

# Small Business in Canada: A Statistical Profile 1981-1983

# Profil statistique de la petite entreprise au Canada 1981-1983

## Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM. Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

### Small Business Statistics

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9046) or to the Statistics Canada reference centre in:

|                       |                           |
|-----------------------|---------------------------|
| St. John's (772-4073) | Sturgeon Falls (753-4888) |
| Halifax (426-5331)    | Winnipeg (949-4020)       |

## Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

### Statistiques sur les petites entreprises

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9046) ou au centre de consultation de Statistique Canada à:

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- amount too small to be expressed
- p preliminary figures
- r revised figures
- x confidential to meet secrecy requirements of the Statistics Act

## NOTE

Because of rounding, totals for statistical tables and the statement may differ slightly from the sum of their component parts and totals given elsewhere.

This publication was produced under the direction of John Moran, Chief, Data Development, Small Business Statistics. Contributions were made by the following persons:

Frank McNeil and John Devlin,  
Tax Record Access  
John Heath, Business Microdata Integration  
and Analysis

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles
- ... n'ayant pas lieu de figurer
- néant ou zéro
- nombres infimes
- p nombres provisoires
- r nombres rectifiés
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

## NOTA

Les chiffres ayant été arrondis, leur somme peut ne pas correspondre exactement aux totaux indiqués dans les tableaux statistiques et ailleurs.

Cette publication a été rédigée sous la direction de John Moran, chef du développement des données, Statistiques sur les petites entreprises. Les personnes suivantes ont contribué à la rédaction de cette publication:

Frank McNeil et John Devlin  
Accès aux documents fiscaux  
John Heath, Intégration et analyse de  
microdonnées d'entreprises

## PREFACE

This report is the first in a series that Statistics Canada intends to publish to meet the needs of business, policy makers and program managers in Government for information on the characteristics and role of small business in the Canadian economy. Subsequent reports will attempt to shed light on particular aspects of these characteristics.

Forthcoming reports will address more specifically the operating and financial ratios of small business, the changes in their financial position, the profile of the industries in which their share is large. There will also be reports on patterns of employment creation by business of different sizes, the small business outlook on business conditions, etc.

Producing relevant information for the small business community without increasing their paperburden constitutes a major challenge. However, this challenge has and will continue to be met. The use of administrative records for the purpose of producing relevant statistics provides Statistics Canada with a unique opportunity to add to existing information without burdening any further the business community.

Ivan P. Fellegi  
Chief Statistician of Canada

## PRÉFACE

La présente publication est la première d'une série, que Statistique Canada se propose de publier pour répondre aux besoins des entreprises, des décisionnaires et des chargés de programme des administrations publiques, relativement aux caractéristiques et au rôle de la petite entreprise dans l'économie canadienne. Dans les prochaines publications, nous tenterons de faire la lumière sur des aspects particuliers de ces caractéristiques.

Les publications à venir se pencheront plus précisément sur les ratios financiers et d'exploitation des petites entreprises, l'état des variations de leur situation financière et le profil de la branche d'activité dans laquelle ils ont une forte participation. D'autres publications porteront sur des sujets tels que la création d'emploi selon la taille d'entreprise, les perspectives économiques des petites entreprises, etc.

Produire des renseignements pertinents à l'intention des petites entreprises sans alourdir le fardeau des enquêtes constitue un défi de taille. Nous avons toutefois toujours relevé ce défi et continuerons à le faire. Le recours aux dossiers administratifs dans le but d'évaluer des statistiques pertinentes, offre à Statistique Canada la possibilité d'ajouter des détails aux renseignements existants sans devoir s'adresser une nouvelle fois aux entreprises.

Ivan P. Fellegi  
Statisticien en chef au Canada

## INTRODUCTION

This report is Statistics Canada's initial release of statistics pertaining to small business in Canada. The Small Business Secretariat of the Department of Regional and Industrial Expansion previously released reports(1) on the topic using aggregate data supplied by Statistics Canada. The reference periods for these reports were: 1974, 1976, 1978 and 1980. While the current report is not identical to its predecessors, every attempt has been made to preserve the continuity between the Small Business Secretariat series and the current series.

The data contained in this report are derived from taxation returns, both incorporated and unincorporated, submitted to Revenue Canada, Taxation for the taxation years 1981, 1982 and 1983. This report does not present an official definition of what constitutes a small business.

Data pertaining to corporate entities are drawn from the universe of corporate taxation returns and data pertaining to unincorporated sole proprietorships and partnerships are derived from a statistical sample of individual taxation returns. A corporate tax return typically consists of a T-2 form and a set of financial statements and supporting schedules. Data in this report are derived from the T-2 form, the balance sheet and income statement. An individual income tax return which reports self-employment income typically consists of a T-1 (General) form and a set of financial statements and supporting schedules. Data pertaining to unincorporated self-employment income in this report are derived from the T-1 form, the balance sheet and income statements.

---

(1) New Statistics on Small Business in Canada, 1978, 1979, 1981 and 1983, Small Business Secretariat, Department of Regional Industrial Expansion.

Dans la présente publication, Statistique Canada diffuse pour la première fois des données statistiques sur les petites entreprises au Canada. Le Secrétariat de la petite entreprise du ministère de l'Expansion industrielle régionale a déjà publié des bulletins sur le sujet (1) où figuraient un ensemble des données fournies par Statistique Canada. Les périodes de référence de ces bulletins agrégées sont 1974, 1976, 1978 et 1980. Bien que la présente publication diffère des précédents bulletins, tous les efforts possibles ont été déployés afin d'assurer la continuité entre la série du Secrétariat de la petite entreprise et la présente série.

Les données présentées ici proviennent des déclarations d'impôt des entreprises constituées et non constituées en société, soumises à Revenu Canada Impôt pour les années d'imposition 1981, 1982 et 1983. La publication ne propose aucune définition officielle d'une petite entreprise.

