## Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between
Statistics Canada, the citizens of Canada, its businesses, governments and other
institutions. Accurate and timely statistical information could not be produced without
their continued cooperation and goodwill.

## Introduction

Under the authority of the Minister of Innovation, Science and Economic Development, Statistics Canada administers the Corporations Returns Act which requires the collection of financial and ownership information on corporations conducting business in Canada. This information is used to evaluate the extent of foreign control of the Canadian corporate economy.

The Corporations Returns Act requires that an annual report be submitted to Parliament summarizing the extent to which foreign control is prevalent in Canada. This is the report for reference year 2014.

In this report, three components are used to measure foreign control: assets, operating revenues and operating profits.

- Asset-based measures of foreign control provide a longer term perspective. Assets are a stock item, reflecting economic decisions and market conditions that evolve more slowly over time.
- Revenue-based measures, on the other hand, represent a flow item and are closely tied to the business cycle. Revenues tend to reflect current business conditions, causing them to be more volatile than asset-based measures.
- Profits are a measure of the financial health and well-being of an economy and can be used to assess its performance and sustainability.

These statistics are compiled from enterprise level data. An enterprise can be a single corporation or a family of corporations under common ownership and/or control, for which consolidated financial statements are produced.

The report covers all incorporated enterprises in Canada, including federal and provincial government business enterprises (GBEs) but excludes enterprises classified under the North American Industry Classification System (NAICS) to Management of Companies and Enterprises (NAICS 55); Religious Organizations (NAICS 8131); Political Organizations (NAICS 81394); Public Administration (NAICS 91), as well as Funds and other Financial Vehicles (NAICS 526). GBEs are public sector enterprises engaged in operations of a commercial nature.

All industry analysis is based on 21 groups of industries which have been defined using NAICS.

## Highlights

- In 2014, the value of assets, revenues and profits in the Canadian economy increased over the previous year. The share of assets held by foreign-controlled enterprises decreased from $18.3 \%$ to $18.1 \%$, while the foreign-controlled share of revenues also fell, from $29.1 \%$ to $28.7 \%$. The foreign-controlled share of operating profits was steady at $20.1 \%$.
- Over the past decade, shares of assets and revenues of foreign-controlled enterprises have remained relatively stable. Asset shares have fluctuated between a high of $21.6 \%$ and a low of $18.1 \%$. Revenue shares were between $30.1 \%$ and $28.7 \%$. Foreign-controlled profit shares, while showing somewhat more variation, fluctuated by less than 10 percentage points over the 10 year period 2005-2014.
- In the non-financial industries, the share of assets and revenues under foreign control decreased slightly as a result of higher growth in Canadian-controlled enterprises. The foreign-controlled assets share was $25.6 \%$ in 2014 , down slightly from $25.7 \%$ the previous year while the revenue share decreased from $30.3 \%$ to $30.0 \%$. The profit share remained unchanged from 2013 at $23.3 \%$. Manufacturing remained the non-financial industry with the largest share of foreign control, followed by Wholesale trade.
- In the finance and insurance industries, the foreign-controlled share of assets decreased slightly, from $12.2 \%$ to $12.0 \%$, while the revenue share decreased from $17.7 \%$ to $17.1 \%$. The foreign-controlled share of profit fell as well from $13.2 \%$ to $12.5 \%$. Non-depository credit intermediation had the highest share of foreign-controlled enterprises within the Finance and insurance industries.
- Enterprises from the United States, the United Kingdom, the Netherlands, France, Germany and Japan accounted for $80.3 \%$ of the foreign-controlled assets in Canada in 2014. U.S.-controlled enterprises maintained the largest overall share, comprising $49.5 \%$ of total foreign-controlled assets, $55.5 \%$ of revenues, and $57.4 \%$ of profits.

## Analysis

## All Industries

In 2014, enterprises operating in Canada held $\$ 10.8$ trillion in assets, generated $\$ 3.9$ trillion in operating revenues, and earned $\$ 388.7$ billion in operating profits. Assets increased $6.6 \%$, operating revenues increased $5.7 \%$, and operating profits rose $7.3 \%$ from 2013 levels.

