FOREWORD

This report sets out the 1978 capital spending intentions for all sectors of the economy. Comparative figures of preliminary actual expenditures in 1977 and actual expenditures in 1976 are also given. The results are based on a questionnaire survey of individual companies and other spending agencies completed towards the end of 1977 and in January and February 1978. The figures reflect spending plans as formulated at that time.

The estimates cover total outlays for construction and for the acquisition of producers' machinery and equipment by Canadian business, institutions and governments, together with expenditures for housing. All in all, about 24,000 establishments were surveyed for their investment intentions. In order to approximate full coverage, adjustments were made for non-surveyed and for non-reporting firms. In a few areas, where the survey approach is not considered practical, expenditure estimates were arrived at independently on the basis of current trends and expert opinion in these fields (e.g., agriculture and housing).

Information on capital spending intentions provides a useful indication of market conditions both in the economy at large and in particular industries. Since such expenditures account for a large and relatively variable proportion of gross national expenditures, the size and content of the investment program provides significant information about demands to be placed upon the productive capacities of the economy during the period covered by the survey. In addition, information on the relative size of the capital expenditures program planned, both in total and for individual industries, gives an indication of the views management hold on prospective market demands in relation to present productive capacity.

Non-capitalized repair expenditures on structures and machinery and equipment are also given in the report, but these are shown separately. By including these outlays, a more complete picture is provided of all demands likely to be made on labour and materials in accomplishing the program.

AVANT-PROPOS

Nous présentons ici un état des immobilisations projetées dans les divers secteurs de l'économie en 1978 (de même que les dépenses réelles provisoires de 1977 et les dépenses réelles de 1976). La plupart des chiffres sont fondés sur les réponses à un questionnaire adressé aux sociétés particulières et aux autres organismes qui font des immobilisations. Comme les réponses ont été préparées vers la fin de 1977 et en janvier et février 1978, les chiffres représentent les immobilisations projetées à ce moment-là.

Les immobilisations prévues comprennent l'ensemble des sommes que les sociétés commerciales, les institutions et les gouvernements du Canada entendent consacrer à des constructions et à l'acquisition de machines et d'outillage, ainsi que les dépenses visant la construction d'habitations. L'étude a porté sur environ 24,000 entreprises commerciales, mais les totaux ont été ajustés de façon à inclure les immobilisations des sociétés qui n'ont pas répondu, ainsi que des sociétés qui n'ont pas fait partie du relevé. Dans certains secteurs, où la méthode d'enquête n'a pas semblé pratique, les montants ont été calculés séparément d'après la tendance courante et l'opinion de spécialistes en la matière (e.g., agriculture, pêche et habitation).

Ces renseignements sur les projets d'immobilisations fournissent des indications utiles quant à l'état du marché dans l'économie en général et dans certaines industries particulières. Comme ces dépenses représentent une partie importante mais toujours variable des dépenses nationales brutes, l'envergure du programme des investissements et sa répartition entre les différents secteurs donnent une idée de la demande particulièrement aléatoire que les producteurs canadiens auront à satisfaire au cours de la période en cause. De plus, ces renseignements sur l'importance relative des immobilisations projetées dans l'ensemble du pays et dans les industries déterminées permettent de connaître les prévisions des chefs d'entreprises pour ce qui est de la demande en fonction de la capacité actuelle de production.

Le rapport comprend aussi, quoique sous une rubrique distincte, les sommes destinées à la réparation non-capitalisée d'immeubles, de machines et d'outillage. L'inclusion de ces sommes donne une idée plus juste des besoins de main-d'œuvre et de matériaux que représentera l'exécution du programme.

PETER G. KIRKHAM,
Chief Statistician of Canada.

Le statisticien en chef du Canada,
PETER G. KIRKHAM.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- ... figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- ... nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

SECTION I. APPRAISAL OF THE 1978 CAPITAL EXPENDITURES PROGRAM¹

SECTION I. APPRÉCIATION DU PROGRAMME D'IMMOBILISATIONS POUR 1978¹

The total of capital expenditures during 1978 by all sectors of the Canadian economy is estimated at \$48,983 million, 5.4% above the \$46,491 million in 1977 which in turn was 6.5% higher than the \$43,636 million in 1976.

In the components of capital outlays, new construction is expected to reach a total of \$31,913 million for a 5.4% gain over the \$30,270 million in 1977. This increase is below the 7.6% advance in 1977 over the \$28,144 million in 1976. The non-residential portion of the construction program is expected to be \$20,569 million, 6.4% above the \$19,338 million last year, while residential construction is estimated at \$11,344 million for a level 3.8% over the \$10,932 million in 1977. These housing estimates for the current year are based on 230,000 starts projected for 1978 compared with 245,000 starts last year. The other component of total capital expenditures is the acquisition of machinery and equipment which is expected to increase by 5.2%. Totals for machinery and equipment are \$17,070 million for 1978, \$16,221 million in 1977 and \$15,492 million in 1976.

Capital expenditures by the business group are shown at \$30,147 million or 6.3% higher than the \$28,356 million in 1977. Outlays for social capital by institutions and governments are \$7,492 million, 4% above the \$7,203 million in 1977. Both categories thus register a smaller increase in the current year than in 1977 when increases of 8% and 10.3% were recorded over 1976 totals of \$26,252 million for business and \$6,532 million for social capital.

Utilities register the largest expansion for 1978 in the business sector in new installations. The program totalling \$10,768 million is 15% above the \$9,364 million last year due mostly to expenditures for electric power, telephones and telegraphs, and for air and rail transportation. Water transport is the only area to show a notable decrease.

¹ In this publication, statistics contained in Tables 1, 1A, 7, 7C and 7D were released in the Daily on March 15, 1978. At that time, further details were made available on CANSIM, namely Tables 1 to 20, Tables 23 and 24, and a breakdown of the provincial totals into the two categories of private and public investment. The March 15, 1978 release replaced the advance national estimates published in the Daily on February 24, 1978.

Pour tous les secteurs de l'économie canadienne, on estime que les dépenses d'investissement atteindront \$48,983 millions en 1978, soit 5.4 % de plus que le chiffre de \$46,491 millions en 1977, lequel dépassait de 6.5 % le chiffre de \$43,636 millions en 1976.

Dans les secteurs d'investissement, on s'attend à ce que le total des constructions neuves atteigne \$31,913 millions, soit un gain de 5.4 % sur \$30,270 millions investis en 1977. Cette augmentation se situe en-dessous du gain de 7.6 % réalisé en 1977 par des investissements de \$28,144 millions en 1976. On s'attend à ce que les investissements atteignent \$20,569 millions dans le secteur de la construction non résidentielle, soit 6.4 % de plus que \$19,338 millions en 1977, tandis qu'on estime à \$11,344 millions les investissements dans la construction résidentielle, soit 3.8 % de plus que les investissements de \$10,932 millions en 1977. Ces estimations tiennent compte de 230,000 mises en chantier prévues pour 1978 comparativement à 245,000 en 1977. Quant au secteur de l'acquisition de machines et de matériel neufs, on s'attend à une progression de 5.2 %. On prévoit des dépenses de \$17,070 millions en machines et matériels neufs en 1978, comparativement à \$16,221 millions en 1977 et \$15,492 millions en 1976.

Selon les prévisions, les investissements seront de l'ordre de \$30,147 millions dans le secteur des affaires, une hausse de 6.3 % par rapport à des sommes de \$28,356 millions en 1977. Dans le domaine social, les dépenses des institutions et des gouvernements atteindront \$7,492 millions, 4 % de plus que \$7,203 millions en 1977. Ainsi, les deux groupes enregistrent une augmentation plus faible en 1978 qu'en 1977 alors que le secteur des affaires avait augmenté de 8 % à \$26,252 millions sur 1976 et celui du secteur social de 10.3 % à \$6,532 millions.

Dans le secteur des affaires, ce sont les services d'utilité publique qui connaîtront le plus fort accroissement des immobilisations au poste des installations neuves. Le programme, qui devrait atteindre \$10,768 millions, dépasse de 15 % celui de l'année dernière (\$9,364 millions), principalement à cause des dépenses relatives à l'électricité, au téléphone, au télégraphe ainsi qu'aux transports aériens et ferroviaires. Le transport par eau est le seul élément de ce secteur qui laisse prévoir une diminution marquée.

¹ Les statistiques des tableaux 1, 1A, 7, 7C et 7D de cette publication ont paru dans *Le Quotidien* du 15 mars 1978. D'autres données sont alors devenues disponibles dans CANSIM, à savoir les tableaux 1 à 20, 23 et 24 ainsi qu'une répartition des totaux provinciaux entre investissements privés et investissements publics. *Le Quotidien* du 15 mars remplaçait les estimations nationales préliminaires publiées dans celui du 24 février 1978.