Les données sur les entreprises constituées en société proviennent de l'univers des déclarations d'impôt des sociétés, et celles sur les entreprises à propriétaire unique et les sociétés en nom collectif, d'un échantillon statistique des déclarations d'impôt des particuliers. La déclaration d'impôt d'une société se compose essentiellement d'une formule T-2, des états financiers et d'annexes à l'appui. Les données figurant ici sont tirées de la formule T-2, du bilan et de l'état des résultats. La déclaration d'impôt sur le revenu d'un particulier qui effectue un travail autonome se compose d'une formule T-1 (générale), des états financiers et d'annexes à l'appui. Les données sur les revenus engendrés par un travail autonome figurant ici proviennent de la formule T-1, du bilan et de l'état des résultats.

---

(1) Nouvelles statistiques sur la petite entreprise au Canada, 1978, 1979, 1981 et 1983, Secrétariat de la petite entreprise, ministère de l'Expansion industrielle régionale.

## SCOPE

For the purpose of this report, the following types of firms which are not generally small businesses have been excluded: 1) banks and other deposit-accepting institutions; 2) credit agencies such as consumer loan companies, sales finance companies, etc.; 3) insurance carriers; 4) investment and holding companies, and 5) non-profit corporations. For the most part, firms in the foregoing categories function as incorporated businesses.

Tables in this report exclude self-employed business operators reporting less than \$10,000 gross income. Tables also exclude all farm operations, fishing operations, professionals and self-employed commission salespersons. The foregoing categories are currently not included in the Statistics Canada taxation sample. Corporations reporting zero dollars of sales are also excluded.

While small business is the primary topic of this report, certain data presented cover all business sizes. Size groups are presented in the tabulations so that readers may apply their own industry and region criteria for the purpose of firm size. However, for the sake of ease the text refers to firms with less than \$2,000,000 sales as "small". Readers should note that size classes are in current dollars. No attempt has been made to adjust for inflation.

## CHAMP D'OBSERVATION

Aux fins de la présente publication, les genres d'entreprise suivants, qui généralement ne sont pas des petites entreprises, ont été exclus: 1) banques et autres établissements acceptant des dépôts; 2) organismes de crédit tels que les sociétés de prêt à la consommation, de financement des ventes, etc.; 3) assureurs; 4) sociétés de placement et de portefeuille; 5) organismes sans but lucratif. La plupart des entreprises faisant partie des catégories susmentionnées fonctionnent comme des entreprises constituées en société.

Les tableaux présentés ne renferment pas de données sur les exploitants autonomes dont le revenu brut est inférieur à \$10,000. Ils excluent également les agriculteurs, les pêcheurs, les membres des professions libérales et les vendeurs indépendants à commission. Ces catégories ne font pas partie de l'échantillon, établi par Statistique Canada, des entreprises ayant produit une déclaration d'impôt. Cet échantillon exclut aussi les entreprises dont les ventes sont nulles.

Bien que la présente publication porte principalement sur les petites entreprises, un certain nombre de données qui y sont présentées se rapportent aux entreprises de toutes les tailles. Les catégories de taille présentées dans les tableaux permettent au lecteur d'utiliser des critères propres à chaque branche d'activité et à chaque région afin de définir la taille des entreprises. Toutefois, afin d'alléger le texte, on considère comme "petites" les entreprises dont les ventes sont inférieures à \$2 millions. Le lecteur doit prendre note que les catégories de taille sont données en dollars courants, aucune correction de la variation des prix n'ayant été faite.

SOURCE OF DATA(A) Incorporated businesses

Data in respect of incorporated businesses are derived from the complete universe of taxation returns submitted to Revenue Canada Taxation. The data items were accessed from Revenue Canada, Taxation's magnetic tape files of corporate tax filers for the taxation years 1981, 1982 and 1983. The Income Tax Act requires corporations to file tax returns within six months of their fiscal period end. Thus, the time frame for the 1983 tax year for example, refers to fiscal period ends between January 1, 1983 and December 31, 1983. Therefore, the data for 1983 may include some income earned during the calendar year 1982 for those corporations whose fiscal period ends do not conform to the calendar year-end. In the most extreme case, firms with a January 1 fiscal period end may have up to one year less a day of 1982 data.

(B) Unincorporated businesses

Data pertaining to unincorporated business were collected as follows:

- (a) a 10% sample of unincorporated businesses reporting gross business income greater than \$10,000 and less than \$25,000;
- (b) a 25% sample of unincorporated businesses reporting gross business income greater than \$24,999 and less than \$500,000; and,
- (c) 100% of all unincorporated businesses reporting gross business income of \$500,000 and over.

Because unincorporated business tax returns are filed on an individual basis, weighted sample estimates are adjusted to account for the partnership phenomenon. Thus, even though two or more partners from a partnership may have been selected in the sample, records have been adjusted so that the firm or partnership is included once only.

The Income Tax Act requires that individuals file a tax return by April 30 in the calendar year immediately following the calendar year in which the fiscal period ends. Data may be included for a fiscal period which does not correspond to the calendar year. Thus, unincorporated firm data may also include results from the previous calendar year.

SOURCES DE DONNÉESA) Entreprises constituées en société

Les données sur les entreprises constituées en société proviennent de l'univers complet des déclarations d'impôt remises à Revenu Canada-impôt. Elles ont été tirées des fichiers sur bandes magnétiques des déclarations d'impôt produites par les sociétés pour les années d'imposition 1981, 1982 et 1983. La Loi de l'impôt sur le revenu oblige les sociétés à produire une déclaration d'impôt dans les six mois suivant la fin de leur exercice financier. La période de référence pour l'année d'imposition 1983, par exemple, renvoie donc à l'exercice financier terminé entre le 1er janvier 1983 et le 31 décembre de la même année. Les données pour 1983 peuvent donc inclure des recettes réalisées au cours de l'année civile 1982 par des sociétés dont la fin de l'exercice financier ne correspond pas à la fin de l'année civile. Dans le cas extrême, les données se rapportant aux entreprises dont l'exercice financier se termine le 1er janvier peuvent, pour un an moins un jour, porter sur l'année 1982.

