## INDEX NUIBERG OF WHOLESATE SNICLO, MARCii, 1934.

The Dominion Bureau of Statistics index number of wholesale prices on the base 1926=100, changed fractionally from 72.1 in February to 72.0 in liarch. 94 quotations were higher, 99 were lower, while 37 * remained unchanged.

Vegetable Products rose from 65.6 to 65.7 , gains for wheat, bran, shorts, and tea more than counterbalancing losses for oats, rye, barley, and flour, animals and Their Products fell from 70.7 to 69.9 declines for calves, hogs, eggs, hides and leather outweighing advances for steers, lambs, butter and fresh and cured meats. Fibres, Textiles and Textile Products moved up from 73.8 to $7 \% .2$, higher prices for cotton fabrics, cotton yarn and thread influencing the index nore than lower quotations for raw cotton, silk and worsted cloth yarns. Vood, Vood Prouucts and Paper advanced from $65 . \epsilon$ to 65.7 owing chiefly to higher prices for fir timber and unbleached wood pulp. Iron and Its Products changed from 87.0 -. Mebruary to 87.2 in March, gains for scrap iron and steel and foundry pig iron outweighing losses for steel rails. Non-Ferpous lietals and Their Products dropped from 66.8 ts 66.1 largely because of lower prices for copper, lead and zinc. Nor-lletallic linerals and Their Products changed fractionally from 86.0 to 86.1 owing principally to higher quotations for glass tumblers. Chemicals and allied Products moved up from 80.6 to 80.8 as a result of advances in the prices of fertilizers.

Consumers' Goods fell from 75.9 to 75.8. Foods, Beverages and Tobacco declined from 73. 1 to 72.5 chiefly on account of lower quotations for eggs ard potatoes. Other Consumers' Goods rose from 77.7 to 78 . $C$ owing mainly to higher prices for cotton fabrics, and cotton thread.

Producers' Goods remaired unchanged at 67.8 with building and construction materials, manufacturers' materials and producers' equipment at 83. 6, 61. 6 and 65.6 respectively, the same as in the previous month.

Raw and Partly lianufactured liaterials fell from 62.9 to 62.1. snimal and mineral products declined while vegetable and marine products advanced.

Fully and Chiefly Manufactured IFaterials rose from 74.5 to 75.0 , gains for animal and forest products outweighing losses for the marine products group.

Canadian Farm Products dropped from 58.0 to 56.5 . Vegetable rroducts moved up from 49.3 to 49.5 chiefly on account of advances in the prices of wheat and hay while animal Products fell from 72.5 to 68.3 with the decline due to lower quotations for hides and skins, calves, hogs, eggs and wool.

SURIGPY OF COIMODITY PRICE MOVEMENTS: MEAT AIS OMER CRAINS: itheat prices continued to move within a narrow rance during liarch. The re was a spread of only $2-5 / 8$ cents between the highest closing quotation of $67 \frac{3}{3}$ cents on iarch 10 th, for No. I Manitoba Northern cash wheat, Fort William and Lort arthur, and the lowest close of $65-1 / 8$ cents on liarch lst. irom liarch Ist to loth, the Winnipeg market moved irregularly upward influenced by limited offerings and lower world shipments. a subsequent increase in shipments and selling pressure at Winnipeg coincided with a decline in prices from the llth to l7th. ixport business during this period was decidedly quiet. From the l8th to the end of the month quotations were for the most part firm. There was a lessening of pressure from Argentine wheat, and mention was made of a possible $25 \mathrm{p} . \mathrm{c}$. cut in australian acreage. Anxicty regarding United States spring wheat moisture conditions was removed by rains in the final week of March.
Descriptiors

MILIED PRODUCTS: Domestic trade in flour was fairly active in the first three weeks of liarch, but later reports indicated business had turned quieter. wome improvement latterly was noted in west coast exports, but this was temporary in character, and export trade generally cortinued dull.