The second largest increase in capital outlays is expected for manufacturing where the total of \$6,296 million represents a gain of 4.8% over the \$6,007 million in 1977. In this sector increases are shown for chemicals (which includes the manufacture of heavy-water), primary metals, transportation equipment, food and beverages, metal fabrication, wood products and textiles. In contrast, the level of expenditures is lower for products of petroleum and coal and for non-metallic minerals.

In the remainder of the business sector, the 1978 total of \$3,773 million for mining is \$262 million or 6.5% below the \$4,035 million of capital outlays last year. This decrease was the result of reduced expenditures in the metal mining group and for tar sands development, offset in part by higher outlays for conventional oil and gas wells and for asbestos. In the other parts of the primary industries group, increases are expected for agriculture and fishing (+ 0.9%) and for forestry (+ 4%). Small gains are also shown for trade (+ 2.3%) and for finance (+ 1.4%). The commercial services indicates more strength in 1978 (+ 11.6%) even though the construction of hotels is expected to decrease by 7.5%.

Total non-capitalized repair expenditures for existing structures and machinery are estimated at \$13,663 million in 1978, a level 8.7% higher than the \$12,564 million in 1977. Repairs to structures amount to \$5,953 million, 8.6% above the \$5,482 million last year; repairs to machinery and equipment, at \$7,710 million, are 8.9% higher than the \$7,082 million in 1977. Adding the repair activity to that of capital spending represents total potential construction activity of \$37,866 million, 5.9% above the 1977 level, and a machinery-related program of \$24,780 million that increases by 6.3% over the last year.

The capital expenditures programs in the various provinces and territories are shown as follows in a comparison of 1978 with 1977 in current dollars: Newfoundland, + 16%; New Brunswick + 15%; British Columbia, + 12.2%; Nova Scotia, + 11.5%; Prince Edward Island + 8.5%; Ontario + 4.4%; Quebec + 4.2%; Alberta + 3.4%; Saskatchewan + 2.5%; Yukon and Northwest Territories, + 2.2%. The total for Manitoba decreased by 1.1%.

In the Atlantic Region, the following industry groups show the largest gains in 1978 capital outlays: in Newfoundland – primary industries (+ 62.6%), institutions and governments (+ 17.8%), housing (+ 13.2%), utilities (+ 9.5%); in Prince Edward Island – institutions and governments (+ 19%), trade-finance-commercial (+ 49.2%); in Nova Scotia – institutions and governments (+ 24.5%), primary

Le secteur de la fabrication devrait connaître la deuxième augmentation en importance au chapitre des immobilisations pour atteindre un total de \$6,296 millions, soit 4.8 % de plus qu'en 1977 (\$6,007 millions). Dans ce secteur, les produits chimiques (comprenant l'eau lourde), la première transformation des métaux, le matériel de transport, les aliments et boissons, la transformation des métaux, les produits du bois et les textiles devraient attirer plus d'investissements. Au contraire, les dépenses pour les produits du pétrole et du charbon ainsi que pour les minéraux non métalliques diminueront.

Pour le reste du secteur des affaires, des investissements de \$3,773 millions dans les mines en 1978 seront inférieurs de \$262 millions (6.5%) à ceux de l'an dernier (\$4,035 millions). Ce fléchissement résulte de la baisse des dépenses d'immobilisations dans les mines métalliques et la mise en valeur des sables bitumineux, baisse partiellement compensée par des investissements accrus dans les puits classiques de pétrole et de gaz et les mines d'amiant. Dans d'autres secteurs des industries primaires, des augmentations sont prévues pour l'agriculture et la pêche (0.9%) et les forêts (4%). Le commerce et les finances affichent également de faibles gains, respectivement 2.3 % et 1.4 %. Les services commerciaux devraient démontrer une plus grande vigueur en 1978 (+ 11.6 %), même si l'on prévoit une chute de 7.5 % dans la construction d'hôtels.

On estime à \$13,663 millions les dépenses totales non capitalisées de réparation de constructions et d'équipements pour 1978, ce qui représente une hausse de 8.7 % par rapport à 1977 (\$12,564 millions). Les réparations de constructions atteignent \$5,953 millions, soit 8.6 % de plus que l'an dernier (\$5,482 millions); celles de biens d'équipement (\$7,710 millions) dépassent de 8.9 % le chiffre de 1977 (\$7,082 millions). Si l'on additionne les réparations aux investissements, on obtient en 1978 un total possible de \$37,866 millions dans le secteur de la construction (+ 5.9 %) et des dépenses de \$24,780 millions sur les machines (+ 6.3 %).

Voici une comparaison de la progression réelle des programmes d'investissement dans les divers territoires et provinces en 1978: Terre-neuve, 16 %; Nouveau-Brunswick, 15 %; Colombie-Britannique, 12.2 %; Nouvelle-Écosse, 11.5 %; Île-du-Prince-Édouard, 8.5 %; Ontario, 4.4 %; Québec, 4.2 %; Alberta, 3.4 %; Saskatchewan, 2.5 %; Yukon et Territoires du Nord-Ouest, 2.2%. Les investissements diminuent de 1.1 % au Manitoba.

Dans la région de l'Atlantique, les augmentations les plus fortes en 1978 sont le fait des provinces et des secteurs suivants: Terre-Neuve – industries primaires (62.6%), institutions et administrations publiques (17.8%), habitation (13.2%), services d'utilité publique (9.5%); Île-du-Prince-Édouard – institutions et administrations publiques (19%), commerce, finances et services commerciaux (49.2%); Nouvelle-Écosse – insti-

industries (+ 29.9%), housing (+ 8.6%), manufacturing (+ 17.2%); in New Brunswick — utilities (+ 27.9%), housing (+ 18.3%), institutions and governments (+ 8.8%), manufacturing (+ 16.9%).

The 4.2% increase in expected capital spending in 1978 in Quebec is lower than the 10.2% increase shown for 1977 in large part as a result of conclusion of some project work in the primary industries group in 1977 and a lower rate of spending for housing (- 5%), trade-finance-commercial (- 7%) and for institutions and governments (- 1.6%) projected for 1978. These decreases were more than offset by higher spending in the utilities group (+ 24.5%) and in manufacturing for chemicals (+ 63.7%), products of petroleum and coal (+ 58.4%), paper products (+ 28.5%) and primary metals (+ 23%). It should be noted that the decrease of 7% this year for the trade-finance-commercial group is smaller than the decrease of 24.3% for 1977 which reflected conclusion of work on installation for the 1976 Olympic Games.

In Ontario, the principal gains expected are from a higher rate of housing projected for this year (+ 11.2%), from outlays in utilities (+ 9.9%), and in the trade-finance-commercial group (+ 11.2%). The 3.7% overall decrease for manufacturing reflects lower levels of expenditures for products of petroleum and coal (- 48.2%), paper products (- 32.3%) and chemical products (+ 13.2%). These decreases were partly offset by increases for textiles (+ 51.7%), non-metallic mineral products (+ 44.2%), food and beverages (+ 21.5), transportation equipment (+ 15.8%), and electrical products (+ 14.1%). Reductions in programs were also in evidence for the primary industries group (- 5.1%) and for institutions and governments (- 1.9%).

Capital spending in the Prairie Provinces shows a decline for Manitoba largely because of a reduced programme for utilities (- 21.7%) even with some gains for institutions and governments (+ 16.9%), for housing (+ 7.7%), and for the trade-finance-commercial group (+ 7.3%). In Saskatchewan, the largest increase is for primary industries (+ 9.7%) followed by institutions and governments (+ 9.3%). In contrast, decreases are expected to occur in manufacturing (- 41.6%) and in the trade-finance-commercial group (- 9.8%). The total for Alberta shows a decline for primary industries (- 2.5%), housing (- 4.5%) and for utilities (- 7%). However, those reductions are more than offset by higher levels for manufacturing (+ 37.3%), institutions and governments (+ 20.6%), and for the trade-finance-commercial group (+ 17.9%).

tutions et administrations publiques (24.5 %), industries primaires (29.9 %), habitation (8.6 %), fabrication (17.2 %); Nouveau-Brunswick — services d'utilité publique (27.9 %), habitation (18.3 %), institutions et administrations publiques (8.8 %), fabrication (16.9 %).