B) Entreprises non constituées en société

Les données sur les entreprises non constituées en société ont été recueillies de la façon suivante:

- (a) un échantillon représentant 10% des entreprises non constituées ayant déclaré des recettes brutes supérieures à \$10,000 et inférieures à \$25,000;
- (b) un échantillon composé de 25% des entreprises non constituées ayant déclaré des recettes brutes supérieures à \$24,999 et inférieures à \$500,000; et
- (c) toutes les entreprises non constituées ayant déclaré des recettes brutes de \$500,000 et plus.

Comme les déclarations d'impôt des entreprises non constituées en société sont remplies par des particuliers, les estimations de l'échantillon pondéré ont été ajustées pour tenir compte des sociétés en nom collectif. Ainsi, même si deux ou plusieurs associés d'une même société en nom collectif ont été retenus pour faire partie de l'échantillon, les dossiers ont été ajustés afin de n'inclure qu'une seule fois l'entreprise ou la société en nom collectif.

En vertu de la Loi de l'impôt sur le revenu, les particuliers doivent remplir une déclaration d'impôt avant le 30 avril de l'année civile suivant immédiatement l'année civile au cours de laquelle l'exercice financier a pris fin. Des données peuvent porter sur un exercice financier qui ne correspond pas à l'année civile. Par conséquent, les données sur les entreprises non constituées en société peuvent aussi comprendre les résultats de l'année civile précédente.

DEFINITIONSFirm Size

Firms with less than \$2,000,000 of sales are herein referred to as small.

Industrial Classification

The industry classification used in this report is the 1980 Standard Industrial Classification. As a result statistics for particular industries may differ from earlier reports and studies published in other Divisions of Statistics Canada which were based on the 1960 or 1970 industry classification. For example, in the current report the industry division, Construction, includes Real Estate Development, however this industry is grouped in the Finance Insurance and Real Estate Division in the publication Corporate Financial Statistics, Catalogue 61-207. A detailed description of the industrial coding structure may be found in publication 12-501E Standard Industrial Classification 1960, 1970 and 1980.

Source documents for data in this report are the financial statements filed by firms with Revenue Canada, Taxation, therefore the statistical unit for purposes of this report is the firm. That means that the firm is classified in its entirety to a single industry even though it may be engaged in more than one industrial activity. This caveat is more applicable to larger corporations. As a result, detailed industry comparisons cannot be made between data based on the firm and data based on other types of statistical units such as location-activity, establishment or enterprise.

Revenue

The term revenue in this report includes all revenues resulting from the operation of the business entity and investment and other types of income as follows:

- Sales of products
- Sales of services
- Rental income - real estate
- Rental income - other than real estate
- Commissions
- Bond, mortgage, bank and other interest income
- Dividends
- Other income (royalties, etc.)

DÉFINITIONSTaille des entreprises

On considère comme petites, les entreprises dont les ventes sont inférieures à \$2 millions.

Classification des industries

La classification des industries utilisée ici est la Classification type des industries de 1980. Par conséquent, les statistiques sur certaines branches d'activité peuvent être différentes de celles figurant dans des publications et des études fondées sur les classifications de 1960 et de 1970 et produites par d'autres divisions de Statistique Canada. Par exemple, dans la présente publication, la division "Construction" comprend la branche d'activité appelée "aménagement de propriétés immobilières", alors que cette branche d'activité se retrouve dans la division "Finances, assurances et affaires immobilières" dans la publication intitulée Statistique financière des sociétés, no 61-207 au catalogue. Une description détaillée du système de codage des branches d'activité se trouve dans les Classifications types des industries de 1960 et de 1980, et dans la Classification des activités économiques de 1970, no 12-501F au catalogue.

Comme les documents de base à partir desquels sont recueillies les données figurant ici sont les états financiers fournis à Revenue Canada Impôt par les entreprises, c'est donc l'entreprise qui a été retenue comme unité statistique. Cela signifie que l'entreprise est classée dans une seule branche d'activité même si elle oeuvre dans plus d'un domaine de l'activité économique. Cet avertissement concerne davantage les grandes sociétés. Il est donc impossible d'établir des comparaisons détaillées entre les données fondées sur l'entreprise et celles reposant sur d'autres unités statistiques telles que l'emplacement et l'activité, l'établissement ou l'unité technique d'exploitation.

Recettes

On entend par recette tous les produits tirés de l'exploitation d'une entreprise, les revenus de placement et d'autres genres de revenus, dont voici la ventilation:

- Ventes de produits
- Ventes de services
- Revenus de location - biens immobiliers
- Revenus de location - autres
- Commissions
- Intérêts provenant d'obligations, d'hypothèques, de comptes en banque et d'autres sources
- Dividendes
- Autres revenus (redevances, etc.)

Profits

Profit (loss) is pre-tax and is the difference between revenue and expense (excluding income taxes, logging and mining taxes and energy taxes).

Assets

This figure represents the net book value of all assets tangible and intangible; current, fixed and other assets.

Liabilities

The amount shown as liabilities represents the total of current and non-current financial obligations of the business as well as deferrals.

Equity

Equity represents the ownership vested in the business and is the difference between assets and liabilities.

Wages and salaries

Wage and salary data represent the total amount paid to all employees of the firm including fees, bonuses and commission.

Depreciation

This item represents the proportion of the book value of tangible fixed assets charged to current year for book purposes including any amortization of leasehold improvements (for smaller firms this item may be the Capital Cost Allowance claimed).

