Perspective révisée 1986

### Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Capital Expenditures Section,  
Science, Technology and Capital Stock Division

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9815) or to the Statistics Canada reference centre in:

St. John's (772-4073)	Sturgeon Falls (753-4888)
Halifax (426-5331)	Winnipeg (949-4020)
Montréal (283-5725)	Regina (359-5405)
Ottawa (990-8116)	Edmonton (420-3027)
Toronto (973-6586)	Vancouver (666-3691)

Credit card only (973-8018)

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

### Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographique sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolinguistique et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des dépenses en immobilisations,  
Division des sciences, de la technologie et du stock de capital

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9815) ou au centre de consultation de Statistique Canada à:

St. John's (772-4073)	Sturgeon Falls (753-4888)

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## **NOTE ON CANSIM**

Data for most of the tables in this publication are available on CANSIM (Canadian Socio-Economic Information Management System). For those tables that are available, the matrix numbers for retrieval are shown on the top left box for every table.

For further information write to CANSIM, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0T6 or telephone (613) 990-8200.

This publication was prepared under the direction of:

- . **P. Koumanakos**, Director, Science, Technology and Capital Stock Division
- . **D. Lusick**, Chief, Capital Expenditures Section
- . **J. Cain**, Head, Manufacturing and Tertiary Industries
- . **J. Lacroix**, Head, Primary Industries and Public Sector

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## **NOTE CONCERNANT CANSIM**

Pour la plupart des tableaux de cette publication, les chiffres sont disponibles sur CANSIM (Système canadien d'information socio-économique). Pour les tableaux qui sont disponibles, les numéros de matrice apparaissent à gauche au haut de la page de chaque tableau.

Pour plus de renseignements, écrivez à CANSIM, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 990-8200.

## INTRODUCTION

This report sets out the 1986 revised capital spending intentions for all sectors of the economy. Comparative figures of the original intentions for 1986 and preliminary actual expenditures for 1985 are also given. The results are based on a questionnaire survey of individual companies and other spending agencies carried out in May, June and early July. The figures reflect spending plans as formulated at that time.

The estimates cover total outlays for construction and for the acquisition of producers' machinery and equipment by Canadian business, institutions and governments, together with expenditures for housing. All in all, about 28,000 establishments were surveyed for their investment intentions. In order to approximate full coverage, adjustments were made for non-surveyed and for non-reporting establishments. In a few areas, where the survey approach is not considered practical, expenditure estimates were arrived at independently on the basis of current trends and expert opinion in these fields (e.g., agriculture, fishing and housing).

Information on capital spending intentions provides a useful indication of market conditions both in the economy at large and in particular industries. Since such expenditures account for a large and relatively variable proportion of gross national expenditures, the size and content of the investment program provides significant information about demands to be placed upon the productive capacities of the economy during the period covered by the survey. In addition, information on the relative size of the capital expenditures program planned, both in total and for individual industries, gives an indication of the views management hold on prospective market demands in relation to present productive capacity.