La hausse de 4.2 % des investissements prévue pour le Québec en 1978 est inférieure à celle observée en 1977 (10.2 %) en raison surtout de l'achèvement de certains projets des industries primaires en 1977 et d'un ralentissement des dépenses pour l'habitation (- 5%), pour le commerce, les finances et les services commerciaux (- 7%) et pour les institutions et les administrations publiques (- 1.6%). Ce recul a été plus que compensé par la progression des services d'utilité publique (24.5 %), de la fabrication de produits chimiques (63.7 %), des produits du pétrole et du charbon (58.4 %), des produits du papier (28.5 %) et de la première transformation des métaux (23%). Il convient de noter que la baisse de 7 % prévue en 1978 pour le groupe commerce, finances et services commerciaux est inférieure à celle qu'on a observée pour 1977 (24.3 %), laquelle découlait de l'achèvement des installations destinées aux Jeux olympiques de 1976.

En Ontario, les principaux gains seraient imputables au secteur de l'habitation (11.2 %), aux services d'utilité publique (9.9 %) et au groupe commerce, finances et services commerciaux (11.2 %). Le fléchissement global de 3.7 % dans le domaine de la fabrication traduit une diminution des dépenses pour les produits du pétrole et du charbon (- 48.2 %), les produits du papier (- 32.3 %) et les produits chimiques (- 13.2 %). Ces baisses ont été atténuées par des gains dans les textiles (51.7 %), les produits minéraux non métalliques (44.2 %), les aliments et boissons (21.5 %), le matériel de transport (15.8 %) et les produits électriques (14.1 %). On constatait également une réduction des programmes d'investissement dans les industries primaires (- 5.1%) ainsi que dans les institutions et les administrations publiques (- 1.9 %).

Dans les provinces des Prairies, on prévoit une chute des investissements au Manitoba, imputable principalement à une coupure au chapitre des services d'utilité publique (- 21.7%), en dépit de certaines augmentations dans le secteur des institutions et des administrations publiques (16.9%), celui de l'habitation (7.7%) et dans celui du groupe commerce, finances et des services commerciaux (7.3%). En Saskatchewan, les industries primaires connaîtront la plus forte augmentation (9.7%), suivies des institutions et des administrations publiques (9.3%). On prévoit, en revanche, un recul dans le secteur de la fabrication (- 41.6%) et dans celui du commerce, des finances et des services commerciaux (- 9.8%). En Alberta, il faut s'attendre à une baisse dans les industries primaires (- 2.5%), l'habitation (- 4.5%) et les services d'utilité publique (- 7%). Toutefois, ces pertes sont plus que compensées par l'augmentation des investissements dans la fabrication (37.3%), les institutions et les administrations publiques (20.6%) et le groupe commerce, finances et services commerciaux (17.9%).

In British Columbia, most sectors show increases except institutions and governments which are down by 1.2%. The increases are as follows: utilities (+ 42%), primary industries (+ 10.1%), housing (+ 5.3%), trade-finance-commercial (+ 3.6%) and manufacturing (+ 0.6%). Gains in the Yukon and Northwest Territories are largely in utilities and in the trade-finance-commercial group with some decline shown for primary industries.

Tous les secteurs de la Colombie-Britannique sont en hausse, à l'exception de celui des institutions et des administrations publiques, en baisse de 1.2 %. Les augmentations sont les suivantes: services d'utilité publique (42 %), industries primaires (10.1 %), habitation (5.3 %), commerce, finances et services commerciaux (3.6 %) et fabrication (0.6 %). Au Yukon et dans les Territoires du Nord-Ouest, ce sont surtout les services d'utilité publique et le secteur du commerce, des finances et des services commerciaux qui progressent, tandis que les industries primaires font voir une certaine baisse.

SECTION III. PROVINCES AND TERRITORIES

SECTION III. PROVINCES ET TERRITOIRES

Capital and Repair Expenditures by Provinces and Territories

(See Tables 7 - 20 following)

The expenditures shown for each province or territory represent the value of construction work put in place and the value of machinery and equipment acquired for use within the province or territory. Such expenditures represent gross additions to the capital stock of the province or territory, and are a reflection of economic activity in that area. However, the actual production of these assets may generate its major employment and income giving effects in other regions. For example, the spending of millions of dollars on plants and equipment in Western Canada may generate considerable activity in machinery industries in Ontario and Quebec as well as construction activity in the Western Provinces.

It should be appreciated that there are statistical difficulties in making a precise geographic allocation of past or anticipated investment since many business firms operating in several provinces do not either record or plan their capital expenditures geographically. As a result, it has been necessary to use approximate breakdowns in many cases. Such is the case for investment in railway rolling stock, ships, aircraft and certain other items.

The degree of detail provided is dependent to some extent on the validity of methods used to obtain provincial estimates and also on limitations imposed by the Statistics Act. These restrictions have particular relevance in the case of smaller provinces or territories.

Private and Public Breakdowns

(See Tables 7 C and 7 D following)

Capital and repair expenditures for the provinces and for the territories are divided into the Private (non-government) and Public (government) categories in Tables 7 C and 7 D.

Additional data, similar to Canada Table 23 along with government department figures for the three levels of government, are also available on the CANSIM data bank. These statistics can be retrieved from the appropriate provincial or territorial matrix back to 1963.

Immobilisations et réparations par province et territoires

(Voir les tableaux 7 à 20 qui suivent)

Les montants indiqués pour chacune des provinces ou territoires représentent la valeur des travaux de construction qui y seront entrepris et celle des machines et du matériel achetés pour y être utilisés. Ces sommes constituent des additions brutes aux capitaux de la province ou territoire et donnent des indications de l'activité économique de la région. Cependant, la production effective des biens en cause peut exercer son influence du point de vue de la création d'emplois et de revenu dans d'autres régions. Ainsi, la dépense de millions de dollars en installations et équipement industriels dans l'Ouest canadien peut déterminer une grande activité dans les industries des machines en Ontario et au Québec et dans la construction dans les provinces de l'Ouest.

On éprouve, dans certains cas, des difficultés d'ordre statistique à déterminer à quel endroit s'applique tel ou tel investissement. En effet, un grand nombre d'entreprises commerciales qui font affaires dans plusieurs provinces n'établissent pas leurs plans ou leurs comptes d'immobilisations sur une base géographique. Il a donc fallu dans ces circonstances se contenter d'une répartition approximative. Ce fut le cas notamment pour les achats de matériel roulant de chemins de fer, de navires, d'avions et d'autres biens analogues.

Les détails fournis dépendent, dans une certaine mesure, de la validité des méthodes employées pour obtenir des estimations d'ordre provincial et des restrictions imposées par la Loi sur la statistique. Ces restrictions ont été particulièrement importantes dans le cas des provinces ou territoires les moins peuplés.

Répartitions privées et publiques

(Voir les tableaux 7 C et 7 D qui suivent)

La répartition entre la catégorie privée et la catégorie publique des dépenses d'immobilisations et de réparations pour les provinces et les territoires se retrouve aux tableaux 7 C et 7 D.

Des données supplémentaires, semblables à celles du tableau 23 (Canada), plus la ventilation des dépenses ministérielles par palier de gouvernement, sont disponibles sur la banque de données CANSIM. On peut extraire ces statistiques des matrices provinciales et territoriales appropriées, à partir de 1963.

SECTION IV. SUPPLEMENTARY

SECTION IV. SUPPLÉMENTAIRES

Current and Constant Dollars (See Table 21 following)

Constant dollars are derived by applying deflators for the major groups of structures for construction and selected weighted deflators for the machinery and equipment component of capital expenditures.

Business and Social Capital (See Table 22 following)

This table is a regrouping of the various SIC industries included in Tables 1 - 6 into the categories of 'Business capital' and of 'Social capital'. A supplementary sheet identifying the individual industries included in each item is available on request from the Construction Division, Statistics Canada, Ottawa, K1A 0T6 (613-994-9546).

Private and Public (See Tables 23 and 24 following)

These tables divide the total capital and repair expenditures for Canada into Private (non-government) and Public (government) categories.

The Public category includes government enterprises for municipal, provincial and federal governments, municipal hospitals and schools, provincial hospitals, schools and universities, and federal government housing, and government department expenditures for the three levels.

Public enterprises cover, in general, government owned establishments whose principal source of revenue is derived from the provision of goods and services to the public.

The total for federal government departments includes data for departmental crown corporations and excludes data for proprietary crown corporations which are all classed as enterprises. Agency crown corporations, on the other hand, are provisionally classified in part to enterprises and the remainder to government departments.

Dollars courants et constants (Voir le tableau 21 qui suit)

Les estimations en dollars constants s'obtiennent par dégonflement pour les principaux groupes de structures pour ce qui est de la construction, et par une pondération sélective de déflation pour les composantes machinerie et outillage de ces investissements.

