ANNUAL REPORT

of

BANK DEBITS TO INDIVIDUAL ACCOUNTS

or

Amount of Cheques Passing Through the Banks

at

Clearing House Centres in Canada 1930

Published by Authority of the Hon. H. H. Stevens, M.P., Minister of Trade and Commerce

OTTAWA

1931

DOMINION SUPERU OF STATISTICS, OTTAWA CENERAL STATISTICS BRANCH

Pominion Statistician:

R. H. Coats, B.A., F.S.S., (Hon.) F.R.S.C.

Chief, General Statistics Branch:

S. A. Cudmore, M.A., F.S.S.

Assistant on Business Statistics:

Sydney B. Smith, M.A.

BANK DEBITS TO INDIVIDUAL ACCOUNTS

or

Amount of Cheques Charged against Bank Accounts at the Clearing House Centres in 1930

Financial transfers in the form of bank debits showed a decline of \$9,179,000,000 or about 20 p.c. in 1930, from the total of the preceding year. The decline was due to moderate activity in business and speculation as well as the lower prices prevailing throughout 1930.

Decreases were general in the clearing centres of the Dominion, with the exception of Moncton, where a gain of 1.5 p.c. was shown. The decline in Montreal was 21.2 p.c., the total in 1930 being \$12,271,000,000, compared with \$15,558,000,000 in the preceding year. Debits in Toronto were \$10,655,000,000, compared with \$13,714,-000,000, a decline of \$3,059,000,000 or 22.4 p.c. The decline in Winnipeg was \$1,077,000,000 or 22.4 p.c., the total for 1930 being \$3,712,000,000 compared with \$4,789,000,000. Debits in Vancouver declined \$553,000,000 or 23.4 p.c., the total in 1930 being \$1,813,000,000 compared with \$2,366,000,000.

Comparison by Economic Areas

The decline in 1930 from the levels of the preceding year was general in each of the economic areas. The percentage decline was less in the Maritime Provinces than in any other area, amounting to 11.2 p.c. The total for 1930 was \$708,000,000 compared with \$798,000,000, a decline of \$89,600,000. The total for the province of Quebec in 1930 was \$13,137,000,000, a decline of 20.4 p.c. from the preceding year. Ontario showed a decline of \$3,499,000,000 or 19.1 p.c. The total in 1930 was \$15,044,000,000 compared with \$18,543,000,000.