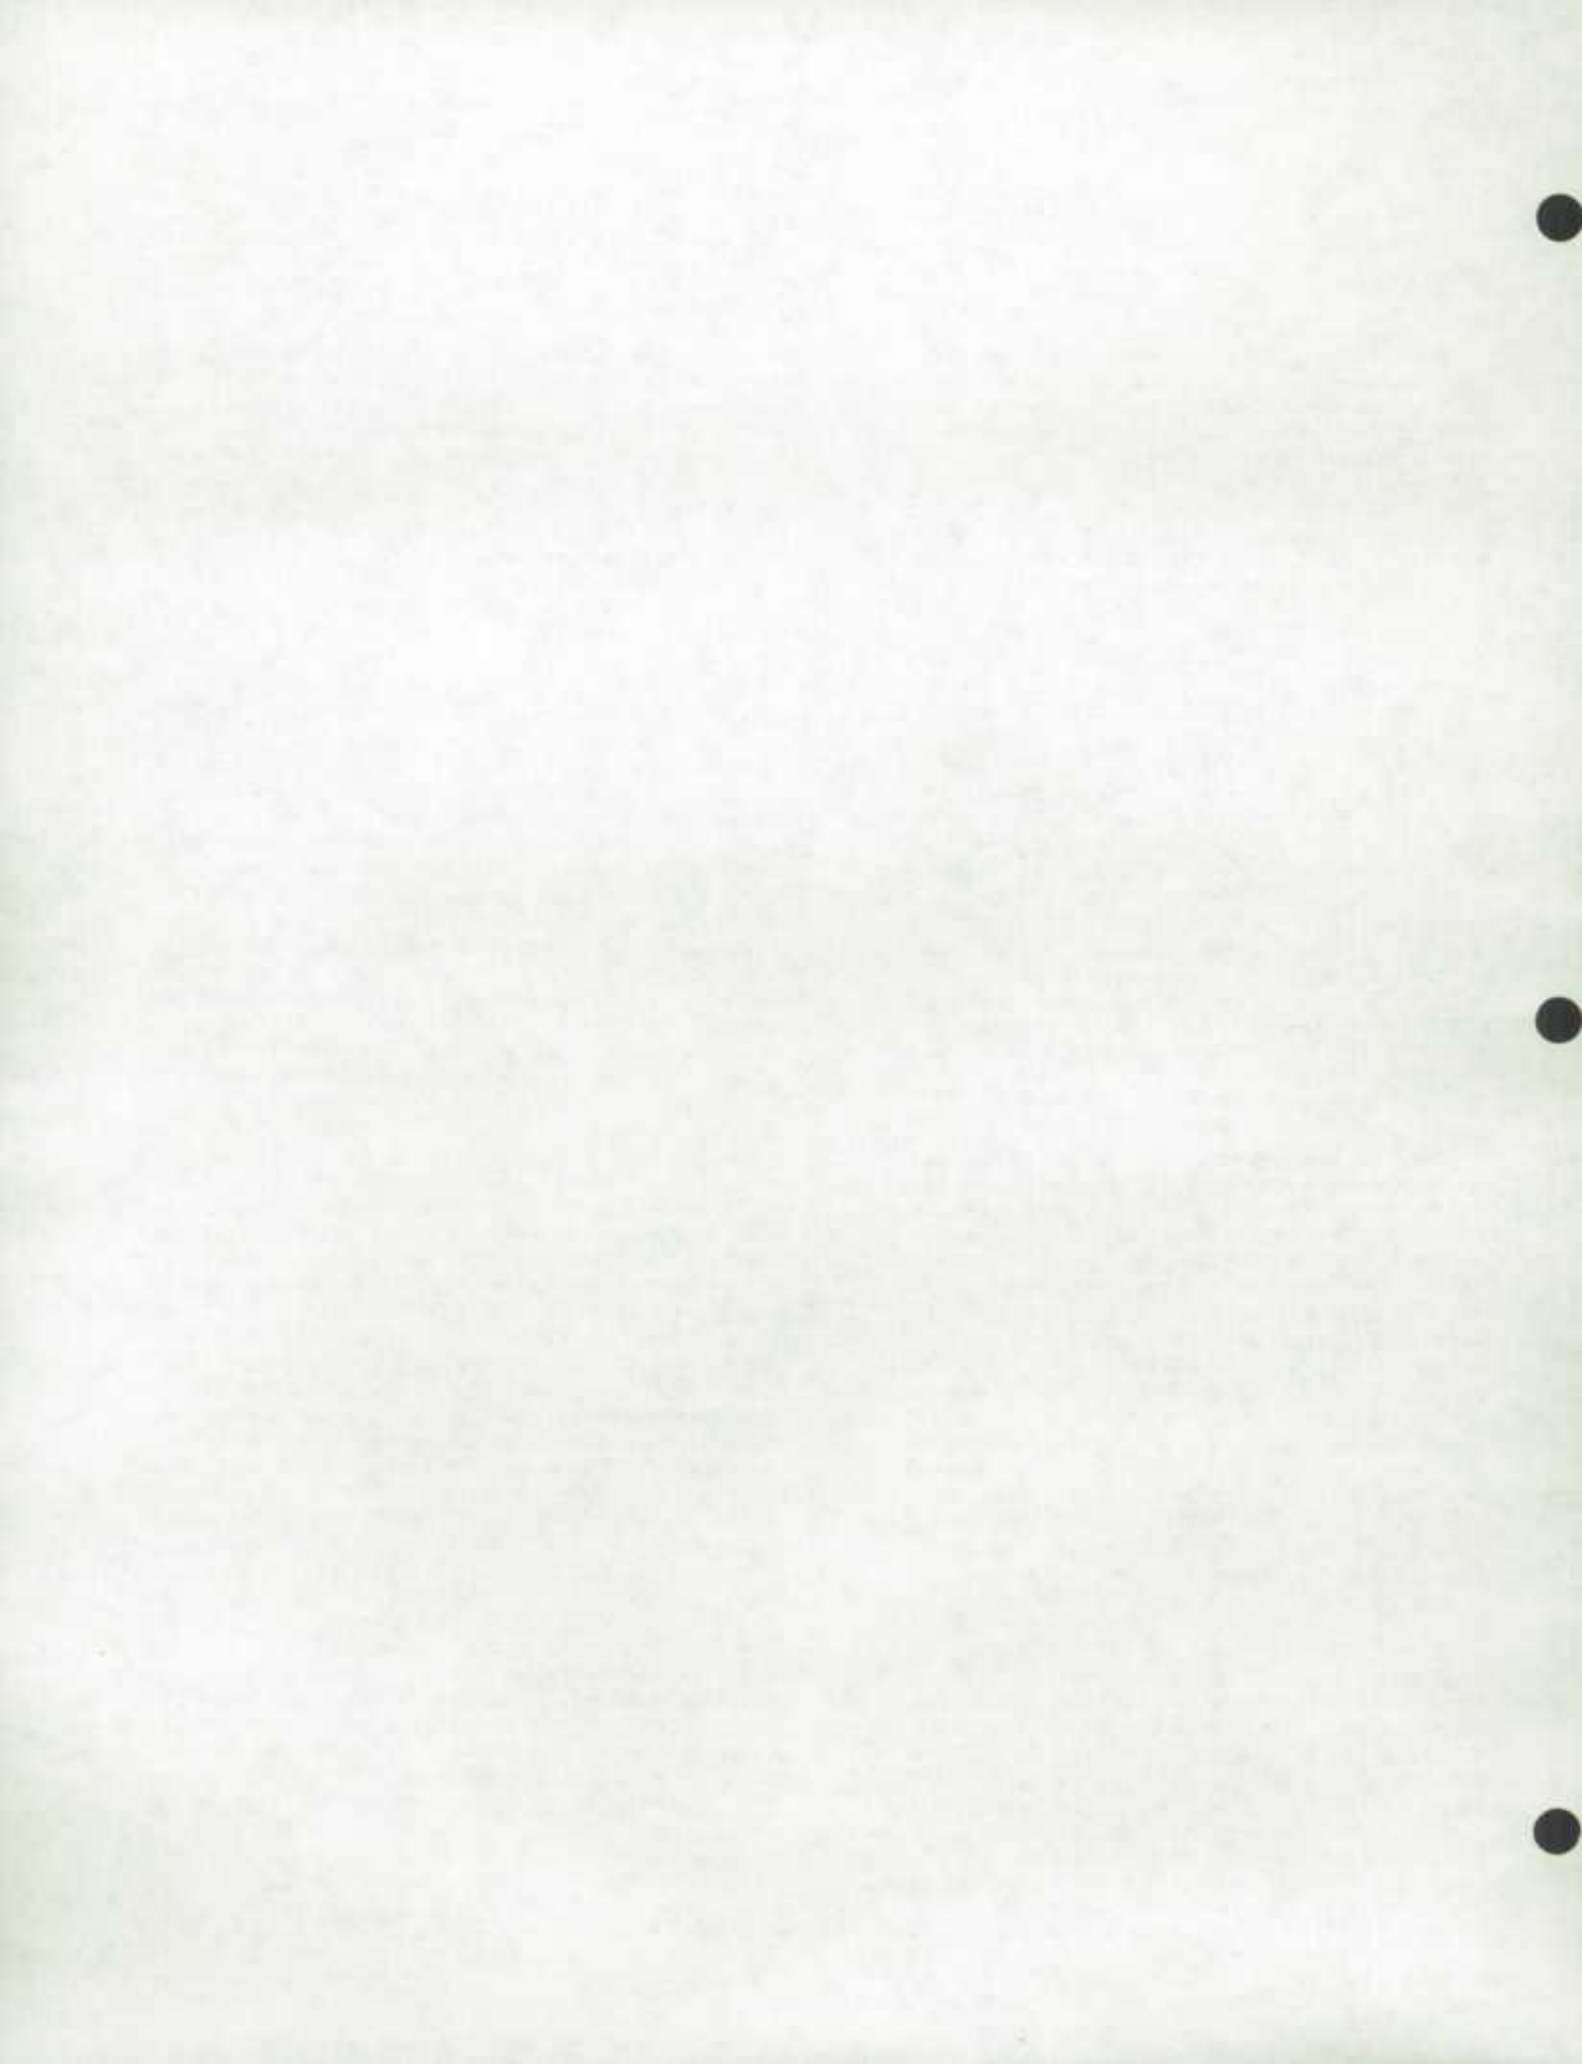

Non-capitalized repair expenditures on structures and machinery and equipment are also given in the report but these are shown separately. By including these outlays, a more complete picture is provided of all demands likely to be made on labour and materials in accomplishing the program.

Nous présentons ici un état des projets de dépenses révisées dans les divers secteurs de l'économie en 1986 (de même que les intentions originales de 1986 et les dépenses réelles provisoires de 1985). La plupart des chiffres sont fondés sur les réponses à un questionnaire adressé aux sociétés particulières et aux autres organismes qui font des immobilisations. Comme les réponses ont été préparées en mai, juin et début juillet, les chiffres représentent les immobilisations projetées à ce moment-là.

Les immobilisations prévues comprennent l'ensemble des sommes que les sociétés commerciales, les institutions et les gouvernements du Canada entendent consacrer à des constructions et à l'acquisition de machines et d'outillage, ainsi que les dépenses visant la construction d'habitations. L'étude a porté sur environ 28,000 établissements, mais les totaux ont été ajustés de façon à inclure les immobilisations des établissements qui n'ont pas répondu, ainsi que des établissements qui n'ont pas fait partie du relevé. Dans certains secteurs, où la méthode d'enquête n'a pas semblé pratique, les montants ont été calculés séparément d'après la tendance courante et l'opinion de spécialistes en la matière (e.g., agriculture, pêche et habitation).

Ces renseignements sur les projets d'immobilisations fournissent des indications utiles quant à l'état du marché dans l'économie en général et dans certaines industries particulières. Comme ces dépenses représentent une partie importante mais toujours variable des dépenses nationales brutes, l'envergure du programme des investissements et sa répartition entre les différents secteurs donnent une idée de la demande particulièrement aléatoire que les producteurs canadiens auront à satisfaire au cours de la période en cause. De plus, ces renseignements sur l'importance relative des immobilisations projetées dans l'ensemble du pays et dans les industries déterminées permettent de connaître les prévisions des chefs d'entreprises pour ce qui est de la demande en fonction de la capacité actuelle de production.

Le rapport comprend aussi, quoique sous une rubrique distincte, les sommes destinées à la réparation non-capitalisée d'immeubles, de machines et d'outillage. L'inclusion de ces sommes donne une idée plus juste des besoins de main-d'oeuvre et de matériaux que représentera l'exécution du programme.