Investissements commerciaux et services sociaux (Voir le tableau 22 qui suit)

Ce tableau rassemble les industries de la CDAÉ, comprises dans les tableaux 1 à 6, en deux catégories: investissements commerciaux et services sociaux. On peut se procurer un feuillet supplémentaire identifiant pour chaque item les industries composantes en s'adressant à la Division de la construction, Statistique Canada, Ottawa, K1A 0T6 (613-994-9546).

Investissements privés et publics (Voir les tableaux 23 et 24 qui suivent)

Ces tableaux divisent les dépenses totales d'immobilisations et de réparations pour le Canada en deux catégories: privée (non-gouvernementale) et publique (gouvernementale).

La catégorie publique comprend les entreprises des gouvernements municipaux, provinciaux et fédéral; les écoles, les universités et les hôpitaux provinciaux; les écoles et les hôpitaux municipaux; les habitations du gouvernement fédéral; et les dépenses aux trois niveaux de gouvernement.

Entreprises publiques comprend, en général, les entreprises qui tirent la majeure partie de leur revenu de la fourniture de biens et de services au public.

Les totaux pour les ministères du gouvernement fédéral comprennent les chiffres pour les corporations de département mais excluent les chiffres pour les corporations de propriétaire, ces dernières étant considérées comme entreprises publiques. D'autre part, les corporations de mandataire sont pour le moment classées en partie avec les entreprises publiques et en partie avec les ministères gouvernementaux.

Comparison of 1976 Actual

with Intentions

(See Table 25 following)

In considering the accuracy of investment intentions, two separate factors should be kept in mind. First, it is necessary to consider the extent to which investment plans are formulated in advance. Second, consideration ought to be given to the comparison of anticipated investment expenditures with the actual investment statistics once they are available for the period in question.

For the first point, it should be noted that it is not always easy to obtain reliable data on the future plans of business firms. Some firms do not decide upon their complete investment program at the beginning of the year and are unable to state their intentions precisely. Generally however, new investment expenditures, particularly those on structures and large installations, need previous planning and preparation and most firms are able to give a good estimate of expected outlays. In addition the seasonal character of construction in Canada frequently means that early decisions must be made regarding capital spending plans for the year ahead.

When comparing intentions with actuals, it should be kept in mind that the figures given represent the capital expenditures intentions of businessmen and others at the time the surveys are made. These intentions may change for a variety of reasons as the year progresses. Changes in the general business outlook may make it desirable to either modify or expand investment spending, changing price trends may result in revision of cost estimates, and shortages of materials or labour, unfavourable weather or labour disputes may retard progress on projects. In addition, individual businesses have different planning periods and in some cases plans are kept flexible as a matter of policy.

Table 25 provides a comparison of the 1976 expenditure intentions in January 1976, the revised expenditure intentions in June 1976, the preliminary estimate of realizations in January 1977 and the final expenditures for 1976 collected in 1977.

Coverage of the 1977-78 Survey

(See Table 26 following)

Estimates for most of the sectors covered in this report are based on questionnaire surveys. The percent coverage in each sector or industry is calculated by expressing expenditures of reporting firms as a percentage of published expenditures. Those groups for which

Etat comparatif des projets et des dépenses réelles de 1976

(Voir le tableau 25 qui suit)

Pour déterminer à quel point les projets d'investissement correspondent à la réalité, il faut tenir compte de la mesure dans laquelle les investissements sont projetés d'avance et la mesure dans laquelle, lorsque la statistique de la période en cause est connue, les résultats se comparent aux intentions du début.

Pour ce qui est du premier point, il faut noter qu'il n'est pas toujours facile d'obtenir des données réellement valables au sujet des projets des entreprises commerciales. Certaines n'établissent pas au début de l'année un programme entier d'immobilisations et sont donc incapables d'indiquer leurs intentions avec précision. Toutefois, les nouvelles immobilisations, notamment celles qui visent des constructions et de grandes installations, nécessitent en général des plans et une assez longue préparation, de sorte que la plupart des entreprises peuvent donner une idée assez exacte de leurs dépenses prévues. En outre, à cause du caractère saisonnier de la construction au Canada, il est souvent nécessaire d'arrêter assez tôt le programme d'immobilisations pour l'année à venir.

Quant au rapport entre les prévisions et les dépenses réelles, il faut bien se rappeler que les chiffres donnés représentent les projets d'investissement des hommes d'affaires et autres au moment du relevé. Ces projets peuvent changer au cours de l'année pour diverses raisons. L'évolution des perspectives générales de commerce peut nécessiter certaines modifications ou même des additions à ces projets; des hausses ou des baisses de prix peuvent exiger un nouveau calcul du coût de l'entreprise, ou une rareté de matériaux et de main-d'oeuvre ou encore les mauvais temps peuvent retarder les travaux. En outre, les entreprises particulières établissent leurs plans à des périodes différentes et certaines tiennent par principe à se réservier une certaine latitude.

Le tableau 25 présente un état comparatif des dépenses de 1976 projetées en janvier 1976, des projets des dépenses révisés en juin 1976, des réalisations estimatives en janvier 1977 et des dépenses réelles pour 1976 recueillies en 1977.

Envergure du relevé de 1977-78

(Voir le tableau 26 qui suit)

Pour la plupart des secteurs visés par le présent rapport, les chiffres sont fondés sur les réponses à un questionnaire circulaire. L'envergure du relevé est calculée d'après le pourcentage des projets déclarés par les entreprises en cause, par rapport au total des investissements.

independent estimates were made are listed in the table with a dash in the percent column.

The estimates of total outlays in the groups covered by survey are thought to be of better quality than the independent estimates which are based on much less complete information.

Comparison of Private and Public Investment with "Gross Fixed Capital Formation" as Recorded in the National Income and Expenditure Accounts

(See Table 27 following)

New investment as shown in this report includes all capital outlays of private organizations and governmental agencies acquiring durable physical assets. The totals do not, however, correspond exactly with the details published for gross fixed capital formation in the National Income and Expenditure Accounts because of further adjustments made for the purposes of the national accounting system. The effect and nature of these further additions is reflected in the classification groupings shown in Table 27 and the explanatory footnotes. The comparison is made for 1975 actual data only. Subsequent years are not included because of a difference in timing of revisions in the National Income and Expenditure Accounts and Private and Public Investment.

Capital and Repair Expenditures by Metropolitan Areas – Manufacturing

(See Tables 28-31 following)

The expenditures are shown for fifteen of the largest metropolitan areas of Canada for manufacturing only. Capital and repair expenditures are not available for all other sectors (e.g., utilities, trade, etc.) which are surveyed only at the provincial or territorial level. Statistics for some individual manufacturing industries are also provided for Montréal, Toronto and Vancouver.

The degree of detail released for manufacturing by metropolitan areas is limited because of the confidentiality clauses of the Statistics Act.

publiés. Les groupes qui ont été l'objet de calculs de la part de tierces personnes sont mentionnés au tableau, mais aucun pourcentage n'est donné dans leur cas.

Dans le cas des groupes atteints par le relevé, les estimations semblent plus sûres que pour les groupes ayant été estimés par des tiers d'après des renseignements beaucoup moins complets.

Rapprochement des investissements privés et publics et de la "formation brute de capital fixe" figurant dans les comptes nationaux du revenu et des dépenses

(Voir le tableau 27 qui suit)

Les nouveaux investissements qui figurent dans le présent rapport comprennent tous les capitaux consacrés par le secteur privé et les pouvoirs publics à l'acquisition de biens tangibles et durables. Par contre, le total ne correspond pas exactement aux chiffres détaillés que publient les comptes nationaux du revenu et des dépenses au titre de la formation brute de capital fixe; en effet pour les besoins de la comptabilité nationale, il a fallu procéder à des ajustements supplémentaires. L'effet, ainsi que la nature de ces additions, font l'objet d'une ventilation conforme au classement adopté pour le tableau 27 et aux renvois explicatifs. Le rapprochement est fait seulement pour les chiffres réels de 1975. On n'a pu inclure les années ultérieures à cause d'une discordance dans les dates pour les révisions des comptes nationaux du revenu et des dépenses et des investissements privés et publics.

Immobilisations et réparations par région métropolitaine – Industries manufacturières

(Voir les tableaux 28-31 qui suivent)

Pour quinze des plus grandes régions métropolitaines du Canada, nous ne publions que les dépenses du secteur manufacturier. Les dépenses d'immobilisations et de réparations ne sont pas disponibles pour tous les autres secteurs (e.g., services d'utilité publique, commerce, etc.) qui ne sont relevés qu'au niveau de la province ou du territoire. Les statistiques de certaines industries manufacturières en particulier sont fournies pour Montréal, Toronto et Vancouver.

