Revue de la mi-année 1982

### Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Capital Expenditures Section,  
Construction Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-9013) or to the Statistics Canada reference centre in:

|            |            |           |            |
|------------|------------|-----------|------------|
| St. John's | (772-4073) | Winnipeg  | (949-4020) |
| Halifax    | (426-5331) | Regina    | (359-5405) |
| Montreal   | (283-5725) | Edmonton  | (420-3027) |
| Ottawa     | (992-4734) | Vancouver | (666-3691) |
| Toronto    | (966-6586) |           |            |

Toll free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

### How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

### Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des dépenses d'investissement,  
Division de la construction,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-9013) ou au centre de consultation de Statistique Canada à:

|            |            |           |            |

## Symbols

The following standard symbols are used in Statistics Canada publications:

- ... figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

### NOTE ON CANSIM

Data for most of the tables in this publication are available on CANSIM (Canadian Socio-Economic Information Management System). For those tables that are available, the matrix numbers for retrieval are shown on the top left box for every table.

For further information write to CANSIM, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8 or telephone (613) 995-7406.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- ... nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

### NOTE CONCERNANT CANSIM

Pour la plupart des tableaux de cette publication, les chiffres sont disponibles sur CANSIM (Système canadien d'information socio-économique). Pour les tableaux qui sont disponibles, les numéros de matrice apparaissent à gauche au haut de la page de chaque tableau.

Pour plus de renseignements, écrivez à CANSIM, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8 ou téléphonez à (613) 995-7406.

## Introduction

This report sets out the 1982 revised capital spending intentions for all sectors of the economy. Comparative figures of the original intentions for 1982 and preliminary actual expenditures for 1981 are also given. The results are based on a questionnaire survey of individual companies and other spending agencies carried out in May, June and early July. The figures reflect spending plans as formulated at that time.

The estimates cover total outlays for construction and for the acquisition of producers' machinery and equipment by Canadian business, institutions and governments, together with expenditures for housing. All in all, about 24,000 establishments were surveyed for their investment intentions. In order to approximate full coverage, adjustments were made for non-surveyed and for non-reporting establishments. In a few areas, where the survey approach is not considered practical, expenditure estimates were arrived at independently on the basis of current trends and expert opinion in these fields (e.g., agriculture, fishing and housing).

Information on capital spending intentions provides a useful indication of market conditions both in the economy at large and in particular industries. Since such expenditures account for a large and relatively variable proportion of gross national expenditures, the size and content of the investment program provides significant information about demands to be placed upon the productive capacities of the economy during the period covered by the survey. In addition, information on the relative size of the capital expenditures program planned, both in total and for individual industries, gives an indication of the views management hold on prospective market demands in relation to present productive capacity.

Non-capitalized repair expenditures on structures and machinery and equipment are also given in the report but these are shown separately. By including these outlays, a more complete picture is provided of all demands likely to be made on labour and materials in accomplishing the program.

## Introduction

Nous présentons ici un état des projets de dépenses révisées dans les divers secteurs de l'économie en 1982 (de même que les intentions originales de 1982 et les dépenses réelles provisoires de 1981). La plupart des chiffres sont fondés sur les réponses à un questionnaire adressé aux sociétés particulières et aux autres organismes qui font des immobilisations. Comme les réponses ont été préparées en mai, juin et début juillet, les chiffres représentent les immobilisations projetées à ce moment-là.

Les immobilisations prévues comprennent l'ensemble des sommes que les sociétés commerciales, les institutions et les gouvernements du Canada entendent consacrer à des constructions et à l'acquisition de machines et d'outillage, ainsi que les dépenses visant la construction d'habitations. L'étude a porté sur environ 24,000 établissements, mais les totaux ont été ajustés de façon à inclure les immobilisations des établissements qui n'ont pas répondu, ainsi que des établissements qui n'ont pas fait partie du relevé. Dans certains secteurs, où la méthode d'enquête n'a pas semblé pratique, les montants ont été calculés séparément d'après la tendance courante et l'opinion de spécialistes en la matière (e.g., agriculture, pêche et habitation).

Ces renseignements sur les projets d'immobilisations fournissent des indications utiles quant à l'état du marché dans l'économie en général et dans certaines industries particulières. Comme ces dépenses représentent une partie importante mais toujours variable des dépenses nationales brutes, l'envergure du programme des investissements et sa répartition entre les différents secteurs donnent une idée de la demande particulièrement aléatoire que les producteurs canadiens auront à satisfaire au cours de la période en cause. De plus, ces renseignements sur l'importance relative des immobilisations projetées dans l'ensemble du pays et dans les industries déterminées permettent de connaître les prévisions des chefs d'entreprises pour ce qui est de la demande en fonction de la capacité actuelle de production.

Le rapport comprend aussi, quoique sous une rubrique distincte, les sommes destinées à la réparation non-capitalisée d'immeubles, de machines et d'outillage. L'inclusion de ces sommes donne une idée plus juste des besoins de main-d'œuvre et de matériaux que représentera l'exécution du programme.

## SECTION I

### PRIVATE AND PUBLIC INVESTMENT IN CANADA - MID-YEAR REVIEW 1982

Estimates of intended capital expenditures in Canada during 1982 are revised down by 7.6% since the earlier release of March 26, 1982. Following a mid-year survey of capital spending by all sectors of the Canadian economy, the total is now expected to reach \$80,578 million, a \$6,594 million decline from the \$87,172 million estimated from the preceding survey. The revised total for 1982 is now only 2.6% above the \$78,512 million for 1981. The increase last year was 18.6% over 1980. All the amounts shown here are in current dollars without any adjustment for price changes during the years covered.

Non-residential construction activity at \$38,058 million shows a decrease of 6.1% from the earlier estimate of \$40,541 million for 1982 and an increase of 9.8% over the \$34,660 million in 1981. Residential construction in 1982 is once again projected to decrease to a new level of \$11,882 million which is 7.3% below the first estimate for 1982, and 9.6% below the \$13,140 million last year. The machinery component of capital spending is now expected to reach \$30,638 million or 9.4% below the \$33,812 million projected earlier for 1982, and down by 0.2% from the 1981 total of \$30,712 million. Last year the increase was 18.0% over the \$20,036 million in 1980.

In the business sector, the revised total of \$57,369 million for capital expenditures in 1982 is down by 9.1% from the \$63,133 million expected earlier this year. The new level is only 3.6% above the \$55,370 million in 1981. Last year, business capital spending was up by 19.4%. Social capital represented by governments and institutions shows a small increase of 1.0% over earlier estimates for a total of \$11,326 million or 13.2% above that of the \$10,003 million in 1981. In this group, the increase of 13.2% over 1981 is identical for the institutions group and for the total of the three levels of government.