Other Expenses

Expenses reported other than wages and salaries and depreciation. It should be noted that this category also includes goods and materials purchased for resale and/or further processing.

Income Generated

For purposes of this report, Income Generated consists of the total of wages and salaries, pre-tax profits (loss), and depreciation.

Profit

Le profit (ou la perte), est la différence, avant impôt, entre les recettes et les frais (à l'exclusion de l'impôt sur les bénéfices, des redevances d'exploitation forestière et minière et des taxes sur l'énergie).

Actif

Ce chiffre représente la valeur comptable nette de tous les éléments d'actif corporels et incorporels, de même que l'actif fixe, à court terme et d'autres natures.

Passif

Le montant indiqué comme passif représente l'ensemble des dettes à court terme et à long terme de l'entreprise, y compris les sommes reportées.

Capitaux propres

Les capitaux propres représentent les sommes investies dans l'entreprise par les propriétaires; il s'agit de la différence entre l'actif et le passif.

Salaires et traitements

Les données sur les salaires et traitements portent sur le total des montants versés à tous les employés de l'entreprise, y compris les honoraires, les primes et les commissions.

Amortissement

L'amortissement représente la portion de la valeur comptable de l'actif immobilisé corporel qui est imputée à l'année en cours pour fins comptables, y compris l'amortissement des améliorations locatives (dans le cas des petites entreprises, il peut s'agir de l'allocation du coût en capital réclamée).

Autres frais

Il s'agit des frais autres que les salaires, les traitements et l'amortissement. Il convient de noter que cette catégorie comprend également les biens et les matières achetés afin d'être revendus et/ou transformés.

Revenus générés

Aux fins de la présente publication, les revenus générés se composent des salaires et traitements, des profits (ou pertes) avant impôt et de l'amortissement.

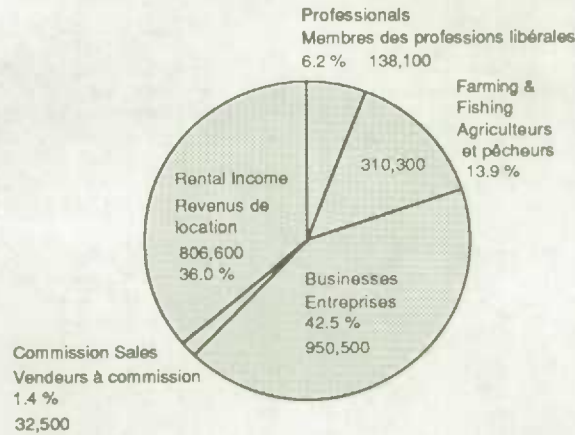

**HIGHLIGHTS****Economic Units and Business Operations**

In 1983 there was an estimated 2.2 million persons operating economic units in Canada. The Small Business Statistics Project at Statistics Canada currently excludes Professionals, Farming and Fishing, Commission Sales and unincorporated Rental Operations (where rental income is not the major source of revenue of the operator) as per Figure 1.

**FAITS SAILLANTS****Unités économiques et entreprises commerciales**

On estime à 2.2 millions les personnes exploitants des unités économiques au Canada en 1983. Dans le cadre du Projet de statistiques sur les petites entreprises de Statistique Canada, on a exclu de ce nombre les membres des professions libérales, les agriculteurs et les pêcheurs, les vendeurs à commission et les entreprises de location non constituées en société (lorsque le revenu de location n'est pas la principale source de revenu de l'exploitant), comme on le voit à la figure 1.

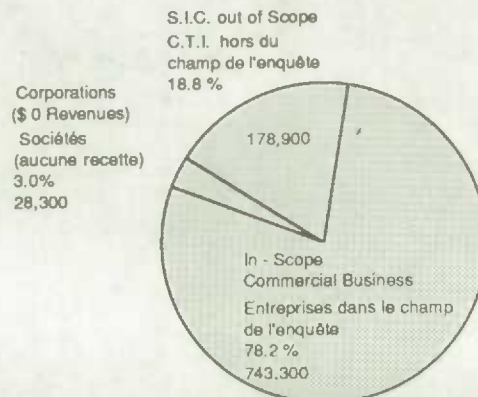

**Figure 1 Persons Operating Economic Units In Canada, 1983**  
**Personnes exploitant des unités économiques au Canada, 1983**

Of the 950,500 economic units labelled as business operations a further 207,200 are excluded by virtue of size or industry type as illustrated in Figure 2.

Des 950,500 unités économiques considérées comme des entreprises commerciales, 207,200 sont également exclues en raison de leur taille ou de la branche d'activité à laquelle elles appartiennent (figure 2).

**Figure 2 Businesses In Canada, 1983**  
**Entreprises au Canada, 1983**

### Firm Size

There were 743,300 in-scope firms operating in Canada in 1983. Of these approximately 96% were small (revenue less than \$2 million dollars). These same firms accounted for just under 19% of total revenue. At the other end of the scale, very large firms (revenue of \$20 million and over) accounted for only 0.4% of firms but generated an estimated 61% of total revenue.