Les détails fournis sur le secteur de la fabrication par région métropolitaine sont limités par les clauses de la Loi sur la statistique relative au caractère confidentiel des chiffres recueillis.

TABLE 27. Comparison with Totals in National Income and Expenditure Accounts for 1975
TABLEAU 27. Rapprochement des totaux avec les comptes nationaux du revenu et des dépenses pour 1975

| Canada | Construction | Machinery and equipment Machines et outillages | Total |
|--|--------------|---|--------|
| millions of dollars — millions de dollars | | | |
| Agriculture, fishing, forestry — Agriculture, pêche et forêts | 571 | 2,073 | 2,644 |
| Mining, quarrying and oil wells — Mines, carrières et puits de pétrole | 1,968 | 644 | 2,612 |
| Construction industry — Industrie de la construction | 80 | 488 | 568 |
| Manufacturing — Fabrication | 1,568 | 3,953 | 5,521 |
| Utilities — Services d'utilité publique | 4,403 | 3,630 | 8,033 |
| Trade, finance and commercial services — Commerce, finances et services commerciaux | 2,768 | 2,448 | 5,216 |
| Institutions | 1,191 | 293 | 1,484 |
| Government departments — Ministères gouvernementaux | 4,392 | 633 | 5,025 |
| Housing — Habitation | 7,114 | — | 7,114 |
| Total in private and public investment in Canada — Total des investissements privés et publics au Canada | 24,055 | 14,162 | 38,217 |
| Adjustments for National Income and Expenditure Accounts(27) — Ajustements nécessités par la comptabilité nationale(27) | 2,343 | 440 | 1,903 |
| Total according to definitions for the National Income and Expenditure Accounts — Total d'après les définitions des comptes nationaux du revenu et des dépenses | 26,398 | 13,732 | 40,120 |
| Allocation of this total by industry in terms of the National Income and Expenditure Accounts — Ventilation du total précédent par industrie, selon les comptes nationaux du revenu et des dépenses: | | | |
| Business gross fixed capital formation(28) — Formation brute de capital fixe par les entreprises(28) | 20,999 | 12,798 | 33,797 |
| Agriculture, fishing, forestry — Agriculture, pêche et forêts | 571 | 2,028 | 2,599 |
| Mining, quarrying and oil wells — Mines, carrières et puits de pétrole | 1,946 | 617 | 2,563 |
| Construction industry — Industrie de la construction | 80 | 488 | 568 |
| Manufacturing — Fabrication | 1,504 | 3,728 | 5,232 |
| Utilities — Services d'utilité publique | 4,403 | 3,499 | 7,902 |
| Trade, finance and commercial services — Commerce, finances et service commerciaux | 2,956 | 2,361 | 5,317 |
| Institutions | 231 | 77 | 308 |
| Housing — Habitation | 9,308 | — | 9,308 |
| Government gross fixed capital formation(29) — Formation brute de capital fixe par les pouvoirs publics(29) | 5,399 | 924 | 6,323 |
| Institutions | 960 | 216 | 1,176 |
| Government departments — Ministères gouvernementaux | 4,414 | 708 | 5,122 |
| Housing — Habitation | 25 | — | 25 |

See footnote(s) at end of tables. — Voir note(s) à la fin des tableaux.

Note: The comparison is for 1975 actual data. For an explanation see the text for Section IV.

Nota: La comparaison est pour les chiffres réels 1975. Pour une explication, voir le texte de la Section IV.

FOOTNOTES

¹ The capital expenditures on construction for mining include outlays for on-property exploration and development for mines and exploratory and development drilling for petroleum and gas but exclude outside or general exploration for mines and geological and geophysical expenditures for petroleum and gas.

² Also includes capital and repair expenditures by both metal and non-metal exploration companies.

³ Includes coal mines, gypsum, salt, potash and miscellaneous non-metal mines, and quarrying.

⁴ Also includes expenditures on facilities related to petroleum and gas wells and extraction of petroleum from shales or sands, natural gas processing plants and contract drilling for petroleum and gas.

⁵ Also includes expenditures for heavy water plants.

⁶ The S.I.C. for broadcasting also includes community antenna television and satellite communication systems.

⁷ Includes toll highways and bridges, warehousing, water systems of private and provincial enterprises and other utilities.

⁸ See footnote 9.

⁹ The largest part of this item in accordance with the S.I.C. is accounted for by expenditures of real estate companies engaged in developing, owning and leasing properties. The total represents all types of non-residential construction including factories and multi-purpose developments where facilities are provided for theatres, stores, hotel accommodation, etc.

¹⁰ Includes acquisition of machinery and equipment for lease and all other services not already shown in this table.

¹¹ The total for federal government departments includes data for departmental crown corporations and excludes data for proprietary crown corporations which are all classified as enterprises. Agency crown corporations, on the other hand, are provisionally classified in part to enterprises and the remainder to government departments.

¹² Estimates for government departments are meant to reflect the capital outlays likely to be achieved and therefore could differ from other series representing stated intentions of capital spending.

¹³ Capital expenditures on machinery and equipment include an estimate for "capital items charged to operating expenses", in the manufacturing, utilities and trade totals.

¹⁴ For further information regarding the private and public breakdowns, see the texts beginning Section III, Provinces and Territories and Section IV, Supplementary.

¹⁵ The percentage is calculated by dividing "Gross Fixed Capital Formation", as defined by the National Income and Expenditure Accounts, by the total "Gross National Expenditure".

¹⁶ These categories cover, in general, government owned establishments whose principal source of revenue is derived from the provision of goods and services to the public.

¹⁷ These categories include provincial hospitals, schools and universities, municipal hospitals and schools and federal government housing.

¹⁸ This category includes provincial hospitals, schools and universities.

¹⁹ This category includes municipal hospitals and schools.

NOTES

¹ Les dépenses d'immobilisations en construction pour les mines incluent les dépenses des travaux d'exploration et de mise en valeur à la mine ou au chantier de même que les dépenses pour les sondages d'exploration et de mise en valeur des puits de pétrole et de gaz; toutefois elles excluent les dépenses pour les travaux d'exploration de nature générale ou hors-chantier pour les mines et celles des études géologiques et géophysiques pour ce qui est des puits de pétrole et de gaz.

² Comprend également les dépenses en immobilisation et en réparation des compagnies d'exploration de minéraux métalliques et non métalliques.

³ Comprend les mines de charbon, de gypse, de sel gemme, de potasse et de produits non métalliques divers, et de produits de carrières.

⁴ Comprend aussi les dépenses d'installations se rattachant aux puits de pétrole et de gaz et à l'extraction de pétrole des schistes ou des sables, aux usines de traitement du gaz naturel et aux entreprises de forage de puits de pétrole et de gaz à forfait.

⁵ De même, comprend les dépenses encourues par les usines d'eau lourde.

⁶ La CDAÉ inclut avec radiodiffusion et télévision, les services de télévision à antenne collective et les systèmes de communication par satellite.

⁷ Y comprend les routes et les ponts à péage, l'entreposage, les services de distribution et de traitement d'eau d'entreprises privées et provinciales, ainsi que les autres services d'utilité publique.

⁸ Voir note 9.

⁹ Selon la CDAÉ, la majeure partie de cette catégorie de dépenses est effectuée par les sociétés dont l'activité consiste à construire, posséder et louer des biens immobiliers. Ce chef représente tous genres de construction non-résidentielle, comme des usines et des projets devant servir à plusieurs fins, tel que les bâtiments qui comprennent: théâtres, magasins, hôtels, etc.

¹⁰ Comprend l'acquisition de machines et d'équipement à des fins de location et tous les autres services qui n'apparaissent pas séparément dans ce tableau.

¹¹ Les totaux pour les ministères du gouvernement fédéral comprennent les chiffres pour les corporations de département mais excluent les chiffres pour les corporations de propriétaire, ces dernières étant considérées comme entreprises publiques. D'autre part, les corporations de mandataire sont pour le moment classées en partie avec les entreprises publiques et en partie avec les ministères gouvernementaux.

¹² Les évaluations des dépenses pour les ministères gouvernementaux sont basées sur les réalisations prévues. Par le fait même, la présente série pourrait différer d'autres statistiques se rapportant qu'aux prévisions.

¹³ Les dépenses en immobilisation pour les machines et l'outillage comprennent une estimation pour les "Biens-capitaux imputés sur les dépenses d'exploitation" dans les totaux pour le secteur de fabrication, le secteur des services d'utilité et le secteur du commerce.