## SECTION I

### INVESTISSEMENTS PRIVÉS ET PUBLICS AU CANADA - REVUE DE LA MI-ANNÉE 1982

Les estimations des dépenses en immobilisations prévues au Canada en 1982 sont révisées à la baisse de 7.6% par rapport à celles publiées le 26 mars 1982. D'après l'enquête de la mi-année, les dépenses en immobilisations prévues de tous les secteurs de l'économie canadienne totaliseraient \$80,578 millions, en baisse de \$6,594 millions par rapport à l'estimation de \$87,172 millions établie à partir de l'enquête précédente. Le total révisé pour 1982 dépasse maintenant de 2.6% seulement le niveau de \$78,512 millions atteint en 1981. L'année dernière, l'augmentation avait été de 18.6% par rapport à 1980. Tous les montants présentés ici sont exprimés en dollars courants, sans aucune correction des variations de prix pour les années visées.

La construction non résidentielle, à \$38,058 millions, accuse une baisse de 6.1% par rapport à la première estimation de \$40,541 millions pour 1982, et une hausse de 9.8% par rapport au niveau de 1981 (\$34,660 millions). La construction résidentielle devrait selon les projections de 1982 baisser une nouvelle fois pour s'établir à \$11,882 millions, soit 7.3% de moins que la première estimation pour 1982, et 9.6% de moins que les \$13,140 millions de l'année dernière. Les dépenses en immobilisations consacrées aux machines devraient maintenant atteindre \$30,638 millions, soit 9.4% de moins que le montant de \$33,812 millions prévu plus tôt pour 1982, et 0.2% de moins que les \$30,712 millions dépensés à ce chapitre en 1981. L'année dernière, l'augmentation par rapport aux \$20,036 millions de 1980 avait été de 18.0%.

Dans le secteur des affaires, le total révisé des dépenses en immobilisations pour 1982 (\$57,369 millions) est en baisse de 9.1% par rapport au montant de \$63,133 millions prévu plus tôt cette année. Le nouveau chiffre ne dépasse que de 3.6% les \$55,370 millions dépensés à ce titre en 1981. L'année dernière, les dépenses en immobilisations de ce secteur avaient augmenté de 19.4%. Dans le domaine social, les dépenses en immobilisations des administrations publiques et des institutions ont augmenté légèrement de 1.0% par rapport aux estimations antérieures pour atteindre \$11,326 millions, soit 13.2% de plus que les \$10,003 millions dépensés en 1981. Dans ce dernier groupe, l'augmentation de 13.2% par rapport à 1981 est identique pour le groupe des institutions et pour l'ensemble des trois paliers d'administration publique.

The mid-year total for the primary industries and construction group of the business sector, at \$16,275 million, is \$1,944 million or 10.7% below the earlier 1982 total and only 3.3% above the \$15,754 million in 1981. This decrease is dominated by the smaller program for petroleum and gas and by lower capital spending for agriculture. Coal mining is the only industry indicating significant additional outlays for 1982 for a total of \$1,051 million compared with \$568 million last year.

The decrease for manufacturing in total at mid-year also reflects major changes in the intended capital outlays. All industries except the products of petroleum and coal group show downward revisions for 1982. The largest such revision is for the paper products group where the new total of \$1,789 million is 16.5% below the \$2,142 million in 1981. Other major changes are as follows showing current mid-year dollar decreases for 1982 over the first forecast 1982, and percentage change of the mid-year 1982 over 1981: primary metals (-\$489 million, -13.6%), wood products (-\$131 million, -48.6%), transportation equipment (-\$111 million, -38.0%), electrical products (-\$76 million, +3.5%). The total for the chemical products group is reduced by \$23 million at mid-year but is still showing an increase of 31.2% over 1981.

For the other industries in the business sector, the total of \$10,667 million for the trade-finance-commercial group is reduced by \$1,166 million (9.8%) from the first estimate for 1982. The group is now 1.9% below the 1981 total. While wholesale and retail trade is almost unchanged from 1981, finance is down by 3% and commercial services drop by 1.8% from 1981. The decrease of \$722 million (-3.8%) for utilities in the revised 1982 total sustains the increase over 1981 at 13.4%. In the miscellaneous utilities which include electric power, the mid-year total is fractionally lower for a resultant increase of 17.4% over 1981. The communications group similarly shows a small downward change of \$124 million (-3.4%) for 1982 to moderate the increase over 1981 to 11.2%. Transportation registers a larger reduction at mid-year (-\$558 million, -9.2%) with downward revisions for oil and gas pipelines, and for air, truck and urban transport. Overall, transportation in 1982 is still 8.5% above 1981.

Le total de la mi-année pour le groupe des industries primaires et de la construction du secteur des affaires, à \$16,275 millions, est inférieur de \$1,944 millions, ou 10.7%, au total antérieur pour 1981, et ne dépasse que de 3.3% celui de \$15,754 millions pour 1981. Cette baisse découle surtout de la réduction des programmes dans le secteur du pétrole et du gaz naturel et par la diminution des dépenses en immobilisations pour l'agriculture. Les mines de charbon sont la seule branche d'activité où une augmentation appréciable des dépenses se manifeste pour 1982, avec un total de \$1,051 millions par rapport à \$568 millions l'année dernière.

La diminution des dépenses en immobilisations du secteur de la fabrication relevée au milieu de l'année traduit également d'importants changements au niveau des intentions. Toutes les branches d'activité, à l'exception de celle des dérivés du pétrole et du charbon, accusent des révisions en baisse pour 1982, notamment le groupe des produits du papier, dont les dépenses de \$1,789 millions sont inférieures de 16.5% à celles de \$2,142 millions effectuées en 1981. Voici les autres principaux changements, donnant en dollars les diminutions relevées à la mi-année pour 1982 par rapport aux premières prévisions pour 1982 et les écarts en pourcentage par rapport à 1981: première transformation des métaux (-\$489 millions, -13.6%), produits du bois (-\$131 millions, -48.6%), matériel de transport (-\$111 millions, -38.0%), produits électriques (-\$76 millions, +3.5%). Le total des dépenses pour le groupe des produits chimiques, malgré une baisse de \$23 millions, n'en est pas moins en hausse de 31.2% par rapport à 1981.