Both Canadian and foreign-controlled asset values increased in 2014, by $6.8 \%$ and $5.6 \%$, respectively. The foreign-controlled asset share dropped, from $18.3 \%$ in 2013 to $18.1 \%$ in 2014 . This was the seventh consecutive year with a decrease in the share of assets under foreign control.

Foreign-controlled revenue growth was up by $4.2 \%$, compared with an increase of $6.3 \%$ for enterprises under Canadian control. The share of revenues under foreign control in 2014 was $28.7 \%$, down from $29.1 \%$ in 2013.

Canadian-controlled operating profits grew 7.2\% in 2014, and those under foreign-control increased by 7.7\%. The share of profits under foreign control in 2014 remained at 20.1\%.

## Non-financial Industries

In 2014, enterprises in non-financial industries held $\$ 4.8$ trillion in assets, generated $\$ 3.5$ trillion in revenues and earned $\$ 274.8$ billion in profits. Non-financial industries represented less than one-half ( $44.8 \%$ ) of the assets for all industries in Canada, but generated $89.7 \%$ of revenues and $70.7 \%$ of profits.

Assets held by Canadian-controlled enterprises rose $6.2 \%$ in 2014, while those held by foreign-controlled enterprises increased $5.8 \%$. As a result, the share of assets under foreign control was $25.6 \%$, down slightly from $25.7 \%$ the previous year.

Total operating revenues rose in 2014, with revenue under Canadian control up $5.5 \%$, and revenue under foreign control up $4.0 \%$ from 2013. The share of operating revenues under foreign control decreased slightly to $30.0 \%$ from $30.3 \%$ the year before.

Operating profits grew $11.8 \%$ in 2014. Both profits in Canadian and foreign controlled non-financial industries grew $11.8 \%$. The foreign-controlled share of operating profits was unchanged from the previous year at $23.3 \%$.

## Finance and Insurance Industries

In 2014, enterprises operating in the financial sector accounted for $\$ 6.0$ trillion in assets, $\$ 401.1$ billion in revenues and $\$ 113.9$ billion in profits. This represented $55.2 \%, 10.3 \%$ and $29.3 \%$ of total assets, revenues and profits, respectively. Both Canadian and foreign-controlled financial enterprises posted increases in assets and revenues in 2014, while recording a drop in profits.

Canadian-controlled and foreign-controlled financial enterprises reported asset growth in 2014, increasing at $7.2 \%$ and $5.2 \%$, respectively. The foreign-controlled share of assets was down slightly to $12.0 \%$, from $12.2 \%$ the previous year.

Revenues of Canadian-controlled enterprises rose $12.2 \%$ in 2014 , and climbed $7.6 \%$ for foreign-controlled enterprises. The share of revenues under foreign control decreased to $17.1 \%$ from $17.7 \%$ the previous year.

Operating profits for Canadian-controlled enterprises in the financial sector edged down $1.4 \%$ in 2014, while foreign-controlled profits dropped by $7.6 \%$. The foreign-controlled share of operating profits was $12.5 \%$, down from $13.2 \%$ the year before.

Foreign-controlled enterprises have been losing asset, revenue, and profit shares in the Canadian financial sector for eight consecutive years. Among all financial industries, non-depository credit intermediation has historically been and remains the one with the highest level of foreign-control.

Chart 6
Annual change in operating revenues by control, 2010 to 2014 - Finance and insurance industries

## Selected Industries

## Manufacturing

The Canadian manufacturing sector reported assets valued at $\$ 906.5$ billion in 2014, up $4.2 \%$ from 2013. Assets held by Canadian-controlled enterprises increased $2.8 \%$, while those held by foreign-controlled enterprises increased by $5.6 \%$. In 2014, the foreign-controlled share was $49.6 \%$, representing a slight increase from $48.9 \%$ in 2013 . This was the first year posting an increase in foreign control after five consecutive years of decline. The share of assets under foreign control in manufacturing has remained the highest of all 21 industries since 2008.