¹⁴ Pour plus d'information sur la répartition privée et publique des investissements, voir les textes au début de la section III, provinces et territoires et section IV, supplémentaires.

¹⁵ Le pourcentage est calculé en divisant la "Formation brute de capital fixe" par les "Dépenses nationales brutes" tels qu'exprimés par les comptes nationaux du revenu et des dépenses.

¹⁶ Ces catégories comprennent, en général, les entreprises publiques qui tirent la majeure partie de leur revenu de la fourniture de biens et de services au public.

¹⁷ Ces catégories comprennent les écoles, les universités et les hôpitaux provinciaux; les écoles et les hôpitaux municipaux, les habitations du gouvernement fédéral.

¹⁸ Cette catégorie comprend les écoles, les universités et les hôpitaux provinciaux.

¹⁹ Cette catégorie comprend les écoles et les hôpitaux municipaux.

FOOTNOTES – Concluded

20 Firms reporting in the mid-year survey were not asked to re-examine repair expenditures. Mid-Year estimates are therefore a repeat of figures reported at the beginning of the year.

21 Not revised at mid-year.

22 Coverage is calculated by expressing expenditures of reporting firms as a percentage of published expenditures.

23 The capital expenditures, allocated to capital items charged to operating expense are not included in the calculation of the coverage.

24 This group comprises several categories of commercial services not covered by direct surveys.

25 Coverage for residential housing is calculated by expressing public and privately initiated housing covered by survey as a percentage of estimated completions.

26 Independent estimates were made of expenditures in these groups.

27 These adjustments comprise deductions for defense construction, net sales of used motor vehicles, scrap and salvage and an addition for transfer costs of land and existing buildings.

28 Also includes government business enterprises but not the portion of their capital expenditures considered to be part of government (direct) gross fixed capital formation.

29 Includes government built non-rental housing, expenditures for public hospitals, provincial and municipal schools, outlays made directly by government departments and the portion of capital expenditures of crown corporations classified to this category.

30 Beginning in 1976, expenditures for the construction industry are projected from benchmark data derived from annual censuses of the construction industry.

31 Combination food stores and other chain stores were previously combined as chain stores.

32 Beginning with the 1976 actual, housing expenditures have been adjusted upwards to include additional home improvements such as re-insulation, landscaping and other alterations.

NOTES – *fin*

20 À l'occasion du relevé de la mi-année, les entreprises n'ont pas été invitées à revoir leurs projets de réparations. Les chiffres de la mi-année sont donc les mêmes que ceux du début de l'année.

21 N'a pas été révisée à la mi-année.

22 L'envergure du relevé est calculée d'après le pourcentage que les projets déclarés par les entreprises en cause représente par rapport au total des investissements publiés.

23 Les dépenses d'immobilisations allouées à l'item "Biens capitaux imputés sur les dépenses d'exploitation" ne sont pas comprises dans le calcul de la couverture.

24 Ce groupe comprend plusieurs catégories de services commerciaux qui n'ont pas fait l'objet d'enquêtes directes.

25 Dans le secteur de l'habitation, l'envergure du relevé a été établie d'après le pourcentage que les projets publics et privés déclarés représentent par rapport au total prévu des maisons achevées.

26 Dans ces groupes, certains projets ont été estimés par des tiers.

27 Ces ajustements comprennent une déduction au titre de la construction de la défense nationale, au titre des ventes nettes de véhicules automobiles usagés, et au titre de rebuts et récupérations ainsi qu'une addition au titre des frais de transfert de terrain et de bâtiments existants.

28 Comprend également les entreprises publiques, à l'exclusion toutefois de la portion de leurs dépenses d'investissement considérée comme faisant partie de la formation brute (directe) de capital fixe par les pouvoirs publics.

29 Comprend la construction gouvernementale pour l'habitation non destinée à la location, les dépenses pour les hôpitaux publics, les écoles provinciales et municipales, les déboursés effectués directement par les ministères gouvernementaux, ainsi que la partie des dépenses d'investissement des sociétés de la Couronne qui relève de la présente catégorie.

30 À compter de 1976, les dépenses de l'industrie de la construction sont projetées à partir de données de référence provenant de recensements annuels de l'industrie de la construction.

31 Auparavant, on retrouvait les magasins d'alimentation combinés et les autres magasins en série sous le même titre magasins en série.

32 À partie de 1976, chiffres réels, les dépenses de l'habitation ont été corrigées de façon à inclure les améliorations additionnelles, telles que la ré-isolation thermique, le paysagisme et autres modifications.

SECTION V. STATISTICAL NOTES

SECTION V. RENSEIGNEMENTS STATISTIQUES

Definitions

The main emphasis of the report is on new capital rather than on non-capitalized repair expenditures. New capital expenditures include the cost of procuring, constructing and installing new durable plant and machinery, whether for replacement of worn or obsolete assets, or as net additions to existing assets. Included are all capitalized costs such as architectural, legal and engineering fees, as well as the value of work on capital assets undertaken by firms with their own labour force. Gross outlays are reported without any deduction for scrap or trade-in value of old assets. Excluded are expenditures made for the acquisition of previously existing structures, for used machinery and equipment unless imported and for land since outlays of this type involve only the transfer of property and not the creation of a capital asset.

Construction includes building construction and all types of engineering construction such as roads, dams, transmission lines and pipelines, as well as oil drilling and mine development. The machinery and equipment category takes into account the purchase of all such items which are used either in producing goods or providing services but does not cover durable goods purchased for personal use. Included, as well as industrial machinery, are transportation equipment, agricultural implements, professional and scientific equipment, office and store furnishings and other similar capital goods. Excluded, for the purpose of this report, are outlays for machinery and equipment by the Department of National Defense.

The intention is to include the cost of all new plant and equipment which normally has a life of more than one year. For this reason companies were asked to report, as capital expenditures, all purchases to be charged to fixed asset accounts. This method of reporting omits certain types of equipment which are bought regularly out of ordinary revenue and charged to current account. Adjustments have been made where necessary to take account of such omitted capital items and separate figures are shown in the relevant tables under "capital items charged to operating expenses".

Housing is not generally considered a capital expenditure in the sense mentioned above but it has been included in this report because it forms a large proportion of construction expenditures and has cyclical fluctuations similar to those which characterize business, institutional and government capital expenditures.

Définitions

Le rapport vise moins les réparations non-capitalisées que les immobilisations neuves. Celles-ci comprennent le coût d'acquisition, de construction et d'installation de nouvelles usines et machines durables, qu'il s'agisse de remplacer des biens usés ou désuets ou d'ajouter aux installations existantes, ainsi que tous les frais portés au compte de capital, comme les honoraires d'architectes, d'avocats et d'ingénieurs, et la valeur des travaux effectués par le propriétaire par l'entremise de ses propres ouvriers. Le rapport indique les dépenses brutes, sans déduction pour la valeur des biens mis au rancart ou cédés en échange de biens nouveaux, mais il ne comprend pas les achats de constructions existantes, de machines ou d'équipement usagés, à moins qu'ils n'aient été importés, ni de terrains, puisque dans ces cas il s'agit d'une simple cession des droits de propriété et non de la création d'un bien nouveau.

La construction comprend les bâtiments et tous les travaux de génie, comme les routes, les barrages, les lignes de transmission et les pipe-lines, ainsi que le forage de puits de pétrole et la mise en exploitation des mines. Dans la catégorie des machines et de l'outillage, les achats comprennent tous les articles employés à la production de biens et de services mais non les biens durables achetés pour usage personnel. Sous cette rubrique sont inclus, en plus des machines industrielles, le matériel de transport, les instruments agricoles, le matériel professionnel et scientifique, les ameublements de bureaux et de magasins et autres biens capitaux du même genre. Toutefois, le présent rapport ne tient pas compte des montants consacrés à l'acquisition de machines et d'outillage par le Ministère de la Défense nationale.

On a visé à inclure le prix de toutes les nouvelles usines et de nouvelles machines et outillage d'une durée normale de plus d'un an. C'est pourquoi on a demandé aux sociétés d'inscrire comme immobilisations tous les achats devant être portés au compte de capital fixe. Ainsi, il n'est pas tenu compte de certains éléments d'actif achetés régulièrement au moyen de recettes ordinaires et portés au compte courant. Des rajustements ont été faits lorsqu'il a semblé nécessaire de tenir compte de ces éléments et les sommes en cause figurent aux tableaux pertinents sous le titre "Bien-capitaux imputés sur les dépenses d'exploitation".

La construction d'habitations n'est pas habituellement considérée comme une immobilisation au sens indiqué ci-dessus mais on l'a incluse dans ce rapport parce-qu'elle représente une forte proportion des dépenses en construction et que le cycle de ses fluctuations est analogue à celui qui caractérise les immobilisations des entreprises commerciales, des institutions et des gouvernements.