## SECTION I

### PRIVATE AND PUBLIC INVESTMENT IN CANADA - REVISED INTENTIONS 1986

Current estimates of revised investment intentions for 1986 confirm the moderate year-to-year increase announced in March. In fact, the increase of 4.6% in the earlier total capital expenditures has been revised upwards to 5.6%. The upward revision would have been sharper but for the cutback in the investment intentions reported for petroleum and gas wells. If these intentions are realized, the increase in capital expenditures for 1986 will be well above the year-to-year increases of 2.5% recorded in 1984 but still below the 8.9% reported in 1985.

Experience in earlier years shows that on balance actual capital expenditures have exceeded revised intentions, although by varying amounts: marginally in 1980, 1981 and 1984 and within a wide range (.2% to 7.5%) between 1973 and 1980. The exceptions were 1982 and 1983 when realizations fell below intentions.

The movements by sector were dissimilar. In the case of business, intentions were revised downwards, from 2.5% announced three months ago, to 1.7%. It is probable that developments influencing the drilling programmes for petroleum and gas wells did not have time to impact intentions to invest in February but have done so now.

The drop in spending intentions on petroleum and gas wells (which account for the largest share in total business capital expenditure) was reinforced by smaller revisions made by the Transportation group. Partial offsets came from the chemical industries; from the trade-finance-commercial group and from utilities. Actually, for manufacturing as a whole, intentions were revised up to almost 27 per cent from the 17 per cent expected earlier in the year. If realized, this rate of spending would exceed the 84/85 change of 24%.

In contrast to the business group, more strength is being shown for capital spending by the public sector of institutions and governments where an increase of 8.5% is expected in 1986. Hospitals, schools and universities all show gains as do provincial and municipal governments. The federal component, however, continued to show no signs of matching the rate of expenditures during the last year. Projections for expenditures on housing were also revised upward, from a reported increase of 15% earlier to the current 17.8% above 1985. The net effect of all these revisions on the

### INVESTISSEMENTS PRIVÉS ET PUBLICS AU CANADA - PERSPECTIVE RÉVISÉE 1986

Les intentions révisées pour 1986 confirment l'augmentation modérée d'une année à l'autre annoncée en mars. En fait, l'augmentation de 4.6% du premier total des dépenses en immobilisations a été révisée à la hausse pour la porter à 5.6%. Cette révision à la hausse aurait été plus forte s'il n'y avait pas eu de réduction des intentions d'investissements dans le cas des puits de pétrole et de gaz naturel. Si ces intentions se réalisaient, l'augmentation des dépenses en immobilisations pour 1986 dépasserait sensiblement celle de 2.5% enregistrée en 1984, mais elle serait néanmoins inférieure à celle de 8.9% observée en 1985.

L'expérience des années antérieures révèle que dans l'ensemble, les dépenses en immobilisations ont dépassé les intentions révisées, mais à des degrés différents: de façon minime en 1980, 1981 et 1984 et dans une large fourchette (de 0.2% à 7.5%) entre 1973 et 1980. Les années qui font exception sont 1982 et 1983, lorsque les réalisations ont été inférieures aux intentions.

Les mouvements par secteur sont différents. Dans le cas des entreprises, les intentions sont révisées à la baisse, de 2.5% il y a trois mois, à 1.7%. Il est probable que les changements touchant les programmes de forage des puits de pétrole et de gaz naturel ne s'étaient pas encore répercutés sur les intentions d'investissements en février, mais l'ont fait depuis.

La chute des intentions d'investissements dans le cas des puits de pétrole et de gaz naturel s'est trouvée renforcée par de petites révisions apportées au groupe des transports, mais celle-ci conserve toujours la part la plus importante du total des dépenses en immobilisations des entreprises. Les branches de la chimie, du groupe commerce-finances-services commerciaux et des services publics neutralisent en partie cette évolution. En fait, pour l'ensemble du secteur de la fabrication, les intentions sont révisées pour atteindre presque 27%, comparativement à 17% plus tôt au cours de l'année. Si ce rythme de dépense se concrétise, il sera supérieur à l'augmentation de 24% enregistrée entre 1984 et 1985.

Contrairement au groupe des entreprises, le secteur public des institutions et des administrations fait preuve de plus de fermeté, avec une augmentation attendue de 8.5% en 1986. Les hôpitaux, les écoles et les universités, de même que les administrations provinciales et municipales, enregistrent tous des progressions. La composante fédérale, cependant, ne semble pas devoir atteindre le rythme de dépense enregistré l'année précédente. Les projections des dépenses en logement sont également révisées à la hausse, passant d'une augmentation prévue de 15% plus tôt au niveau actuel de 17.8% par rapport à 1985. L'effet net de toutes ces révisions sur le total

sub-total of public investment plus housing is to bring it up from a gain of 8.7% to 13.5%.

Provincially, Ontario and Quebec exceeded the national average with increases of 16.2% and 7.4% respectively and showed most of the year-over-year growth. Manitoba, at 10.3%, also posted a significant gain. The Northwest Territories, Alberta, Saskatchewan, Nova Scotia and Newfoundland, reflected the curtailment of drilling programs of petroleum and gas wells.

The following tables provide a summary of the industry year-to-year changes and also totals by industry and by province. Additional statistics for the provinces by industry, or according to private or public categories, can be obtained from CANSIM: Matrices for the revised intentions 1986 are 1188, 1192, 1196, 1200, 1204, 1208, 1212, 1216, 1220, 1224, 1228, 1244-1257. Matrices for the first intentions 1986 and the preceding years are 1190, 1194, 1198, 1202, 1206, 1210, 1214, 1218, 1222, 1226, 1230, 1066-1079.

partiel des investissements publics plus le logement devrait porter la progression générale de 8.7% à 13.5%.

Par province, l'Ontario et le Québec dépassent la moyenne nationale avec des augmentations de 16.2% et de 7.4% respectivement, et enregistrent la plus grande partie de la croissance annuelle. Le Manitoba enregistre également une progression appréciable (10.3%). Les Territoires du Nord-Ouest, l'Alberta, la Saskatchewan, la Nouvelle-Écosse et Terre-Neuve accusent tous le contrecoup de la réduction des programmes de forage des puits de pétrole et de gaz naturel.

Les tableaux suivants présentent un résumé des variations d'une année à l'autre par branche d'activité ainsi que les totaux par branche d'activité par province. Des statistiques supplémentaires pour les provinces par branche d'activité, ou selon la catégorie (privée ou publique), se trouvent dans CANSIM: les matrices pour les intentions révisées de 1986 sont 1188, 1192, 1196, 1200, 1204, 1208, 1212, 1216, 1220, 1224, 1228, 1244-1257. Les matrices pour les premières intentions de 1986 et les années précédentes sont 1190, 1194, 1198, 1202, 1206, 1214, 1218, 1222, 1226, 1230, 1066-1079.

## SECTION III

### PROVINCES AND TERRITORIES

#### Capital and Repair Expenditures by Provinces and Territories (See Tables 7-20)

The expenditures shown for each province or territory represent the value of construction work put in place and the value of machinery and equipment acquired for use within the province or territory. Such expenditures represent gross additions to the capital stock of the province or territory, and are a reflection of economic activity in that area. However, the actual production of these assets may generate its major employment and income giving effects in other regions. For example, the spending of millions of dollars on plants and equipment in Western Canada may generate considerable activity in machinery industries in Ontario and Quebec as well as construction activity in the Western provinces.

It should be appreciated that there are statistical difficulties in making a precise geographic allocation of past or anticipated investment since many business firms operating in several provinces do not either record or plan their capital expenditures geographically. As a result, it has been necessary to use approximate breakdowns in many cases. Such is the case for investment in railway rolling stock, ships, aircraft and certain other items.

The degree of detail provided is dependent to some extent on the validity of methods used to obtain provincial estimates and also on limitations imposed by the Statistics Act. These restrictions have particular relevance in the case of less populated provinces or territories.