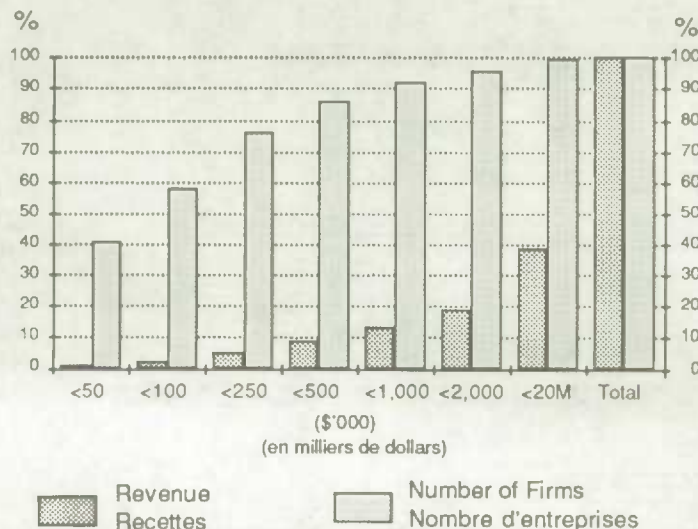

In 1981, small firms represented 95.8% of the total population and accounted for 19.5% of total revenue. During the 1981 to 1983 period, revenues of small firms decreased slightly in both share of total revenue and average revenue per firm. For example, average sales per firm for the smallest size group (less than \$50,000 revenue) decreased from \$23,700 in 1981 to \$23,200 in 1983 in current dollars, a decrease of approximately 2%. The application of an inflation factor over this three year period would widen the gap. For example, the Gross National Expenditure Implicit Price Deflator was 16.2% over the 1981-83 period. Thus in terms of constant 1981 dollars the decrease was from \$23,700 to \$19,500 in 1983 in average revenues for the smallest of firms.

### Taille des entreprises

En 1983, 743,300 entreprises en activité au Canada faisait partie du champ d'observation de l'enquête; il s'agissait, dans environ 96% des cas, de petites entreprises (recettes inférieures à \$2 millions). Ces dernières ont généré un peu moins de 19% des recettes totales. À l'opposé, les très grandes entreprises (recettes de \$20 millions et plus) représentaient seulement 0.4% des entreprises, mais d'après les estimations, elles ont produit 61% de l'ensemble des recettes.

En 1981, les petites entreprises représentaient 95.8% de l'ensemble des entreprises et ont généré 19.5% des recettes totales. Entre 1981 et 1983, les recettes des petites entreprises ont diminué en ce qui a trait à la proportion des recettes totales et aux recettes moyennes par entreprise. Par exemple, les ventes moyennes des entreprises figurant dans la tranche de recettes inférieure (recettes inférieures à \$50,000) sont passées de \$23,700 en dollars courants en 1981 à \$23,200 en 1983, soit une baisse d'environ 2%. L'application d'un facteur d'inflation aux données portant sur cette période de trois ans accentuerait cet écart. Par exemple, l'indice implicite de déflation de la dépense nationale brute était de 16.2% au cours de la période 1981-1983. Ainsi, en dollars constants de 1981, les recettes moyennes des plus petites entreprises sont passées de \$23,700 en 1981 à \$19,500 en 1983.

**Figure 3 Distribution of Firms and Revenues by Revenue Size Group, 1983**  
Répartition des entreprises et des recettes selon la tranche de recettes, 1983

Very few industry groups are dominated by small size firms. One exception is the Motor Vehicle Repair Shop Industry. In 1983, there were approximately 18,500 firms in this industry. Firms with sales below \$2 million, represented 86% of the population and accounted for over 96% of the revenues. These same smaller size firms paid out 90% of wages and salaries in the industry and