The repair expenditures shown in the tables represent the non-capitalized outlays made to maintain the operating efficiency of the existing stock of durable physical assets. These repairs and maintenance expenditures exclude, however, the routine care of assets such as in oiling and cleaning of machinery. Where the repair costs are large enough to materially lengthen the expected serviceable life of the assets, increase its capacity or otherwise raise its productivity, they are treated as capital expenditures on new construction or on new machinery and equipment.

Methods

The figures in the various tables of this report are estimates of total expenditures. In order to approximate full coverage for Canada, adjustments were made to allow for the smaller firms which are not surveyed and for firms which did not report. In manufacturing, the method used to inflate the reported expenditures was to multiply the known expenditures by a factor obtained by dividing the total value of shipments for the most recent year available of all the firms in each industry by the corresponding total for the firms reporting in the current surveys. The use of shipments as a related indicator provides a framework of analysis in the estimation procedures to take account of relevant industry characteristics such as the size of firms. In the utilities, trade, finance and institutional and commercial services sectors the same principle has been followed using appropriate basic data for the sector concerned. Expenditures reported by establishments for which no production or other basic data are available are included as "net additions". It is believed that the estimating procedures for non-reporting firms and the sectors not covered by direct survey, does not introduce any great margin of error into the total. Estimates for individual industries or regions are, of course, subject to greater error than the total figures for Canada.

In a few areas, where the survey approach is not considered to be practical, expenditure estimates were arrived at independently on the basis of current trends and expert opinion in these fields. Some of the areas so estimated are agriculture and fishing investment. The estimates of total outlays in the groups covered by survey are thought to be a better quality than the independent estimates which are based on much less complete information.

Housing estimates were made on a different basis from those derived from information submitted directly by businesses and governments. For 1976 and 1977, estimates of the volume of residential construction were prepared on the basis of results from surveys conducted by the Central Mortgage and Housing Corporation, and the value estimates were prepared by

Les dépenses en réparation, figurant dans les tableaux, représentent les déboursés non-capitalisés effectués en vue de maintenir les biens matériels durables en bon état de fonctionnement. Ces dépenses en réparation et en entretien excluent toutefois les soins courants, comme le nettoyage et le graissage des machines. Lorsque ces dépenses atteignent des sommes suffisantes et qu'elles ont pour effet d'accroître la durée prévue ou la productivité d'éléments d'actif, elles sont considérées comme des immobilisations en constructions neuves ou en machines et outillage neufs.

Méthodes

Les chiffres qui apparaissent dans les divers tableaux sont des estimations des dépenses globales. Afin de se rapprocher le plus possible du total pour tout le Canada, on a effectué des rajustements de façon à faire la part des plus petites entreprises qui n'ont pas fait partie de l'enquête ou n'y ont pas répondu. Pour le secteur de la fabrication, la méthode employée pour gonfler le montant des dépenses en immobilisation déclarées consiste à multiplier ce dernier par le facteur du rapport de la valeur totale des expéditions, pour l'année la plus récente, de toutes les entreprises de chaque industrie sur le total correspondant des entreprises ayant répondu à l'enquête courante, suivant la disponibilité des données. L'utilisation des expéditions comme indicateur connexe insère une analyse d'ensemble dans les procédures d'estimations afin de tenir compte des caractéristiques pertinentes tel que la grosseur d'une entreprise. Pour les services d'utilité publique, le commerce, la finance, les institutions et les services commerciaux, on a appliqué le même principe en cherchant des données de base appropriées au secteur en cause. Les projets mentionnés par les entreprises à l'égard desquelles aucun renseignement en matière de production ou autre ne pouvait être obtenu, sont inscrits comme "additions nettes". Il y a lieu de croire que la formule d'estimation employée à l'égard des entreprises qui n'ont pas répondu au questionnaire et des secteurs que le relevé n'a pas atteint directement, n'a pas pu fausser sensiblement le montant global.

Dans certains secteurs, où la méthode d'enquête n'a pas semblé pratique, les montants ont été calculés séparément d'après la tendance courante et l'opinion de spécialistes en la matière. Cette méthode d'évaluation a été employée surtout à l'égard des investissements agricoles et de ceux de l'industrie de la pêche. Dans le cas des groupes atteints par le relevé, les estimations semblent plus sûres que pour les groupes ayant été estimés par des tiers d'après des renseignements beaucoup moins complets.

Pour l'habitation, les estimations n'ont pas été établies sur la même base que celle qui découlent des renseignements fournis directement par les entreprises ou les pouvoirs publics. En 1976 et 1977, Statistique Canada a estimé les dépenses d'habitation en se basant sur les résultats des enquêtes menées par la Société centrale d'hypothèques et de logement et au moyen d'une méthode

Statistics Canada. These value estimates were calculated by means of a methodology making use of the duration of construction and monthly measures of work put in place for various types of construction.

Appraisals of the probable volume of new housing construction in 1978 were made by representatives of the Corporation who assessed market conditions, mortgage facilities, current and proposed housing policies. Allowing for probable change in construction costs, estimates were then prepared for the value of construction work carried over from 1977 and the value of work expected to be undertaken in 1978. Finally an allowance was made for other housing expenditures such as home conversions, mobile homes, alterations, home improvements and acquisition costs which currently account for approximately 20% of total expenditures.

Construction Expenditures – by Type of Structure

For details of construction activity by type of structure see the publication *Construction in Canada* (Catalogue 64-201).

The statistics for these types of structure come from the same capital and repair expenditures surveys that produce *Private and Public Investment in Canada, Outlook*.

logie fondée sur la durée des travaux et sur les réalisations mensuelles des différents types de construction.

Pour 1978, des estimations du volume probable des travaux de construction domiciliaire ont été faites par des représentants de la société, lesquels se fondent sur les conditions du marché, les disponibilités de financement et les politiques d'habitation proposées. En tenant compte de l'évolution probable des coûts de la construction, on a pu alors estimer la valeur des travaux reportés pour l'année dernière et celle des travaux attendus cette année. Enfin, on a tenu compte des autres dépenses d'habitation telles que les transformations, les maisons mobiles, les modifications, les améliorations et les frais d'acquisition qui représentent environ 20 % des dépenses totales.

Dépenses de construction – par genre de construction

On trouvera dans la publication *La Construction au Canada* (n° 64-201 au catalogue) le détail des travaux de construction selon le genre.