Both Canadian-controlled and foreign-controlled manufacturers showed revenue growth in 2014, at $0.8 \%$ and $5.6 \%$, respectively. More than half of the manufacturing sector's revenue is generated by foreign-controlled enterprises. The share of revenue under foreign control was at $51.8 \%$, an increase from $50.6 \%$ the previous year.

Manufacturing operating profits grew by $17.8 \%$ in 2014 following a $6.9 \%$ drop in 2013. Canadian-controlled enterprises showed $11.7 \%$ growth in profits, while foreign-controlled entities reported a $23.6 \%$ increase. The share of manufacturing profits under foreign control rose from $51.1 \%$ to $53.6 \%$.

## Oil and gas extraction and support activities

The oil and gas extraction and support activities industry posted increases in assets, revenues and profits in 2014. Assets increased by $5.5 \%$, revenues by $11.6 \%$, and profits increased by $53.6 \%$ from the previous year.

Canadian-controlled enterprises held assets valued at $\$ 403.8$ billion, up $6.8 \%$ from the previous year. The industry's assets under foreign control were valued at $\$ 252.3$ billion, up $3.5 \%$ from the previous year. The foreign-controlled share of these assets contracted to $38.5 \%$, from $39.2 \%$ in 2013.

Canadian-controlled enterprises reported increases in revenues of $19.3 \%$ between 2013 and 2014 while revenue increases for foreign-controlled enterprises were more modest at $2.7 \%$. Foreign-controlled revenue shares fell to $42.4 \%$, from $46.1 \%$ the year before.

Following a $\$ 2.6$ billion increase in profits from 2012 to 2013, enterprises in oil and gas extraction and support activities registered a $\$ 6.3$ billion increase in 2014, bringing the total value of operating profits to $\$ 18.1$ billion. Canadian-controlled enterprise profits increased by $82.8 \%$, while those under foreign control decreased by $1.3 \%$. These shifts shrunk the foreign-controlled share of profits to $22.3 \%$ in 2014 , from $34.7 \%$ in 2013.

## Depository credit intermediaries

In 2014, enterprises operating in the depository credit intermediation industry, which consists mostly of banks, accounted for $62.0 \%$ of the assets in the finance and insurance sector of Canada, along with $35.1 \%$ of revenues and $39.0 \%$ of profits. Total assets for this industry grew $6.7 \%$, to $\$ 3.7$ trillion. Total revenues rose by $4.6 \%$, to $\$ 140.6$ billion while profits grew by $4.9 \%$ to $\$ 44.4$ billion.

Assets, revenues and profits of Canadian-controlled enterprises in this heavily regulated industry increased by $6.7 \%, 4.9 \%$ and $5.3 \%$, respectively. Foreign-controlled enterprises also made positive gains in assets which grew by $7.5 \%$. Revenues decreased by $0.6 \%$ and profits decreased by $1.9 \%$.

Relative shares of assets held by foreign-controlled enterprises were up slightly in 2014 at $5.3 \%$. Shares of foreign controlled revenues declined to $4.7 \%$ in 2014 from a level of $5.0 \%$ in 2013 while profits declined to $5.4 \%$ in 2014 from $5.8 \%$ in 2013.

## Foreign control by country

Returns collected under the Corporations Returns Act show that foreign control in Canada is represented by enterprises from over 80 different countries around the world. However, $80.3 \%$ of assets held under foreign-control can be attributed to just six countries, as shown in Text table 10.

American-controlled enterprises continued to have the highest share of foreign-controlled assets, revenues and profits in 2014. Their share of assets decreased slightly from $49.8 \%$ to $49.5 \%$, and their share of revenues decreased from $56.9 \%$ to $55.5 \%$. The share of profits earned by U.S.-controlled enterprises also decreased from $60.2 \%$ in 2013 to $57.4 \%$ in 2014. Foreign assets held by enterprises under U.S. control in the non-financial sector were 2.4 times larger than those in the financial sector in 2014.