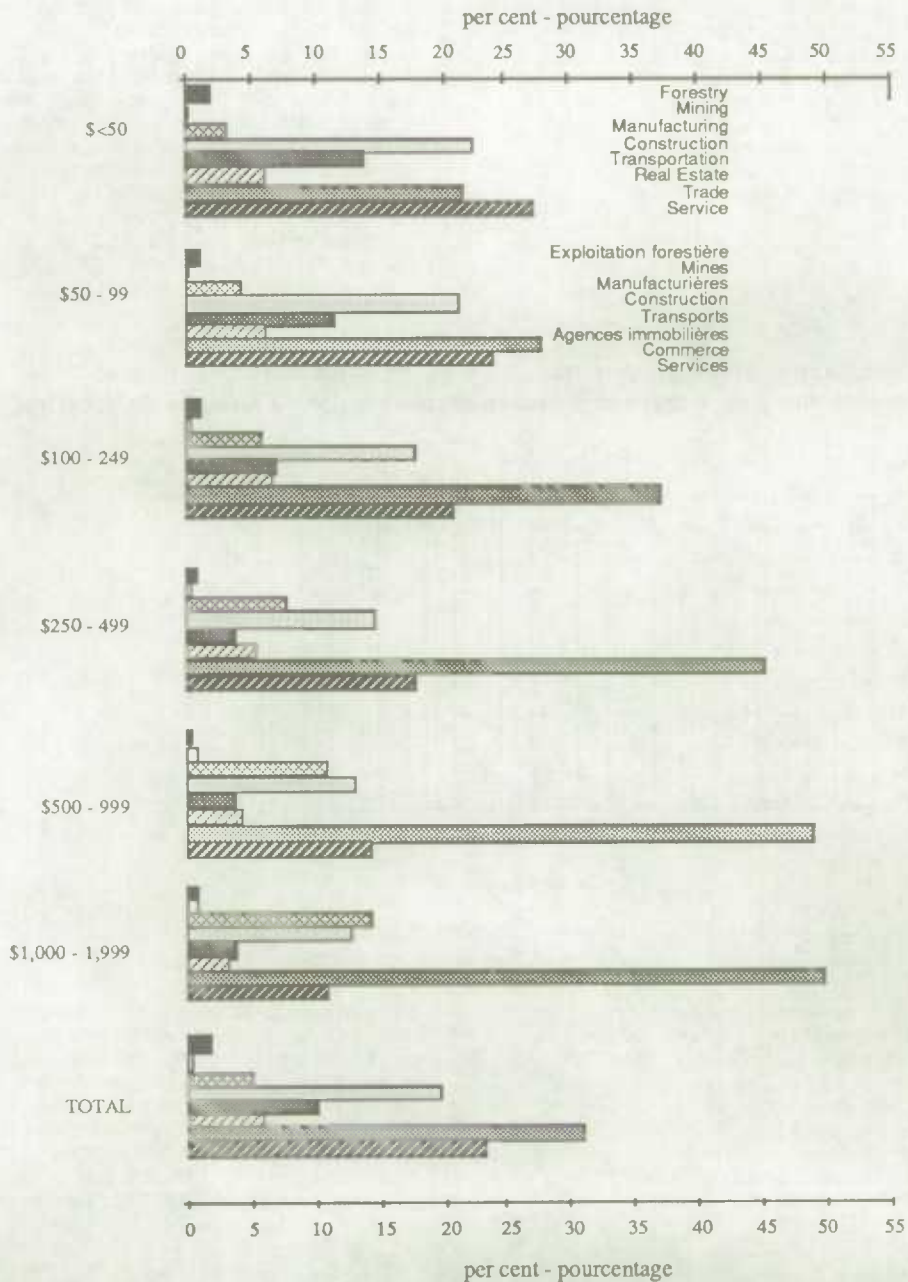

Il existe peu de branches d'activité où les petites entreprises prédominent. Les ateliers de réparation de véhicules automobiles font exception. En 1983, environ 18,500 entreprises oeuvraient dans cette branche d'activité, au sein de laquelle les entreprises dont les ventes étaient inférieures à \$2 millions représentaient 86% de la population et généraient plus de 96% des recettes. Ces

accounted for over 90% of the income generated by the industry. Some additional exceptions to the rule of large firm industry domination are Barber Shops, Beauty Shops, Logging, Travel and Ticket Agencies and the Taxicab Industry.

petites entreprises ont payé 90% des salaires et traitements versés dans cette branche d'activité et ont contribué pour plus de 90% aux revenus générés dans cette branche d'activité. Il existe d'autres exceptions à la règle de la prédominance des grandes entreprises; il s'agit des salons de coiffure pour homme, des salons de beauté pour dame, de l'exploitation forestière, des agences de voyage et de vente de billets et de l'industrie du taxi.

**Figure 4** Distribution Of Number Of Small Businesses By Industry Division Within Revenue Size Groups (\$'000), 1983

Répartition de certaines petites entreprises selon la branche d'activité dans chaque tranche de recettes (en milliers de dollars), 1983

### Industry Concentration

Small firms, as shown in Table 1, amounted to 96% of all firms in 1983. Smaller firms are most heavily concentrated in three industry sectors: Construction, Trade, and Services. These three sectors accounted for 75% (20.0%, 31.5% and 23.5% respectively) of all smaller firms. The remaining 25% of businesses is distributed amongst Transportation (10.5%), Real Estate Operators and Insurance (6.4%), Manufacturing (5.6%), Forestry (1.8%) and Mining (0.7%).

### Répartition selon la branche d'activité

Comme on peut le voir au tableau 1, les petites entreprises représentaient 96% de l'ensemble des entreprises en 1983. Trois branches d'activité, soit la construction, le commerce et les services, regroupaient à elles seules 75% de toutes les petites entreprises (20.0%, 31.5% et 23.5% respectivement). Les autres petites entreprises (25%) étaient réparties de la façon suivante: transports (10.5%), exploitants immobiliers et agents d'assurances (6.4%), industries manufacturières (5.6%), exploitation forestière (1.8%) et industrie des mines (0.7%).

Text Table 1. Distribution of Small Businesses in Canada by Industry Sector, 1983

Tableau explicatif 1. Répartition des petites entreprises au Canada selon la branche d'activité, 1983

| Industry Sector<br>Branche d'activité  | Firms<br>Entreprises |              |
|--|----------------------|--------------|
|  | Number               | Percentage   |
| <b>Total*</b>  | <b>712,924</b>       | <b>100.0</b> |
| Forestry - Exploitation forestière   | 12,850               | 1.8          |
| Mining - Mines   | 4,795                | 0.7          |
| Manufacturing - Industries manufacturières   | 39,910               | 5.6          |
| Construction   | 142,848              | 20.0         |
| Transportation - Transports  | 74,672               | 10.5         |
| Trade - Commerce   | 224,713              | 31.5         |

| Business and Personal Services -<br>Services personnels et aux entreprises                     | 167,684              | 23.5         |

\* Total does not add due to rounding

Les chiffres ayant été arrondis, leur somme ne correspond pas au total indiqué.

The degree of small business concentration varies amongst revenue size groups. For example, the Trade Sector accounts for 22.1% of firms in the <\$50 thousand group and 50.3% of firms in the \$1 to \$2 million size group. On the other hand, the Service sector accounts for 27.7% of all firms in the <\$50 thousand revenue size group and only 11.3% of the population in the \$1 million to \$2 million revenue size group (Figure 4).

Industries with the highest rate of small business concentration are generally characterized as requiring relatively low capital inputs and high labour inputs combined with relative ease of entry. Tables 1 and 2 of this report present statistics on sixteen of these small business dominated industries that account for almost 20% of all businesses. The remaining 80% is widely dispersed amongst approximately 800 other industry groups.

La concentration des petites entreprises dans une branche d'activité donnée varie selon la tranche des recettes. Par exemple, le secteur du commerce regroupe 22.1% des entreprises dont les recettes sont inférieures à \$50,000 et 50.3% de celles dont les recettes se situent entre \$1 million et \$2 millions. Par contre, le secteur des services regroupe 27.7% des entreprises dont les recettes sont inférieures à \$50,000 et seulement 11.3% de celles dont les recettes se situent entre \$1 million et \$2 millions (figure 4).

Les branches d'activité où la concentration des petites entreprises est la plus forte regroupent généralement les caractéristiques suivantes: la part de capital à investir est relativement faible, l'activité est à prédominance de main-d'oeuvre, et il est relativement facile de débiter en affaires. Les tableaux 1 et 2 présentent des données portant sur seize de ces branches d'activité où prédominent les petites entreprises et qui regroupent presque 20% de toutes les entreprises. Les autres entreprises (80%) se répartissent dans environ 800 autres branches d'activité.