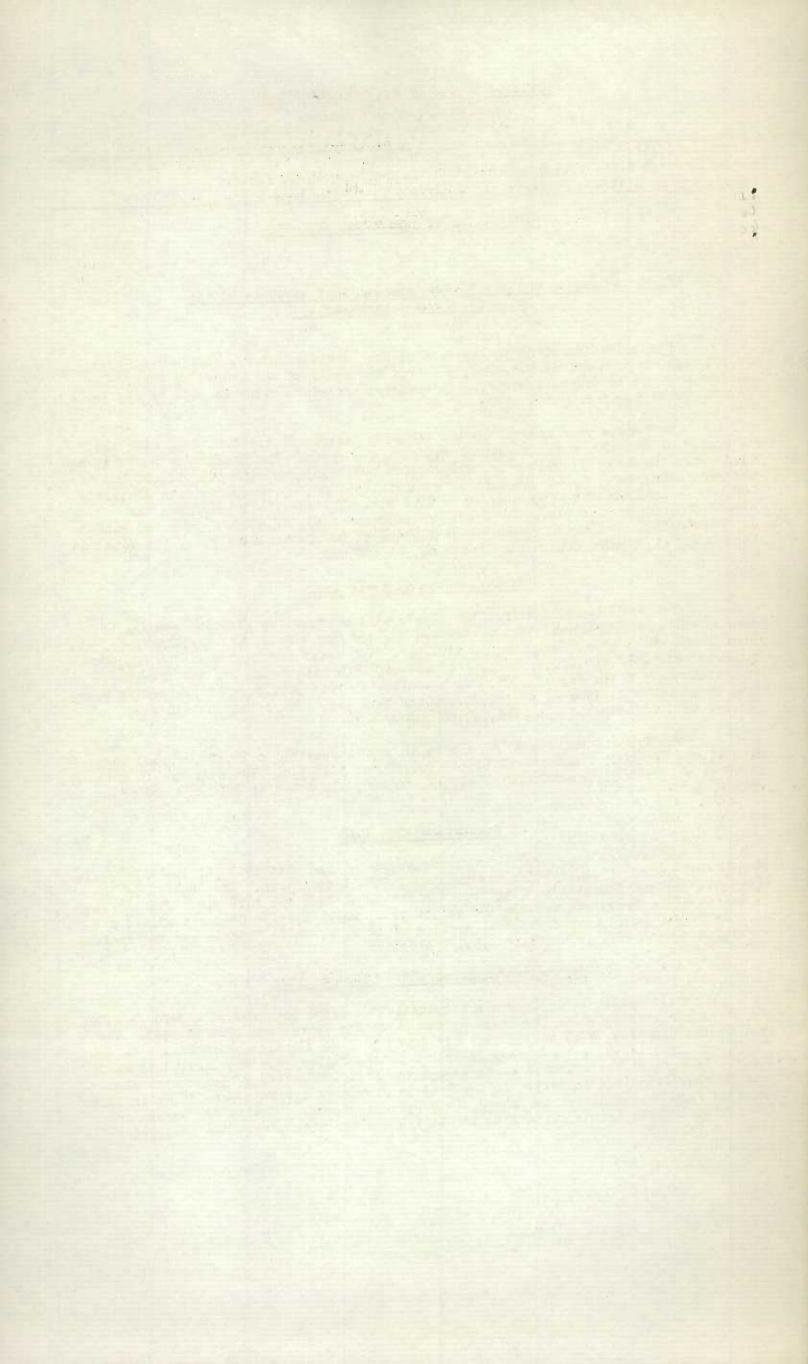

The Prairie Provinces had debits in 1930 amounting to \$6,279,000,000 compared with \$7,923,000,000, a decline of \$1,644,000,000 or 20.8 p.c. The decrease in British Columbia was from \$2,923,000,000 to \$2,322,000,000, amounting to \$600,000,000 or 20.5 p.c.

Comparison with 1928

Comparisons with 1928 were more favourable than with 1929, as the high point during the period of observation was reached in the latter year. The decline in the aggregate for the Dominion in 1930 from the levels of 1928 was 13.8 p.c. The decrease in the Maritime Provinces was limited to 5.0 p.c., while British Columbia showed a decline of 7.0 p.c. Quebec showed a decline of 12 p.c., while Ontario and the Prairie Provinces were down 13.2 and 21.6 p.c., respectively.

Comparison with years from 1924 to 1927

While debits in 1930 showed substantial declines compared with 1928 or 1929, the level was considerably above each of the preceding years from 1924 to 1927. The gain in the Dominion total in 1930 over 1924 was 38 p.c. Continuous increases being shown from 1924 to 1927, the excess in 1930 over the latter year was limited to about 4 p.c. In each of the economic areas except the Prairie Provinces, gains were shown year by year from 1924 to 1929. In the Prairie Provinces declines were shown in 1926 and 1929 from the totals of the immediately preceding years. Totals for Canada and the economic areas from 1924 to 1930 in million dollars with percentage analysis is given in Table 6.

Bank Debits in Branch Banks Outside of Clearing Centres

Statistics of bank debits as published in this bulletin are limited to returns from clearing house centres only. For the purpose of establishing the ratio of the debits in clearing centres to the total amount of debits charged to accounts at all branch banks in Canada in a particular month, a special enquiry was made by the Canadian Bankers' Association in regard to the amount of bank debits charged to accounts at branch banks outside of clearing house centres during January, 1929. It was determined that the total debits outside of clearing house centres were only 14.5 p.c. of the debits in clearing centres. The business done through the passage of cash from hand to hand cannot be estimated with any degree of accuracy.

Relation to Equation of Exchange

Since the national economy is one of money payments, of which say 85 p.c. to 95 p.c. are effected through exchange of cheques, a highly important indication of fluctuations in the total volume of business transactions is afforded by figures for bank debits to individual accounts. While the decline in bank debits in 1930 amounted to nearly 20 p.c., the sum of the demand and notice deposits of the chartered banks averaged only 5.4 p.c. less in 1930 than in 1929. Deposits, since they generally owe their origin to lending and investing operations of the banks, are dependent chiefly on the volume of these operations. Owing to the slack demand for funds, current loans showed marked reduction during 1930, while investments, especially in Dominion Government bonds, showed considerable gain.