#### Private and Public Breakdowns (See Tables 7C and 7D)

Capital and repair expenditures for the provinces and for the territories are divided into the Private (non-government) and Public (government) categories in Tables 7C and 7D.

Additional data, similar to Canada Table 23 along with government department figures for the three levels of government, are also available on the CANSIM data bank. These statistics can be retrieved from the appropriate provincial and territorial matrix back to 1963.

### PROVINCES ET TERRITOIRES

#### Immobilisations et réparations par province et territoire (voir tableaux 7-20)

Les montants indiqués pour chacune des provinces ou territoires représentent la valeur des travaux de construction qui y seront entrepris et celle des machines et de l'outillage achetés pour y être utilisés. Ces sommes constituent des additions brutes aux capitaux de la province ou territoire et donnent des indications de l'activité économique de la région. Cependant, la production effective des biens en cause peut exercer son influence du point de vue de la création d'emplois et de revenu dans d'autres régions. Ainsi, la dépense de millions de dollars en installations et équipement industriels dans l'Ouest canadien peut déterminer une grande activité dans les industries des machines en Ontario et au Québec et dans la construction dans les provinces de l'Ouest.

On éprouve, dans certains cas, des difficultés d'ordre statistique à déterminer à quel endroit s'applique tel ou tel investissement. En effet, un grand nombre d'entreprises commerciales qui font affaires dans plusieurs provinces n'établissent pas leurs plans ou leurs comptes d'immobilisations sur une base géographique. Il a donc fallu dans ces circonstances se contenter d'une répartition approximative. Ce fut le cas notamment pour les achats de matériel roulant de chemins de fer, de navires, d'avions et d'autres biens analogues.

Les détails fournis dépendent, dans une certaine mesure, de la validité des méthodes employées pour obtenir des estimations d'ordre provincial et des restrictions imposées par la Loi sur la statistique. Ces restrictions ont été particulièrement importantes dans le cas des provinces ou territoires les moins peuplés.

#### Répartitions privées et publiques (voir tableaux 7C et 7D)

La répartition entre la catégorie privée et la catégorie publique des dépenses d'immobilisations et de réparations pour les provinces et les territoires se retrouve aux tableaux 7C et 7D.

Des données supplémentaires, semblables à celles du tableau 23 (Canada), plus la ventilation des dépenses ministérielles par palier du gouvernement, sont disponibles sur la banque de données CANSIM. On peut extraire ces statistiques des matrices provinciales et territoriales appropriées, à partir de 1963.

## SECTION IV

### **SUPPLEMENTARY**

#### **Current and Constant Dollars (See Table 21)**

Constant dollars are derived by applying deflators for the major groups of structures for construction and selected weighted deflators for the machinery and equipment component of capital expenditures.

#### **Business and Social Capital (See Table 22)**

This table is a regrouping of the various SIC industries included in Tables 1-6 into the categories of Business capital and Social capital.

#### **Business Capital (Excluding Housing)**

##### **Agriculture and Food Industries**

Agriculture and fishing (0110-0210, 0410); Food and beverages (1011-1094); Tobacco products (1510-1530).

##### **Resource Based Forest and Mineral Industries**

Forestry (0310); Mining (0510-0520, 0580-0599, 0710-0799, 0830-0870, 0940-0941); Wood industries (2511-2599); Paper and allied industries (2710-2740); Primary metals (2910-2980); Non-metallic mineral products (3511-3599).

##### **Secondary and Construction Industries**

Rubber and plastics (1623-1650); Leather (1720-1799); Textiles (1810-1899); Knitting Mills (2310-2390); Clothing (2431-2499); Furniture and fixtures (2611-2680); Printing, publishing and allied industries (2860-2890); Machinery (3110-3180); Transportation equipment (3210-3290); Electrical products (3310-3399); Chemical and chemical products (3720-3799); Miscellaneous manufacturing (3911-3999); Construction industry (4040-4210).

##### **Fuel and Power (Including Distribution)**

Uranium (0570); Coal (0610); Petroleum and gas (0640); Contract drilling (0960); Petroleum and coal products (3650-3690); Pipelines (5151-5152); Electric power (5720); Gas distribution (5740); Other utilities (5790).

### **SUPPLÉMENTAIRES**

#### **Dollars courants et constants (voir le tableau 21)**

Les estimations en dollars constants s'obtiennent par dégonflement pour les principaux groupes de structures pour ce qui est de la construction, et par une pondération sélective de déflation pour les composantes machinerie et outillage de ces investissements.

#### **Investissements commerciaux et services sociaux (voir le tableau 22)**

Ce tableau rassemble les industries de la CAÉ, comprises dans les tableaux 1-6 en deux catégories: investissements commerciaux et services sociaux.

#### **Investissements commerciaux (habitation exclue)**

##### **Industries agricoles et alimentaires**

Agriculture et pêche (0110-0210, 0410); Aliments et boissons (1011-1094); Tabacs (1510-1530).

##### **Industries forestières et minérales primaires**

Forêts (0310); Mines (0510-0520, 0580-0599, 0710-0799, 0830-0870, 0940-0941); Industrie du bois (2511-2599); Papier et industries connexes (2710-2740); Métaux primaires (2910-2980); Produits des minéraux non-métalliques (3511-3599).

##### **Industries secondaires et de la construction**

Caoutchouc et plastique (1623-1650); Cuir (1720-1799); Textiles (1810-1899); Bonneterie (2310-2390); Vêtements (2431-2499); Meubles et accessoires (2611-2680); Impressions, publication et industries connexes (2860-2890); Machines (3110-3180); Matériel de transport (3210-3290); Appareils et fournitures électriques (3310-3399); Produits chimiques (3720-3799); Fabrication diverse (3911-3999); Industrie de la construction (4040-4210).

##### **Combustible et énergie (y compris distribution)**

Uranium (0570); Charbon (0610); Pétrole et gaz (0640); Forage de puits de pétrole à forfait (0960); Dérivés du pétrole et du charbon (3650-3690); Pipe-lines (5151-5152); Énergie électrique (5720); Distribution du gaz (5740); Autres services d'utilité publique (5790).

**Trade, Finance and Commercial Services**

Trade (6020-6999); Finance (7010-7030, 7210, 7370); Commercial services (8410-8990).

**Transportation, Storage and Communication**

Air transport (5010); Railway transport (5030); Water transport and services (5040-5050); Motor transport (5070, 5080, 5170, 5190); Urban transit systems (5090); Toll bridges and highways (5161); Grain elevators (5240, 5241); Other storage and warehousing (5270); Broadcasting (5430-5431, 5435); Telephone and telegraph (5440-5450); Water systems (5760).

**Housing and Social Capital****Housing****Institutions**

School (8010-8050); Universities (8060); Other institutions (8070, 8090, 8220-8280); Hospitals (8210); Churches (8310).

**Government Departments (Including Municipal Water Systems)**

Federal government (9020, 9090); Provincial government (9310); Municipal government (9510).

**Private and Public (See Tables 23 and 24)**

These tables divide the total capital and repair expenditures for Canada into Private (non-government) and Public (government) categories.

The Public category includes government enterprises for municipal, provincial and federal governments, municipal hospitals and schools, provincial hospitals, schools and universities, and federal government housing, and government department expenditures for the three levels.

Public enterprises cover, in general, government owned establishments whose principal source of revenue is derived from the provision of goods and services to the public.

The total for federal government departments includes data for departmental Crown corporations and excludes data for proprietary Crown corporations which are all classed as enterprises. Agency Crown corporations, on the other hand, are provisionally classified in part to enterprises and the remainder to government departments.

**Commerce, finances et services commerciaux**

Commerce (6020-6999); Finances (7010-7030, 7210, 7370); Services commerciaux (8410-8990).