Even though small firms may be highly concentrated in a specific sector this does not necessarily mean that they dominate the sector. In the manufacturing sector in 1983 smaller size firms far outnumbered medium size and large firms, 39,900 small firms versus 7,300 medium and large size firms. These same small firms accounted for only 6% of the total revenues of this sector in 1983.

#### Operating Results

The pre-tax profits of small businesses dropped between 1981 and 1982 from \$6.7 billion in 1981 to \$6.0 billion in 1982. By 1983 pre-tax profits reported by business had rebounded to the 1981 level of \$6.7 billion.

The rate of return on revenues (pre-tax profits/revenues) for businesses was 5.1%, 4.5% and 5.0% for the years 1981, 1982 and 1983 respectively. Average pre-tax profits (in current dollars) reported by small business in 1981 was \$9,600, the average dropped to \$8,600 in 1982 and rose to \$9,400 in 1983.

On a sectoral basis the highest rate of pre-tax profits in 1983 was reported by small business in the Transportation Industry, 9.3% of revenues, followed by the Business and Personal Service Industries with an average rate of return of 7.2%.

#### Economic Contribution

The 712,900 small business firms in Canada in 1983, reported pre-tax profits of \$6.7 billion on revenues of \$133 billion.

Même si les petites entreprises sont beaucoup plus nombreuses dans un secteur donné, cela ne signifie pas nécessairement qu'elles jouent le rôle le plus important dans ce secteur. En 1983, dans le secteur des industries manufacturières, les petites entreprises étaient beaucoup plus nombreuses que les entreprises de moyenne et de grande taille; il existait 39,900 petites entreprises et 7,300 moyennes grandes entreprises. Par contre, ces petites entreprises n'ont généré que 6% des recettes totales dans ce secteur en 1983.

#### Résultats d'exploitation

Les profits avant impôt des petites entreprises sont passés de \$6.7 milliards en 1981 à \$6.0 milliards en 1982. En 1983, les profits avant impôt déclarés par les entreprises sont revenus au niveau de 1981, c'est-à-dire à \$6.7 milliards.

Le taux de rendement des recettes (quotient des profits avant impôt par les recettes) des entreprises se chiffrait à 5.1%, 4.5% et 5.0% pour 1981, 1982 et 1983 respectivement. En 1981, le profit moyen avant impôt (en dollars courants) déclaré par les petites entreprises s'élevait à \$9,600; il est ensuite tombé à \$8,600 en 1982 puis a remonté à \$9,400 en 1983.

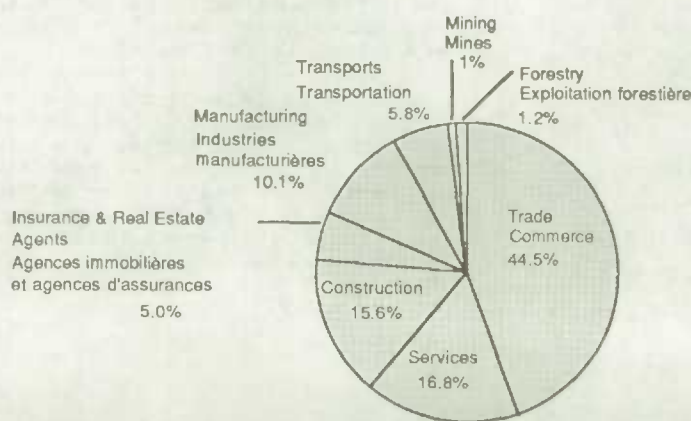

Pour ce qui est des branches d'activité, les petites entreprises oeuvrant dans le secteur des transports ont déclaré le taux de profit avant impôt le plus élevé (9.3% des recettes) en 1983; les entreprises du secteur des services personnels et aux entreprises, dont le taux moyen de rendement est de 7.2%, se classent au deuxième rang.

#### Participation à l'économie

En 1983, les 712,900 petites entreprises du Canada ont déclaré des profits avant impôt s'élevant à \$6.7 milliards pour des recettes de \$133 milliards.

**Figure 5 Percentage Distribution of Small Business Revenues by Major SIC Division, Canada, 1983**

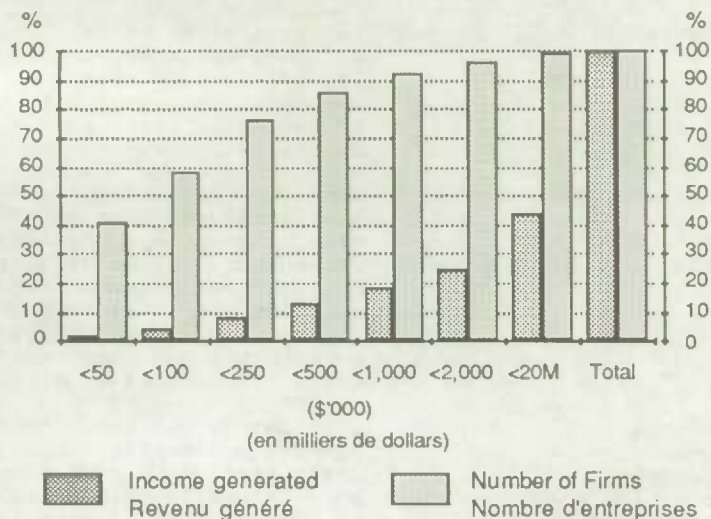

**Répartition en pourcentage des recettes des petites entreprises selon la branche d'activité, Canada, 1983**

These same firms generated a return to owners and employees (income generated) of \$34 billion or 25.6% of total revenue. By contrast the return to medium and large size firms in the same industries was \$105.7 billion on revenues of \$574.2 billion - a rate of 18.4%.