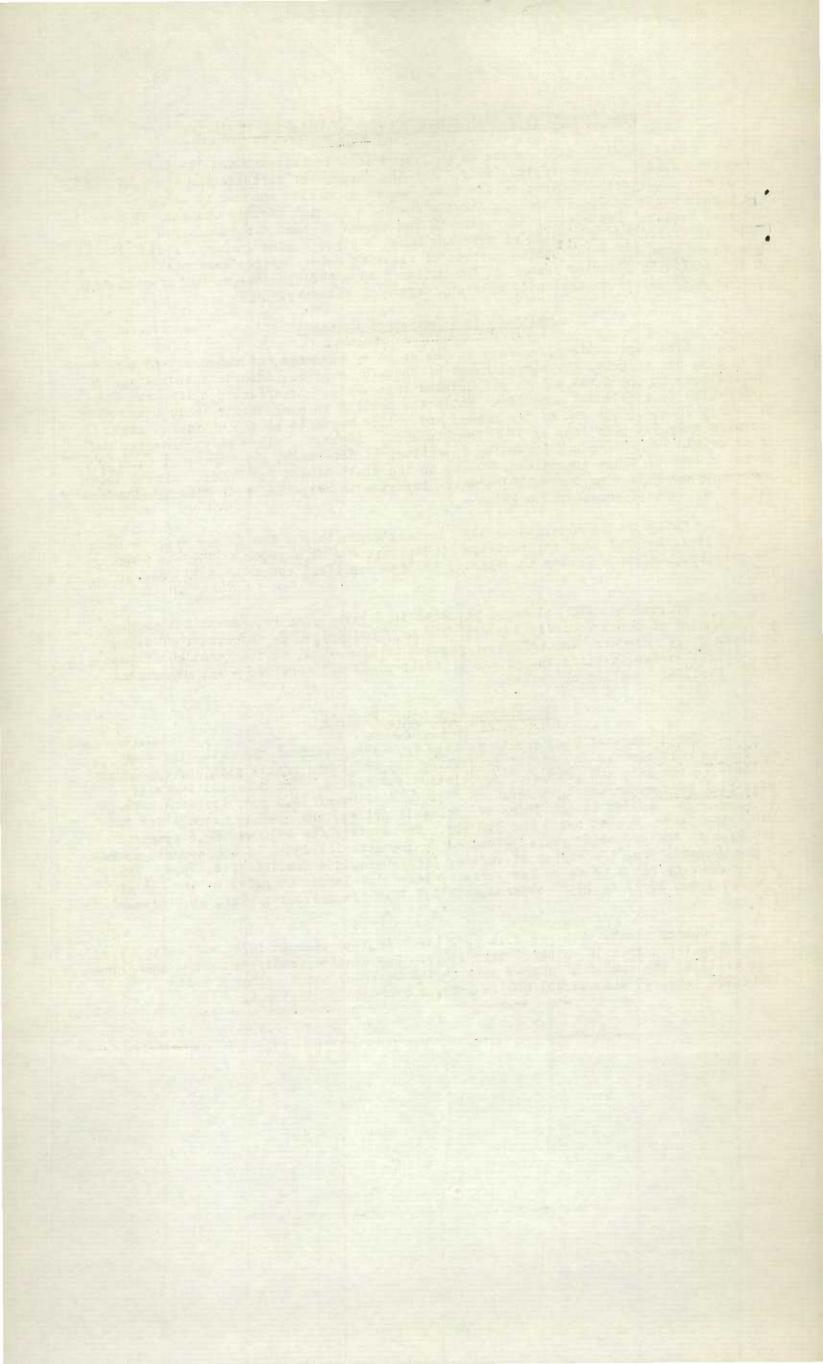

Owing to the moderate decline in bank deposits and the marked drop in bank debits, it is evident that the turnover of deposits was at a reduced level in 1930. The percentage of bank debits to deposits in 1930 was 151.5 compared with 178.0 in 1929.

In general, the volume of payments in a given year represents the product of the amount of money (chiefly deposit currency) multiplied by the number of times it turns over. However, the volume of payment is also equal to the quantity of goods or services exchanged times the prices of these goods and services - the other side of the familiar equation of exchange.