**Transport, entreposage et communications**

Transport aérien (5010); Chemins de fer (5030); Transport par eau et services (5040-5050); Transport routier (5070, 5080, 5170, 5190); Réseaux de transport urbain (5090); Ponts et routes à péage (5161); Silos à céréales (5240, 5241); Autres entrepôts (5270); Radiodiffusion et télévision (5430-5431, 5435); Téléphone et télégraphe (5440-5450); Distribution d'eau (5760).

**Habitation et services sociaux****Habitation****Institutions**

Écoles (8010-8050); Universités (8060); Autres institutions (8070, 8090, 8220-8280); Hôpitaux (8210); Églises (8310).

**Ministères gouvernementaux (ainsi que les services de distribution d'eau des municipalités)**

Gouvernement fédéral (9020, 9090); Gouvernement provincial (9310); Gouvernement municipal (9510).

**Investissements privés et publics (voir les tableaux 23 et 24)**

Ces tableaux divisent les dépenses totales d'immobilisations et de réparations pour le Canada en deux catégories: privée (non-gouvernementale) et publique (gouvernementale).

La catégorie publique comprend les entreprises des gouvernements municipaux, provinciaux et fédéral; les écoles, les universités et les hôpitaux provinciaux; les écoles et les hôpitaux municipaux; les habitations du gouvernement fédéral; et les dépenses aux trois niveaux de gouvernement.

Entreprises publiques comprend, en général, les entreprises gouvernementales qui tirent la majeure partie de leur revenu de la fourniture de biens et de services au public.

Les totaux pour les ministères du gouvernement fédéral comprennent les chiffres pour les corporations de département mais excluent les chiffres pour les corporations de propriétaire, ces dernières étant considérées comme entreprises publiques. D'autre part, les corporations de mandataire sont pour le moment classées en partie avec les entreprises publiques et en partie avec les ministères gouvernementaux.

## Footnotes

- (1) The capital expenditures on construction for the mining sector include outlays for on-property exploration and development but exclude outside or general exploration for mines, and exclude geological and geophysical expenditures for petroleum and gas. Starting with the 1982 data, on-property exploration and development expenditures include: (i) field expenditures on all physical work and surveys, (ii) "other related costs" such as applied administrative costs, general overhead and lease rental costs. In the earlier data the definition excluded the second group of "other related costs". For further details see Catalogue 61-216 **Investment Statistics - Exploration, Development and Capital and Repair Expenditures by Mining and Exploration Companies.**
- (2) Also includes capital and repair expenditures by both metal and non-metal exploration companies.
- (3) Includes coal mines, gypsum, salt, potash and miscellaneous non-metal mines, and quarrying.
- (4) Also includes expenditures on facilities related to petroleum and gas wells and extraction of petroleum from shales or sands, natural gas processing plants and contract drilling for petroleum and gas.
- (5) Also includes expenditures for heavy water plants.
- (6) The SIC for broadcasting also includes community antenna television.
- (7) Includes toll highways and bridges, warehousing, water systems of private and provincial enterprises and other utilities.
- (8) The largest part of this item in accordance with the SIC is accounted for by expenditures of real estate companies engaged in developing, owning and leasing properties. The total represents all types of non-residential construction including factories and multi-purpose developments where facilities are provided for theatres, stores, hotel accommodation, etc.
- (9) Includes acquisition of machinery and equipment for lease and all other services not already shown in this table.