Pour les autres branches du secteur des affaires, le total des dépenses en immobilisations (\$10,667 millions) pour le groupe du commerce, des finances et des services commerciaux accuse un retard de \$1,166 millions (9.8%) sur la première estimation pour 1982 et une baisse de 1.9% par rapport au total de 1981. Bien que le commerce de gros et celui de détail soient pratiquement inchangés par rapport à 1981, les finances accusent une baisse de 3%, et les services commerciaux, de 1.8% par rapport à 1981. La diminution de \$722 millions (-3.8%) des services d'utilité publique dans le total révisé des dépenses en immobilisations pour 1982 maintient l'augmentation par rapport à 1981 à 13.4%. Les prévisions des dépenses des services d'utilité publique divers, qui regroupent l'énergie électrique, sont légèrement moins élevées à la mi-année mais en hausse de 17.4% par rapport à 1981. Le groupe des communications accuse de même une légère baisse de \$124 millions (-3.4%) pour 1982, ce qui ramène l'augmentation par rapport à 1981 à 11.2%. Les transports accusent à la mi-année, une réduction plus forte (-\$558 millions, -9.2%), avec des révisions en baisse pour les oléoducs et gazoducs, les transports aériens et urbains et le camionnage. Dans l'ensemble, les dépenses en immobilisations du groupe des transports en 1982 dépassent toujours de 8.5% le total pour 1981.

The institutions and governments representing social capital show a further increase for 1982 (+\$107 million, +1.0%) in the revised total of \$11,326 million which is 13.2% above 1981. Currently most of the increase in institutions may be attributed to hospitals which are registering an increase of 27.6% over 1981. Provincial governments are estimated at \$3,465 million or 16.0% over 1981, municipal governments at \$3,892 million or 10.7% over 1981 and federal departments at \$1,296 million or 13.9% above 1981.

Provincially, the following are the revised year-over-year changes for 1982 with the mid-year revisions in parenthesis: Newfoundland, 20.1% (1.3%); Yukon and Northwest Territories, 17.5% (7.0%); Nova Scotia, 8.0% (-18.4%); Alberta, 7.4% (-10.3%); New Brunswick, 7.1% (-8.2%); Prince Edward Island, 2.9% (-7.1%); Ontario, 2.6% (-8.0%); Saskatchewan, 1.5% (-1.9%); British Columbia, -0.9% (-4.9%); Quebec, -2.7% (-7.5%); Manitoba, -6.5% (-7.5%).

Newfoundland is the only province in the Atlantic region having an upward revision at mid-year mostly as a result of a gain for the primary industries group (+\$137 million, +35.5%). This gain more than offset decreases in the other industry groups. Manufacturing is revised down by \$67 million (-48.7%), housing by \$36 million (-19.6%) and utilities by \$25 million (-7.7%). An upward adjustment of \$15 million of governments and institutions also contributes to the improved mid-year level. In the other provinces of the Atlantic region, the largest revision is for the primary industries group in Nova Scotia (-\$340 million, -39.2%), which dominates the decreases in all the other major industry groups for that province. In the case of New Brunswick, the most notable decrease is for manufacturing (-\$126 million, -26.2%) with a limited offsetting increase of \$21 million (+7.8%) for the primary industries group. For Prince Edward Island, the largest revision is for the primary industries group (-\$7 million, -17.0%). Overall, the Atlantic region shows major downward revisions at mid-year for manufacturing and for the primary industries group so that compared with 1981, the increase of 15.1% expected earlier for the region has been narrowed to 10.4%. Housing is the only sector with a decrease from 1981 in each of the Atlantic provinces.

Le total révisé des dépenses en immobilisations du groupe des institutions et des administrations publiques a encore augmenté en 1982 (+\$107 millions, +1.0%) pour atteindre \$11,326 millions, soit 13.2% de plus qu'en 1981. À l'heure actuelle, cette augmentation provient surtout, pour les institutions, des hôpitaux, en hausse de 27.6% par rapport à 1981. Les estimations s'établissent à \$3,465 millions pour les administrations provinciales, 16.0% de plus qu'en 1981, à \$3,892 millions pour les administrations municipales (+10.7%) et à \$1,296 millions pour les ministères fédéraux (+13.9%).

Voici par province, les écarts révisés d'une année à l'autre pour 1982, les révisions de la mi-année étant indiquées entre parenthèses: Terre-Neuve, 20.1% (1.3%); Yukon et Territoires du Nord-Ouest, 17.5% (7.0%); Nouvelle-Écosse, 8.0% (-18.4%); Alberta, 7.4% (-10.3%); Nouveau-Brunswick, 7.1% (-8.2%); Île-du-Prince-Édouard, 2.9%, (-7.1%); Ontario, 2.6% (-8.0%); Saskatchewan, 1.5% (-1.9%); Colombie-Britannique, -0.9% (-4.9%); Québec, -2.7% (-7.5%); Manitoba, -6.5% (-7.5%).

Terre-Neuve est la seule province de la région de l'Atlantique dont les dépenses en immobilisations ont été révisées à la hausse à la mi-année surtout par suite des gains enregistrés pour le groupe des industries primaires (+\$137 millions, +35.5%). Cette hausse a plus que compensé les baisses enregistrées dans les autres groupes d'activité économique. Les dépenses ont été révisées à la baisse de \$67 millions (-48.7%) dans le secteur de la fabrication, de \$36 millions (-19.6%) dans celui du logement et de \$25 millions (-7.7%) dans celui des services d'utilité publique. Une révision à la hausse de \$15 millions des dépenses en immobilisations des administrations publiques et institutions a également contribué à redresser la situation de mi-année. Dans les autres provinces de l'Atlantique, la principale révision vise le groupe des industries primaires en Nouvelle-Écosse (-\$340 millions, -39.2%), qui domine les baisses relevées pour tous les autres grands groupes d'activité économique dans cette province. Au Nouveau-Brunswick, la baisse la plus notable se manifeste dans la fabrication (-\$126 millions, -26.2%); celle-ci a toutefois été annulée partiellement par une augmentation de \$21 millions (+7.8%) dans le groupe des industries primaires. Dans l'Île-du-Prince-Édouard, la plus forte révision vise le groupe des industries primaires (-\$7 millions, -17.0%). Dans l'ensemble, de fortes révisions à la baisse à la mi-année se manifestent dans la fabrication et le groupe des industries primaires pour l'ensemble de la région de l'Atlantique de sorte que, par rapport à 1981, l'augmentation de 15.1% prévue antérieurement a été ramenée à 10.4%. Le logement est le seul secteur à la baisse dans chacune des provinces Atlantiques par rapport à 1981.

In Quebec, the decrease at mid-year for manufacturing of \$480 million (-18.4%) has reversed an earlier increase over 1981 to a decrease of \$219 million or 9.3%. The largest part of this decrease is for paper products where at mid-year the revised total is \$276 million (-38.6%) lower than expected earlier for 1982 and down by 8.7% from 1981. The next ranking downward revision is for primary metals (-\$81 million, -22.6%) which results in a level 37.5% below 1981. In contrast, an upward revision for the chemical products industries reversed an earlier expected 1982 decrease of 13.6% from 1981. The current total of \$189 million for the group results in a small increase of 4.4% over last year. The total for petroleum and coal products continues to show a gain over 1981 (+70.1%) even though the current 1982 estimate represents a reduction of \$10 million or 5.2% from earlier expectations.

