgage Loan Companies

Item 3 - Investments

Investments are at book value. Part of these investments will be after deduction of investment reserves since some companies show investments before deduction of investment reserves and other companies show them net of reserves. The understatement of assets due to deduction of reserves will be very small however. Item 3(a-viii), collateral loans, consists largely of call loans and day-to-day loans to investment dealers. Item 3(c), foreign investments, consists largely of short term securities such as United States treasury bills.

Item 11 - Deposits and demand certificates

This item contains those deposits and certificates which can be withdrawn or cashed on demand.

Item 12 – Deposit receipts, guaranteed investment certificates and debentures

This item contains deposits which cannot be withdrawn without a waiting period, and certificates and debentures for which there is an agreement covering a specific period. The certificates and debentures can be for any number of years, with the most common term being from three to five years.

Item 20 - General, investment and special reserves

As stated above under investments, some companies include investment reserves in the reported total of general, investment and special reserves, while others deduct these reserves directly from the appropriate investment category. Although transfers from surplus to reserves may take place at any time there is a tendency for these transfers to be concentrated at the fiscal year-end, which accounts for the increase in this item in the fourth quarter.

Item 30 - Net payables and retained income

A number of companies do not calculate interest receivable and payable quarterly and are not therefore able to report these items, or to report their retained income which is dependent on these calculations. The total of assets, excluding receivables, is therefore obtained, and the balancing item on the liability side is net payables and retained income. Total assets are therefore understated by the amount of receivables, or by about one per cent.

B. Sales Finance and Consumer Loan Companies

Item 2-Accounts and notes receivable

The questionnaire used in the survey requests only the total of accounts and notes receivable. The Dominion Bureau of Statistics publication *Credit Statistics* contains more detail on these receivables and this information is given in the footnote to the table. Item (b) of the footnote, other receivables, is the difference between the receivables reported in the balance sheet survey and the receivables reported in *Credit Statistics*. A small part of this difference is due to the inclusion in consolidated returns of the receivables of subsidiaries engaged in other activities. Primarily however, it is made up of inventory financing, capital loans, other types of non-personal loans and sampling errors.

Item 11 — Total liabilities to parent and associated companies

Several of the larger consumer loan companies are owned by foreign parents or by Canadian incorporated sales finance companies, and an important part of their funds is supplied by loans from these parent companies. Since these loans are intercompany transactions they are eliminated when consolidated reports are filed. This item would therefore be somewhat larger if non-consolidated reports were received from all companies.

Item 12 - Short term loans and notes payable

Demand and short term notes represent an important source of funds to sales finance and consumer loan companies. They are sold, either

directly or through investment dealers, to corporations, governments, foreign buyers and persons with short term funds to invest, and are one of the major money-market instruments.

Item 14(a) - Dealers' credit balance

When an automobile dealer sells customers' paper to sales finance companies, under most agreements the dealer is liable for any default and the sales finance company customarily withholds

part of the purchase price. This item represents the total amount so withheld.

Item 16(a)—Unearned and deferred income and charges

When loans are made it is customary to show under accounts and notes receivable the total which must be repaid, including all interest and other charges. The unearned portion of these charges is included in this item.

QUALITY OF THE ESTIMATES

Because of the relatively small number of trust companies, mortgage loan companies, sales finance companies and consumer loan companies, and the full cooperation received from them in our survey, coverage in terms of assets is over 90 per cent for each of these groups. The estimates for all companies contained here will therefore contain relatively small sampling errors. There may be some errors in individual items due to differences in accounting practices of companies. A complete description of the procedures of estimation used will be given in a later publication.

OTHER SOURCES OF INFORMATION

In addition to published annual reports for many of the companies, there are the following sources of data.

Report of the Superintendent of Insurance for Canada: Loan and Trust Companies (annual)

Report of the Superintendent of Insurance for Canada: Small Loan Companies and Money Lenders (annual)

Report of the Ontario Registrar of Loan and Trust Corporations (annual)

Summary of Financial Statements filed within the office of the Inspector of Trust Companies for the Province of Quebec (annual)

Department of National Revenue Taxation Statistics (annual)

Bank of Canada Statistical Summary (monthly)

Dominion Bureau of Statistics Credit Statistics (monthly)

A wealth of information on these companies is also included in briefs filed with the Royal Commission on Banking and Finance by the Trust Companies Association of Canada, the Federated Council of Sales Finance Companies and the Canadian Consumer Loan Association.

A valuable source of background information is *The Financing of Economic Activity in Canada*, a study prepared by Wm. C. Hood for the Royal Commission on Canada's Economic Prospects.