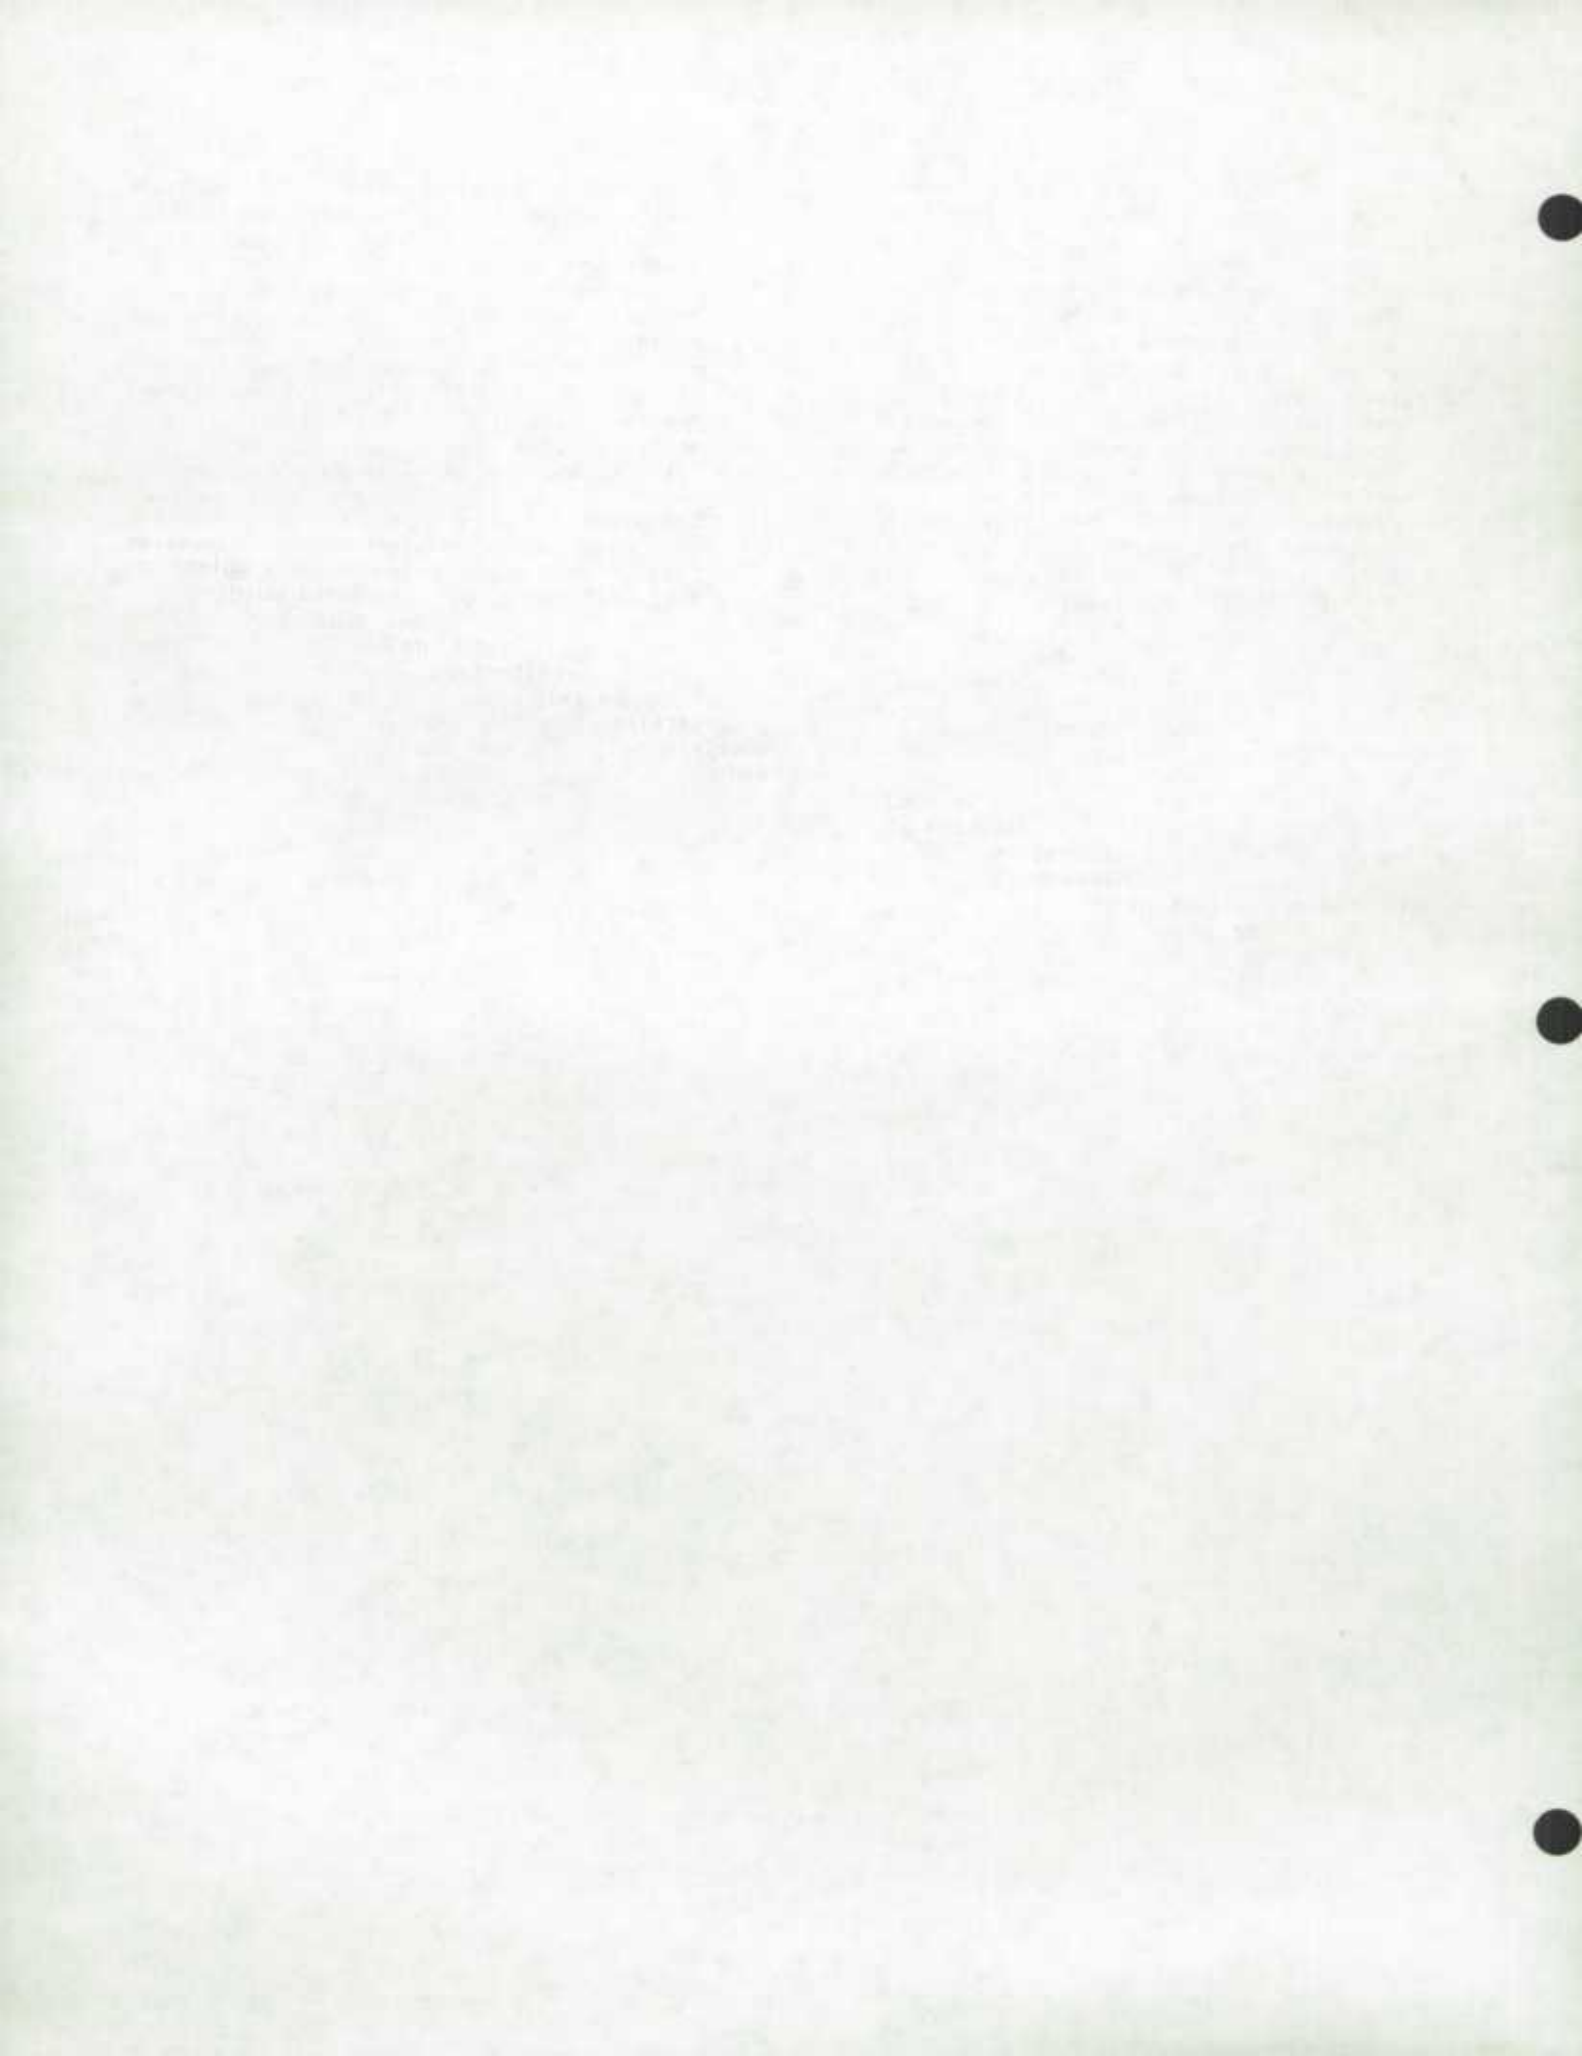

## Notes

- (1) Les dépenses d'immobilisations en construction pour le secteur minier incluent les dépenses des travaux d'exploration et de mise en valeur à la mine ou au chantier; toutefois elles excluent les dépenses pour les travaux d'exploration de nature générale ou hors-chantier pour les mines et celles des études géologiques et géophysiques pour ce qui est des puits de pétrole et de gaz. À partir de données de 1982, les dépenses d'exploration (prospection) et de mise en valeur au terrain comprend: (i) les dépenses pour les travaux physiques et les levés sur le terrain, (ii) "autres frais" tels que les frais, généraux et les frais de location. Dans les données antérieures, le deuxième groupe "autres frais" étaient exclus. Pour des renseignements détaillés sur les dépenses d'immobilisations voir n° 61-216 au catalogue Statistique des investissements - **Dépenses d'exploration, de mise en valeur, d'immobilisations et de réparations par les compagnies minières et d'exploration.**
- (2) Comprend également les dépenses en immobilisation et en réparation des compagnies d'exploration de minerais métalliques et non métalliques.
- (3) Comprend les mines de charbon, de gypse, de sel gemme, de potasse et de produits non métalliques divers, et de produits de carrières.
- (4) Comprend aussi les dépenses d'installations se rattachant aux puits de pétrole et de gaz et à l'extraction de pétrole des schistes ou des sables, aux usines de traitement du gaz naturel et aux entreprises de forage de puits de pétrole et de gaz à forfait.
- (5) De même, comprend les dépenses encourues par les usines d'eau lourde.
- (6) La CAÉ inclut avec radiodiffusion et télévision les services de télévision à antenne collective.
- (7) Y comprend les routes et les ponts à péage, l'entreposage, les services de distribution et de traitement d'eau d'entreprises privées et provinciales, ainsi que les autres services d'utilité publique.
- (8) Selon la CAÉ, la majeure partie de cette catégorie de dépenses est effectuée par les sociétés dont l'activité consiste à construire, posséder et louer des biens immobiliers. Ce chef représente tous genres de construction non-résidentielle, comme des usines et des projets devant servir à plusieurs fins, tel que les bâtiments qui comprennent: théâtres, magasins, hôtels, etc.
- (9) Comprend l'acquisition de machines et d'outillage à des fins de location et tous les autres services qui n'apparaissent pas séparément dans ce tableau.