Enterprises from the second largest source of foreign control in Canada, the United Kingdom, reported relatively constant asset shares at $13.8 \%$. In 2014, the share of revenues under British control rose from $8.2 \%$ to $8.5 \%$, while the share of profits fell from $8.2 \%$ to $5.6 \%$. Unlike American-controlled enterprises, assets under U.K. control were more concentrated in the financial sector, with a value approximately 2.3 times greater than in the non-financial sector.

Dutch-controlled enterprises held the third largest proportion of foreign-controlled assets in Canada in 2014. Their share of assets was stable at $4.9 \%$ while their share of revenues fell from $4.3 \%$ to $4.0 \%$. Their profit share fell from $2.8 \%$ to $2.6 \%$ between 2014 and 2013. Dutch-controlled assets in the non-financial sector were approximately 1.6 times the size of assets in the financial sector in 2014.

Text table 10

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Table 9
Transportation and warehousing

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Table 17
Administrative and support, waste management and remediation services

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Table 22
Total finance and insurance industries

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

| 2005 | 18.2 | 7.3 | 3.1 | 28.7 | 59.4 | 11.9 | 71.3 | 100 |

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Table 25
Total finance and insurance industries (by detailed country of control)

|  | United States of America | European Union |  |  |  |  | Other Foreign |  | Under foreign control |

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Table 26
Total non-financial industries (by detailed country of control)

|  | United States of America | European Union |  |  |  |  | Other Foreign |  | Under foreign control |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | United Kingdom | Germany | France | Netherlands | Other European European Union | Japan | Residual |  |

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

Table 27
Total all industries (by detailed country of control)

Note(s): Shares are calculated by dividing a value for one or a group of countries of control (numerator) by the total value for all countries of control (denominator). When profits in the numerator are negative, the corresponding profit share will be negative. When profits in the numerator are larger than those in denominator, the profit share will be greater than $100 \%$. This can occur when the denominator is the sum of negative and positive profits. Text table data may not correspond exactly with statistical tables due to rounding.

## Concepts and methods

This section outlines the basic concepts and methods needed to understand the data in this report.

## Coverage

The data in this publication are compiled for statistical enterprises. An enterprise is a single corporation or a family of corporations under common ownership and/or control, for which consolidated financial statements are produced.

These enterprises are classified according to the 2012 North American Industry Classification System (NAICS). Each enterprise is assigned a six-digit NAICS code in two steps. First, a NAICS code is assigned to each establishment belonging to an enterprise. The enterprise is then assigned the NAICS code for the industry which accounts for the largest share of value-added across all the establishments that make up the enterprise. For publication purposes, enterprise data based on the six-digit NAICS codes have been aggregated into 21 industry groups, such as mining and manufacturing (Text table 1).

The statistics in the report cover all incorporated enterprises in Canada, including federal and provincial government business enterprises (GBEs), but excluding enterprises classified to Management of Companies and Enterprises (NAICS 55); Religious Organizations (NAICS 8131); Political Organizations (NAICS 81394); Public Administration (NAICS 91); as well as Funds and other Financial Vehicles (NAICS 526). GBEs are public sector enterprises engaged in operations of a commercial nature.
Text table 1
Publication level of aggregation

|  | NAICS Canada 2012 |
| :--- | ---: |
| Total Non-Financial | 11 |
| Agriculture, forestry, fishing and hunting | 211,213 |
| Oil and gas extraction and support activities | 212 |
| Mining and quarrying (except oil and gas) | 22 |
| Utilities | 23 |
| Construction | $31,32,33$ |
| Manufacturing | 41 |
| Wholesale trade | 44,45 |
| Retail trade | 48 |
| Transportation and warehousing | 49 |
| Information and cultural industries | 51 |
| Real estate and rental and leasing | 53 |
| Professional, scientific and technical services | 54 |
| Administrative and support, waste management and remediation services | 56 |
| Educational, health care and social assistance services | 61,62 |
| Arts, entertainment and recreation | 71 |
| Accommodation and food services | 72 |
| Repair, maintenance and personal services | $811,812,813$ |
| TotalFinancial and Insurance <br> Depository credit intermediation | 5211,5221 |
| Non-depository credit intermediation | 5222 |
| Insurance carriers and related activities | 524 |
| Other financial industries | 5223,523 |

## Data Sources

The Corporations Returns Act report focuses on the statistical enterprise. It is based on a dataset which links country of control information derived at the legal entity level, with financial data compiled at the enterprise level from Industrial Organization and Finance Division's (IOFD) Financial and Taxation Statistics for Enterprises program.