SUGrR: Unsteadiress in the raw sugar market developed intc a sharp decline in the latter part of Warch. In the fourth week, future positions on the New York Exchange dropped about 12 p.c. Duty frees on a spot basis follcwed this decrease while Cubans, quoted only upon a nominal basis, held firm Weakness was associated. in trade circles with the prolonged delay in the passage of sugar legislatior at Washington. Recert information stated that United sitates beet producers had been granted a further 100,000 tons, bringing their quota up to $1,550,000$ short tons. W. B. Dyer and Company have estimated that year-end stocks on mugust 31 st next would amount to $10,579,000$ long tons, as compared with $12,953,000$ tons two years earlier. This carry-over would be less than $40 \mathrm{p} . \mathrm{c}$. of estimated $193 \mathrm{f}-35$ consumption requirements, the first such percentage to be bolow 40 since 1928-29.

COFiPE: Early firmness in ifarch spot coffee prices at liew York gave way latterly to a moderate decline, influenced in part by wakness in lirazil markets and by larger arrivals. Cables from Prazil stated that destruction for the first half of lilarch had amounted to 76,000 bags of coffee, and mentioned further that plans to destroy $5,000,000 \mathrm{bag}$ before the end of the crop year, would be carried out. The statistical outlook for coffee was said to be favourable.

RUBBER: Speculative prices for raw rubber ir the early part of March touched a new high not equalled since July, 1930. It apparently was believed widely that final agreement upon restriction measures would be reached soon, but later intimations were less favourable, with both iritish and Dutch interests silent about the progress of regotiations. The prospect of labour trouble in the motor industry of the United States retarded buying of spot rubber until a settlement was reached on the 24 th. United States consumption for Pebruary at 40,600 tons was slightly higher than for January and over $87 \mathrm{p} . \mathrm{c}$. above that for Ficbruary of 1933. Stocks in the east totalled 92,210 tons at the end of that month as compared with 88,215 tons at the end of January.

LIVESTOCK: Eastem cattle markets were scmewhat depressed by liberal runs of ordinary grades in the early part of líarch, while westerr. centres held comparatively firm. As receipts moderated, slight upward price revisions were noted at several points. Hogs and calves moved downward. Although supplies of the former were reported light, prices declined, influenced in part it was stated by reports of easier United Kingdom bacon prices. Lambs advanced at first but increased runs carried prices to lower levels at the close $o f$ the month.

EGGS: General declines were common in egg markets throughout Canada in
March. Milder weather with a consequent gain in production caused an increased movement to larger centres. As a result of heavy offerirgs, dealers were hesitant about taking supplies, and prices dropped sharply in the early part of the month. Latterly owing to better Easter demand prices maintained a fairly steady level. Cold storage holdings, as reported by the agricultural iranch of the Dominion Bureau of Statistics, were 14,701 dozen on March lst, a decrease of about $87 \mathrm{p} . \mathrm{c}$. from stocks on the lst of the previous mor.th.

BUmeER: Butter prices held comparatively firm throughout the month. Consumptive demand was reported good, and owing to shortage of domestic supplies at some centres, small amounts of imported butter were released. Stocks of creamery butter in cold storage were reported by the Agricultural Branch of the Dominion Bureau of Statistics at $7, C 56,695$ pounds on March lst. This was about $27 \mathrm{p} . \mathrm{c}$. Iess thar. holdings on the same date last year, and approximately $51 \mathrm{p} . \mathrm{c}$. lower than on the first of the previous month.

COTTON: Cotton advanced slightly pending developments of the United . States regulations regarding the new crop. Latterly, delay and uncertainty regarding the se measures together with quieter conditions in the textilu industry were quoted as influences contributing to a decline in prices. World visible supplies of American cotton dropped from $7,879,000$ bales on March 2nd to $7,302,000$ balcs on the 30 th. Forwardings to mills of the world for the four wecksended March 30 th aggrogated $1,142,000$ bales as against $1,134,000$ bales for the preceding four week period.