Other revisions for Quebec occur in utilities where the earlier gain of 11.6% over 1981 is narrowed to 7.3% in the latest 1982 total of \$4,587 million. In the case of the trade-finance-commercial group, the increase of 8.5% in the first estimate for 1982 is now expected to be 1.7% below 1981. The primary industries group, governments and institutions, and housing are also revised down to a level 9.9%, 7.0% and 6.9% respectively below 1981.

Capital expenditures in Ontario are showing major downward revisions for 1982 in manufacturing (-\$1,129 million, -17.7%), in the trade-finance-commercial group (-\$458 million, -10.8%), in the primary industries group (-\$271 million, -12.2%), and in housing (-\$143 million, -3.9%). The primary metals industry in manufacturing is lower by \$364 million or 32.7% from the first estimate for 1982 year-over-year drop of 15.0% when compared with 1981. The paper products industry is also revised down with the new total being \$155 million or 20.6% below the first estimate for 1982 and 5.0% below 1981. The decrease expected in transportation equipment at the beginning of 1982 has been supplemented by a further downward revision to a new total of \$566 million which is down by 43.9% from the \$1,008 million last year. In the case of the products of petroleum and coal industry and the chemical products industry, the increase in 1982 over 1981 is now reduced to 91.5% and 5.3% respectively. The utilities group of transportation-communications and miscellaneous utilities did not change significantly

Au Québec, la baisse de \$480 millions (-18.4%) relevée à la mi-année dans la fabrication a fait que l'augmentation prévue antérieurement par rapport à 1981 se transforme en une baisse de \$219 millions (-9.3%). Cette baisse provient en grande partie au groupe des produits du papier pour lequel l'estimation révisée à la mi-année accuse un recul de \$276 millions (-38.6%) par rapport aux prévisions antérieures pour 1982 et de 8.7% par rapport à 1981. Cette révision à la baisse est suivie de celle pour les métaux primaires (-\$81 millions, -22.6%) qui représentent une baisse de 37.5% par rapport à 1981. Par contre, une révision à la hausse pour le groupe des produits chimiques annule la baisse de 13.6% prévue antérieurement par rapport à 1981. Les estimations actuelles de \$189 millions pour ce groupe se traduisent par une faible augmentation de 4.4% par rapport à l'an dernier. Les estimations totales pour les produits du pétrole et du charbon continuent d'indiquer une hausse par rapport à 1981 (+70.1%) même si les estimations actuelles pour 1982 ont baissé de \$10 millions, soit 5.2%, par rapport aux prévisions antérieures.

À la suite d'autres révisions, la hausse de 11.6% par rapport à 1981 prévue antérieurement pour les services d'utilité publique a été ramenée à 7.3%, les dernières prévisions pour 1982 se situant à \$4,587 millions, tandis que pour le groupe du commerce, des finances et des services commerciaux, contrairement à l'augmentation de 8.5% prévue à l'origine pour 1982, l'on s'attend maintenant à une baisse de 1.7% par rapport à 1981. Pour le groupe des industries primaires, les administrations et institutions, et le logement, l'on s'attend maintenant à des baisses de 9.9%, de 7.0% et de 6.9% respectivement par rapport à 1981.

En Ontario, les dépenses en immobilisations sont fortement révisées à la baisse pour 1982 dans la fabrication (-\$1,129 millions, -17.7%), dans le groupe du commerce, des finances et des services commerciaux (-\$458 millions, -10.8%), dans le groupe des industries primaires (-\$271 millions, -12.2%), et dans le logement (-\$143 millions, -3.9%). Dans le secteur de la fabrication, les métaux primaires accusent une baisse de \$364 millions, soit 32.7%, par rapport aux estimations initiales pour 1982, ce qui représente une baisse de 15.0% par rapport à 1981. Les prévisions pour l'industrie des produits du papier sont également révisées à la baisse, les nouvelles estimations se situant à \$155 millions, soit 20.6% en deçà des estimations initiales pour 1982 et 5.0% de moins qu'en 1981. La baisse prévue pour le matériel de transport au début de 1982 a été accentuée par une nouvelle révision à la baisse, la nouvelle estimation de \$566 millions représentant une diminution de 43.9% par rapport aux \$1,008 millions dépensés l'an dernier. Pour les produits des industries du pétrole et du charbon et les produits chimiques, l'augmentation prévue en 1982 par rapport à 1981 a été ramenée à 91.5% et à 5.3% respectivement. Le

for 1982 apart from a decrease in transportation being almost offset by an increase for miscellaneous utilities.

Most of the downward adjustment at mid-year in the Prairie region comes from the primary industries in Manitoba and in Saskatchewan and particularly in Alberta. The regional 1982 total for agriculture is reduced by \$407 million or 15.0% and the total for mining, including petroleum and gas is lowered by \$1,027 million or 15.4%. The trade-finance-commercial group is cut by \$490 million or 13.0% for 1982 and the estimate for housing is adjusted down by \$391 million or 12.5%. As a consequence, the latest 1982 intentions for the trade-finance-commercial group and for housing are now 8.6% and 14.6% respectively below the 1981 total in the region. In contrast, the 1982 total for manufacturing is increased by a further \$124 million or 4.8% to bring it up to a 45.3% gain over 1981.

In British Columbia, 1982 capital spending is revised down in the amount of \$597 million or 4.9% to bring this year's total to 0.9% below 1981. Most of this decrease for 1982 is shown for manufacturing (-\$242 million, -17.8%) and for housing (-\$182 million, -6.0%) with a resultant year-over-year decline by these two sectors at 35.3% and 8.9% respectively when compared with last year. The paper products group of manufacturing is the largest influence for that sector where the \$419 million shown for 1982 is now 41.5% below the total for 1981. Utilities, on the other hand are holding to a 22.9% increase over 1981 even with a limited downward revision at mid-year.

The Yukon and Northwest Territories are showing more strength in 1982 with an upward revision at mid-year of \$179 million or 13.6% for the primary industries group which advances that group to 17.4% over 1981. In contrast, the estimate for the utilities group is reduced for 1982 by \$55 million or 31.2% for a level only 19.1% over 1981.

groupe des services publics de transport et de communication et celui des services d'utilité publique divers n'ont pas changé de façon sensible sauf qu'une baisse au titre des transports a été pratiquement annulée par une hausse au chapitre des services d'utilité publique divers.