## Country of control data

The country of control data are derived from ownership schedules filed annually with Statistics Canada by corporations liable under the Corporations Returns Act, and information obtained from the Canada Revenue Agency's administrative records.

Statistics Canada collects ownership information from incorporated businesses in Canada whose gross revenues exceed $\$ 200$ million, whose assets exceed $\$ 600$ million or whose long-term debt or equity owing to non-residents exceeds a book value of $\$ 1$ million. This information is used to establish links between parent corporations and their subsidiaries, to define corporate ownership structures, and to determine the ultimate country of control for each corporate structure. The ownership information is supplemented by research based on other publicly available sources which include web sites, gazettes, press clippings, as well as federal and provincial business registries.

Statistics Canada relies on information from Canada Revenue Agency administrative records to determine the country of control for corporations whose assets, revenues and equity or debt are below the thresholds for collection of ownership data. These businesses tend to have a simple corporate structure and are, for the most part, Canadian-controlled. These administrative records are maintained on Statistics Canada's Business Register.

## Financial data

The IOFD Financial and Taxation Statistics for Enterprises combined three sources of financial data to form a census of the 1,657,637 enterprises in the target population for 2014 (Text table 2). Annualized data from IOFD's Quarterly Survey of Financial Statements (QFS) provided consolidated data for 4,111 of the largest enterprises. Public Sector Statistics Division supplied data for 114 provincial and federal level government business enterprises. Administrative Data Division supplied financial information for the remaining enterprises from T2 Corporation Income Tax Returns and the General Index of Financial Information (GIFI).
Text table 2
Contribution of assets and operating revenue by data source, 2014

|  | Enterprises | Percentage of total assets | Percentage of total operating revenues |
| :---: | :---: | :---: | :---: |
|  | number | percent |  |
| Data source |  |  |  |
| Quarterly survey of financial statements | 4,111 | 70.8 | 50.5 |
| Government business enterprises data | 114 | 8.1 | 3.2 |
| Administrative taxation data | 1,653,412 | 21.1 | 46.3 |
| Total | 1,657,637 | 100.0 | 100.0 |

## Reference period

The series in this report are intended to cover business activity within a calendar reference period. Data derived from the QFS approximate the calendar period. The GBE data reflect fiscal periods which often are governed by the April to March fiscal year of governments. The administrative data used from the Canada Revenue Agency are based on financial statements filed along with annual income tax returns by corporations. Historically, data from fiscal periods ending at any time between January and December were included in the reference year. However, beginning with the release of the 2004 data, data from income tax returns for fiscal periods ending between April and March have been included in order to better represent business activity in the calendar period.

## Edit and imputation

At the record level, several checks are performed on the financial data to verify internal consistency and identify extreme values. Checks are also performed to ensure that financial data records have been assigned a country of control code and that this information is accurate.

Imputation of the financial data for complete non-response is performed by two methods. The preferred and most common method makes use of historical information about the non-responding unit and current trends in the principal characteristics of similar units. When historical information is not available, such as in the case of new units, a donor of similar size and industry is substituted for the missing unit.

Annual changes in the tabulated financial data are reviewed by industry and country of control. The largest changes are investigated and updates are made to the financial and country of control data as required. In addition, these data are analyzed for comparability with trends in related Statistics Canada data series and with general trends in the economy.

## Estimation

As noted earlier, annual data are obtained from one of three sources for each enterprise in the population of interest. Estimates are derived by tabulating the enterprise data for this population. These estimates are produced and published by industry and country of control.
Due to certain financial reporting constraints, data for enterprises in the insurance industry could not be obtained through the administrative data source. As a result, estimates for this industry are derived using QFS weighted estimates.