Comparison with Other Factors

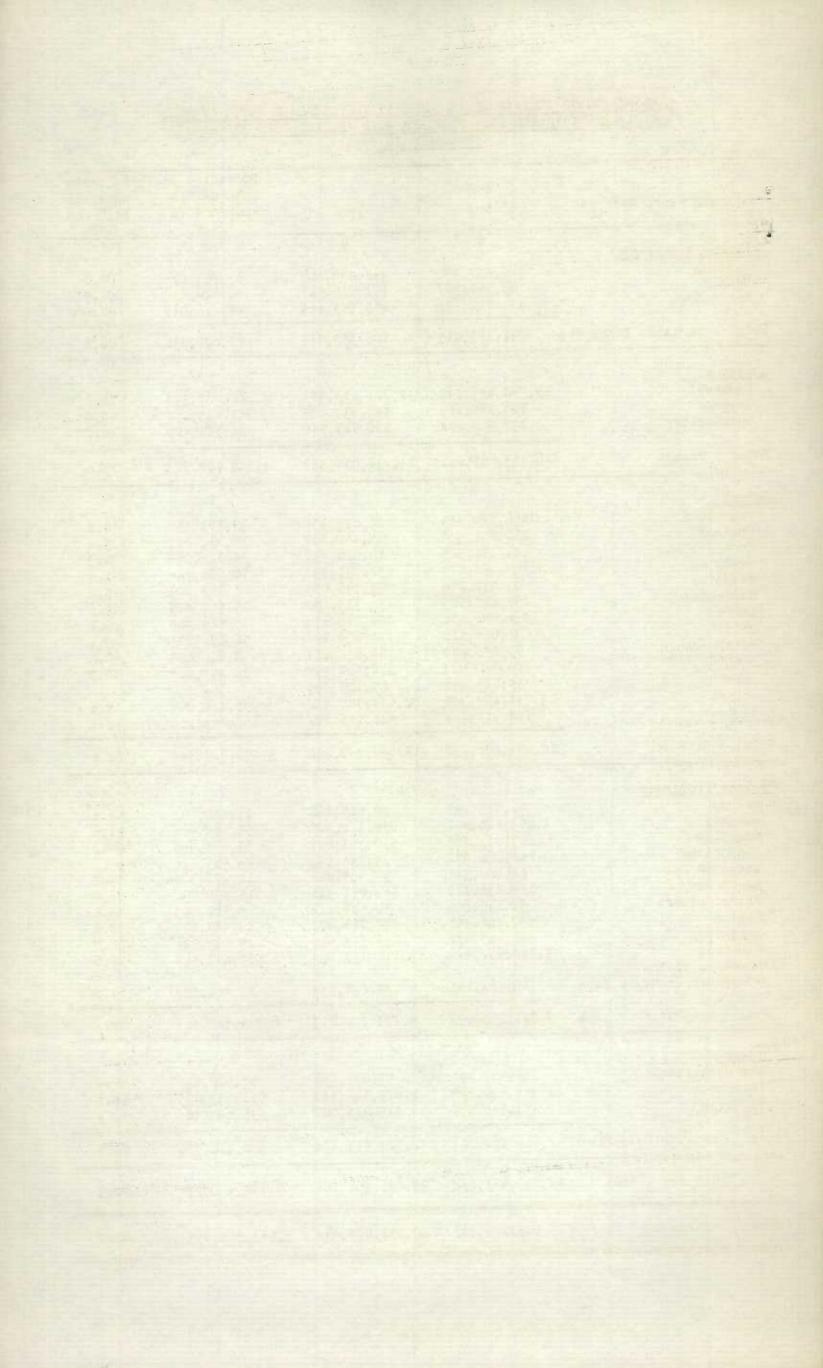

The decline of bank debits in 1930 from the levels of the preceding year was due to reduction in industrial production and wholesale prices with corresponding declines in the sale and prices of speculative securities. The official index of industrial production averaged 164.0 in 1930, a decline of 14.8 p.c. from the average for 1929. The decline in the index of wholesale prices, the monthly average for the year being taken in each case, was 9.2 p.c. The average for 1930 was 86.8 compared with 95.6 in the preceding year. Measured by the official index of employment, as reported by employers, the number of working forces showed a decline of 4.8 p.c. The index number of rates of wages for various classes of labour compiled by the Labour Department was 194.4 in 1930 compared with 192.7 in the preceding year, an increase of 1 p.c.

Common stocks averaged 28.6 p.c. lower in 1930 than in 1929, the official index being 146.2 in 1930 compared with 190.7. Speculative trading showed a sharp decline in 1930, the number of shares sold on the Montreal stock exchange being 11,067,000 compared with 23,203,000 in 1929, a decrease of 52.3 p.c.