- (10) The total for federal government departments includes data for departmental Crown corporations and excludes data for proprietary Crown corporations which are all classified as enterprises. Agency Crown corporations, on the other hand, are provisionally classified part to enterprises and the remainder to government departments.
- (11) Estimates for government departments are meant to reflect the capital outlays likely to be achieved and therefore could differ from other series representing stated intentions of capital spending.
- (12) Capital expenditures on machinery and equipment include an estimate for "capital items charged to operating expenses", in the manufacturing, utilities and trade totals.
- (13) For further information regarding the private and public breakdowns, see the texts beginning Section III, Provinces and Territories and Section IV, Supplementary.
- (14) The percentage is calculated by dividing "Gross Fixed Capital Formation", as defined by the National Income and Expenditure Accounts, by the total "Gross National Expenditure".
- (15) These categories cover, in general, government owned establishments whose principal source of revenue is derived from the provision of goods and services to the public.
- (16) These categories include provincial hospitals, schools and universities, municipal hospitals and schools and federal government housing.
- (17) This category includes provincial hospitals, schools and universities.
- (18) This category includes municipal hospitals and schools.
- (19) Firms reporting in the mid-year survey were not asked to re-examine repair expenditures. Mid-year estimates are therefore a repeat of figures reported at the beginning of the year.
- (20) Not revised at mid-year.
- (21) Housing expenditures are derived from the data available at the time of publication. Revised and adjusted data are available in CANSIM Matrix No. 0442. The next publication for Revised intentions 1987 will include the most recent adjustments in the totals.
- (22) Beginning with the 1976 actual, housing expenditures have been adjusted upwards to include additional home improvements such as re-insulation, landscaping and other alterations. Further adjustments back to 1961 are being prepared and will appear in CANSIM Matrix No. 0442 (Matrix 439 for repairs).
- (10) Les totaux pour les ministères du gouvernement fédéral comprennent les chiffres pour les corporations de département mais excluent les chiffres pour les corporations de propriétaire, ces dernières étant considérées comme entreprises publiques. D'autre part, les corporations de mandataire sont pour le moment classées en partie avec les entreprises publiques et en partie avec les ministères gouvernementaux.
- (11) Les évaluations des dépenses pour les ministères gouvernementaux sont basées sur les réalisations prévues. Par le fait même, la présente série pourrait différer d'autres statistiques se rapportant qu'aux prévisions.
- (12) Les dépenses en immobilisation pour les machines et l'outillage comprennent une estimation pour les "Biens-capitaux imputés sur les dépenses d'exploitation" dans les totaux pour le secteur de fabrication, le secteur des services d'utilité publique et le secteur du commerce.
- (13) Pour plus d'information sur la répartition privée et publique des investissements, voir les textes au début de la section III, provinces et territoires et section IV, supplémentaires.
- (14) Le pourcentage est calculé en divisant la "Formation brute de capital fixe" par les "Dépenses nationales brutes" tels qu'exprimés par les comptes nationaux du revenu et des dépenses.
- (15) Ces catégories comprennent, en général, les entreprises publiques qui tirent la majeure partie de leur revenu de la fourniture de biens et de services au public.
- (16) Ces catégories comprennent les écoles, les universités et les hôpitaux provinciaux, les écoles et les hôpitaux municipaux, les habitations du gouvernement fédéral.
- (17) Cette catégorie comprend les écoles, les universités et les hôpitaux provinciaux.
- (18) Cette catégorie comprend les écoles et les hôpitaux municipaux.
- (19) À l'occasion du relevé de la mi-année, les entreprises n'ont pas été invitées à revoir leurs projets de réparations. Les chiffres de la mi-année sont donc les mêmes que ceux du début de l'année.
- (20) N'a pas été révisé à la mi-année.
- (21) Les dépenses pour l'habitation représente les données disponibles au moment de la publication. Les données révisées sont publiées dans la matrice de CANSIM numéro 0442. La prochaine publication (Perspective révisée 1987) va inclure les ajustements les plus récents dans les totaux.
- (22) À partir de 1976, chiffres réels, les dépenses de l'habitation ont été corrigées de façon à inclure les améliorations additionnelles, telles que la ré-isolation thermique, le paysagisme et autres modifications. Les ajustements à 1961 sont entrain d'être conclus et seront dans la matrice de CANSIM numéro 0442 (la matrice 439 pour les réparations).

- (23) Combination food stores and other chain stores were previously combined as chain stores.
- (24) Public enterprises and institutions are classified as public where a government agency or department controls 50.1% or more of the voting rights.
- (25) Iron and steel mills (SIC 2910) previously published under Secondary and construction industries, are now included in Resource based forest and mineral industries.
- (26) Uranium mines (SIC 0570) previously published under Resource based forest and mineral industries, are now included in Fuel and power.
- (23) Auparavant, on retrouvait les magasins d'alimentation combinés et les autres magasins en série sous le même titre magasins en série.
- (24) Les entreprises et institutions sont considérées comme étant publiques lorsqu'un ministère ou organisme gouvernemental contrôle 50.1% ou plus des droits de vote.
- (25) La sidérurgie (CAÉ 2910) est maintenant comprise dans les industries forestières et minérales primaires et non dans les industries secondaires et de la construction.
- (26) Les mines d'uranium (CAÉ 0570) sont maintenant comprises dans le groupe combustible et énergie et non dans les industries forestières et minérales.

## SECTION V

### STATISTICAL NOTES

#### Definitions

The main emphasis of the report is on new capital rather than on non-capitalized repair expenditures. New capital expenditures include the cost of procuring, constructing and installing new durable plant and machinery, whether for replacement of worn or obsolete assets, or as net additions to existing assets. Included are all capitalized costs such as architectural, legal and engineering fees, as well as the value of work on capital assets undertaken by firms with their own labour force. Gross outlays are reported without any deduction for scrap or trade-in value of old assets. Excluded are expenditures made for the acquisition of previously existing structures, for used machinery and equipment unless imported and for land since outlays of this type involve only the transfer of property and not the creation of a capital asset.

Construction includes building construction and all types of engineering construction such as roads, dams, transmission lines and pipelines, as well as oil drilling and mine development. The machinery and equipment category takes into account the purchase of all such items which are used either in producing goods or providing services but does not cover durable goods purchased for personal use. Included, as well as industrial machinery, are transportation equipment, agricultural implements, professional and scientific equipment, office and store furnishings and other similar capital goods. Excluded, for the purpose of this report, are outlays for machinery and equipment by the Department of National Defence.

The intention is to include the cost of all new plant and equipment which normally has a life of more than one year. For this reason companies were asked to report, as capital expenditures, all purchases to be charged to fixed asset accounts. This method of reporting omits certain types of equipment which are bought regularly out of ordinary revenue and charged to current account. Adjustments have been made where necessary to take account of such omitted capital items and separate figures are shown in the relevant tables under "capital items charged to operating expenses".

### RENSEIGNEMENTS STATISTIQUES

#### Définitions

Le rapport vise moins les réparations non-capitalisées que les immobilisations neuves. Celles-ci comprennent le coût d'acquisition, de construction et d'installation de nouvelles usines et machines durables, qu'il s'agisse de remplacer des biens usés ou désuets ou d'ajouter aux installations existantes, ainsi que tous les frais portés au compte de capital, comme les honoraires d'architectes, d'avocats et d'ingénieurs. et la valeur des travaux effectués par le propriétaire par l'entremise de ses propres ouvriers. Le rapport indique les dépenses brutes, sans déduction pour la valeur des biens mis au rancart ou cédés en échange de biens nouveaux, mais il ne comprend pas les achats de constructions existantes, de machines ou d'outillage usagés, à moins qu'ils n'aient été importés, ni de terrains, puisque dans ces cas il s'agit d'une simple cession des droits de propriété et non de la création d'un bien nouveau.