SILK: Quotations for silk moved lower following the easier tone displaycd by Jawanesc markets. Shipments to the United States fell from 40,942 bales for January to 39,021 bales for Fcbruary while Japanesc port stocks declined from 142,300 bales to 137,300 bales during the latter month.

WOOL: In line with the easicr tone prevailing in primary markots, prices of Canadian wool declined slightly. Domestic buying was limited to immediate ruquirements and exports dropped from 378,343 pounds in January to 184,630 pounds in the following month.

LUNBER: About the only change in the easterm lumber situation was the more prompt forwarding of shipments, owing to a greater amount of available shipping space. On the west coast, improved demand from the prairies and castern Canada was mentioned although rail shipments still continued low. Output of lumber during March was reported but little in excess of demand and the threatened scarcity of raw mill materials, owing to labour trouble in logging camps was relicved to a great extent by imported stocks. Exports of boards and planks rose from $93,983 \mathrm{lf} \mathrm{bd}$. ft. in Jonuary to 104,952 in February.

COPPER: Copper delivered Connecticut Valley basis was quoted at a nominal price of $8 \phi$ per pound throughout the month. Buying in the Unitcd States was reported low while for the greater part consumers were said to be satisfied to withdraw metal from stocks on hand rather than enter the markct pending the completion of code negotiations. Statistics revealed the fact that world visible supplies dropped from 631,500 tons (revised figure) in January, to 612,000 tons at the close of Fobruary, with holdings in North and South America showing a decrease of 16,000 tons.

The general index of retail prices, rents, and costs of services roso from 79.1 in February to 80.2 for March.

An index for retail prices alone advanced from 73.8 to 75.5 . When foods were removed from this index it showed only a slight advance, from 77.8 to 77.9.

For 46 food products the index rose from 69.4 to 72.9 , due mainly to higher prices for moats, oggs, butter and potatoos. Advances in fresh pork from $19.1 \phi$ to $21.2 \phi$, in shoulder beef from $11.3 \phi$ to $11.9 \phi$, in bacon from $24.8 \phi$ to $28.7 \phi$, and in cooked ham from $41.6 \phi$ to $45.8 \phi$ per pound were indicative of tho upward movement in meats. Fresh eggs were up from $35.3 \phi$ to $40.5 \phi$ per dozen, while grade " $B$ " and " $C$ " eggs averaged $34.6 \phi$ per dozen as compared with $28.4 \phi$ in February. Creamery butter rose from $29.7 \phi$ to $32.5 \phi$ per pound, while the dairy varlety averaged $25.7 \phi$ and $28.3 \phi$, respectively for Rebruary and March. Potatoos advancod from $23.5 \phi$ to 26.4 por pock.

Slightly higher prices in the sub-indexes for coke and wood caused the fuel and lighting index to increase from 87.2 to 87.3 . The sub-index for coal was unchanged at 88.7 .

The clothing index ra 69.9 as against 70.0 in February slight increases in men's clothing and some lines of ladies' apparel being more than offset by declines in ladfos! undorwoar, shoos, etc.

The index for miscellaneous items moved up from 93.8 to 93.9 , owing to higher prices for furniture and household effects. Advances in practically every item of household lincn causod this sub-indox to incroase from 75.9 in Fobruary to 79.2 for March. The corrosponding indox for furnituro was up from 82.9 to 83.6 .

Chen

Changes in wholesele price index numbers for February were rather larger than usual. Declines were outnumbered by advances which ranged commonly between one and tro p.c. Increases for building materials, textiles, and metals were fairly general, while indexes for food products in most cases averaged lower.

It was just one year ago that prices reached extreme low levels in Canada and the United States. Since then reccvery has been marked in these countries as well as abroad. In Europe the improvement has been generally more gradual and of a steadier character. Percentage changes in indexes of wholesale prices for specified countries as between February, 1933, and February, 1934, have been as follows: United States +23.7, Canada 43.4 , Netherlands +8.1 , United Kingdom +6.5 , Germany +5.5 , France -1.0 , and Belgium -5.7 .