## Confidentiality

The confidentiality of the financial statistics is protected under the provisions of the Statistics Act.
For this reason, these data are released in aggregate form only and are subject to various confidentiality checks before they are released to prevent the publication or disclosure of any information deemed confidential. If necessary, data are suppressed to prevent direct or residual disclosure of identifiable data.
Direct disclosure could occur when the value in a tabulated cell is composed of only a few respondents or when the cell is dominated by a few companies. Residual disclosure could occur when confidential information can be derived indirectly by piecing together information from different sources or data series.

## Data accuracy

While considerable effort is made to ensure high standards throughout all collection and processing operations, the resulting estimates are inevitably subject to a certain degree of error. There are two types of errors in statistical information: sampling and non-sampling. Non-sampling errors are the only type that applies to this program, given that the estimates are based on a census of the population, and not a sample (with the exception of the insurance industry).
Non-sampling errors can arise from a variety of sources and are difficult to measure. Among non-sampling errors are response errors, such as gaps in the information provided by corporations in their returns, and errors in processing, such as miscoding the industry of an enterprise.

## Revisions

The most recent annual data in this report are subject to a one-year revision policy. These data may be revised to include amended information or reports from respondents that are received after the end of a collection cycle.

## Key indicators

Total assets are the sum total of economic resources over which an enterprise exercises a certain control. They include cash and deposits; accounts receivable and accrued revenue; inventories; investments and accounts with parents, subsidiaries and affiliates; portfolio investments; loans given to other enterprises; and capital assets.

Operating revenues include revenues from the sales of goods and services; rental and operating lease revenues; and revenues from commissions, franchise fees, and royalties.

Operating expenses include the cost of goods and services used as inputs into production; wages and salaries; employer portion of employee benefits; indirect taxes; and depreciation, amortization and depletion of buildings, machinery and natural resources.

Operating profits are the difference between operating revenues and operating expenses.

## Key concepts

## Statistical Enterprise

An enterprise is a single corporation or a family of corporations under common ownership and/or control, for which consolidated financial statements are produced.

## Controlling Interest

The controlling interest of an enterprise, referred to as the enterprise head, may be an individual, a related group, a corporation or a government. Controlled corporations are called subsidiaries. A multi-corporation enterprise contains one or more subsidiaries. A corporation that is not controlled by another corporation and that does not control another corporation is called a single-corporation enterprise.

## Corporate control

Corporate control is the potential to affect the corporate strategic decision-making process of the board of directors of a corporation. In many cases where control is said to exist, corporations may still function with considerable autonomy in their financial, marketing, or operational activities. Majority control is exercised by a person, group or corporation if more than $50 \%$ of the voting equity of a corporation is held, directly or indirectly, other than by way of security only, by or for the benefit of that person, group or corporation. In the case of irrevocable options or the right to acquire shares, the calculation of the voting equity is made as if all options have been exercised.

Effective control of a corporation implies control of the corporation through methods other than ownership of the majority voting equity of the corporation. The assessment of effective control may be based on any of the following rules:

- If more than $50 \%$ of the directors of a corporation are also directors of a trust or an estate, or are also members of a related group, then the corporation is effectively controlled by that trust, estate or related group.
- If more than $50 \%$ of the directors of a corporation are also directors of another corporation, and if there is a significant voting ownership of the corporation by that other corporation, then the corporation is effectively controlled by that other corporation.
- If control is acknowledged by a corporation, then the acknowledgement is sufficient to assign effective control.

## Country of control

In most cases of foreign control, the country of control is the country of residence of the ultimate foreign controlling parent corporation, family, trust, estate or related group. Each subsidiary within the global enterprise is assigned the same country of control as its parent. A company whose voting rights are equally owned by Canadian-controlled and foreign-controlled corporations, is Canadian-controlled. If two foreign-controlled corporations jointly own an equal amount of the voting rights of a Canadian resident company, the country of control is assigned according to an order of precedence based on their aggregate level of foreign control in Canada. For example, United States takes precedence over all other foreign countries because it has the highest level of aggregate foreign control in Canada.