La construction comprend les bâtiments et tous les travaux de génie, comme les routes, les barrages, les lignes de transmission et les pipelines, ainsi que le forage de puits de pétrole et la mise en exploitation des mines. Dans le secteur des machines et de l'outillage, les achats comprennent tous les articles employés à la production de biens et de services mais non les biens durables achetés pour usage personnel. Sous cette rubrique sont inclus, en plus des machines industrielles, le matériel de transport, les instruments agricoles, le matériel professionnel et scientifique, les ameublements de bureaux et de magasins et autres biens capitaux du même genre. Toutefois, le présent rapport ne tient pas compte des montants consacrés à l'acquisition de machines et d'outillage par le Ministère de la Défense nationale.

On a visé à inclure le prix de toutes les nouvelles usines et de nouvelles machines et outillage d'une durée normale de plus d'un an. C'est pourquoi on a demandé aux sociétés d'inscrire comme immobilisations tous les achats devant être portés au compte de capital fixe. Ainsi, il n'est pas tenu compte de certains éléments d'actif achetés régulièrement au moyen de recettes ordinaires et postés au compte courant. Des rajustements ont été faits lorsqu'il a semblé nécessaire de tenir compte de ces éléments et les sommes en cause figurent aux tableaux pertinents sous le titre "Bien-capitaux imputés sur les dépenses d'exploitation".

Housing is not generally considered a capital expenditure in the sense mentioned above but it has been included in this report because it forms a large proportion of construction expenditures and has cyclical fluctuations similar to those which characterize business, institutional and government capital expenditures.

The repair expenditures shown in the table represent the non-capitalized outlays made to maintain the operating efficiency of the existing stock of durable physical assets. Where the repair costs are large enough to materially lengthen the expected serviceable life of the assets, increase its capacity or otherwise raise its productivity, they are treated as capital expenditures on new construction or on new machinery and equipment.

### Methods

The figures in the various tables of this report are estimates of total expenditures. In order to approximate full coverage for Canada, adjustments were made to allow for the smaller establishments which are not surveyed and for establishments which did not report. In manufacturing, the method used to inflate the reported expenditures was to multiply the known expenditures by a factor obtained by dividing the total value of shipments for the most recent year available of all the establishments in each industry by the corresponding total for the establishments reporting in the current surveys. The use of shipments as a related indicator provides a framework of analysis in the estimation procedures to take account of relevant industry characteristics such as the size of establishments. In the utilities, trade, finance and institutional and commercial services sectors the same principle has been followed using appropriate basic data for the sector concerned. Expenditures reported by establishments for which no production or other basic data are available are included as "net additions". It is believed that the estimating procedures for non-reporting establishments and the sectors not covered by direct survey, does not introduce any great margin of error into the total. Estimates for individual industries or regions are, of course, subject to greater error than the total figures for Canada.

In a few areas, where the survey approach is not considered to be practical, expenditure estimates were arrived at independently on the basis of current trends and expert opinion in these fields. Some of the areas

La construction d'habitations n'est pas habituellement considérée comme une immobilisation au sens indiqué ci-dessus mais on l'a incluse dans ce rapport parce qu'elle représente une forte proportion des dépenses en construction et que le cycle de ses fluctuations est analogue à celui qui caractérise les immobilisations des entreprises commerciales, des institutions et des gouvernements.

Les dépenses en réparation, figurant dans les tableaux, représentent les déboursés non-capitalisés effectués en vue de maintenir les biens matériels durables en bon état de fonctionnement. Lorsque ces dépenses atteignent des sommes suffisantes et qu'elles ont pour effet d'accroître la durée prévue ou la productivité d'éléments d'actif, elles sont considérées comme des immobilisations en constructions neuves ou en machines et outillage neufs.

### Méthodes

Les chiffres qui apparaissent dans les divers tableaux sont des estimations des dépenses globales. Afin de se rapprocher le plus possible du total pour tout le Canada, on a effectué des rajustements de façon à faire la part des plus petits établissements qui n'ont pas fait partie de l'enquête ou n'y ont pas répondu. Pour le secteur de la fabrication, la méthode employée pour gonfler le montant des dépenses en immobilisation déclarées consiste à multiplier ce dernier par le facteur du rapport de la valeur totale des expéditions, pour l'année la plus récente, de tous les établissements ayant répondu à l'enquête courante, suivant la disponibilité des données. L'utilisation des expéditions comme indicateur connexe insère une analyse d'ensemble dans les procédures d'estimations afin de tenir compte des caractéristiques pertinentes tel que la grosseur d'un établissement. Pour les services d'utilité publique, le commerce, la finance, les institutions et les services commerciaux, on a appliqué le même principe en cherchant des données de base appropriées au secteur en cause. Les projets mentionnés par les établissements à l'égard desquels aucun renseignement en matière de production ou autre ne pouvait être obtenu, sont inscrits comme "additions nettes". Il y a lieu de croire que la formule d'estimation employée à l'égard des établissements qui n'ont pas répondu au questionnaire et des secteurs que le relevé n'a pas atteint directement, n'a pas pu fausser sensiblement le montant global.

Dans certains secteurs, où la méthode d'enquête n'a pas semblé pratique, les montants ont été calculés séparément d'après la tendance courante et l'opinion de spécialistes en la matière. Cette méthode d'évaluation a été employée surtout

so estimated are agriculture and fishing investment. The estimates of total outlays in the groups covered by survey are thought to be of better quality than the independent estimates which are based on much less complete information.

Housing estimates were made on a different basis from those derived from information submitted directly by businesses and governments. Last year's estimates of the volume of residential construction were prepared on the basis of results from surveys conducted by the Canada Mortgage and Housing Corporation, and the value estimates were prepared by Statistics Canada. These value estimates were calculated by means of a sensitive methodology making use of the duration of construction and monthly measures of work put in place for various types of construction.

Appraisal of the probable volume of new housing construction in the current year was made by representatives of the Corporation who assessed market conditions, mortgage facilities, current and proposed housing policies. Finally an allowance was made for other housing expenditures such as home conversions, mobile homes, alterations, home improvements and acquisition costs which currently account for approximately 20% of total expenditures. Allowing for probable change in construction costs, estimates were then prepared for the value of construction work carried over from last year and the value of work expected to be undertaken this year.

à l'égard des investissements agricoles et de ceux de l'industrie de la pêche. Dans le cas des groupes atteints par le relevé, les estimations semblent plus sûres que pour les groupes ayant été estimés par des tiers d'après des renseignements beaucoup moins complets.

Pour l'habitation, les estimations n'ont pas été établies sur la même base que celles qui découlent des renseignements fournis directement par les entreprises ou les pouvoirs publics. Pour l'année dernière, Statistique Canada a estimé les dépenses d'habitation en se basant sur les résultats des enquêtes menées par la Société canadienne d'hypothèques et de logement et au moyen d'une méthodologie sensible fondée sur la durée des travaux et sur les réalisations mensuelles des différents types de construction.

Pour l'année courante, des estimations du volume probable des travaux de construction domiciliaire ont été faites par des représentants de la société, lesquels se fondent sur les conditions du marché, les disponibilités de financement et les politiques d'habitation proposées. Enfin, on a tenu compte des autres dépenses d'habitation telles que les transformations, les maisons mobiles, les modifications, les améliorations et les frais d'acquisition qui représentent environ 20% des dépenses totales. En tenant compte de l'évolution probable des coûts de la construction, on a pu alors estimer la valeur des travaux reportés pour l'année dernière et celle des travaux attendus cette année.