La révision à la baisse effectuée à la mi-année pour la région des Prairies découle des industries primaires au Manitoba, en Saskatchewan et surtout en Alberta. Les prévisions des dépenses en immobilisations pour l'ensemble de la région en 1982 dans le secteur de l'agriculture sont réduites de \$407 millions, soit 15.0%, et celles pour les mines, y compris le pétrole et le gaz, de \$1,027 millions, soit 15.4%. Les estimations du groupe du commerce, des finances et des services commerciaux ont été réduites de \$490 millions (13.0%) pour 1982 et celles pour le logement, de \$391 millions (12.5%). Il s'ensuit que pour ces deux secteurs les dernières intentions pour 1982 se situent respectivement à 8.6% et 14.6% en deçà des dépenses totales effectuées en 1981 dans la région. Par contre, les estimations du secteur de la fabrication pour 1982 ont été rehaussées d'encore \$124 millions, soit de 4.8%, ce qui représente une hausse totale de 45.3% par rapport à 1981.

En Colombie-Britannique, les dépenses en immobilisations en 1982 ont été révisées à la baisse de \$597 millions, soit de 4.9%, et les estimations de cette année accusent donc un recul de 0.9% sur les dépenses de 1981. Une grande partie de cette baisse est imputable à la fabrication (-\$242 millions, -17.8%) et au logement (-\$182 millions, -6.0%), ce qui représente pour ces deux secteurs des baisses de 35.3% et 8.9% respectivement par rapport à l'an dernier. Dans la fabrication, la baisse est surtout attribuable au groupe des produits du papier où les estimations de \$419 millions pour 1982 représentent une baisse de 41.5% par rapport à 1981. Par contre, malgré une faible révision à la baisse à la mi-année, l'on prévoit toujours une augmentation de 22.9% par rapport à l'an dernier pour les services d'utilité publique.

Le Yukon et les Territoires du Nord-Ouest manifestent plus de vigueur en 1982, les estimations du groupe des industries primaires indiquant, à la suite d'une révision à la hausse de \$179 millions (13.6%) à la mi-année, une augmentation de 17.4% par rapport à 1981. Par contre, après avoir été réduite de \$55 millions, soit de 31.2%, les estimations du groupe des services d'utilité publique pour 1982 ne dépassent plus que de 19.1% le niveau des dépenses atteint en 1981.

## Section III

### PROVINCES AND TERRITORIES

#### Capital and Repair Expenditures by Provinces and Territories (See Tables 7 - 20)

The expenditures shown for each province or territory represent the value of construction work put in place and the value of machinery and equipment acquired for use within the province or territory. Such expenditures represent gross additions to the capital stock of the province or territory, and are a reflection of economic activity in that area. However, the actual production of these assets may generate its major employment and income giving effects in other regions. For example, the spending of millions of dollars on plants and equipment in Western Canada may generate considerable activity in machinery industries in Ontario and Quebec as well as construction activity in the Western provinces.

It should be appreciated that there are statistical difficulties in making a precise geographic allocation of past or anticipated investment since many business firms operating in several provinces do not either record or plan their capital expenditures geographically. As a result, it has been necessary to use approximate breakdowns in many cases. Such is the case for investment in railway rolling stock, ships, aircraft and certain other items.

The degree of detail provided is dependent to some extent on the validity of methods used to obtain provincial estimates and also on limitations imposed by the Statistics Act. These restrictions have particular relevance in the case of less populated provinces or territories.

#### Private and Public Breakdowns (See Tables 7C and 7D)

Capital and repair expenditures for the provinces and for the territories are divided into the Private (non government) and Public (government) categories in Tables 7C and 7D.

Additional data, similar to Canada Table 23 along with government department figures for the three levels of government, are also available on the CANSIM data bank. These statistics can be retrieved from the appropriate provincial and territorial matrix back to 1963.

## Section III

### PROVINCES ET TERRITOIRES

#### Immobilisations et réparations par province et territoire (voir tableaux 7 - 20)

Les montants indiqués pour chacune des provinces ou territoires représentent la valeur des travaux de construction qui y seront entrepris et celle des machines et du matériel achetés pour y être utilisés. Ces sommes constituent des additions brutes aux capitaux de la province ou territoire et donnent des indications de l'activité économique de la région. Cependant, la production effective des biens en cause peut exercer son influence du point de vue de la création d'emplois et de revenu dans d'autres régions. Ainsi, la dépense de millions de dollars en installations et équipement industriels dans l'Ouest canadien peut déterminer une grande activité dans les industries des machines en Ontario et au Québec et dans la construction dans les provinces de l'Ouest.

On éprouve, dans certains cas, des difficultés d'ordre statistique à déterminer à quel endroit s'applique tel ou tel investissement. En effet, un grand nombre d'entreprises commerciales qui font affaires dans plusieurs provinces n'établissent pas leurs plans ou leurs comptes d'immobilisations sur une base géographique. Il a donc fallu dans ces circonstances se contenter d'une répartition approximative. Ce fut le cas notamment pour les achats de matériel roulant de chemins de fer, de navires, d'avions et d'autres biens analogues.

Les détails fournis dépendent, dans une certaine mesure, de la validité des méthodes employées pour obtenir des estimations d'ordre provincial et des restrictions imposées par la Loi sur la statistique. Ces restrictions ont été particulièrement importantes dans le cas des provinces ou territoires les moins peuplés.

#### Répartitions privées et publiques (voir tableaux 7C et 7D)

La répartition entre la catégorie privée et la catégorie publique des dépenses d'immobilisations et de réparations pour les provinces et les territoires se retrouve aux tableaux 7C et 7D.

Des données supplémentaires, semblables à celles du tableau 23 (Canada), plus la ventilation des dépenses ministérielles par palier du gouvernement, sont disponibles sur la banque de données CANSIM. On peut extraire ces statistiques des matrices provinciales et territoriales appropriées, à partir de 1963.

## Section IV

### SUPPLEMENTARY

#### Current and Constant Dollars (See Table 21)

Constant dollars are derived by applying deflators for the major groups of structures for construction and selected weighted deflators for the machinery and equipment component of capital expenditures.

#### Business and Social Capital (See Table 22)

This table is a regrouping of the various SIC industries included in Tables 1-6 into the categories of Business capital and Social capital. A supplementary sheet identifying the individual industries included in each item is available on request from the Construction Division, Statistics Canada, Ottawa, K1A 0T6 (613-995-9013).

#### Private and Public (See Tables 23 and 24)

These tables divide the total capital and repair expenditures for Canada into Private (non-government) and Public (government) categories.

The Public category includes government enterprises for municipal, provincial and federal governments, municipal hospitals and schools, provincial hospitals, schools and universities, and federal government housing, and government department expenditures for the three levels.

Public enterprises cover, in general, government owned establishments whose principal source of revenue is derived from the provision of goods and services to the public.