## Changes affecting historical comparability of data

Listed below are summaries of the main changes in coverage, classification, concepts and methods since reference year 1999 which may affect the comparability of the Corporations Returns Act data over time. The year associated with each change indicates the reference year of data to which the change was first applied.

## 2014 Change to the Corporations Returns Act Regulations

Beginning with reference year 2014, the reporting thresholds requiring corporations to file returns under the Corporations Returns Act were revised. As prescribed in the Regulations, the new thresholds are as follows: gross revenues exceeding $\$ 200$ million, assets exceeding $\$ 600$ million or foreign equity exceeding a book value of $\$ 1$ million. The impact on the levels of foreign control reported in this publication is minimal.

## 2013 Methodology note

Program estimates include only units that have been assigned a valid NAICS code on Statistics Canada's Business Register database. Starting with the release of data for reference year 2013, many units that had previously not been assigned to an industry were added to the database, using NAICS codes they supplied with their tax returns. These consisted of mostly smaller units that had not previously been classified on the Business Register. This change resulted in a significant increase in the number of enterprises covered by the program.

## 2013 Change in definition of European Union

Beginning with reference year 2013, statistics for the European Union (EU) cover 28 countries, reflecting the addition of Croatia. Data for this country were previously included in estimates for the Other Foreign country of control category.

## 2011 Introduction of NAICS 2012

Beginning with reference year 2011, statistics by industry have been compiled based on the 2012 North American Industry Classification System (NAICS). The data are published at an aggregate level such that there is no effect on historical comparability.

## 2007 Change in definition of European Union

Beginning with reference year 2007, statistics for the European Union (EU) cover 27 countries, reflecting the addition of Bulgaria and Romania. Data for these countries were previously included in estimates for the Other Foreign country of control category.

## 2006 Introduction of NAICS 2007

Beginning with reference year 2006, statistics by industry have been compiled based on the 2007 North American Industry Classification System (NAICS). Data for reference years 1999 to 2005 were revised in order to reflect this classification system.

## 2006 Refinement of Country of Control Concept

For reference year 2006, the country of control was assigned to enterprises based on the country of residence of their ultimate, controlling parent, rather than based on the country which has majority ownership of the enterprise's voting shares. When the preliminary 2006 data were released, data for reference years 1999 to 2005 were revised to reflect the new country of control method, technical improvements and late returns.

The use of the new country of control method for the 1999 to 2005 data resulted in a small increase in the level of Canadian-controlled assets when compared with statistics for the same years based on the previous method.

On average, over the 1999 to 2005 period, Canadian-controlled assets were $1.9 \%$ higher under the new method compared with the old method.

## 2004 Change in definition of European Union

Beginning with reference year 2004, statistics for the European Union (EU) cover 25 countries, reflecting the addition of the following ten countries to the EU: Czech Republic, Cyprus, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia. Prior to reference year 2004, the EU included the following countries: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Italy, Ireland, Luxembourg, the Netherlands, Portugal, Spain, Sweden and the United Kingdom.

## 2003 Introduction of NAICS 2002

Beginning with reference year 2003, statistics by industry were compiled based on the 2002 North American Industry Classification System (NAICS). Data for reference years 1999 to 2002 were revised in order to reflect this classification system.

## 1999 Introduction of NAICS 1997

Starting with reference year 1999, statistics by industry were compiled based on the 1997 North American Industry Classification System (NAICS 1997). For reference periods 1988 to 1998 inclusive, the statistics were compiled based on the Standard Industrial Classification for Companies and Enterprises (SIC-C 1980). Prior to 1988, the 1960 Standard Industrial Classification for Establishments was used.

## 1997 Change to Corporations Returns Act

The Corporations Returns Act was formerly known as the Corporations and Labour Unions Returns Act (CALURA). The original CALURA was first introduced in 1962 and Statistics Canada has prepared annual reports to Parliament since that time. Parliament officially amended the Act as of January 1999, deleting the requirement of labour unions to report under the Act.