Les petites entreprises ont donné aux propriétaires et employés un rendement (revenu généré) de \$34 milliards, soit 25.6% des recettes totales. Le rendement des moyennes et grandes entreprises oeuvrant dans les mêmes branches d'activité était de \$105.7 milliards pour des recettes s'élevant à \$574.2 milliards, ce qui représente un taux de 18.4%.

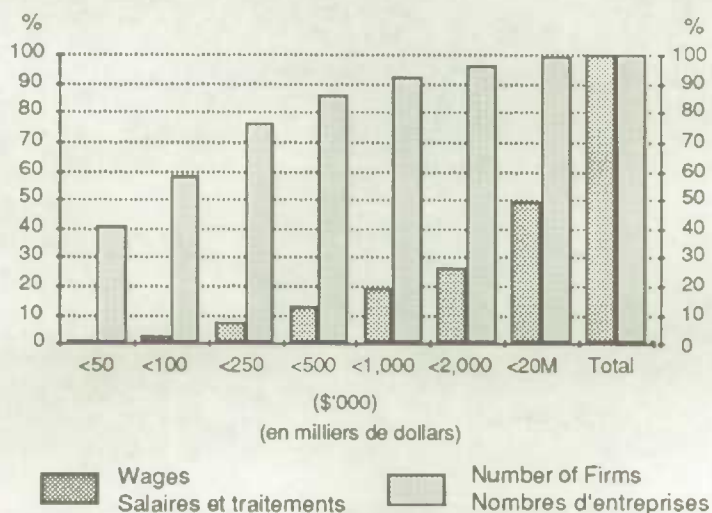

**Figure 6 Income Generated by Revenue Size Group of Firm, Canada, 1983**  
**Revenus générés selon la tranche de recettes des entreprises, Canada, 1983**

Within small business, the Forestry Industry reported the highest rate of income generated per dollar of revenues, 37.6% while the Retail Trade Industry reported the lowest rate at just under 16%. In absolute terms, the Business and Personal Services Industries reported the largest amount of income generated \$8.2 billion, and the Mining Industry the smallest, \$0.2 billion.

Les petites entreprises oeuvrant dans l'industrie forestière ont enregistré le taux le plus élevé de revenu généré par dollar de recettes (37.6%), tandis que celles du secteur du commerce de détail ont connu le taux le plus bas, soit un peu moins de 16%. En valeur absolue, les entreprises des services personnels et aux entreprises ont enregistré le revenu généré le plus élevé (\$8.2 milliards), et celles de l'industrie des mines le moins élevé (\$0.2 milliards).

**Figure 7 Wages and Salaries by Revenue Size Group of Firm, Canada, 1983**  
**Salaires et traitements selon la tranche de recettes des entreprises, Canada, 1983**

On average, small businesses paid out 17.5% of revenues in the form of wages and salaries in 1983. The Business and Personal Service Industry paid out the highest amount of wages and salaries \$5.6 billion or 25% of total revenues.

#### Financial Characteristics

In 1983 the debt to equity ratio of small business was 2.6:1, that is to say two dollars and sixty cents of debt for every dollar of equity (ownership).

By contrast the debt to equity ratio of larger firms, i.e. revenues >\$2 million, in the equivalent industries was 1.9:1 in 1983. This same ratio for small firms was 2.5:1 in 1981 and 2.6:1 in 1982 whereas for larger firms in corresponding industries the debt/equity was 1.9:1 in 1981 and 2.0:1 in 1982. The debt/equity ratio is lower for firms which are at the lower end of the size spectrum i.e. 1.9:1 for firms below \$100 thousand in revenues and 2.9:1 for firms between \$100 thousand and \$2 million in revenues in 1983.

The Real Estate Operators and Insurance Agency Industry recorded the highest debt/equity ratio amongst small business in 1983 of 4.1:1. At the other end of the scale the Mining Industries recorded the lowest debt/equity ratio amongst small business at 1.1:1.

Asset turnover (revenues/assets) in small business operations was 1.3:1 in 1983. The rate of asset turnover ranged from a low of 0.2:1 in Mining Industries to 2.5:1 in Retail Trade in 1983.

En 1983, les petites entreprises ont consacré en moyenne 17.5% de leurs recettes au versement de salaires et de traitements. C'est dans l'industrie des services personnels et aux entreprises que le montant consacré aux traitements et salaires était le plus élevé (\$5.6 milliards, soit 25% des recettes).

#### Caractéristiques financières

En 1983, le ratio d'endettement des petites entreprises était de 2.6:1, c'est-à-dire que la dette s'élevait à \$2.60 pour chaque dollar de capital (avoir des propriétaires).

Par contre, le ratio d'endettement des grandes entreprises, c'est-à-dire celles dont les recettes sont supérieures à \$2 millions, dans les mêmes secteurs d'activité, était de 1.9:1 en 1983. Il était de 2.5:1 en 1981 et de 2.6:1 en 1982 pour les petites entreprises, alors que pour les grandes entreprises œuvrant dans les mêmes branches d'activité, le ratio d'endettement était de 1.9:1 en 1981 et de 2.0:1 en 1982. Le ratio d'endettement est plus bas chez les entreprises se situant au bas de l'échelle des tranches des recettes; il était de 1.9:1 pour les entreprises dont les recettes étaient inférieures à \$100,000 et de 2.9:1 pour les entreprises dont les recettes se situaient entre \$100,000 et \$2 millions en 1983.

L'industrie des exploitants immobiliers et agences d'assurances a connu le taux d'endettement le plus élevé chez les petites entreprises (4.1:1) en 1983. À l'opposé, l'industrie des mines a enregistré le taux d'endettement le moins élevé (1.1:1).

En 1983, la rotation de l'actif (recettes/actif) des petites entreprises était de 1.3:1. Les taux de rotation de l'actif se situaient entre un minimum de 0.2:1 (industrie des mines) et un maximum de 2.5:1 (commerce de détail).