The total for federal government departments includes data for departmental crown corporations and excludes data for proprietary crown corporations which are all classed as enterprises. Agency crown corporations, on the other hand, are provisionally classified in part to enterprises and the remainder to government departments.

## Section IV

### SUPPLÉMENTAIRES

#### Dollars courants et constants (voir le tableau 21)

Les estimations en dollars constants s'obtiennent par dégonflement pour les principaux groupes de structures pour ce qui est de la construction, et par une pondération sélective de déflation pour les composantes machinerie et outillage de ces investissements.

#### Investissements commerciaux et services sociaux (voir le tableau 22)

Ce tableau rassemble les industries de la CDAÉ, comprises dans les tableaux 1-6 en deux catégories: investissements commerciaux et services sociaux. On peut se procurer un feuillet supplémentaire identifiant pour chaque item les industries composantes en s'adressant à la Division de la construction, Statistique Canada, Ottawa, K1A 0T6 (613-995-9013).

#### Investissements privés et publics (voir les tableaux 23 et 24)

Ces tableaux divisent les dépenses totales d'immobilisations et de réparations pour le Canada en deux catégories: privée (non-gouvernementale) et publique (gouvernementale).

La catégorie publique comprend les entreprises des gouvernements municipaux, provinciaux et fédéral; les écoles, les universités et les hôpitaux provinciaux; les écoles et les hôpitaux municipaux; les habitations du gouvernement fédéral; et les dépenses aux trois niveaux de gouvernement.

Entreprises publiques comprend, en général, les entreprises qui tirent la majeure partie de leur revenu de la fourniture de biens et de services au public.

Les totaux pour les ministères du gouvernement fédéral comprennent les chiffres pour les corporations de département mais excluent les chiffres pour les corporations de propriétaire, ces dernières étant considérées comme entreprises publiques. D'autre part, les corporations de mandataire sont pour le moment classées en partie avec les entreprises publiques et en partie avec les ministères gouvernementaux.

Note(s) at end of tables. - Voir note(s) à la fin des tableaux.

Note(s) Preliminary actual 1981, intentions 1982, revised intentions 1982.

Nota: Dépenses réelles provisoires 1981, prévisions 1982, prévisions révisées 1982.

## Footnotes

- <sup>1</sup> The capital expenditures on construction for mining include outlays for on-property exploration and development for mines and exploratory and development drilling for petroleum and gas but exclude outside or general exploration for mines and geological and geophysical expenditures for petroleum and gas.
- <sup>2</sup> Also includes capital and repair expenditures by both metal and non-metal exploration companies.
- <sup>3</sup> Includes coal mines, gypsum, salt, potash and miscellaneous non-metal mines, and quarrying.
- <sup>4</sup> Also includes expenditures on facilities related to petroleum and gas wells and extraction of petroleum from shales or sands, natural gas processing plants and contract drilling for petroleum and gas.
- <sup>5</sup> Also includes expenditures for heavy water plants.
- <sup>6</sup> The SIC for broadcasting also includes community antenna television and satellite communication systems.
- <sup>7</sup> Includes toll highways and bridges, warehousing, water systems of private and provincial enterprises and other utilities.
- <sup>8</sup> See footnote 9.
- <sup>9</sup> The largest part of this item in accordance with the SIC is accounted for by expenditures of real estate companies engaged in developing, owning and leasing properties. The total represents all types of non-residential construction including factories and multi-purpose developments where facilities are provided for theatres, stores, hotel accommodation, etc.
- <sup>10</sup> Includes acquisition of machinery and equipment for lease and all other services not already shown in this table.
- <sup>11</sup> The total for federal government departments includes data for departmental crown corporations and excludes data for proprietary crown corporations which are all classified as enterprises. Agency crown corporations, on the other hand, are provisionally classified in part to enterprises and the remainder to government departments.
- <sup>12</sup> Estimates for government departments are meant to reflect the capital outlays likely to be achieved and therefore could differ from other series representing stated intentions of capital spending.
- <sup>13</sup> Capital expenditures on machinery and equipment include an estimate for "capital items charged to operating expenses", in the manufacturing, utilities and trade totals.
- <sup>14</sup> For further information regarding the private and public breakdowns, see the texts beginning Section III, Provinces and Territories and Section IV, Supplementary.
- <sup>15</sup> The percentage is calculated by dividing "Gross Fixed Capital Formation", as defined by the National Income and Expenditure Accounts, by the total "Gross National Expenditure".
- <sup>16</sup> These categories cover, in general, government owned establishments whose principal source of revenue is derived from the provision of goods and services to the public.
- <sup>17</sup> These categories include provincial hospitals, schools and universities, municipal hospitals and schools and federal government housing.
- <sup>18</sup> This category includes provincial hospitals, schools and universities.
- <sup>19</sup> This category includes municipal hospitals and schools.
- <sup>20</sup> Firms reporting in the mid-year survey were not asked to re-examine repair expenditures. Mid-year estimates are therefore a repeat of figures reported at the beginning of the year.
- <sup>21</sup> Not revised at mid-year.
- <sup>22</sup> Beginning in 1976, expenditures for the construction industry are projected from benchmark data derived from annual censuses of the construction industry.
- <sup>23</sup> Beginning with the 1976 actual, housing expenditures have been adjusted upwards to include additional home improvements such as re-insulation, landscaping and other alterations.
- <sup>24</sup> Combination food stores and other chain stores were previously combined as chain stores.