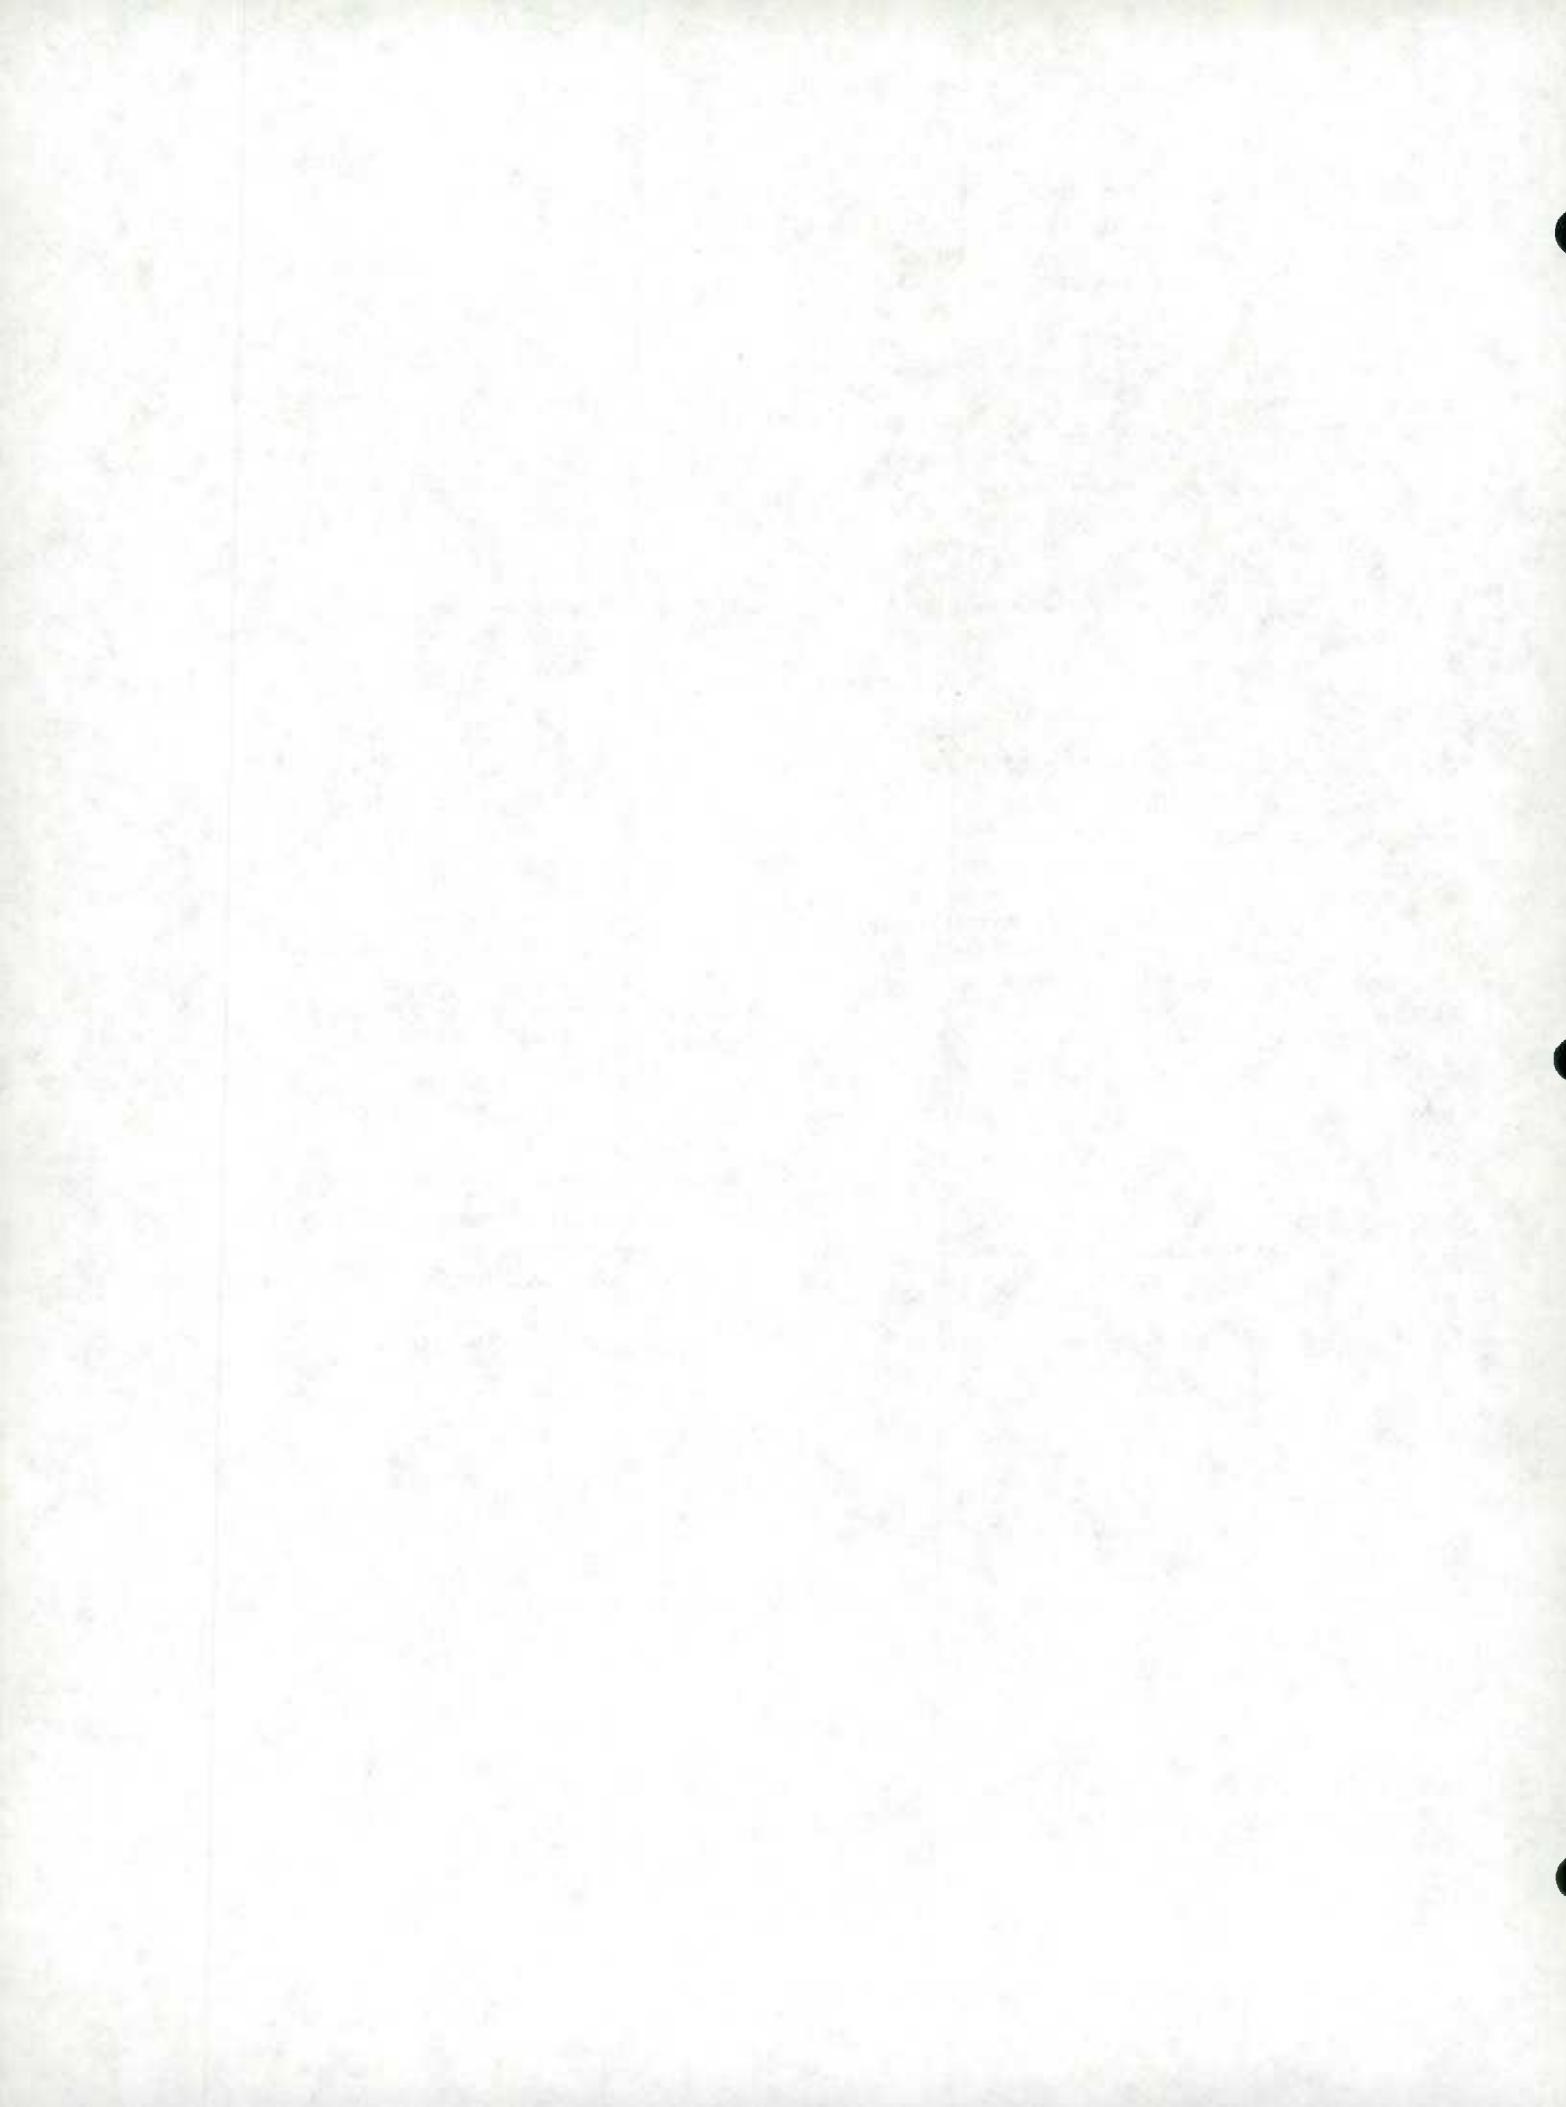

Les enquêtes sur les dépenses d'immobilisations et de réparations, dont les résultats apparaissent dans la publication *Investissements privés et publics au Canada – Perspectives*, nous fournissent également les statistiques pour ces genres de construction.