## Notes

- <sup>1</sup> Les dépenses d'immobilisations en construction pour les mines incluent les dépenses des travaux d'exploration et de mise en valeur à la mine ou au chantier de même que les dépenses pour les sondages d'exploration et de mise en valeur des puits de pétrole et de gaz; toutefois elles excluent les dépenses pour les travaux d'exploration de nature générale ou hors-chantier pour les mines et celles des études géologiques et géophysiques pour ce qui est des puits de pétrole et de gaz.
- <sup>2</sup> Comprend également les dépenses en immobilisation et en réparation des compagnies d'exploration de minerais métalliques et non métalliques.
- <sup>3</sup> Comprend les mines de charbon, de gypse, de sel gemme, de postasse et de produits non métalliques divers, et de produits de carrières.
- <sup>4</sup> Comprend aussi les dépenses d'installations se rattachant aux puits de pétrole et de gaz et à l'extraction de pétrole des schistes ou des sables, aux usines de traitement du gaz naturel et aux entreprises de forage de puits de pétrole et de gaz à forfait.
- <sup>5</sup> De même, comprend les dépenses encourues par les usines d'eau lourde.
- <sup>6</sup> La CDAÉ inclut avec radiodiffusion et télévision, les services de télévision à antenne collective et les systèmes de communication par satellite.
- <sup>7</sup> Y comprend les routes et les ponts à péage, l'entreposage, les services de distribution et de traitement d'eau d'entreprises privées et provinciales, ainsi que les autres services d'utilité publique.
- <sup>8</sup> Voir note 9.
- <sup>9</sup> Selon la CDAÉ, la majeure partie de cette catégorie de dépenses est effectuée par les sociétés dont l'activité consiste à construire, posséder et louer des biens immobiliers. Ce chef représente tous genres de construction non-résidentielle, comme des usines et des projets devant servir à plusieurs fins, tel que les bâtiments qui comprennent: théâtres, magasins, hôtels, etc.
- <sup>10</sup> Comprend l'acquisition de machines et d'équipement à des fins de location et tous les autres services qui n'apparaissent pas séparément dans ce tableau.
- <sup>11</sup> Les totaux pour les ministères du gouvernement fédéral comprennent les chiffres pour les corporations de département mais excluent les chiffres pour les corporations de propriétaire, ces dernières étant considérées comme entreprises publiques. D'autre part, les corporations de mandataire sont pour le moment classées en partie avec les entreprises publiques et en partie avec les ministères gouvernementaux.
- <sup>12</sup> Les évaluations des dépenses pour les ministères gouvernementaux sont basées sur les réalisations prévues. Par le fait même, la présente série pourrait différer d'autres statistiques se rapportant qu'aux prévisions.
- <sup>13</sup> Les dépenses en immobilisation pour les machines et l'outillage comprennent une estimation pour les "Biens-capitaux imputés sur les dépenses d'exploitation" dans les totaux pour le secteur de fabrication, le secteur des services d'utilité publique et le secteur du commerce.
- <sup>14</sup> Pour plus d'information sur la répartition privée et publique des investissements, voir les textes au début de la section III, provinces et territoires et section IV, supplémentaires.
- <sup>15</sup> Le pourcentage est calculé en divisant la "Formation brute de capital fixe" par les "Dépenses nationales brutes" tels qu'exprimés par les comptes nationaux du revenu et des dépenses.
- <sup>16</sup> Ces catégories comprennent, en général, les entreprises publiques qui tirent la majeure partie de leur revenu de la fourniture de biens et de services au public.
- <sup>17</sup> Ces catégories comprennent les écoles, les universités et les hôpitaux provinciaux; les écoles et les hôpitaux municipaux, les habitations du gouvernement fédéral.
- <sup>18</sup> Cette catégorie comprend les écoles, les universités et les hôpitaux provinciaux.
- <sup>19</sup> Cette catégorie comprend les écoles et les hôpitaux municipaux.
- <sup>20</sup> À l'occasion du relevé de la mi-année, les entreprises n'ont pas été invitées à revoir leurs projets de réparations. Les chiffres de la mi-année sont donc les mêmes que ceux du début de l'année.
- <sup>21</sup> N'a pas été révisé à la mi-année.
- <sup>22</sup> À compter de 1976, les dépenses de l'industrie de la construction sont projetées à partir de données de référence provenant de recensements annuels de l'industrie de la construction.
- <sup>23</sup> À partir de 1976, chiffres réels, les dépenses de l'habitation ont été corrigées de façon à inclure les améliorations additionnelles, telles que la ré-isolation thermique, le paysagisme et autres modifications.
- <sup>24</sup> Auparavant, on retrouvait les magasins d'alimentation combinés et les autres magasins en série sous le même titre magasins en série.

## Section V

### STATISTICAL NOTES

#### Definitions

The main emphasis of the report is on new capital rather than on non-capitalized repair expenditures. New capital expenditures include the cost of procuring, constructing and installing new durable plant and machinery, whether for replacement of worn or obsolete assets, or as net additions to existing assets. Included are all capitalized costs such as architectural, legal and engineering fees, as well as the value of work on capital assets undertaken by firms with their own labour force. Gross outlays are reported without any deduction for scrap or trade-in value of old assets. Excluded are expenditures made for the acquisition of previously existing structures, for used machinery and equipment unless imported and for land since outlays of this type involve only the transfer of property and not the creation of a capital asset.

Construction includes building construction and all types of engineering construction such as roads, dams, transmission lines and pipelines, as well as oil drilling and mine development. The machinery and equipment category takes into account the purchase of all such items which are used either in producing goods or providing services but does not cover durable goods purchased for personal use. Included, as well as industrial machinery, are transportation equipment, agricultural implements, professional and scientific equipment, office and store furnishings and other similar capital goods. Excluded, for the purpose of this report, are outlays for machinery and equipment by the Department of National Defense.

The intention is to include the cost of all new plant and equipment which normally has a life of more than one year. For this reason companies were asked to report, as capital expenditures, all purchases to be charged to fixed asset accounts. This method of reporting omits certain types of equipment which are bought regularly out of ordinary revenue and charged to current account. Adjustments have been made where necessary to take account of such omitted capital items and separate figures are shown in the relevant tables under "capital items charged to operating expenses".

## Section V

### RENSEIGNEMENTS STATISTIQUES

#### Définitions

Le rapport vise moins les réparations non-capitalisées que les immobilisations neuves. Celles-ci comprennent le coût d'acquisition, de construction et d'installation de nouvelles usines et machines durables, qu'il s'agisse de remplacer des biens usés ou désuets ou d'ajouter aux installations existantes, ainsi que tous les frais portés au compte de capital, comme les honoraires d'architectes, d'avocats et d'ingénieurs, et la valeur des travaux effectués par le propriétaire par l'entremise de ses propres ouvriers. Le rapport indique les dépenses brutes, sans déduction pour la valeur des biens mis au rancart ou cédés en échange de biens nouveaux, mais il ne comprend pas les achats de constructions existantes, de machines ou d'équipement usagés, à moins qu'ils n'aient été importés, ni de terrains, puisque dans ces cas il s'agit d'une simple cession des droits de propriété et non de la création d'un bien nouveau.

La construction comprend les bâtiments et tous les travaux de génie, comme les routes, les barrages, les lignes de transmission et les pipe-lines, ainsi que le forage de puits de pétrole et la mise en exploitation des mines. Dans le secteur des machines et de l'outillage, les achats comprennent tous les articles employés à la production de biens et de services mais non les biens durables achetés pour usage personnel. Sous cette rubrique sont inclus, en plus des machines industrielles, le matériel de transport, les instruments agricoles, le matériel professionnel et scientifique, les ameublements de bureaux et de magasins et autres biens capitaux du même genre. Toutefois, le présent rapport ne tient pas compte des montants consacrés à l'acquisition de machines et d'outillage par le Ministère de la Défense nationale.

On a visé à inclure le prix de toutes les nouvelles usines et de nouvelles machines et outillage d'une durée normale de plus d'un an. C'est pourquoi on a demandé aux sociétés d'inscrire comme immobilisations tous les achats devant être portés au compte de capital fixe. Ainsi, il n'est pas tenu compte de certains éléments d'actif achetés régulièrement au moyen de recettes ordinaires et portés au compte courant. Des rajustements ont été faits lorsqu'il a semblé nécessaire de tenir compte de ces éléments et les sommes en cause figurent aux tableaux pertinents sous le titre "Biens capitaux imputés sur les dépenses d'exploitation".

Housing is not generally considered a capital expenditure in the sense mentioned above but it has been included in this report because it forms a large proportion of construction expenditures and has cyclical fluctuations similar to those which characterize business, institutional and government capital expenditures.

The repair expenditures shown in the table represent the non-capitalized outlays made to maintain the operating efficiency of the existing stock of durable physical assets. Where the repair costs are large enough to materially lengthen the expected serviceable life of the assets, increase its capacity or otherwise raise its productivity, they are treated as capital expenditures on new construction or on new machinery and equipment.

## Methods

The figures in the various tables of this report are estimates of total expenditures. In order to approximate full coverage for Canada, adjustments were made to allow for the smaller establishments which are not surveyed and for establishments which did not report. In manufacturing, the method used to inflate the reported expenditures was to multiply the known expenditures by a factor obtained by dividing the total value of shipments for the most recent year available of all the establishments in each industry by the corresponding total for the establishments reporting in the current surveys. The use of shipments as a related indicator provides a framework of analysis in the estimation procedures to take account of relevant industry characteristics such as the size of establishments. In the utilities, trade, finance and institutional and commercial services sectors the same principle has been followed using appropriate basic data for the sector concerned. Expenditures reported by establishments for which no production or other basic data are available are included as "net additions". It is believed that the estimating procedures for non-reporting establishments and the sectors not covered by direct survey, does not introduce any great margin of error into the total. Estimates for individual industries or regions are, of course, subject to greater error than the total figures for Canada.

In a few areas, where the survey approach is not considered to be practical, expenditure estimates were arrived at independently on the basis of current trends and expert opinion in these fields. Some of the areas so estimated are agriculture and fishing investment. The estimates of total outlays in the groups covered by survey are thought to be of better quality than the independent estimates which are based on much less complete information.

La construction d'habitations n'est pas habituellement considérée comme une immobilisation au sens indiqué ci-dessus mais on l'a incluse dans ce rapport parce qu'elle représente une forte proportion des dépenses en construction et que le cycle de ses fluctuations est analogue à celui qui caractérise les immobilisations des entreprises commerciales, des institutions et des gouvernements.

Les dépenses en réparation, figurant dans les tableaux, représentent les déboursés non-capitalisés effectués en vue de maintenir les biens matériels durables en bon état de fonctionnement. Lorsque ces dépenses atteignent des sommes suffisantes et qu'elles ont pour effet d'accroître la durée prévue ou la productivité d'éléments d'actif, elles sont considérées comme des immobilisations en constructions neuves ou en machines et outillage neufs.

## Méthodes

Les chiffres qui apparaissent dans les divers tableaux sont des estimations des dépenses globales. Afin de se rapprocher le plus possible du total pour tout le Canada, on a effectué des rajustements de façon à faire la part des plus petits établissements qui n'ont pas fait partie de l'enquête ou n'y ont pas répondu. Pour le secteur de la fabrication, la méthode employée pour gonfler le montant des dépenses en immobilisation déclarées consiste à multiplier ce dernier par le facteur du rapport de la valeur totale des expéditions, pour l'année la plus récente, de tous les établissements ayant répondu à l'enquête courante, suivant la disponibilité des données. L'utilisation des expéditions comme indicateur connexe insère une analyse d'ensemble dans les procédures d'estimations afin de tenir compte des caractéristiques pertinentes tel que la grosseur d'un établissement. Pour les services d'utilité publique, le commerce, la finance, les institutions et les services commerciaux, on a appliqué le même principe en cherchant des données de base appropriées au secteur en cause. Les projets mentionnés par les établissements à l'égard desquelles aucun renseignement en matière de production ou autre ne pouvait être obtenu, sont inscrits comme "additions nettes". Il y a lieu de croire que la formule d'estimation employée à l'égard des établissements qui n'ont pas répondu au questionnaire et des secteurs que le relevé n'a pas atteint directement, n'a pas pu fausser sensiblement le montant global.

Dans certains secteurs, où la méthode d'enquête n'a pas semblé pratique, les montants ont été calculés séparément d'après la tendance courante et l'opinion de spécialistes en la matière. Cette méthode d'évaluation a été employée surtout à l'égard des investissements agricoles et de ceux de l'industrie de la pêche. Dans le cas des groupes atteints par le relevé, les estimations semblent plus sûres que pour les groupes ayant été estimés par des tiers d'après des renseignements beaucoup moins complets.

Housing estimates were made on a different basis from those derived from information submitted directly by businesses and governments. Last year's estimates of the volume of residential construction were prepared on the basis of results from surveys conducted by the Canada Mortgage and Housing Corporation, and the value estimates were prepared by Statistics Canada. These value estimates were calculated by means of a sensitive methodology making use of the duration of construction and monthly measures of work put in place for various types of construction.

Appraisal of the probable volume of new housing construction in the current year was made by representatives of the Corporation who assessed market conditions, mortgage facilities, current and proposed housing policies. Finally an allowance was made for other housing expenditures such as home conversions, mobile homes, alterations, home improvements and acquisition costs which currently account for approximately 20% of total expenditures. Allowing for probable change in construction costs, estimates were then prepared for the value of construction work carried over from last year and the value\* of work expected to be undertaken this year.

Pour l'habitation, les estimations n'ont pas été établies sur la même base que celles qui découlent des renseignements fournis directement par les entreprises ou les pouvoirs publics. Pour l'année dernière, Statistique Canada a estimé les dépenses d'habitation en se basant sur les résultats des enquêtes menées par la Société canadienne d'hypothèques et de logement et au moyen d'une méthodologie sensible fondée sur la durée des travaux et sur les réalisations mensuelles des différents types de construction.

Pour l'année courante, des estimations du volume probable des travaux de construction domiciliaire ont été faites par des représentants de la société, lesquels se fondent sur les conditions du marché, les disponibilités de financement et les politiques d'habitation proposées. Enfin, on a tenu compte des autres dépenses d'habitation telles que les transformations, les maisons mobiles, les modifications, les améliorations et les frais d'acquisition qui représentent environ 20 % des dépenses totales. En tenant compte de l'évolution probable des coûts de la construction, on a pu alors estimer la valeur des travaux reportés pour l'année dernière et celle des travaux attendus cette année.
